Portland, Oregon
April 11, 1949

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st. Asst. State Highway Engineer
W. W. Stiffler, 2nd. Asst. State Highway Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
M. H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Chairman Banfield publicly introduced Mr. Chas. H. Reynolds, La Grande, appointed State Highway Commissioner by Governor Douglas McKay, effective April 1, 1949, to fill the vacancy occurring by reason of the resignation of Mr. A. W. Schaupp, Klamath Falls.

At 9:00 a.m. bids, as follows, for highway construction were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room.

The Commission approved the minutes of its meetings held on January 24 and 25, and on February 28 and March 1, 1949.

Messrs. W. H. Lynch, Division Engineer, Public Roads Administration; and W. C. McDonald, Highway Engineer, U. S. Forest Service, were present and discussed with the Commission matters pertaining to the Oregon Forest Highway Program, particularly recommendations for the allocation of funds to projects, involving funds for the fiscal years 1946, 1947 and 1950. As the result of discussion, the Commission unanimously approved and signed the following letter directed to the Chief, Forest Service, and Commissioner of Public Roads, Washington D. C., with the express understanding, however, that the allocation mentioned therein for the improvement of the Pacific Highway- (Project and Account No. 15-A1, B2(0319-0)- is tentative only and may be revised after the Commission has personally inspected the project on its trip scheduled for the early part of May.

Chief, Forest Service,
Commissioner of Public Roads,
Washington, D. C.

Dear Sirs:

In accordance with the Rules and Regulations for Administering Forest Highways, a joint conference was held on February 28, 1949 at the Portland office of the Oregon State Highway Commission, between the Oregon State Highway Commission, representatives of the U. S. Forest Service, and the Public Roads Administration, for consideration of and agreement upon projects to be recommended for approval for construction out of funds apportioned for the Fiscal Year 1950 and for recommendations for revisions of allocations of funds to previously programmed projects.

FUNDS

Apportionment Fiscal Year 1950 Forest Highway Funds		$2,756,755.00
Deductions		
10% Reserved for Public Roads Administration & Forest Service Administration	$275,676.00	
Reserve for Const. Contingent	100,079.00	375,755.00
Balance available for project allocation		$2,381,000.00

Because of changed conditions and greatly increased costs subsequent to programming of Fiscal Years' 1946-47 funds, it is not now possible to finance all previously programmed projects and the following revisions and cancellations are recommended in order to finance those projects on which construction is most urgent.

(Cont.)

April 11, 1949

Project and Account No.	Project Name, Type of Work and Length	Recommended Revised Allocation		Allocation now Programmed	Surplus (+) or Deficit (-)	Remarks
6-A2,B2,E9,F2 (7068-00)	Alsea Highway Unit 1, Grading 10.46 Miles Unit 2, Surf.& Bit. Surf. 10.46 Miles	$400,000		$400,000		
21-E5,F5,G3,H4 I4,J5,K5,L2 (7038-01)	Willamette Highway Grading, Surf. & Bit. Surf. 21 Miles	950,000		630,000	- $320,000	
21-M,O	Willamette Highway Surf. & Bit. Surf. 4.6 Miles Rock Production 13.4 Miles	1,040.59 None	(FH) (Coop)	105,000 25,000	+ 103,959.41 + 25,000	Cancelled Funds returned to State

	Total surplus forest highway funds available for reallocation				+ 229,773.92	
	F.Y. 1950 funds available for allocation				2,381,000.00	
	Total all funds available for allocation				2,610,773.92	
	Less deficits on projects let to contract		378,994.85			
	Less state construction contingent		77,779.07		456,773.92	
	Total available to finance new projects as recommended in the following tabulation				2,154,000.00	

(cont.)

Project and Account No.	Route Name and Type of Work	Length Miles	Recommended Allocation
6-B3 (0317-00)	Alsea Highway Bridge	0.022	$ 50,000
10-D3,E1 (0318-00)	Oregon Coast Hwy. Grading, Surfacing & Bit. Surfacing	2.3	475,000
15-A1,B2 (0319-00)	Pacific Highway Grading, Surfacing &Bit. Surfacing	6.19	884,000 (FH) 816,000 (Coop)
24-A5,B7,C5 (0320-00)	North Santiam Hwy. Surfacing	12.9	250,000
46-C2 (0321-00)	Cascade Lakes Hwy. Surfacing	8.6	75,000
50-A3,B2 (0322-00)	Timberline Hwy. Surf. & Bit. Surfacing	5.6	295,000
	Location Survey		50,000
	Maintenance		75,000
	Total Forest Highway Funds		2,154,000
	Total Cooperative Funds		816,000

The following are reasons for revisions and cancellations of previously programmed projects.

Project 6-A2,B2,E9,F2, Alsea Highway, remains unchanged except that grading of Sections B and F and probable slides on Sections A and E, are to be let under one contract and the surfacing and bituminous surfacing under a second contract. The chief reason for delaying the surfacing is to permit determination of the source of materials.

Projects 21-M,O and 21-N, Willamette Highway, are recommended for cancellation and state funds to be returned as the work proposed under the projects has been accomplished by the State.

Projects 25-A7, 34-B4,C, Mt. Hood and Pendleton-John Day Highways, respectively, are recommended for cancellation because of their low priority in urgency of construction.

Projects 43-A2 and 46-A4,B2, Diamond Lake and Cascade Lakes Highways, respectively, were programmed as urgently needed at the time to permit log hauling.

(Cont.)

The construction is not now needed for this purpose and the projects are in satisfactory condition for their otherwise normal travel, and their cancellation is recommended.

Work contemplated under Project 21-E5,F5,G3,H4,I4,J5,K5,L2, Willamette Highway, has been needed for some time and the project has deteriorated considerably by reason of the past severe winter. The project cannot practicably be shortened or otherwise reduced and the indicated increase in allocation is recommended.

Work contemplated under Project 30-A3,E1, Klamath Falls-Lakeview Highway, is unchanged but increased costs of construction necessitate the increase in allocation as recommended.

The Pendleton-John Day project originally programmed as 33-A2,B3 D4 for 14 miles of grading, surfacing and bituminous surfacing. Increased costs and further study dictate that the project be shortened to within Sections A and B and that funds be increased to $350,000 as now recommended.

Due to increased costs it has been necessary to eliminate the surfacing and bituminous surfacing from Project 35-B3,C2. It is now planned to place a cushion course of selected material to serve until the project can be surfaced.

Under Project 38-E, Flora-Enterprise Highway, funds were provided for completing the initial grading of the route. The State has now accomplished this work and have requested that the funds be reallocated to the reconstruction grading and surfacing of approximately four miles at the south end of the route which is in need of improvement. This project, 38-A2, will widen and straighten a portion of the section graded and surfaced by the Public Roads Administration between 1919 and 1922.

Under Project 46-C2,D1, Cascade Lakes Highway, $50,000 was programmed to continue grading westerly. Since its construction in 1940, the graded Section C has materially deteriorated and is in need of reconditioning and surfacing to preserve the improvement and to enable its use. It is recommended that the original project 46-C2,D1 be cancelled, the funds increased to $75,000 and combined with a similar amount recommended from fiscal year 1950 funds to finance the surfacing, under Project 46-C2, of the 8.6 miles now graded.

Project 47-A1,B1,D, North Umpqua Highway, originally programmed in the amount of $567,000 to finance the grading of 5.8 miles at the west end of the route, has now been let to contract involving only the grading of 2.21 miles and advance clearing of 3.59 miles. The estimated cost of this contract is $295,000, leaving a surplus of $272,000 which with $103,000 from cancelled projects, is recommended for transfer to project 47-A2,B2,D1, which project will complete the grading of the 5.8 miles at an estimated cost of $375,000.

(Cont.)

Project 47-B2, North Umpqua Highway, as previously programmed for 1947 fiscal year funds in amount of $433,000 will now become project 47-B3, and the estimated cost is now $500,000. It is recommended that the change in designation be approved and that an additional $67,000 be allocated from cancelled projects to finance the project as indicated in the above programmed revisions.

On Project 50-A1,B, Timberline Highway, let to contract in 1941, and the contract cancelled in 1944 because of the war, there remains $83,814.51 of State cooperative funds and $4,814.51 of forest highway funds. It is recommended that the remaining State funds be reallocated to Project 50-A2,B1, now underway, and a like amount of forest highway funds released from that project. The remaining forest highway funds will revert to the State contingent when the project is closed out.

Description and Comment on New Projects:

ALSEA HIGHWAY
Bridge, Project 6-B3, 0.022 miles, $50,000

This project is for construction of a concrete girder structure over Scott Creek within the limits of Project 6-A2,B2,E9,F2. The present bridge is not on the new alignment and otherwise is in need of replacement.

OREGON COAST HIGHWAY
Grading, Surfacing and Bituminous Surfacing, Project 10-D3,E1, 2.3 miles, $475,000.

This project was originally approved for grading and bituminous surfacing, as 10-D1,E, on March 28, 1945, but due to war conditions was reduced to clearing only and construction of three concrete box culverts. Under Project 10-D2 the Hubbard Creek Bridge was constructed but cannot be utilized until the section has been graded and surfaced. The $475,000 is recommended for approval to finance the grading, surfacing and bituminous surfacing which will enable utilization of present construction and eliminate a very bad section of existing road.

PACIFIC HIGHWAY
Grading, Surfacing and Bituminous Surfacing, Project 15-A1,B2, 6.19 miles, $884,000 (FH) $816,000 (Coop).

The State has improved this route from the south to the south end of the forest highway route and of Project 15-A, constructed by the Public Roads Administration in 1919. Project 15-A1,B2 contemplates the improvement from that point northerly 6.19 miles. This will eliminate the major portion of the low standard road on the forest highway route leaving only 3.6 miles

(Cont.)

of substandard construction to be improved. The project is estimated to cost $1,700,000 and the State has agreed to finance any additional cost over the $884,000 allocation of forest highway money herein recommended. Survey and plans have been worked up by the State.

NORTH SANTIAM HIGHWAY
Surfacing, Project 24-A5,B7,C5, 12.9 miles, $250,000.

The grading of this section is now being completed under Projects 24-A2,A3,A4,B4,B3, Unit 1, and B3, Unit 2, C4, Unit 1, and the bridges under B6. The reconstruction was necessitated by the construction of the Detroit Dam, which structure also dictates the abandonment of the Mill City branch of the Southern Pacific Railway. Abandonment of the railroad cannot be effected until a facility, satisfactory to the Inter-state Commerce Commission, is completed for substitution for the railroad. The recommended project contemplates a partial surfacing and bituminous treatment to fulfill this requirement until the balance of the reconstruction, approximately 3.9 miles, can be completed. On completion of the grading of this last section it is planned to surface the 3.9 miles, add additional depth of surfacing over the 12.9 miles and construct a bituminous mat over the entire section. Sufficient funds are not now available and it is not considered advisable to place the ultimate surfacing and bituminous mat until it can be accomplished over the entire reconstructed section. In addition to the 12.9 miles of highway the project also includes the surfacing and bituminous treatment of a temporary connection at the east end to the present highway at Detroit and a connection to the Corps of Engineers Camp opposite the east end of Project 24-B3, Unit 1.

CASCADE LAKES HIGHWAY
Surfacing, Project 46-C2, 8.6 miles, $75,000.

The $75,000 recommended herein is to be combined with a similar amount from previously programmed funds to accomplish the surfacing of 8.6 miles previously graded and now in serious need of improvement as mentioned above.

TIMBERLINE HIGHWAY
Surfacing and Bituminous Surfacing, Project 50-A3,B2, 5.6 miles, $295,000.

Completion of the grading of this route is now being accomplished under Project 50-A2,B1 and the recommended project contemplates the surfacing and bituminous surfacing of the entire route. Immediate surfacing and bituminous surfacing is needed to enable economical snow removal and

to provide a travel surface which will satisfactorily serve the heavy recreational traffic carried by this route. This project will complete all construction on the route as now contemplated by this agency.

Very truly yours,

/s/ W. H. Lynch

Commissioner

/s/ Chas. H. Reynolds
Commissioner

April 11, 1949

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

(1) Joint statement of policy with the Bureau of Land Management, U. S. Department of Interior, concerning the preservation of Government owned Juniper Waysides along the Central Oregon highway between Bend and Horse Ridge; along the McKenzie Highway between Sisters and Redmond; and along the Ochoco Highway between Redmond and Powell Butte, involving 30 miles of waysides. He presented a statement, as follows, prepared by the Regional Administrator of the Bureau of Land Management, and recommended approval of the same as the Commission's policy with respect to such matters:

JOINT STATEMENT OF POLICY

Scenic Waysides

It is the policy of the Highway Commission, State of Oregon, and of Region I, Bureau of Land Management, United States Department of the Interior, to preserve for the benefit of the public the scenic values inherent in timber, woodland or other resources adjacent to or in the proximity of public highways. In order that the policies of the two agencies may be correlated for the attainment of this public purpose with respect to such specific areas as may be agreed upon, it will be the policy of the Regional Administrator with respect to such areas under his management to:

1. Disapprove applications for timber unless it appears that the timber should be removed for reasons in the public interest. Before any such removal is authorized it will be the policy of the Regional Administrator to consult with the Superintendent of State Parks.

2. Exert every reasonable effort to preserve the woodland and timber stands from depredation and from damage or destruction by fire, disease and insect pests.

3. Withhold approval of applications for advertising displays.

4. Take, in cooperation with the Highway Commission, State of Oregon, any other action deemed to be in the public interest for the preservation of scenic values on lands under his management.

It will be the policy of the Highway Commission, State of Oregon, with respect to such areas to:

1. Exert every reasonable effort and impose every reasonable restriction to the end that such areas may be kept free from commercial advertising and from waste or offensive material of any kind.

(Cont.)

JOINT STATEMENT OF POLICY (Cont.)

Scenic Waysides (Cont.)

2. Control, to the full extent of its authority, the location of pole lines to preserve scenic values.

3. Aid the Regional Administrator so far as feasible in the policing of such areas and to report promptly to him any encroachment on such areas which may tend to defeat the policy stated above.

3. Take, in cooperation with the Regional Administrator, Region I, Bureau of Land Management, United States Department of the Interior, additional action deemed to be in the public interest for the preservation of scenic waysides.

The specific scenic wayside areas to which this joint statement of policy will be applicable will be described in supplements to be agreed upon from time to time by the cooperating agencies. Such supplements will specify the location, note the width of each scenic wayside, the resource to be protected and such additional matters as may be appropriate.

This joint statement of policy and the supplements thereto which relate to specific scenic waysides shall continue to be effective until cancelled by either party upon thirty days notice.

SUPPLEMENT TO JOINT STATEMENT OF POLICY
dated April 11, 1949, by the Oregon
State Highway Commission and the Regional
Administrator, Bureau of Land Management
United States Department of the Interior.

The Oregon State Highway Commission and the Regional Administrator will apply the policy set forth in the statement of policy dated April 11, 1949 to scenic juniper waysides in Central Oregon which extend 1320 feet each side of the specified portions of the following described highways:

1. Oregon State Highway between Bend and Horse Ridge.

2. McKenzie Highway between Sisters and Redmond.

3. Ochoco Highway between Redmond and Prineville.

April 11, 1949

The Commission approved the recommendation unanimously. (The Commission signed four copies of the Statement on the following day.)

(2) The Commission by unanimous vote confirmed the telephonic approval given the State Parks Superintendent subsequent to its last meeting, to purchase for the sum of $7,500 a house located adjacent to the State Park along the Deschutes River just north of Bend. The Parks Superintendent explained for the record, that his plans for this park provide for construction of a house for the caretaker, but that the one under discussion, which is located just across the road from the park, will serve admirably, and the purchase price is very reasonable. The appraised value of the property is in excess of $12,000.

(3) Parks Roadway Betterment Projects: The Parks Superintendent requested authority to proceed with the following projects located within State Park areas, provision for which, he said, is contained in the 1949 budget:

DIVISION I		
Dabney	$1,100	Oil parking area
DIVISION II		
Silver Falls CCC Camp	520	Oil sidewalks and dust palliative
Yaquina	500	Oil parking areas
DIVISION III		
Honeyman	500	Oil road to sand dunes
DIVISION IV		
Collier	400	Oil parking area
	$3,020	

The Commission approved the request unanimously and ordered the work done by State oiling crews.

(4) Appointment of a Park Supervisor to take care of 21 parks and waysides in the Bend District: The Parks Superintendent explained the need for the services of a Supervisor in this area, and requested authority to appoint someone to fill the place. The Commission deferred action on the matter until its next meeting and instructed the Parks Superintendent to submit in the mean time a detailed report giving an overall, clear-cut picture of the duties of the Park Supervisor and the Park Engineer.

(5) Status report on the plans for the proposed building at Champoeg State Park: The Parks Superintendent advised that the members of the Portland Chapter of the American Institute of Architects, who are designing this building, and Mr. Frank G. Hutchinson, Highway Department artist and designer, have jointly approved the general plans for this structure, and certain details, so the construction of this building in his estimation could proceed in the not too distant future. The Engineer confirmed this statement and suggested, in order to expedite completion of the details, that he be authorized to take over this feature of the work. It was his thought that the architects should be thanked for their services. The Commission approved the completion of the details by the Highway Department architect, and instructed the Secretary to thank the Portland Architects for their services when a letter has been received from them stating that they consider that they have completed their assignment.

(6) Proposed extension of an agreement with Mr. Ralph S. Nohlgren, covering the concession in Silver Falls State Park: The Parks Superintendent advised that he is very well satisfied with the arrangement heretofore in effect with Mr. Nohlgren, and recommended that the present working arrangement be extended for another year. The Chief Counsel concurred in the recommendation. The Commission unanimously approved such an extension of time to December 1, 1949.

(7) Proposed agreement with Mr. Wayne Simeral, Silverton, for the cutting of cord wood in Silver Falls State Park: The Parks Superintendent advised that he needs 50 cords of wood in connection with the operation of this park, and that Mr. Simeral has offered to furnish it from trees in the park designated by the Parks Department, for the sum of $5.00 per cord. He recommended acceptance of the offer. The Commission approved the recommendation unanimously. (An agreement covering the matter was signed on the following day.)

(8) Cutting of wayside timber along the Wilson River Highway and the Sunset Highway, particularly that damaged by the Tillamook burn in 1933: The Parks Superintendent reported receipt of an inquiry from a party who is interested in salvaging snags along these highways, and inquired whether or not he should give the party any encouragement. He recommended approval of an arrangement to get rid of the snags so as to improve the looks of the waysides. The Commission approved the recommendation unanimously and ordered that bids be received in Salem for the purchase of this material, in the same manner as bids are taken for the sale of used equipment, buildings, etc.

(9) State Parks Surveys: The Parks Superintendent requested authority to proceed with surveys to establish boundaries of state parks, for which he said the sum of $20,000 has been provided in the tentative budget for 1949. The Commission approved the request unanimously, with the understanding that the work is to be done by the Highway Department's engineering crews under the supervision of the State Highway Engineer. The Parks Superintendent was instructed to work up the details with the Engineer.

Commissioner Chandler brought up for discussion the matter of constructing rest rooms at Depoe Bay for the convenience of the general public. He advised that there are no such facilities available now, and the people of this town have expressed a willingness to keep in a clean and sanitary condition any facilities that the state may provide, and will also furnish electricity to light them. Chairman Banfield gave as his feeling that if there were an absolute guarantee by the local people that the facilities would be kept absolutely clean and sanitary, then the state might furnish them. However, he said, in past experience they have not been maintained in good condition, and the state might be better off without them. A decision in the matter was deferred until the following day, when a delegation from Depoe Bay was scheduled to appear before the Commission regarding the same subject. (See ahead for additional item on this subject.)

The Assistant Attorney, Mr. J. W. DeSouza, reported on the matter of acquiring wayside tracts between the Warm Springs Highway and the Deschutes River at the crossing of the highway over this river near Warm Springs Agency. He advised that three properties have been under consideration, one of which contains 0.8 of an acre and has been appraised at $350; the second one contains 1.2 acres and is appraised at $1,500; and the third contains 2.7 acres and has been appraised at $3,500. The appraisals, he said, were made by Mr. Roy Newell, Realtor, Bend, Oregon. The Parks Superintendent stated that he prefers the acquisition of the 2.7 acre tract, because, in his estimation, it is the best one of the three. He stated further that the owner does not wish to sell the property, so if the Commission wants it, it may be necessary to acquire it by condemnation. The Commission ordered further negotiations with the owner for this tract, and a report.

The Assistant Attorney also presented a list of options that he has negotiated for the acquisition of right of way that is needed for various highway purposes throughout the state. The Commission carefully considered each item on the list and, following discussion, unanimously authorized acquisition of the tracts at the prices contained in the options. The attached resolution relative thereto, marked Exhibit "A", which resolution by this reference is made a part hereof with like effect as though copied in full herein, was thereupon adopted by the Commission by unanimous vote.

FOOTNOTE:

The following footnote refers to item No. 14751 appearing in the above mentioned and attached resolution, marked Exhibit "A", and concerns acquisition of park property from D. O. and Edna Belle Scott, along the Gold Beach-Brookings Section of the Oregon Coast Highway (Ocean Waysides). This property was approved for purchase at a total cost of $12,500 on the condition that the owners be allowed two years' occupancy of the premises rather than perpetual use of the property, which they originally requested.

In the discussion of real property matters, the Commission also considered an option to purchase for $382.50 a stock pile site from Burdette and Sibyl F. Dodge, on the Table Rock Road-Dodge Bridge Section of the Sams Valley Secondary Highway in Jackson County. The option provides that the State shall, in addition to the cash payment, construct a cattle pass which is estimated to cost $3200. The question arose whether or not when right of way was acquired from the Dodges any commitment was made that would obligate the State to furnish the cattle pass. The Commission refused to approve construction of the cattle pass unless obligated to do so by the terms of the right of way settlement. The Assistant Attorney was instructed to investigate the facts and report his findings.

Also in the discussion of real property matters, the Commission ordered that hereafter the amounts of the options as disclosed in the list presented by the Right of Way Department, shall include the estimated cost of moving buildings, and other estimated expense, so that the amount shown for each item will indicate the total cost to the State so far as can be determined in advance.

The matter of renting State-owned properties in Sullivan Gulch was discussed. The Chief Counsel advised that the Commonwealth Company, which is handling properties for the Commission in this area, has suggested that the Commission allow the rental of properties situate along the sections that are not scheduled for earliest construction, on a longer than six months basis, it being the Company's thought that the rentals accrued would more than offset any drop in the market price of the properties when disposed of later on. He was instructed to report his recommendations in writing, giving his reasons for the same.

In this connection, the Commission also discussed the matter of paying taxes on the rented properties. It appears that the Multnomah County Assessor plans to assess such properties under a 1947 statute. The Chief Counsel gave as his opinion that the properties are not assessable because they are not being held for investment or income purposes, but merely for salvage, therefore should not be subject to taxes. He was instructed to consult with the county officials in an endeavor to secure relief from payment of the taxes.

The meeting recessed for luncheon at 12:00 noon, and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

Colonel O. E. Walsh, District Engineer, U. S. War Department, was present and discussed with the Commission the advisability of closing down the operations of a highway contractor on a two and three quarter mile section of the Willamette Highway near Dexter, Lane County, particularly Contract No. 3034, with Roy L. Houck, Jr., for construction of the Lost Creek-Lowell Section of this highway. Colonel Walsh explained that it is quite likely that Congress will approve the development of hydro-electric power on the Meridian Dam Project by construction of another dam near Dexter, and if so, another pool will be created which will innundate a section of the highway that is now being built by Mr. Houck. He pointed out that it is not known definitely at this time what Congress will do in the matter, but indications

are favorable and definite action should be taken before July 1st. The Federal Government, he said, will reimburse the State for losses sustained by reason of delay in the contract. The Commission referred the matter to the Engineer, and Chief Counsel, to analyze and report back as to what the Commission's contractual obligations are, and the estimated cost of complying with Colonel Walsh's suggestion. (This matter was again discussed by the Commission the following day, at which time the Commission decided unanimously not to hold up the contractor's work that is now in progress, unless the State is relieved from all liabilities.)

County Judge James H. Sturgis, Umatilla County, appeared before the Commission regarding a loan to Umatilla County of the sum of $150,000, under the provisions of H.B. 451, which has just been approved by the 1949 Legislature and signed by Governor McKay. He explained that the County needs this money to finance repairs to county roads which were severely damaged as the result of unusually bad weather conditions during the past winter. The Chief Counsel explained the details of the law, and advised that the Commission, if it so desires, could advance such sum to the County if the County will comply with the requirements that the State Highway Commission might promulgate, as well as the statutory requirements. Following discussion, the Commission assured Judge Sturgis that the loan would be approved when the requirements had been satisfied. The matter was thereupon referred to the Chief Counsel to arrange the details. (The matter was discussed further on the following day, at which time the Commission approved a resolution from the County Court requesting the loan and signed a letter directed to the Secretary of State certifying that the County is entitled to the sum requested and recommending that the advance be made. See ahead for additional paragraph on this subject.)

The Commission discussed the matter of approving the vacation of a portion of an unnamed street in First Addition to Jennings Lodge. The engineer advised that this street is 30 feet wide and parallels the right of way of the Portland Traction Company's Portland-Oregon City electric line. The State now owns the triangular area situate within the "Y" intersection of this road and the highway, he said, and it would be to the State's advantage, particularly as a matter of safety, were this street vacated. He recommended approval of the vacation proceedings. In the discussion of this matter, it was pointed out that Mr. Joe J. Burkhardt, Tigard, Oregon, who owns the area south of the State's property in this particular block, also desires the roadway vacated, and that the attitude of the Portland Traction Company is favorable, but it takes the position that it should obtain title to one-half the roadway, which is a matter in dispute. The Commission appeared favorably inclined to approve the vacation of this street, however deferred a definite decision with regard thereto until the differences with the Portland Traction Company have been ironed out satisfactorily. The matter was referred to the Chief Counsel to handle.

Mr. C. W. Enfield, Assistant Counsel, brought up for discussion a proposed settlement of the condemnation case of the State Highway Commission vs Raymond Eastwood, et al, concerning acquisition of right of way for the Tillamook-Pleasant Valley Section of the Oregon Coast Highway. He recalled that the Commission previously authorized the payment of $4,000 for the property, but the owners were unwilling to settle for such an amount, so condemna-

tion proceedings were started. However, the owners are now willing to accept the sum of $4,350 by stipulation, and the owners also have agreed to remove the buildings from the tract. He recommended approval of such settlement as being less than it would cost the State if the case went to trial. The Commission approved the recommendation unanimously.

The Chief Counsel brought to the Commission's attention a proposed settlement of its condemnation action against Louis Fleck, Tillamook County, for right of way needed in connection with the improvement of the Tillamook-Pleasant Valley Section of the Oregon Coast Highway. He advised that the Commission authorized an offer of $2000 for the property but the owner demanded $5000; however, as a result of further negotiations, he has finally agreed to settle for $2880. He recommended settlement on such basis. The Commission approved the recommendation unanimously.

The Assistant Counsel, Mr. J. W. DeSouza, brought up for discussion a request from Mrs. Louise Bissaillon for permission to use a portion of the highway right of way at the filling station on the Oswego Highway a short distance north of the Town of Oswego. It appeared from the discussion that the service station has been there for many years and is partially located on a widened section of the highway right of way, and that Mrs. Bissaillon wants the Highway Commission to grant her encroachment privileges so as to avoid the expense of moving her facilities. The Engineer advised that the encroachment is on a small section of right of way that is not absolutely essential for highway purposes, and that if the Commission decides to lease the area to Mrs. Bissaillon it should be on condition that she absolutely will not serve customers on the highway. On the other hand, it might be advisable to sell to Mrs. Bissaillon the small area on which her facilities encroach, also with the understanding that she could not serve the public from the highway side. The Commission deferred its decision in this matter pending further investigation and report by the Chief Counsel.

The Chief Counsel requested approval of the appointment of Messrs. C. W. Enfield and Samuel A. Hall as Assistant Counsels. The Commission confirmed such appointments and thereupon by unanimous vote adopted the attached resolution, marked Exhibit "B", relative thereto, which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Commission also unanimously approved the transfer of Mr. Forrest Cooper from the Engineering Department to the Legal Department as Supervisor of the entire Right of Way staff. The Chief Counsel explained that this appointment is being made to facilitate cooperation between the Engineering and Legal Departments, and to provide for greater efficiency. The Engineer expressed his hearty concurrence.

In this connection, the Engineer recommended the appointment of John W. Cattrall as Acting City and County Relations Engineer, which position was held by Mr. Cooper prior to his transfer to the Legal Department. The Commission approved the recommendation unanimously.

The Chief Counsel reported receiving a letter from Mr. George Winslow, Tillamook, Oregon, regarding the Commission's condemnation case against Mr. Herman B. Jacobs for acquisition of right of way for the Tillamook-Pleasant Valley Section of the Oregon Coast Highway. It appeared that Mr. Jacobs is in the dairy business, and that the new highway has severed his property, leaving part of it isolated, and that it is going to require a drainage structure across the highway which will cost about $3,000. It now develops that Mr. Jacobs is planning to sell the isolated part of his property, in view of which he has stated a willingness to accept the Commission's offer for his land on the condition that the State will pay him $3,000 cash for eliminating the drainage structure. The Commission deferred action in this matter pending further negotiations.

The Chief Counsel also brought up for discussion a proposed settlement in the case of Elkins vs the State, arising out of the improvement of the Pacific Highway West, in Polk County. He advised that Mr. Elkins had agreed to settle this long-standing claim for $7,250 and will sign a statement completely releasing the State from further liability. He recommended acceptance of the offer. The Commission approved the recommendation unanimously and so ordered.

The Chief Counsel brought up for discussion the order of the Public Utilities Commissioner, No. 21,830, concerning the application of the Gardiner Lumber Company and the Southern Pacific Company for authority to construct a railroad grade crossing on the Oregon Coast Highway near Gardiner, Douglas County. He advised that the order authorizing the construction of such grade crossing, in his estimation, is entirely wrong because it would create a serious traffic hazard for traffic on this important highway. He recommended that the Commission file a complaint in the Circuit Court to vacate the order of the Public Utilities Commissioner as being in the best public interest. The Commission approved the recommendation unanimously and instructed the Chief Counsel to proceed in conformity therewith.

The Chief Counsel reported the status of settlement with the Ericksen Brothers, St. Helens, for property needed to provide a uniform width right of way for the Columbia River Highway at this place. He advised that negotiations with the Ericksens have been difficult — that they want an unlimited time within which to complete removal of their building, notwithstanding the Court's having ordered otherwise. He suggested that the Commission pay into Court the amount determined by the Court, $26,865.30, for disbursement to the Ericksens when they have complied with the Court order. The Commission unanimously approved the suggestion and so ordered.

The Engineer reported on the extent of frost and flood damage suffered by the State Highway System during the past winter. He estimated the total cost to rehabilitate the damaged sections at $2,580,000, of which $2,391,000 represents the cost to repair frost damage, and $188,100 the cost to repair flood damage. He recommended that the work be financed by transferring $200,000 unappropriated in the special maintenance fund, $500,000 from the maintenance reserve fund, $280,000 from the Mt. Hood Highway improvement project, and an additional appropriation of $1,820,000. The Commission

unanimously approved the recommendation with respect to the following projects for which bids were received at this meeting:

Collins Creek and Parkdale Sections of the Hood River and and Mt. Hood Highways in Hood River County — $39,000.

Corvallis-Albany Section of the Corvallis-Eastside Secondary Highway in Linn County — $70,000.

Irrigation ditch bridge near Hermiston, in Umatilla County — $16,000.

Stanfield-Pendleton-Adams Reoiling Project on three state highways in Umatilla County — $202,500.

(This report was again discussed on the following day, at which time the Commission approved additional projects as follows, for which bids also were received at this meeting. The Engineer was authorized to advertise for bids for additional work that is urgent and must be gotten under way at the earliest possible time:

Powell Butte-Prineville Section of the Ochoco Highway in Crook County — $55,100,

Toledo-Pioneer Section of the Corvallis-Newport Highway in Lincoln County — $30,000,

Eddyville-Kline Section of the Corvallis-Newport Highway in Lincoln County — $65,000,

Salem-Dayton Secondary Highway throughout, in Polk and Yamhill Counties — $88,500,

Bellevue-Hopewell Secondary Highway throughout, in Yamhill County — $80,500,

Lafayette Secondary Highway throughout, in Yamhill County — $39,000.

Amity-Dayton Secondary Highway (north four miles) in Yamhill County — $24,000,

Sunnyside-Umapine Secondary Highway (several sections) in Umatilla County - $20,000.

See report in general files for details.)

The Commission discussed a written report from the Engineer concerning his studies of an alternate route for the Oregon Coast Highway between Tillamook and Nestucca Bay, via Sand Lake, as previously proposed by a delegation from Tillamook County. No action was taken by the Commission on this matter. (See

copy of the report in the general files for details.)

The Commission also discussed and ordered filed a report from the Engineer on the amounts of moneys that cities and counties have received from State Highway revenues since inception of such payments. (See Pages 163 to 167 of the Eighteenth Biennial Report for details.)

The Engineer reported on a complaint made by Morton Tomkins, Master of the Oregon State Grange, regarding traffic congestion on the Mt. Hood Highway near Government Camp. He said that the matter has been studied for the past six weeks in an attempt to find some method to relieve the situation, and the best solution that can be found is to prohibit parking on weekends (Fridays, Saturdays and Sundays) for a distance of approximately one quarter of a mile through the business district at Government Camp, and the maintenance of substantial overhead signs, supported by cable, calling attention to the restricted zone. This matter was discussed at considerable length, but action thereon was deferred pending further study and report by the Engineer and Chief Counsel.

The Commission discussed with the Engineer the bids received at the morning session for highway construction, and at 3 p.m. Chairman Banfield publicly announced the Commission's decisions with respect to each project as follows, the Commission's action being by unanimous vote:

"Paint structural steel in Youngs Bay and Lewis and Clarke River Bridges on the Oregon Coast Highway near Astoria, Clatsop County. Tri State Painting Company, Portland, submitted the low bid for this work at $5,900. Antonsen Painting Co., Tacoma, submitted the next low bid at $7,000. There were six higher bidders. The Commission has awarded this contract to the low bidder, Tri State Painting Company, Portland, at its bid price.

"Repair and replace pier fenders at McCullough Bridge on Oregon Coast Highway, and at Eastside Bridge and Enegren Ferry on Coos River Secondary Highway in Coos County. Hillstrom Shipbuilding Company, Coos Bay, submitted the only bid for this job, in the amount of $11,192.56. The Commission has awarded the contract to Hilstrom Company at its bid price.

"Grading, surfacing and oiling, and furnishing crushed rock in stock piles on the Collins Creek and Parkdale Sections of the Hood River and Mt. Hood Highways, in Hood River County. The low bid for this work was submitted by A. H. Saxton & Sons, Corvallis, at $66,771. The next low and only other bid was submitted by Lofts & Son and Allen E. Sackett, Hood River, for $74,703. The Commission has awarded this contract to A. H. Saxton & Sons, the low bidder, at their bid price.

"Mosier Rock Production Project on three state highways in Hood River and Wasco Counties. The only bid for this job was submitted by Arthur Gentemann, Portland, at $53,820. The Commission has accepted the bid and has awarded the contract to Mr. Gentemann at his bid price.

"Grading, surfacing and oiling, and furnishing crushed rock stock piles on the Henley-Lost River and Malin Sections of the Klamath Falls-Malin Highway in Klamath County. J. N. & M. J. Conley, Portland, submitted the low bid of $233,443. Inter City Sand & Gravel Company, Eugene, submitted the next low bid of $258,038.50. There was one higher bid. The Commission has awarded this contract to the low bidder, J. N. & M. J. Conley at their bid price.

"Rainrock-Alderwood Park rock production project on the Siuslaw and Alsea-Deadwood Highways in Lane County. Homer G. Johnson, Portland, submitted the only bid for this work at $88,835. The Commission has accepted the bid and has awarded the contract to Mr. Johnson at his bid price.

"Construction of buildings at Deadwood Maintenance Station on the Siuslaw Highway, Lane County. Gilbert Roberts, Hood River, submitted the low bid, $24,087, based on Alternate "A", Frame Construction. He submitted no bid based on Alternate "B", Block Construction. R. H. Jones, Hillsboro, was the second low bidder at $24,348 based on Alternate "A", Frame Construction and $25,027 based on Alternate "B", Block Construction. There were two higher bidders. The Commission has awarded the contract to the low bidder, Gilbert Roberts, at their bid price for frame construction.

"Painting structural steel in the Harrisburg Bridge over the Willamette River on the Pacific Highway; the Willamette River Bridge at Springfield on the McKenzie Highway; the Cresswell Bridge over the Coast Fork of the Willamette River on the Springfield-Cresswell Highway; and the Eastside Bridge over the Willamette River on the Corvallis-Eastside Highway at Corvallis. Low bidder for this work was O. & S. Painters, Portland, at $20,484. Antonsen Painting Company, Tacoma, submitted the next low bid of $25,000. There were eight higher bids. The Commission has awarded the contract to the low bidder, O. & S. Painters, at their bid price.

"Painting structural steel in the arch span of Yaquina Bay Bridge on the Oregon Coast Highway at Newport, Lincoln County. Hall & Wols, Portland, submitted the low bid at $17,950. The next low bid was submitted by Pacific Bridge Painting Company, San Francisco, at $29,188. There were seven higher bids. The Commission has awarded the contract to the low bidders, Hall & Wols, at their bid price.

"Surfacing and oiling on the Corvallis-Albany Section of the Corvallis-Eastside Secondary Highway in Linn County. The Commission received five bids for this work, the low one being that of Warren Northwest, Inc., Portland, at $62,025.75 based on the use of asphalt. They submitted no bid based on the use of tar. The next low bidder was the Acme Construction Company, Eugene, at $65,053.50 based on the use of asphalt. They, too, submitted no bid based on the use of tar. There were three higher bids. The Commission has awarded the contract to the low bidder, Warren Northwest, Inc., at its bid price.

"Installation of traffic signals on the Pacific Highway East at Eighth and Madison Streets in Albany, Linn County. The Commission received one bid for this project, it being that of W. R. Grasle Company, Portland, at $5,150. The bid has been rejected.

"Landscaping work on the Front Avenue Section (Alder Street-Sheridan Street) of the Pacific Highway West in Portland, Multnomah County. Western Golf Course Supply Company, Portland, submitted the low bid for this work at $36,213.40 based on the use of galvanized iron pipe. They submitted no bid based on the use of copper pipe. The next low bid was submitted by C. S. Whitcomb Company, Portland, at $44,434 based on the use of galvanized iron pipe, and $52,930.02 based on the use of copper pipe. There was one higher bid. The contract has been awarded to the low bidder, Western Golf Course Supply Company, at its bid based on the use of galvanized iron pipe.

"Construct reinforced concrete slab span bridge over irrigation ditch near Hermiston, Umatilla County. The low bid for this work was submitted by Archie R. Averill, Portland, at $10,830. VaDare Construction Company, Portland, submitted the next low bid at $13,755. There were three higher bids. The Commission has awarded this contract to the low bidder, Archie R. Averill, at his bid price.

"Stanfield-Pendleton-Adams Recoiling Project on three state highways in Umatilla County. Newport Construction Company and Russell Olson, Portland, submitted the low bid for this work at $182,619. The next low bid was that of J. C. Compton Company, McMinnville, at $194,797. The third and only other bid was submitted by Babler Bros., Portland, at $202,469. The Commission has awarded the contract to the low bidder, Newport Construction Company and Russell Olson, at their bid price.

"Grading and paving on the Amity Section of the Pacific Highway West, in Yamhill County. O. C. Yocom Company, McMinnville, submitted the low bid for this work at $31,841. The only other bid was submitted by Warren Northwest Inc., Portland, at $36,788.50. The Commission has awarded this contract to the low bidder, O. C. Yocom Company, at its bid price."

The Engineer reported on the progress being made by Contractors on the Upper Columbia River Highway and on the Warm Springs Highway Projects. He was instructed by the Commission to "push" the contractors to complete their work at the earliest possible time. (See Engineer's written report in general files for details.)

The Engineer reported on the necessity to revise the alignment of the Delmar-Coaledo Section of the Oregon Coast Highway in Coos County. He advised that in the construction now underway, a large fill had been planned through a swampy area along the railroad track, and when the fill was started it became apparent that the ground would not support the fill without displacement of the railroad embankment. It is necessary therefore to move the location of the Highway further into the hill so that the fill on the swampy area will be eliminated. He estimated the extra cost of the work at $62,000 and requested authority to increase the project authorization in such amount. The Commission unanimously approved the Engineer's request.

The Engineer reported the results of bids received in Salem on March 7. 1949, for the sale of a residence building south of Coos Bay on the Oregon Coast Highway in Coos County, as follows:

1.	A. H. Miller, Coos Bay	$ 432.00
2.	Walter W. Tymich, Coos Bay	237.50
3.	W. L. Lorsing, Coos Bay	79.00

He pointed out that the highest bid for the property is $432, whereas the estimated value of the building is $1250. He recommended that all bids be rejected and that authority be granted to negotiate the private sale of the building. The Chief Counsel concurred in the recommendation. The Commission unanimously approved it.

The Engineer also reported the results of bids received in Salem on April 5th for sale of used equipment and scrap materials stored at Highway Department equipment plants at Klamath Falls, Coquille, LaGrande and Salem. He presented a tabulation of the high bids received therefor, and recommended that awards be made to the high bidder in each instance with the exception of a few items, noted thereon, concerning which he recommended rejection of all offers.

(The tabulation of bids referred to in the above paragraph is filed in the office of the State Highway Commission, in Salem, under the heading "Miscellaneous Proposals," being No. 373 under such heading, and said tabulation by this reference is made a part of this minute entry to the same extent as if copied in full herein.)

The Engineer pointed out that tie bids were received for several of the items and advised that the successful bidder for these was determined by the flip of a coin by the Secretary before several witnesses. The Commission approved the recommendations unanimously.

The Commission discussed a report from the Engineer on the weighmaster's operations for the calendar year 1948, as they pertain to transportation of logs, poles and piling, and a report on activities concerning transportation of commodities other than logs, poles and piling. The Engineer advised that in both cases, violations had shown a slight increase. The Commission ordered that where consistent violators are in evidence, these operators be brought to the attention of the Commission for action in conformity with past practice.

A progress report on the status of the plans for the proposed Highway Department Office Building in Salem was presented by the Engineer. He exhibited plans as submitted by the architects and advised that some changes in the location of columns better to fit structural needs, and in the position of the stairways and elevator shafts, have been made as previously suggested. After careful study of the plans the Commission approved them as to the general overall floor plan, represented by the architects' "Scheme VI," accompanying their letter of April 1, 1949, subject to a change in the location of the outside elevator, but not as to the details of the interior development

of the building. The Engineer was authorized to instruct the architects to proceed with the plans in conformity therewith. In this connection the Engineer advised receipt of a request from Governor McKay that the plans be submitted to the Capitol Building Commission for its approval. The Commission indicated its approval of this request, but not to the extent that it would alter arrangements already perfected.

The Commission considered a request from Charles Shields of Gold Beach for an extension of the present paving contract on the Oregon Coast Highway in Gold Beach from Second to Fourth Street on the west side only. The Commission denied the request, it being the feeling of the Commission that it would be unwise to improve only one side of the street and let the opposite side remain in an uncompleted condition.

In this connection, Commissioner Chandler reported a complaint from Rogue Motors, Gold Beach, that they are losing customers because of the curbs that the State has constructed in front of their establishment preventing free access to their place of business. The Engineer was instructed to investigate the matter.

Chairman Banfield inquired whether or not the service station located at Fort Hill Bridge on the Salmon River Highway in Polk County has the right of entry to the highway that is presently being used. It was his thought that the right of way negotiations did not provide this privilege. The Engineer and Chief Counsel were instructed to investigate and report.

A letter was presented from County Judge Grant Murphy, Marion County, requesting a loan of $150,000 under the provisions of H.B. 451, passed by the 1949 Legislature, to finance repairs to County roads that were damaged by severe weather conditions during the past winter. The Commission approved the loan on condition that the County Court will make application for the same in approved form.

The Commission considered a request from John W. Cunningham and Associates, Consulting Engineers for the Newberg City Water Development, for a reconnaissance survey to determine the site of a possible future bridge over the Willamette River at Newberg. The Engineer advised that it would be necessary to construct a new bridge at this site within a few years, but that the exact location would be extremely difficult to determine, due to the necessity for re-aligning the highway through Newberg. He suggested that a reconnaissance survey be made to provide the approximate location of the bridge. The Commission approved the Engineer's suggestion and authorized the reconnaissance survey with the understanding that no committment is to be made as to the precise location or as to time of construction.

The Commission discussed the matter of extending its contract with Babbidge & Holt for operation of the Astoria-Megler Ferry, upon the expiration of the present contract on June 1, 1949. The Engineer advised that under the terms of the contract the Commission has the right if it so desires to extend the contract for a period not exceeding one year. He recommended that the contract be extended for a period of one year, ending June 1, 1950. In the

discussion following, the matter of the contractor's operating costs was brought up. The Chief Accountant was instructed to check the contractor's books and report his findings. Action concerning the extension of the contract was deferred pending this report.

The Commission discussed a letter from the Engineer requesting approval of an increase in the amount budgeted in September, 1948, for painting ten steel bridges, viz: Youngs Bay, Lewis and Clark River, Yaquina Bay, Harrisburg, Kernville, Yachats, Corvallis, Springfield, Creswell, and Smith Ferry, the present estimated cost being $14,270 more than that estimated when the budget was compiled in September. The Engineer advised that in view of the low bids received today for bridge painting it does not appear necessary to increase the budget at this time. The Commission approved the projects but took no action on increasing the budget.

The Commission considered a letter from the East Side Commercial Club, Portland, urging that steps be taken to protect properties along the Columbia River, to insure the adequacy of present flood protection facilities. The Engineer advised that investigations have been made and are continuing to be made of all bridges, embankments and other state highway facilities, but he is making no investigation of dikes, etc., which come under the supervision of the Army Engineers, and various drainage districts. The Commission approved the Engineer's action and instructed the Chief Counsel to prepare a reply to the East Side Commercial Club, advising them of the limits of the Commission's authority, and its responsibility in connection with flood protection.

The Commission discussed a proposed agreement with the State of Idaho, covering the obligations of Idaho and Oregon with respect to the rebuilding, when necessary, of four interstate bridges across the Snake River. The Commission indicated its approval of the provisions thereof insofar as they pertain to the bridges at Payette and at Weiser, but not those concerning the bridges at Ontario and Nyssa. The Chief Counsel was instructed to revise the wording so as to provide that Idaho will be obligated to cooperate with Oregon in the rebuilding of the Ontario and Nyssa bridges on the same basis that it has agreed to cooperate in rebuilding the other two bridges, when the Oregon State Highway Commission thinks they should be replaced. He was cautioned to prepare the agreement to fully protect the interests of the State of Oregon.

A letter was presented from the Columbia County Court stating that the County will acquire necessary rights of way for the proposed Federal Aid Secondary Highway project on Spitzenberg County Road, for which $100,000 has been programmed. In view of this information the Commission authorized the Engineer to proceed with the survey.

A petition was presented from residents of Garibaldi, Rockaway, Nehalem, Wheeler, Bar View, Tillamook, Bay City, and Manzanita, requesting the improvement of the Oregon Coast Highway immediately north of the Kilchis River Bridge in Tillamook County so as to avoid flooding during periods of high water. The Engineer advised that it is impractical to raise the grade of the existing highway because the water would be confined, and the result would

be the ponding of water above the highway with subsequent cutting of channels through farm land below. He pointed out that the present highway is not on permanent alignment and that surveys indicate that it should follow a route parallel to the railroad, where the water can be controlled without damage to property. He estimated the cost of construction along the new route at $450,000 and recommended the improvement along such route when funds are available to finance it. The Commission ordered that the petitioners be advised of the facts, that no funds are available to finance the work at this time and that when the improvement is made it will be on revised alignment.

The Engineer reported on a request from citizens of Linn County for improvement of the remaining portion of the Albany-Lyons Secondary Highway between Scio and Lyons. He estimated the cost of improving the fourteen-mile section at $350,000, and recommended that inasmuch as it is a heavily traveled State Secondary Highway, that it be given consideration when the Commission formulates the next two-year construction program. The Commission ordered that the petitioners be informed that it is not in position to commit funds to this project now, but will give it consideration in arranging future construction programs.

The Engineer reported on a request from Leslie Shaw, Editor of the Lake County Examiner Tribune, for construction of a footpath along US395 south of the south city limits of Lakeview. He advised that this matter has been investigated by the Traffic Engineer, who recommends approval of the project because of the volume of vehicular traffic that uses the road, and the large number of school children who walk along the highway going to and from school. He stated his concurrence therein and recommended that a four-foot footpath be constructed between M.P. 144.45 and M.P. 144.90 at an estimated cost of $2,100, to be financed with funds from the Minor Betterment reserve. The Commission approved the recommendation unanimously.

A request from Cecil M. Sly, Superintendent of Crook County Schools, for footpath construction along the Madras-Prineville and Ochoco Highways near Prineville, and the construction of a parking area at the Prineville schoolhouse, was considered by the Commission. The Engineer advised that he personally inspected these projects in company with Mr. Sly. He recommended approval of the footpath construction along the Madras-Prineville Highway at an estimated cost of $5,000, because of the large number of school children who walk along this highway daily, and that the other two projects be denied. The Commission unanimously approved the recommendation.

The Engineer reported on a request from the Board of County Commissioners of Multnomah County for installation of traffic signals at the intersection of S. E. 122nd Avenue and Powell Boulevard (Mt. Hood Highway) near Portland. He advised that a beacon flashing amber on one side and red on the other was installed at this intersection in September, 1948, and that recently a letter had been received from the Multnomah County Commissioners requesting that this intersection be made a four-way stop. He recommended that such action be taken by using red on all four sides at an estimated cost of $10. The recommendation was unanimously approved by the Commission.

The Commission considered a request from residents of Jennings Lodge and vicinity for installation of a traffic signal at the intersection of the Pacific Highway East and Jennings Avenue, between Portland and Oregon City. The Engineer advised that this intersection has been investigated by the Traffic Engineer, who advises that there is need for a semi-actuated traffic signal at this place. He estimated the cost of the installation at $6,500 and recommended approval of the installation with the cost to be borne entirely by the State, since it is outside of an incorporated area, and that it be paid for with funds from the unallocated Minor Betterment reserve. Action in this matter was deferred pending a report from the Engineer showing the volume of traffic that enters this intersection. (The Engineer reported on the following day that the daily traffic volume on the highway is 13,300 vehicles and 1,000 vehicles on the crossroad. In view of this report the Commission unanimously approved the installation of a three-way traffic actuated signal as recommended.)

The Engineer presented a request from the Southern Pacific Company for installation of illuminated advance railroad crossing signs at the crossing of the Wilson River Highway and the Southern Pacific Railroad tracks near the Tillamook east city limits. He advised that the Railroad Company has installed flood lights at this crossing, but some accidents still occur; further, that the Traffic Engineer's investigation reveals the signs are essential. He recommended that advance railroad crossing signs, illuminated with an overhead light, be installed at both sides of the crossing at an estimated total cost of $250, the expense to be borne entirely by the State, inasmuch as the Southern Pacific Company has previously paid the entire cost of the present floodlight installation. The Commission unanimously approved the Engineer's recommendation.

The Commission discussed a request from Frank Graber, Chief of Police, Monmouth, for elimination of traffic hazards at the intersection of Main and Monmouth Streets (U.S.99W) in Monmouth. The Engineer advised that a study of this intersection reveals a traffic volume and an accident record that warrants the installation of a flashing beacon with amber showing in two directions and red facing in the other directions. He recommended the installation of such a signal, and the cutting back of the curb, at an estimated total cost of $375, the expense to be paid entirely by the State on the condition that the City will furnish electric energy to operate the signal and will adopt necessary ordinances. The Commission unanimously approved the Engineer's recommendation and ordered the matter covered by appropriate agreement with the City.

The Engineer reported that the following cities and towns have satisfied the legal requirements with respect to the expenditure of 1947 State Tax Street Funds which they received in 1948, and that the plans of the projects that they expect to finance with such funds, have been examined and found satisfactory:

Canyonville Corvallis Oakland
Scio Tualatin

He recommended approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted the attached resolution with respect thereto, marked Exhibit "C", which resolution by this reference is made a part hereof with like affect as though extended in full herein.

The Engineer also reported that the following cities and towns have satisfied the legal requirements with respect to the expenditure of 1948 State Tax Street Funds which they received in 1949, and that the plans of the projects which they expect to finance with such funds have been examined and found satisfactory:

Boardman	Donald	Gearhart	Paisley	Sandy
Brownsville	Eastside	Juntura	Phoenix	Scio
Butte Falls	Estacada	Lafayette	Prescott	Sublimity
Carlton	Fossil	Long Creek	Rockaway	Tualatin
Cascade Locks	Garibaldi	Oakridge	Rogue River	Umatilla
				Wheeler

He recommended approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted the attached resolution with respect thereto, marked Exhibit "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer presented for the Commission's consideration "options for cooperative construction projects" in the following cities and towns covering city street improvements to be financed from the $250,000 Special State Tax Street Fund account, as previously authorized by the Commission:

Coquille	Hood River	North Powder
Drain	Mosier	Redmond
Rogue River	Toledo	Yoncalla

The Commission unanimously approved the projects as submitted.

The Engineer requested an increase of $5,801.71 in the project authorization for Contract No. 2983, with Roy Norquist, for construction of the Meadow Brook-Red Bridge Section of the Starkey Secondary Highway, in Union County. He advised that slides in heavy cuts had resulted in an overrun of excavation quantities to the extent that the project will be overrun about 13%. The Commission unanimously approved such increase.

The Engineer reported that pursuant to authority previously given him by the Highway Commission, he has awarded contracts as follows, the conditions of the awards having been satisfied:

(1) Waldport Rock Production Project on the Oregon Coast and Alsea Highways, in Lincoln Counties. Contract awarded to L. R. Kauffman, as a result of negotiations.

(2) Grading, Paving and Bridge construction on the Sundial Section of the Columbia River Highway, Multnomah County. Bids received January 25, contract awarded March 8, to Carl M. Halvorson, low bidder.

(3) Paving and minor grading work on the Troutdale Section of the Columbia River Highway, in Multnomah County. Bids received February 28; contract awarded March 8, to C. T. Malcom & Co., low bidder.

(4) Grading, surfacing and oiling the Snider Creek-Crater Lake Junction Section of the Sams Valley Secondary Highway, in Jackson County. Bids received March 1; contract awarded March 25, to Walter Berndt Construction Co., low bidder.

The Commission unanimously confirmed the awards as reported.

The Commission considered the following requests for extensions of time within which to complete highway contracts:

Warren Northwest, Inc., Contract No. 3010, for structures, grading and paving on the Oregon City-New Era Section of the Pacific Highway East, in Clackamas County, requested an additional extension of time of ninety days, from March 1, 1949, to June 1, 1949, within which to complete this job. They alleged that the overrun of time was due to wet weather which delayed the painting of guard rail. The Engineer advised that all work on this project was completed last year, with the exception of some painting, general clean-up and minor drainage items, which would require two or three weeks of good weather. He recommended that the extension of time be granted as requested, without penalty. The Commission approved the Engineer's recommendation.

K. F. Jacobsen & Co., Inc., Contract No. 2891, for grading and bituminous macadam surfacing on the West Cornelius Pass Section of the Cornelius Pass County Road in Washington County, requested an additional extension of time of 227 days, from September 15, 1948, to April 30, 1949, within which to complete this job. They stated that because of adverse weather conditions it was considered inadvisable to apply the last coat of paint to the guard rail until spring, when the weather was right. The Engineer advised that all road work on this job was completed last fall, but due to wet weather, the contractor could not finish the painting of the guard rails and sight posts until later. He recommended that the extension of time be granted as requested, without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

R. A. Heintz Construction, Contract No. 2887, for grading, surfacing and oiling on the Eagle Creek-Sandy Section of the Woodburn-Sandy Secondary Highway in Clackamas County, requested an additional extension of 242 days, from August 31, 1948, to May 1, 1949, within which to complete this job. They alleged that snow and rainy weather prevented completion of the job within the previously extended time limit. The Engineer advised that all road work was completed last fall, with the exception of final painting of guard rails and sight posts, which work could not be done until weather conditions were favorable. He recommended that the extension of time be granted as requested, without penalty.

A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Erwin E. Batterman, Contract No. 3081, for construction of a building at the Salem Highway Shops, requested an extension of time of sixty days, from March 31, 1949, to May 30, 1949, within which to complete this work. He stated that the Resident Engineer on the job ordered the work closed down from January 4 to February 23 because of freezing and rainy weather, which accounted for the overrun of the time limit. The Engineer advised that the contractor was directed to discontinue work during a part of January and February because of unfavorable weather. He recommended in view thereof that the extension of time be granted as requested without penalty. The Commission approved the recommendation.

J. N. & M. J. Conley, Contract No. 2895, for slope protection and topping on the Troutdale-Wahkeena Creek Section of the Columbia River Highway in Multnomah County, requested an additional extension of time of ten days from March 31 to April 10, 1949, within which to complete this job. They alleged that the overrun in time was due to wet weather which prevented completion of shaping and seeding of approximately fifteen acres of borrow pit area. The Engineer advised that all work, except that mentioned by the contractor, was completed before the time limit expired and that it was impossible to complete the shaping and seeding because of extremely wet weather. He recommended that the extension of time be granted as requested, without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

The Commission, in passing on requests for extensions of time as listed above, considered but did not necessarily adopt the recommendations of the Engineer and the reasons given by the contractors for failure to complete their projects within the specified time limits.

The Engineer reported that Contracts No. 2966, 2975 and 3031, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. After due consideration of the Engineer's report with respect to the contracts under discussion, the Commission approved and accepted the said contracts as reported and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Engineer has reported that the following State Highway Commission Contracts, for the construction of State Highway projects, have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2966, with Holmes Bros., for furnishing sanding materials in stock piles on the Meacham Section of the Old Oregon Trail Highway in Umatilla and Union Counties; completed November 5, 1948.

Contract No. 2975, with Gerald Miller, for grading on the West Cottonwood Canyon Section of the Wasco-Heppner Secondary Highway in Sherman County; completed November 30, 1948.

Contract No. 3031, Warren Northwest, Inc., for paving on Dallas, Independence and West Salem city streets; completed December 1, 1948.

THEREFORE, BE IT RESOLVED, that the work covered by said State Highway Contracts for the construction of said State Highway projects, be declared completed according to the terms of the respective projects, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered the designation of certain State Highway Department officials to sign reimbursement vouchers submitted to the Public Roads Administration. The Engineer recommended that W. C. Williams, First Assistant State Highway Engineer; J. W. Nash, Assistant Office Engineer; and he, R. H. Baldock, be authorized to sign such papers. The Commission approved the Engineer's recommendation, and on the following day signed a letter addressed to the Public Roads Administration certifying the action.

The Commission discussed a proposed agreement with the U. S. Coast Guard providing for use by the state of the Coast Guard's telephone facilities which extend from Cape Arago Light Station into Cape Arago State Park. The Engineer recommended approval of the agreement which will provide telephone service for the caretaker in this park. The Commission approved the Engineer's recommendation and on the following day signed the agreement.

A request was presented from the Cannon Beach Commercial Club for permission to maintain view-scopes at several points on the Oregon Coast Highway between Neahkahnie Mountain and Ecola Park, in Clatsop County. The Commission denied the request as a matter of policy.

A request from the Memorials Committee of the Oregon Historical Society to erect an historical marker on US101 between Gardiner and Reedsport commemorating Jedediah Smith, a famous explorer, was considered by the Commission. The Commission approved the request unanimously and authorized the Engineer to erect the marker at state expense, which he estimated would not exceed $200. The Commission also approved the following inscription for the marker as prepared by the Memorials Committee:

"JEDEDIAH SMITH

JEDEDIAH SMITH, MAKING THE FIRST RECORDED OVERLAND TRIP FROM CALIFORNIA, FOLLOWED THE OREGON COAST NORTHWARD AND ON JULY 13, 1828, CAMPED WITH SEVENTEEN TRAPPERS ON THE NORTH BANK OF SMITH RIVER CHANNEL FIVE-EIGHTHS OF A MILE NORTHEAST OF THIS POINT.

THE FOLLOWING MORNING, WHILE SMITH AND TWO COMPANIONS WENT FORWARD TO FIND A RIVER CROSSING, THE INDIANS CAME INTO CAMP AND MASSACRED ALL BUT ONE MAN. SMITH AND THE SURVIVORS ESCAPED TO FORT VANCOUVER, WHEREUPON JOHN McLOUGHLIN SENT AN EXPEDITION TO THE UMPQUA, RECOVERING SOME OF SMITH'S FURS AND EQUIPMENT.

(Cont.)

JEDEDIAH SMITH HAD THREE AMBITIONS: TO SERVE HIS GOD, TO PROVIDE FOR HIS FAMILY AND TO BECOME A GREAT AMERICAN EXPLORER. IN ALL THREE THINGS HE SUCCEEDED."

The Commission considered a request from Mr. Carl C. Webb, Manager of the Oregon Newspaper Publishers Association that the Commission allow the use of the ferry, "Merle R. Chessman," for a special boat trip during the annual convention of the Association at Gearhart on June 17, 18 and 19, 1949. The Engineer advised that such use of the ferry would void the marine insurance now carried on this ferry, that it would be necessary to secure additional permits from the Coast Guard, and that such use of the ferry might establish a precedent which would be difficult to avoid in passing on similar requests in the future. He recommended that the request be denied. The Commission approved the Engineer's recommendation and instructed the Secretary to inform Mr. Webb of the decision and the reasons therefor.

The Commission considered and ordered filed a letter from the Washington County Court dated January 5, 1949, in which the Court releases the State from further responsibility in connection with the maintenance of Walker County Road, which was used by the State's contractor during the construction of the Sunset Highway.

Consideration was given by the Commission to the abandonment of a portion of the Sundial Secondary Highway pursuant to an agreement with Multnomah County and the Port of Portland, dated January 25, 1949. The Commission confirmed such arrangement and adopted by unanimous vote the attached resolution, marked EXHIBIT "E", relative thereto, which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The matter of appointing someone a member to the Travel Advisory Board to fill the vacancy caused by Governor McKay's appointment of Mr. Charles H. Reynolds a member of the State Highway Commission, had the attention of the Commission. Commissioner Reynolds suggested the name of Mr. Fred E. Kiddle of Island City, Oregon. The suggestion was approved by Chairman Banfield and Commissioner Chandler, thus making the action unanimous. The Secretary was instructed to notify Mr. Kiddle and secure his reaction.

The Commission discussed letters from the Cave City Chamber of Commerce and the Illinois Valley Chamber of Commerce protesting the imposition of fines on log haulers for overloading on the Redwood Highway, and requesting the return of fines heretofore imposed on such operators. The Engineer advised that due to the unstable condition of the roadway, it was necessary to post this highway for a fifty percent reduced load limit from February 18 to March 2; also, that special efforts were made to remedy conditions by transferring maintenance crews from Eagle Point and Medford; moreover, on February 24 the Assistant Engineer conferred with millowners and haulers at which time the

problem was frankly discussed. All of the violations, he said, occurred during the time when the reduced load limits were in effect and while signs were up calling attention to the restrictions. He recommended in view of the circumstances that the Commission take no action toward the refunding of any fines nor to the canceling of any cases now pending in court. The Commission approved the recommendation and ordered that the complaining parties be advised of the action taken and the reasons that prompted the same.

The Commission confirmed the Engineer's action with respect to the posting of certain highways for reduced load limits, since the last meeting of the Commission, upon advice from the Engineer that the restrictions were necessary to preserve highway surfaces. The Commission thereupon adopted the attached resolution relative thereto, marked EXHIBIT "F-1", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission also confirmed the Engineer's action in removing the reduced load limits heretofore imposed on certain highways where the need for such restriction no longer exists. The attached resolution relative thereto, marked EXHIBIT "F-2", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote. In the discussion of this matter the Commission ordered a report showing the number of miles of highways which had been placed under reduced load limits during the winter of 1948-49.

The matter of prohibiting shoulder parking of vehicles along the Pacific Highway East between Oregon City and New Era was considered by the Commission. The Engineer advised that shoulder parking along this section is creating a traffic hazard, and that the major offenders are employees of various industries located in this district who park their vehicles on the highway shoulders throughout the entire day. He recommended the adoption of an order prohibiting such manner of parking between the points mentioned, and that appropriate signs be maintained. In the discussion of this matter the Chief Counsel questioned the Commission's authority to make such an order. The matter was referred to the Chief Counsel for an opinion.

The Engineer brought up for discussion the advisability of prohibiting the parking of vehicles at any time on the south side of Fifth Street, route of the Pacific Highway East in Oregon City, between Main Street and the railroad underpass, where such manner of parking creates a traffic hazard. He recommended the adoption of an order to that effect which, he said, is in conformity with the ideas of the City Council as expressed in a resolution that it has passed. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "G", which resolution by this reference is made a part hereof with like effect as though extended in full herein. In the discussion of this matter the question arose whether or not it would be advantageous also to prohibit parking on the opposite side of this street. The matter was referred to the Engineer for study and consultation with the city officials.

The Commission also considered recommendation from the Engineer that the parking of vehicles on the shoulders of the Pacific Highway West near an auction market and cafe south of Corvallis should be prohibited as a traffic safety measure. The Commission referred the matter to the Chief Counsel for an opinion as to its legal authority to impose such a restriction.

The Engineer requested authority to purchase tools and equipment for use at maintenance stations, costing $10,000. He advised that the 1949 budget contains provision for this item. The Commission unanimously approved the Engineer's request.

The Commission confirmed approval previously given for Don Manning, Glenn Loertscher and Fred Sugnet of the Traffic Engineering Department to attend a Road Service and Traffic Control meeting with the Washington State Highway Planning Survey in Olympia, Washington on March 29, 30, 31, 1949, at an estimated cost of $84.00, of which 62 percent will be paid with Federal funds. The Commission also confirmed authority granted W. C. Williams, Assistant Highway Engineer, to attend a meeting with Washington State officials in Olympia on April 6 to discuss the proposed Columbia River Toll Bridge at The Dalles; expense involved, $4.50. Authority was also granted G. S. Paxson, Bridge Engineer, to make a side trip to the University of Colorado, at a cost of about $19.00, to interview engineering students who have expressed an interest in entering the employ of the Oregon State Highway Department.

The Engineer reported on a state-wide investigation of excessive damage to primary and secondary highways caused by unusually adverse weather conditions during the past winter season. He estimated the cost to repair the damage caused by frost at $2,391,900, and the cost to repair flood water damage at $188,100. He also pointed out that because of the unusual winter, costs of snow removal and sanding operations have exceeded the amounts budgeted for such purposes by $200,000, making a grand total of $2,780,000 unanticipated expense. He submitted a tabulation showing the location and estimated cost of each repair project and advised that bids for several of the projects were received at today's letting and that others will be received at the bid opening on the following day.

The Commission unanimously approved the projects for which bids were received at this morning's session but deferred until later consideration of of the remaining projects. (The projects for which bids were received on the following day were approved at that time. For further details of this matter see copy of the Engineer's letter of April 7, 1949, to the Commission in general files.)

The Engineer requested authority to purchase miscellaneous office, engineering, filing and ferry equipment which he estimated will cost about $11,944.50. The Commission approved the request unanimously.

The meeting adjourned at 5:00 p.m. to reconvene on the following morning in the same room.

Portland, Oregon
April 12, 1949

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel with the following present and participating:

T. H. Banfield, Chairman
Ben R. Chandler, Commissioner
Charles H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction work were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room.

A delegation from Oswego consisting of the following was present and urged the Commission to improve State Highway No. 3 (Oswego Highway) through Oswego by widening for four lanes of travel, including the construction of curbs between "C" Street and Kirkham Street: P. K. Hammond, City Attorney; George Rogers, Councilman; J. B. Illo, President, Oswego Chamber of Commerce; Walt Reisner, Secretary, Chamber of Commerce; Ralph Carlson, Mark Calder, Allen Morriss, R. McVey, Wm. Rogers, Al Pakcheb, Art Rosman, Floyd Bender, Ted Gilbert, Fred Gorman, Elston Ireland, Ray Lentz, Ben Walling, Jack Huddleston, Ray Brooks,

Leo Gustofson, Abe Teeney, Lou Lavechek, H. L. Lavechek, Paul Murphy, Wm. Davis, Wm. Mitchell and Lee Stidd, Jr., all members of the Oswego Chamber of Commerce. Mr. Hammond headed the group. He alleged that this improvement was promised them in 1941, just prior to the war, but was postponed because of wartime conditions. He gave as their feeling that the work should go forward now in view of large increase in traffic volume, increase in population, and the poor condition of the present highway. Mr. Illo said that business in their town is suffering because of inadequate transportation space and he pointed out the dangers existent on the present narrow highway and advised that the City Council is making provision for parallel parking in lieu of the present head-in parking. Mayor Needham offered city cooperation in any way possible to expedite the improvement. At the request of Chairman Banfield, the Engineer advised that the original improvement plan contemplated an expenditure of about $20,000, but due to present day prices will now approximate $65,000. The plan now under consideration, he stated, contemplates a full width street with parking space on both sides. Chairman Banfield advised that this project as now contemplated is considerably larger than the Commission previously had in mind, but the Commission will discuss it with the Engineer and Chief Counsel and see what can be done. He stated emphatically that whatever the Commission may approve, it will not include sidewalk construction; which is a city responsibility.

Following departure of the group this matter was again discussed, at which time the Commission stated its willingness to proceed with the project according to the revised plan if the City will adopt an ordinance providing for the parallel parking of cars along this street, and will assume full responsibility for construction of sidewalks. The matter was referred to the Engineer and Chief Counsel to pass on whatever action the City takes regarding these features.

A delegation from Jackson County, including Chester Hubbard and Don Lane, Vice President and Secretary respectively of the Medford Chamber of Commerce, and Ed Singmaster of the Ashland Chamber of Commerce, was present and requested additional improvements to the Pacific Highway, particularly between Ashland and Central Point. Mr. Hubbard headed the group. He pointed out the need for an improved highway due to greater population, industrial development and heavy fruit-hauling traffic, and advised that this improvement is their No. 1 project. Mr. Singmaster stated that their traffic problem is a serious one and that the present two-lane highway is entirely inadequate. Chairman Banfield inquired if it is the universal feeling of the people of Jackson County that the improvement of the Ashland-Central Point Section is of more importance and is more essential than the improvement south of Canyonville. Mr. Lane replied that in the overall picture the Canyonville-South project should be given priority status. The Commission took no action on the request but agreed to consider the project upon conclusion of its trip through Southern Oregon within the next few weeks. Mr. Lane presented a letter from Mayor D. L. Flynn of Medford endorsing the Ashland-Central Point improvement.

A delegation from Depoe Bay consisting of the following persons, was present and urged the Commission to provide rest room facilities at Depoe Bay for the convenience of tourists: William Wood, President, Chamber of

Commerce; Graham Ainsley and Raymon McQueen, members of the Chamber of Commerce. Mr. Wood headed the group and pointed out the need for such accommodations. Chairman Banfield cited the Commission's past experience with restrooms, which, he said, was not at all satisfactory; however, he added, the Commission appreciates the need for such accommodations at Depoe Bay and will consider installing them if definitely assured in writing by the people of this place that they will maintain them in a condition that is acceptable to the Commission. Mr. Wood agreed to furnish such written statement, whereupon the matter was referred to the State Parks Superintendent and the Chief Counsel to see what kind of arrangement can be worked up.

The following persons representing the Salem City Council appeared before the Commission regarding the State Highway Engineer's report on highway needs in Salem and vicinity: J. L. Franzen, City Manager; David O'Hara, Acting Mayor; Dan J. Fry, Albert H. Gille, Howard Maple, and James Nicolson, Councilmen; J. H. Davis, City Engineer; Clayton V. Jones, businessman; C. A. Vibbert, Contractor; Tom Armstrong; Roy P. Adsitt; James W. Tindall, Druggist; and Walter Musgrave, Mayor, West Salem. Mr. Franzen headed the group. He confined his remarks to that portion of the report which deals with a proposed truck by-pass along Lancaster Drive. He urged adoption and construction of this temporary route at the earliest possible time in order to relieve traffic congestion on North Capitol Street; and acquisition of right of way now for the proposed permanent route located between Lancaster Drive and the east city limits so it will be available when needed, and to enable property owners in the district to develop their holdings in conformity therewith. Mr. Franzen also mentioned the proposed by-pass route from North Capitol Street to North Commercial Street, and suggested two-way traffic on Pine Street rather than one-way traffic on Norway and Shipping Streets, as recommended by the State Highway Engineer, notwithstanding a slightly increased cost. In order to avoid a bottleneck situation at the north city limits Mr. Franzen suggested the widening of the present highway for four traffic lanes between the city limits and Hayesville School. The availability of the by-pass routes, he said, will greatly relieve the traffic situation on North Capitol Street.

Mr. David O'Hara, Acting Mayor for the City of Salem, stated that the strongest opposition to the plan proposed in Mr. Baldock's report is from those who do not favor the one-way street feature, particularly those who reside along Liberty and Summer Streets. He confirmed Mr. Franzen's suggestion for the routing of traffic on Pine Street and along Lancaster Drive, and offered the suggestion that due to the opposition of residents on South Liberty Street and Summer Street, the Commission might consider the widening of the present route. Mr. Gille stated that the City Council has been beseiged with remonstrances against the "Baldock Plan" but, as yet, has taken no action either for or against it. He inquired to what extent the Commission's decision would be influenced by any recommendation or preference that the City Council might express as to the location of the Willamette River Bridge, and requested an answer within a reasonable length of time. Mr. Maple urged, in behalf of South Salem property owners, the widening of the present route along South Commercial Street for four traffic lanes so it can be used by traffic in both directions, rather than the one-way plan.

Chairman Banfield recalled that the report submitted by the Engineer was authorized by the Commission at the request of the City of Salem; that the City's original request was simply for a new bridge across the Willamette River. This request, he stated, has now been enlarged considerably and the report covers the whole situation; however, the Commission has not, and is not now, assuming an obligation of approximately $8,000,000 which is the estimated cost to revise the highway routing through the city in conformity with the plan outlined in the report. It is the Commission's obligation, he stated, to take care of highway traffic, and the Commission can not assume responsibility for city planning; moreover, the Commission cannot commit itself at this time to any specific by-pass route. He emphasized that there is much highway construction needed in the rural areas, and that individuals whose property might be involved must conform to the best interests of the State as a whole; and that the Commission expects the City of Salem to take the same attitude. The only project that the Commission is now considering in Salem, he said, is a new bridge across the Willamette River, but no definite decision has been reached as yet with respect to that project and no action will be taken until the Commission has completed its state-wide tour of inspection, which it is anticipated will be completed in the near future. However, the Commission feels that the bridge is essentially a highway project and has tentatively set up a sum of money to finance it.

With reference to the proposed by-pass, Chairman Banfield advised that the Commission cannot finance such a project now but will proceed with the improvement without more ado when it considers the time propitious. At his request, the Secretary read aloud the record of the action taken on the Engineer's report.

Mr. Gille again inquired as to the extent that the Commission's decision would be influenced by a recommendation from the City Council. Chairman Banfield replied that if the question arrived at such point, the Commission would take the advice of the Engineer in preference to that of the City Council. Mr. Gille also inquired if the bridge program covers practically the entire amount that the Highway Commission expects to spend in Salem in the near future, to which Chairman Banfield replied that that is substantially correct.

Mr. O'Hara gave as his thought that the estimated cost of purchasing right of way for widening of South Commercial is excessive. He gave a cost of approximately $30,000 as compared with the State's estimate of $280,000, explaining, however, that his estimate is based on a 66-foot street as against the State's 100-foot street. Chairman Banfield replied that the Commission considers that its estimates are reliable. Mr. Harbison, representing tugboat operators, stated that he had been advised that the type of bridge proposed would seriously hamper the passage of logs through the Salem area. Chairman Banfield replied that the type of bridge contemplated would provide ample facilities for towing logs. Mr. Walter Musgrave, Mayor of West Salem, stated that he favored the "Baldock Plan" and that in his estimation the opposition to it stemmed from the selfish interests of a few individuals. The City of West Salem, he said, is one hundred percent in favor of the "Baldock Plan." Chairman Banfield concluded the conference by stating that the Highway Commission is not unsympathetic and really wants to do something for Salem, but it

cannot spend one or two million dollars there if the people are not satisfied with the plans. He added that the Commission will welcome any suggestions if the people of Salem feel that the program is wrong, and can prove it wrong, and that it will not take care of Salem's traffic needs.

A delegation from Malheur County, representing the Malheur County Highway and Industrial Development Association, and including Harold Logue, Manager, Ontario Chamber of Commerce; Alva Goodell, County Commissioner; Dyer Bennett, Mayor, Ontario; and W. E. Sandquist, County Roadmaster, was present regarding the 1949 road construction program for the County. Mr. Logue headed the group. They urged the following improvements: viz; Cairo-Vale Section of the Central Oregon Highway; Ontario-Weiser Junction Section of the Old Oregon Trail; Ontario-Nyssa Section of the John Day Highway, and Nyssa-Adrian Section of the Nyssa-Adrian State Secondary Highway; and presented a written brief in support of their oral requests. They also presented extracts from the minutes of the Ontario City Council, dated March 7, 1949, concerning the appointment of a "Mayor's Committee" to appear before the Highway Commission and urge the improvement of the highways in Malheur County before any money is spent to replace the interstate bridges at Weiser and Payette.

Mr. Bennett expressed concern that while Oregon might cooperate with Idaho in the reconstruction of two Snake River bridges at Weiser and Payette, that Idaho might not be able to cooperate with Oregon when the other two Snake River bridges, at Ontario and Nyssa, need improvement. He was assured by Chairman Banfield that whatever contract is made with the State of Idaho will amply protect the interests of the State of Oregon. He also advised that the Commission is now considering projects for its second postwar program and will make a final decision with respect thereto after it has completed its tour of inspection in the next month or two. In the meantime, the Engineer has been authorized to make surveys of a number of projects that very likely will be approved. This concluded the conference.

The Engineer reported a request from the Sherman County Court that funds heretofore tentatively set up to finance the improvement of the Locust Grove-Wasco Section of the Fulton Canyon Federal Aid Secondary Highway, amounting to $100,000, be transferred to the Scott Canyon Section of the Scott Canyon Federal Aid Secondary Highway. He advised that both routes have been investigated and that it is his belief that the Scott Canyon Section should have priority because of the volume of wheat hauling traffic that uses it and the fact that the road is impassible at certain times of the year. He recommended approval of the transfer and requested, if approved, authority to make the necessary location survey. The Commission decided to consider this project in its next construction program and accordingly authorized such survey, it being understood, however, that the county is to acquire right of way as may be required.

The Engineer reported the results of further investigation of a request from citizens of Washington County for a connection of the Cornelius Pass County Road and the Sunset Highway at Merle undercrossing. He stated that an exhaustive study has been made which indicated that about 800 vehicles use the county road daily and that most of them can get onto the highway at

points from one to four miles distant, although they would probably use a connection at Merle Undercrossing were it provided. He estimated the cost to make a complete connection at $25,000. and the cost to provide a connection on the north side only, that would serve until the Sunset Highway is widened to a four-lane facility, at $14,000, including right of way, and recommended approval of the latter project. The Commission deferred a decision in the matter pending adoption of its next construction program.

The Commission discussed a request from The Dalles Rod and Gun Club, presented by Senator Ben Musa of The Dalles, for construction of a highway along the east bank of the Deschutes River from the Columbia River Highway southerly to a junction with the Warm Springs Highway. The Engineer advised that the matter has not been investigated thoroughly but from his knowledge of conditions such road would be very costly and would serve very little traffic. He recommended that the request be denied. The Commission approved the recommendation.

The Chief Counsel reported receipt of a letter from the Denton Construction Company, contractor for construction of the Gardiner Section of the Oregon Coast Highway, Contract No. 2944, advising that due to financial difficulties they are unable to complete the job and have turned it over to their surety, the Glens Falls Indemnity Company to handle. He also reported receipt of a letter from John M. Coke, Attorney for the surety, requesting that Denton Construction Company be declared in default and that he be notified accordingly so the surety can proceed to make other arrangements to carry on the work. The Chief Counsel recommended approval of the request. The recommendation was unanimously approved by the Commission and it was so ordered. The Chief Counsel was instructed to handle the details.

The Chief Counsel also presented for the Commission's consideration a proposed agreement with the Maryland Casualty Company disposing of the State's claim arising out of the default by White Bros. Company of its contract with the State for excavating and shaping the Oneonta Borrow Pit on the Upper Columbia River Highway in Multnomah County. He advised that the Maryland Casualty Company has offered to pay the State the sum of $4,680 in order to settle this account and to secure relief from its obligation under the bond. He recommended acceptance of the offer. The Commission unanimously approved the recommendation. A form of agreement covering the matter was signed later in the session.

The Commission discussed and upon recommendation of the Engineer and Chief Counsel approved an agreement with the S. P. & S. Railway Company whereby the Company grants to the State a right and easement to construct and maintain a section of the Lower Columbia River Highway on railroad property between Ranier and Goble. The agreement was signed later in the session.

The Engineer presented a form of agreement with the City of Albany which provides that the State shall pay a portion of the cost, estimated at $1,809, of improving certain city streets in front of the Highway Maintenance Station at Albany. He recalled that the Commission tentatively approved the project at its meeting on March 1, 1949, and referred the matter back to the Chief Counsel and he to discuss with the city, which has been done. He recommended approval of the arrangement. The Commission approved the recommendation and later in the day signed the agreement.

The meeting recessed for luncheon at 12:00 o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

A delegation from Vancouver appeared before the Commission in the interests of another interstate bridge across the Columbia River connecting Portland and Vancouver. The group was headed by Edgar M. Swan, Attorney, and included the following: R. V. Spencer, Bob Hidden, Jim Hutton and Maynard Ivens, representing the Voter's League; George Hutton, Finance Commissioner; and Luke Graham, citizen. They urged construction of a second bridge, alleging that the present bridge is not capable of handling the traffic that uses it, and that another structure is essential. At the request of the Commission the Chief Counsel advised that the Commission has legal authority, if it wants to use it, to join with the State of Washington in the construction of a new bridge. However, the arrangements should be between the highway authorities of the two states rather than other groups. Mr. Swan stated that, insofar as he knows, the Washington Highway Department has not been contacted. The suggestion was then made that the group present its project to the Washington authorities with the suggestion that they make known their ideas on the subject because the Oregon Highway Commission is not in a position to make any statements regarding the project until it knows what the State of Washington is willing to do. Mr. Swan stated that they would act on the suggestion.

The Engineer requested authority to remove an accumulation of rock from Oneonta Borrow Pit to fill in and close the Oneonta Tunnel which is no longer of value for highway purposes, the highway having been reconstructed around this point. It was the considered opinion of the Commission that the materials in the borrow pit should not be removed until the claim of the Union Pacific against the State Highway Commission, which involves this pit and which is now in court, has been disposed of, and it was so ordered.

The Engineer requested an additional authorization of $112,504 to finance certain 1948 Minor Betterment projects which were carried over in the 1949 Budget and are listed on the following pages. The Chief Accountant, Malcolm Hawke, explained details. He advised that due to conditions created by flood damage and the truck-hauling of logs, the amount of work performed on Minor Betterment Projects in 1948 was considerably less than anticipated, with the result that the estimated cost of 1948 projects which should have been carried over into the 1949 Budget was $112,504 in excess of the carry-over shown in that Budget. Chairman Banfield stated that these jobs should be carried over from year to year until the work is completed or the project is withdrawn by resolution. He explained that whenever the Commission approves a project of this kind it is obligated to complete the work, and that in the future the authorizations as set up for this type of work are to be handled so they do carry over into succeeding years until finished. The Commission approved the carry-over expenditures for the Minor Betterment projects as requested, and also approved a carry-over expenditure in the amount of $36,615 for maintenance station building projects that were authorized but uncompleted in 1948 as follows, funds to be transferred from the construction reserve.

April 12, 1949

The Engineer brought up for discussion his written report of October 29, 1948, concerning footpath construction and improvement of the alignment of the Oregon Coast Highway at the north entrance to Coquille. He recalled that the estimated cost of the realignment work was $12,000, and that of the footpath construction $7,000, a total of $19,000; and that the Commission deferred action on the matter pending adoption of the new program because of the possibilities of changing the highway location, which would automatically solve the problem. Commissioner Chandler advised that he has been contacted several times by members of the School Board and Service Clubs of Coquille, who consider the footpath essential to protect school children, and who now want permission to construct their own footpath on the highway right of way in view of the possibilities of the highway being relocated to by-pass this district. The Commission unanimously authorized the granting of such permission and thereupon referred the matter to the Engineer and Chief Counsel to handle the details.

The Commission discussed a date for its next regular meeting and decided to hold such meeting in Portland on Monday and Tuesday, May 16 and 17, 1949. The Secretary was instructed to make the usual arrangements for use of the Green Room in the Imperial Hotel for this purpose.

The Commission also decided to make its final inspection tour, prior to adopting its second postwar construction program, during the week commencing Monday, May 2, 1949.

The Engineer again brought up for discussion his report on the extent of frost and flood damage which the State Highway System suffered during the past winter, by reason of the unusual weather conditions, and he requested confirmation of the contracting of several projects for which bids were taken at this meeting. (The list of projects is contained in the Engineer's written report on the subject, dated April 2, 1949, in general files, and they are also listed previously in these minutes, when the matter was discussed on the first day of the meeting.) The Commission unanimously approved the contracting of the work for which bids were received today, and authorized the Engineer to advertise for bids for additional work that is urgent and must be started at the earliest possible time.

The Commission discussed with the Engineer bids received at the morning session for construction of State Highway projects and by unanimous vote took the following action thereon as publicly announced by Chairman Banfield at 3:00 p.m.

"Necanicum Rock Production Project on three State highways in Clatsop and Tillamook Counties. Jed Wilson, Seaside, submitted the low bid for this work at $26,100. J. R. Taggart and Company, Salem, submitted the only other bid at $26,500. The contract has been awarded to the low bidder, Jed Wilson.

"Rock Creek and Sandy Creek Bridges on the Coos Bay-Roseburg Highway in Coos County. Coos Bay Dredging Company, Coos Bay, submitted the low bid for this job at $113,452.50, using asphalt. They also submitted a bid of $113,940.50, using tar. The second low bid using

asphalt was submitted by Lindstrom Brothers, Portland, at $114,782. No bid was submitted for the use of tar. One other bid was received. The Commission has rejected all bids as being too high.

"Powell Butte-Prineville Section of the Ochoco Highway in Crook County 3.5 miles of surfacing and 6.9 miles of oiling. D. F. McKenzie, Salem, submitted the low bid for this job at $62,065. Babler Brothers, Portland, submitted the second low bid at $63,114. One other bid was received. The contract has been awarded to D. F. McKenzie, the low bidder.

"Harris Beach Park grading and surfacing project in Curry County. Jack Robinson, Bend, submitted the low bid for this job at $8,993.50. The second low bid was submitted by Durbin Brothers, Eugene, at $9,565. Two other bids were received. The contract has been awarded to the low bidder, Jack Robinson.

"Painting structural steel in the Smith Ferry Bridge over the Umpqua River on the Elkton-Sutherlin Highway in Douglas County. Hall and Wols, Portland, submitted the low bid for this job at $4,600. O & S Painters, Portland, submitted the second low bid at $4,750. Nine other bids were received. The contract has been awarded to the low bidder, Hall and Wols.

"Redwood Junction Section of the Pacific Highway in Josephine County. Grading, paving and landscaping. Snook Brothers, Corvallis, submitted the only bid received for this job at $21,563. The Commission has rejected this bid as being too high.

"Construction of two bridges and approaches on the Pacific Highway in Cottage Grove, Lane County. Hamilton and Thoms, Eugene, submitted the low bid for this project at $191,405. The second low bid was submitted by Valley Construction Company, Portland, at $195,000. One other bid was received. The contract has been awarded to the low bidder, Hamilton and Thoms.

"Construction of a masonry block office building in Eugene, Lane County. Rath and Morris, Eugene, submitted the low bid for this job at $22,237. The second low bid was submitted by W. H. Shields Company, Eugene, at $25,275.54. Two other bids were received. The contract has been awarded to the low bidder, Rath and Morris.

"Toledo-Simpson Creek Section of the Corvallis-Newport Highway in Lincoln County. 5.41 miles of recoiling. J. N. and M. J. Conley, Portland, submitted the low bid for this work at $36,676.75 using asphalt. No bid was submitted for the use of tar. D-H Paving Company, Vancouver, Washington, submitted the second low bid at $37,186.75 using asphalt. Two other bids were received. The contract has been awarded to the low bidder, J. N. and M. J. Conley.

"Eddyville-Kline Mountain Section of the Corvallis-Newport Highway in Lincoln County. 6.5 miles of recoiling. D-H Paving Company, Vancouver, Washington, submitted the low bid for this project, using asphalt, at

$43,692.50. No bid was submitted for the use of tar. Harr and Horton, Portland, submitted the second low bid using asphalt at $46,215. One other bid was received. The contract has been awarded to the low bidder, D-H Paving Company.

"Painting of structural steel in the Kernville Bridge over the Siletz River and the Yachats River Bridge in Yachats on the Oregon Coast Highway in Lincoln County. Hall and Wols, Portland, submitted the low bid for this work at $5,874. The second low bid was submitted by Antonsen Painting Company, Tacoma, Washington, at $6,000. Eight other bids were received. The contract has been awarded to the low bidder, Hall and Wols.

"Construct addition to existing maintenance building at Albany, Linn County. Arthie R. Averill, Portland, submitted the low bid for this project at $5,382. R. H. Jones, Hillsboro, submitted the second low bid at $6,082.30. One other bid was received. The contract has been awarded to the low bidder, Archie R. Averill.

"Construct masonry block or concrete open vehicle storage building at Salem Shops, Marion County. Erwin E. Batterman, Salem, submitted the low bid for this job at $15,880 on Alternate "C", precast concrete walls. On Alternate "B", using poured concrete walls, he bid $15,889. On Alternate "A", using masonry block walls, he bid $16,761. The second low bid was submitted by Alan E. Siewert, Salem, on Alternate "B", poured concrete walls, at $17,911. On Alternate "A", masonry block construction, he bid $19,102. No bid was submitted for Alternate "C". Eight other bids were received. The contract has been awarded to the low bidder, Erwin E. Batterman on Alternate "B", poured concrete walls.

"Furnishing and installing three automatic traffic signals at the following locations in and near Portland, Multnomah County; (1) intersection of Southwest Capitol Highway and Southwest Barbur Boulevard, (2) intersection of Southwest Capitol Hill Road, Southwest 19th Avenue, and Southwest Barbur Boulevard, (3) intersection of Highland Road and Southwest Canyon Road. W. R. Grasle, Portland, submitted the low bid for this work at $13,327. The second low bid was submitted by A. R. Johnson Electric Company, Portland, at $13,592. One other bid was received. The contract has been awarded to the low bidder, W. R. Grasle Company.

"Bellevue-Dayton-West Salem oil mat surfacing project on three state highways in Polk and Yamhill Counties. 13.09 miles of surfacing and 25.96 miles of oiling. D-H Paving Company, Vancouver, Washington, submitted the low bid for this work at $176,002 using asphalt. The second low bid was submitted by J. C. Compton Company and O. C. Yocom Company, McMinnville at $194,792. Neither of these bidders submitted a bid for the use of tar. One other bid was received. The contract has been awarded to the low bidder, D-H Paving Company.

"Umatilla Section of the Columbia River Highway in Umatilla County. 0.92 mile of grading, surfacing and oiling. Newport Construction

Company and Russell Olson, Portland, submitted the low bid for this work at $57,474. George E. Corliss, Ontario, submitted the second low bid at $65,899. Two other bids were received. The contract has been awarded to the low bidder, Newport Construction Company and Russell Olson.

"Washington State Line-Sunnyside recoiling project on the Sunnyside-Umapine Highway in Umatilla County. 2.85 miles of recoiling. Newport Construction Company and Russell Olson, Portland, submitted the low bid for this work at $10,485.50. Morrison and Fisher, Walla Walla, Washington, submitted the second low bid at $10,861.50. One other bid was received. The contract has been awarded to the low bidder, Newport Construction Company and Russell Olson.

"Amity-Hopewell Section of the Bellevue-Hopewell Highway. 0.80 mile grading, surfacing and oiling. Durbin Brothers, Eugene, submitted the low bid for this work at $38,701 using asphalt. No bid was submitted for the use of tar. Stevenson Construction Company, Salem, submitted the second low bid at $40,251 using asphalt. No bid was submitted for the use of tar. One other bid was received. The contract has been awarded to the low bidder, Durbin Brothers."

The matter of closing down the construction work of Contractor Roy L Houck, Jr., on the Lost Creek-Lowell Section of the Willamette Highway, Lane County, as suggested by Col. O. E. Walsh, District Engineer, U. S. War Department, on the previous day, was again discussed by the Commission. As a result thereof, the Commission decided unanimously not to hold up the contractor's work, unless the State is definitely relieved from all liabilities resulting therefrom. The Engineer was instructed to convey such information to Colonel Walsh.

The Hon. James H. Sturgis, County Judge of Umatilla County, again appeared before the Commission relative to securing for the County a loan of $150,000 Highway funds under the provisions of Chapter 358, Oregon Laws, 1949, to assist the County in financing repairs to its County Road System, that were necessitated by unusual weather conditions prevailing during the past winter. Judge Sturgis presented a resolution requesting such loan. The Chief Counsel advised the Commission that the resolution sets out the matter as required by law, and in all respects conforms to the statutory requirements. He submitted to the Commission a form of certificate, as required by law, by which certificate the Commission authorizes the Secretary of State to pay to Umatilla County the sum of $150,000 as a loan or advancement under the provisions of said law. The Commission unanimously approved the loan to the County, it appearing that the requirements have been satisfied. The form of certificate directed to the Secretary of State was also approved unanimously and signed. The certificate was then delivered to Judge Sturgis at his request, for presentation to the Secretary of State.

In this connection, the Secretary was instructed to refer all requests of this nature to the Chief Counsel to pass on the legal features, and to the Engineer to pass on the amounts of the proposed loan, then to bring the request to the attention of the Commission for final action.

Pursuant to instructions given him on the previous day, the Engineer reported the volume of traffic that passes through the intersection of the Pacific Highway East and Jennings Avenue, between Portland and Oregon City. He advised that the daily traffic volume on the highway is 13,300 vehicles, and that 1000 vehicles enter the intersection from Jennings Avenue. The Commission considered that such traffic volume justifies the installation of the three-way traffic actuated signal heretofore recommended by the Engineer, and thereupon unanimously approved the installation of said signal at State expense.

The Commission approved and signed agreements, et cetera, as follows:

Agreement with Wayne Simeral for cutting 50 cords of wood in Silver Falls State Park.

Release and assignment agreement re default of White Brothers Company on their bid and proposal for excavating and shaping the Oneonta Borrow Pit on the Oneonta Section of Columbia River Hwy. in Multnomah County.

Agreement with S.P. & S. Railway Company covering easement permit for construction of Columbia River Hwy. between Ranier and Goble.

Agreement with City of Albany covering improvement of certain City streets in vicinity of Highway Department Maintenance Station in Albany.

Lease agreement with Neva McCaffery, covering road material supplies for Ochoco Highway between Deschutes County Line and Powell Butte Secondary Highway Junction.

Agreement with Southern Pacific Company covering installation of flashing light signals at crossing of Albany-Lyons Secondary Highway and Southern Pacific Railroad tracks at Crabtree.

Letter designating certain officials of State Highway Department to sign reimbursement vouchers submitted to Public Roads Administration.

Proposed agreement with U. S. Coast Guard covering telephone pole line extension to serve Cape Arago State Park.

Five-year Permit covering 10.17 acres of tribal land on Klamath Indian Agency for stockpile site.

Agreement covering installation of traffic signal at intersection of 8th (US99E) and Madison Streets in City of Albany.

Modification of Project Agreement, Butte Creek - Kinzua Junction, Kinzua Road.

Modification of Project Agreement, Unity Junction-Mill Gulch Section, Baker-Unity Highway.

Joint Statement of Policy by the Oregon State Highway Commission and the Regional Administrator, Bureau of Land Management, United States Department of the Interior. Also Supplement thereto.

There being no further business to come before the Commission at this time, the meeting adjourned at 3:30 p.m.

Minutes of April 11 and 12, 1949

EXHIBIT "A"

Minutes of April 11 and 12, 1949

RESOLUTION

WHEREAS, in connection iwth the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Minutes of April 11 and 12, 1949

RESOLUTION

WHEREAS, by virtue of the provisions of Section 100-113, O. C. L. A., as amended by Chapter 359, Oregon Laws, 1947, the Highway Commission is empowered to appoint, with the approval of the Attorney General, a Chief Counsel and Assistant Counsel; and

WHEREAS, Samuel A. Hall is an attorney in good standing before the Oregon State Bar, is admitted to practice before all of the courts of the State of Oregon and before the United States District Court for the District of Oregon; and

WHEREAS, C. W. Enfield is an attorney in good standing before the Oregon State Bar, has been admitted to practice in all of the courts of the State of Oregon, and has now pending an application for admission to practice in the United States District Court for the District of Oregon, which application will be passed upon at the July, 1949, term of said court; and

WHEREAS, J. M. Devers, an Assistant Attorney General and Chief Counsel to the Oregon State Highway Commission, has requested and recommended that the said Samuel A. Hall and the said C. W. Enfield be appointed and authorized to serve as Assistant Counsels to the State Highway Commission; and

WHEREAS, the Attorney General of the State of Oregon has approved of such appointments;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That Samuel A. Hall be and he hereby is appointed, with the approval of the Attorney General, as an Assistant Counsel to serve in such capacity for the period of four years.

2. That C. W. Enfield be and he hereby is appointed, with the approval of the Attorney General, as an Assistant Counsel to serve in such capacity for the period of four years.

(Cont.)

EXHIBIT "B" (Cont.)

3. That each of said Assistants shall serve under the direction of the Chief Counsel, and in the absence of the Chief Counsel shall have full authority to perform any duty required or permitted by law to be performed by the Chief Counsel.

4. That the salary which shall be paid to each of said Assistants shall be fixed by the Commission as provided by law and shall be subject to the approval of the Attorney General.

5. That in addition to the salary which shall be paid to each of the said Assistants each shall be entitled to and shall be paid his actual traveling and other necessary expenses as may be incurred in the performance of their official duties.

6. That this resolution shall be entered in the minutes and records of the Commission as of the eleventh day of April, 1949.

EXHIBIT "C"

Minutes of April 11 and 12, 1949

R E S O L U T I O N

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, as amended, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1948 for street purposes as provided in said law, the several sums of amounts set opposite the names of the respective cities or towns:

4. This resolution shall be entered in the minutes and recrods of the Oregon State Highway Commission as of the 11th day of April, 1949.

EXHIBIT "E"

Minutes of April 11 and 12, 1949

R E S O L U T I O N

WHEREAS, prior to the 18th day of December, 1941, a certain market road in Multnomah County, the beginning point of which is on the Columbia River Highway approximately one mile west of Troutdale where the Columbia River Highway is intersected by the Sun Dial County Road, and runs thence northerly to the dike, which is the terminus of said county road, the total length of which is approximately 1.3 miles, was then a county road under the exclusive jurisdiction of the Board of County Commisssioners of said County; and

WHEREAS, pursuant to the provisions of subsection 36 of Section 100-115, O. C. L. A., the Commission, with the approval and consent of the County Commissioners of said County, selected said county road as a road to be added to the secondary state highway system, which county road was so added and was designated and is known as the Sun Dial Secondary Highway No. 124; and

WHEREAS, for the purpose of making possible necessary extensions and other developments of the Troutdale Airport the State and the County have been requested by the Port authoritites to abandon as a public highway the section of said Sun Dial Secondary State Highway No. 124 which lies within the boundaries of the Troutdale Airport as extended; and

WHEREAS, for the purpose of cooperating with the Port of Portland in its purpose to provide and maintain a more serviceable airport, the County and the State have agreed in writing to take from the secondary state highway system, and permit the same to revert to its original status as a county road, that section and part of the Sun Dial Secondary Highway No. 124 which begins at the southerly boundary of the Troutdale Airport area and extends northerly to the existing dike.

NOW, THEREFORE, be it and hereby is resolved by this Commission, all members being present and voting affirmatively, as follows:

1. That the section of the Sun Dial Secondary State Highway No. 124, which begins at the southerly boundary of the Troutdale Airport area and extends northerly to the existing dike, hereby is taken, removed, and eliminated from the secondary highway system, and said section of said highway shall henceforth no longer be under the jurisdiction of control of the State Highway Commission, but shall revert to its original status as a county road and as such shall be under the jurisdiction and control of the Board of County Commissioners of Multnomah County.

2. That the Secretary be and is hereby instructed to deliver to the County Commissioners of Multnomah County a duly certified copy of this resolution.

3. This resolution shall be entered in the minutes and records of the Commission as of the 11th day of April, 1949.

EXHIBIT "F-1"

Minutes of April 11 and 12, 1949

ORDER REDUCING MAXIMUM LOAD LIMITS

ON CERTAIN STATE HIGHWAYS

WHEREAS, the following roads or highways have been duly designated and declared to be and are state highways, and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as state highways, to-wit:

John Day Highway No. 5
Central Oregon Highway No. 7
Fremont Highway No. 19
Crater Lake Highway No. 22
Lakeview-Burns Highway No. 49
Elkton-Sutherlin Secondary Highway No. 231
Hood River Secondary Highway No. 281
Medical Springs Secondary Highway No. 340
Midland Secondary Highway No. 420
Chiloquin Secondary Highway No. 422

AND WHEREAS, the above-named state highways are, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which will damage and injure the said highways during the present period of freezing and thawing, and in order to protect said highways against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highways that the maximum weights permitted and authorized by law be reduced during such period;

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission that the maximum weights which shall be permitted upon said roads during said period shall be reduced and fixed as in this order provided.

NOW THEREFORE, the premises being in part as above stated, and the State Highway Commission being of the opinion that said roads were not built to sufficient standards to withstand adverse action of the elements and the maximum weights permitted and authorized by law, and the Commission having found upon due investigation that it will be for the best interests of said highways that the maximum total weight of load and vehicle which shall be hereinafter specified, shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named roads shall not exceed the weight herein fixed.

(Cont.)

EXHIBIT "F-1" (Cont.)

The maximum weights which shall apply to the following highways, to-wit:

John Day Highway, No. 5, M.P. 257.7 to 281.36 in Malheur County; effective date- March 1, 1949; and from M.P. 191.0 to 213.5 in Grant and Baker Counties; effective date- March 7, 1949

Central Oregon Highway No. 7, M.P. 48.0 to 116.0 in Deschutes, Lake and Harney Counties; effective date- March 9, 1949.

Fremont Highway No. 19, M.P. 0.0 to 143.43 in Deschutes, Klamath and Lake Counties; effective date- March 7, 1949

Crater Lake Highway No. 22, M.P. 40.55 to 69.7 in Jackson and Klamath Counties; effective date- March 21, 1949

Lakeview-Burns Highway No. 49, entire length, in Harney and Lake Counties; effective date- March 7, 1949

Elkton-Sutherlin Secondary Highway No. 231 from M.P. 14.74 to 26.61, in Douglas County; effective date- February 1, 1949; and from M.P. 14.74 to 25.18 also in Douglas County; effective date March 9, 1949

Hood River Secondary Highway No. 281, from M.P. 5.14 to 17.28 in Hood River County; effective date- March 5, 1949

Medical Springs Secondary Highway No. 340, from M.P. 0.0 to 21.6 in Union County; effective date- March 7, 1949

Midland Secondary Highway No. 420, entire length, in Klamath County; effective date- March 15, 1949

Chiloquin Secondary Highway No. 422, entire length, in Klamath County; effective date- March 17, 1949

shall be as follows: The maximum combined weight bearing on the surface of the highway at contact with the tread on all of the wheels of a vehicle or combination of vehicles shall not exceed thirty-six thousand (36,000) pounds; and, the maximum combined weight bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles shall not exceed eight thousand (8000) pounds.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Sec. 115-394, O. C. L. A., shall be in full force and effect from the effective date hereinabove specified, until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of each of the above-described highway sections and at important crossroads on said highways, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of each county affected by this order, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this 11th day of April, 1949

Minutes of April 11 and 12, 1949

RESOLUTION LIFTING REDUCED LOAD LIMITS

ON VARIOUS STATE HIGHWAYS

WHEREAS, on the 24th day of January and on the 28th day of February, and on the 11th day of April, 1949, at meetings of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted resolutions reducing the maximum load limit on various state Highways and sections of state highways; and

WHEREAS, subsequent to the passage of the said resolutions, conditions have changed so that it no longer is necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolutions,

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit as set forth in the said resolutions of January 24th, February 28th and April 11th, 1949, on various state highways or sections thereof, to-wit:

be, and the same hereby is rescinded and canceled as of this date, and the maximum load limit permissible on such highways hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that a certified copy of this resolution be furnished to the county clerk of each county in which said highways are located, and to the Superintendent of the Department of Police for his information.

Dated this 11th day of April, 1949.

EXHIBIT "G"

Minutes of April 11 and 12, 1949

R E S O L U T I O N

WHEREAS, the Pacific Highway East, also known and designated as US99E, is one of the main traveled highways of the State over which there moves an average daily traffic of 11,000 vehicles, consisting of both local and through traffic; and

WHEREAS, Fifth Street in the City of Oregon City has heretofore been by the Highway Commission designated as and now is a street of said city over which there has been and is now being routed traffic moving over the said Pacific Highway East; and

WHEREAS, in the opinion of the State Highway Commission the parking of cars and other vehicles along the curb on the south side of said street tends to inconvenience traffic, creating a potential traffic hazard and otherwise interferes with the normal flow of traffic upon said street; and

WHEREAS, the City of Oregon City on March 9, 1949, by appropriate resolution has prohibited the parking of any vehicle upon the south side of Fifth Street (also known as U. S. Highway 99E) between Main Street and the underpass at the Southern Pacific Company railway tracks; and

WHEREAS, the city has served on the State Highway Commission a copy of said resolution; and

WHEREAS, it is the recommendation of the State Highway Engineer that regulations imposing "no parking at any time" restrictions should be maintained with respect to said section of highway; and.

WHEREAS, it is the opinion of the Commission, based upon the foregoing facts and conditions, that certain parking regulations should be established and maintained with respect to said section of highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively as follows:

1. That the south side of the section of the Pacific Highway East, US99E, (Fifth Street), which begins at Main Street and ends at the underpass at the Southern Pacific Company railway tracks in the City of Oregon City, be and said portion of said section of highway hereby is declared to be a "no parking at any time" area, and from and after the passage and adoption of this resolution the parking of motor vehicles within said area shall be prohibited.

2. That the Engineer be and he hereby is instructed to erect and thereafter maintain at appropriate places within said defined area the approved "no parking at any time" signs.

3. That this resolution be entered in the minutes and records of the Commission as of the 11th day of April, 1949, and an exact copy hereof mailed to the Mayor of the City of Oregon City and a like copy to the Superintendent of State Police.

Burns, Oregon
May 2, 1949

The State Highway Commission met in a special session at 4:30 p.m. in Room 228 of the Arrowhead Hotel, for disposal of routine matters that had accummulated subsequent to its regular meeting held in Portland on April 11 and 12, 1949. Present were:

T. H. Banfield, Chairman
Ben R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

The Chief Counsel brought up for discussion the matter of repairing a building owned by the Fannie G. Caughell Estate, in the town of Gold Beach. He advised that this building was moved to accommodate the highway improvement at this place, but after it was re-established, it became evident that some rearrangement of the entrance to the building would be necessary, and that a wall would have to be constructed to support the building on two sides. He estimated the cost to do this work at $450., and he recommended approval of the expenditure because in his estimation it is the State's responsibility. The Commission approved the recommendation unanimously.

The Commission discussed a letter from the City of Roseburg, and a notice of assessment from this city for the improvement of Jackson Street, which is adjacent to the Highway Department's Division Headquarters at this place. The Engineer advised that the Highway Commission owns several lots at this location, which have been assessed in the amount of $2,384.94 as a proportionate cost of improving Jackson Street between Roberts and Rice Streets. He recommended approval of the payment of this assessment because it will enhance the value of the State's property, and it will permit access to the rear of this property on a paved street at some future time. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Engineer reported an offer from Mr. George Gray, Seaside, Oregon, to pay $400. for 45 merchantable trees located on a five acre quarry site, owned by the State Highway Department, near the Sunset Highway, three and one-half miles east of the hamlet of Elsie. He said that the trees are of no value to the state and recommended that they be sold to the highest bidder therefor, as determined by competitive bidding, and based on a cruise and appraisal by the State Forester. The Commission unanimously approved the recommendation.

The Chief Counsel reported a complaint from Kenneth D. Horn, Florence, Oregon, concerning the operation of his truck on the ocean beach. It appears that Mr. Horn has an Army surplus amphibian truck which he uses for pleasure, fishing and riding through the surf, and that he has to pay a State license of

$125. in order to operate it on the beach. Moreover, he has to secure a permit from the Public Utilities Commissioner before he can legally use this truck to recover automobiles that may become stalled in the sand. Mr. Horn complains that he is required to pay a fee before he is allowed to use the beach area for his purposes, whereas venders of fireworks, candy, popcorn, etc. who have very small investments compared to his, are allowed the use of the beach area without cost. The Chief Counsel advised that there is no direct statute or law covering the subject, however the legislature has vested in the State of Oregon title to the shore of the ocean, and has made the shore of the ocean a public highway; moreover, it has made the laws of the road applicable to the beach, so the Commission could, if it so desired, interpose some objection to the use of the beach area if the purposes for which it is being used become a nuisance. The Commission approved the report, and ordered that the information be conveyed to Mr. Horn, and that he be further informed that the State Highway Commission has no authority to act if he is operating his amphibian truck on the beach for "good samaritan" purposes. The matter was referred to the Chief Counsel to handle.

Pursuant to instructions from the Commission, the Chief Counsel presented a form of resolution to be used by County Courts when applying for an advancement or loan of State Highway funds under the provisions of Chapter 358, Oregon Laws, 1949, to finance repairs to county roads which have been severely damaged by the unusually bad weather conditions of the past winter. (See Exhibit "A" attached hereto, for copy of resolution.)

The Chief Counsel also presented a form of certificate for use by the Highway Commission in recommending to the Secretary of State, approval of the loans requested by the Counties under such law. (See Exhibit "A-1" attached hereto, for copy of certificate.) After due consideration of these matters, the Commission approved both forms by unanimous vote, and ordered that a copy of the resolution be sent to the County Court of each County as a guide when submitting requests for loans under this statute.

In this connection, resolutions were presented from the County Courts of Polk County and Marion County, requesting loans of $88,945 and $100,000 respectively, for the purpose for which the loans were authorized. The Chief Counsel advised that both requests are in order and recommended approval of the same. The Commission approved the recommendation and thereupon signed the certificates directed to the Secretary of State, recommending the granting of both loans.

The Chief Counsel brought up for discussion the claim of the Southern Pacific Company against Kuckenberg Construction Co., contractors for the construction of a Forest Highway section of the North Santiam Highway between Niagara and Detroit, in Marion County, which claim amounts to $22,259.92, and represents reimbursement to the railroad company of the cost of furnishing watchmen to protect the Railroad Company's interests during the construction of this highway. The Chief Counsel advised that the State is interested in this matter because of the fact that when negotiations were carried on for right of way across the Railroad Company's property, the State guaranteed to the Company that it would pay the cost of such watchmen's services, and because Kuckenberg Construction Company has refused to assume such expense. He advised that the Railroad Company is particularly anxious to

secure settlement of its claim on or before July 15th, and suggested that it would be advisable for the Highway Commission to pay the claim of the Railroad Company and recover from the Federal Government later, out of funds due and payable to Kuckenberg Construction Co., under its contract. The Commission approved the suggestion unanimously on the condition, however, that the State's interests are properly protected.

The Chief Counsel reported the results of a discussion with the representatives of the Portland Traction Company regarding the vacation of an unnamed street which lies between the Pacific Highway East and the Company's Portland-Oregon City electric line, at Jennings Lodge, Clackamas County. He recalled that this matter was first presented to the Commission at its last meeting, but action thereon was deferred pending investigation and report on the matter of the reversion of the area within the dedicated street, were it vacated. Investigation has been made, he said, and it has been found that reversion of all the width of the street, abutting and adjoining Lots 18 and 25, which are owned by the State Highway Department, will be to the State of Oregon as it is appertinent to the legal ownership of the lots. In view of this information, the Commission unanimously approved the vacation of the street as previously recommended by the Engineer and Chief Counsel. The form of "consent to vacate" the area was thereupon signed.

The Engineer reported on the status of the proposed Dewey Avenue Underpass Project on the Baker-Unity Highway in the City of Baker. He advised that all of the right of way has been acquired and that the approval of the City Council of Baker has been secured. Moreover, a hearing has been held before the Public Utilities Commissioner who has issued his orders, which are in accord with the recommendation of the State Highway Commission, and provide that the Union Pacific Railroad Company shall pay 10% of the cost of underpassing its tracks, and the Sumpter Valley Railroad Company shall make certain donations such as ties, railroad steel, used railroad bridges that are suitable for use on its revised line, etc., such donations being valued at more than 10% of the cost of the project. This project he said, should be ready to advertise for bids in about two months, provided the necessary four-way agreement between the Union Pacific Railroad Company, the Sumpter Valley Railroad Company, the City of Baker and the State Highway Commission is consummated. The Commission approved the report.

Pursuant to instructions given him at the previous meeting, the Engineer presented a written report on the total mileage of each primary and each secondary highway that was posted for a 50% reduced load limit during the period December 31, 1948 and April 15, 1949, because of extremely adverse weather conditions. This report is summarized as follows:

	Total Miles in System	Miles Under Load Limit	Percentage of Total
Primary Highways	4820	958.41	20%
Secondary Highways	2478	835.18	33.7%
Total Composite	7298	1793.59	24.5%

(For details, see copy of Engineer's report in general files.) The Commission approved the report and ordered it filed.

The Commission discussed a petition signed by 95 residents of Florence, Oregon, in which request is made that the Commission take action to slow up traffic along a two-mile section of the Oregon Coast Highway, north from the Town of Florence, as a safeguard to school children, and as a traffic accident prevention measure. The Engineer advised that this matter had been investigated by the Traffic Engineer, who reports that conditions along this section of highway do not warrant or justify the designation of a reduced speed zone, and who recommends that the request be denied. He expressed his concurrence in the recommendation. The Commission approved the recommendation unanimously.

The Commission discussed a report from Mr. Malcolm Hawke, Chief Accountant, on his inspection of the records of Babbidge and Holt, Inc., with respect to its contract with the Commission for providing ferry service across the Columbia River between Astoria, Oregon, and Megler, Washington. The report covers two periods, viz: January 1, 1948 to March 31, 1949, and June 1, 1948 to March 31, 1949, and indicates that during the first of these periods the ratio of net profit to revenues was 8.1% and during the second period the ratio was 11.6%. The Commission considered such profit to be not exorbitant, and accordingly decided to extend the period of the contract for one year, to 6:30 a.m. on June 1, 1950, by the exercise of its right under the original contract with the Company, which provides for such extension. The Commission ordered that the contractor be so informed.

There was presented for the Commission's consideration a petition signed by 19 owners of property along the Oregon Coast Highway between the West Warrenton Junction and a point 1000 yards easterly thereof, requesting protection from hazards caused by excessive speed by motorists along this section. The Engineer advised that the Traffic Engineer, who has investigated this matter, reports that his findings do not warrant the designation of a speed zone, however, it appears that practically all of the area is within the city limits of Warrenton, an incorporated town, where the control of the speed of vehicles comes under the authority of the State Speed Control Board. He recommended in view thereof, that the petition be referred to the State Speed Control Board for its consideration, with the thought in mind that if this Board designates a certain reduced speed zone, then the State Highway Commission might see fit to extend it the short distance that the district lies outside of the city limits. The Commission approved the recommendation and so ordered.

A letter was presented from the City of Heppner requesting the improvement of drainage facilities along the Heppner Highway in this city, to avoid its being damaged by washouts caused by drainage water from the hillsides adjoining the highway. The Engineer advised that the matter has been investigated by Division Engineer Chidsey, who reports that a bad drainage condition exists there, which should be corrected, and who suggests that this could be done by some grade widening, construction of curbs and installation of catch basins. He roughly estimated the cost of the work at $12,000, and advised that the City of Heppner probably will assume the cost of drainage

and curbs, amounting to about $4,000, which would leave a balance of $8,000 to be paid by the State. He suggested that he be authorized to make a more detailed survey to get a better idea as to what the actual cost will amount to, and to contact the city to ascertain what cooperation the city will extend. The Commission unanimously approved the suggestion and so ordered.

A request was presented from the City of Tualatin for the improvement of drainage conditions and the oiling of macadam shoulders on the Beaverton-Aurora Secondary Highway for about two blocks through the Tualatin business district. The Engineer advised that to correct the condition referred to will require the construction of about 1000 lineal feet of eight inch storm sewer, and the oiling of 1200 feet of shoulders. He estimated the cost of the work at $5,500, and recommended that the project be considered in the 1950 Minor Betterment budget. The Commission approved the recommendation by unanimous vote.

The Commission discussed a letter from Mr. E. R. Fatland, Condon, regarding the extension of a storm sewer along the John Day Highway past their City Park. It appears that the city sanitary sewer is installed directly under a highway drainage ditch, and that surface water from the highway which flows along this ditch causes erosion, which, unless remedial measures are taken, will damage the city's sewer line; also, that to correct the situation will require the installation of drainage pipe to carry the water from the highway. In the discussion of this matter, it was recalled by Chairman Banfield and Commissioner Chandler that the Commission on a trip through Eastern Oregon in 1948, inspected the premises in company with Mr. Fatland, and assured him orally at that time that the State would furnish the pipe for this installation, but the action was not made a matter of record and the work has not been done. In view of the findings, the Commission voted unanimously to furnish the necessary pipe for this project, which is estimated to cost about $3,960., thus confirming the oral action previously taken, it being the understanding of the Commission however, that its obligation is limited to furnishing the pipe only, and that the city will have to install it at city expense.

The Engineer reported an overrun in the total cost of the work performed by contractor Gerald Miller, on the West Cottonwood Canyon Section of the Wasco-Heppner Secondary Highway, State Highway Contract No. 2975, such overrun amounting to $5,924.22, and being 10.77% over the amount of the project authorization. The Commission approved the overrun unanimously and ordered appropriate transfer of funds in the Commission's books to show an additional authorization to the project.

The Commission discussed a report of the Engineer on the status of a Special State Tax Street Fund Project in the City of Hillsboro, consisting of grading, surfacing and paving, which is estimated to cost $10,300. The Engineer advised that according to the arrangement with the City, the City was to do the grading and gravel surfacing at an estimated cost of $5,100, and the State was to pave the street at an estimated cost of $5,200, however the city now advises that it will not be able to complete its part of the work this year, and has asked that the project be postponed until 1950.

He recommended, in view thereof, that this project be deleted from this year's program and that the monies be allowed to revert to the unobligated balance of Special State Tax Street funds for utilization elsewhere, with the understanding that the project be reinstated in 1950 if the city can fulfill the requirements at that time. The Commission approved the recommendation unanimously.

The Commission also discussed a report from the Engineer on the status of a 1949 Special State Tax Street Fund Project in the City of Tillamook. The Engineer recalled that the Commission previously approved a $33,000 project in this city and authorized an expenditure of $15,000 of State Highway funds to assist in financing the work, the balance of the cost to be paid by the city. He advised that according to information now received from the City Manager, the voters at a special city election on April 12th rejected a proposed bond issue to pay for the city's portion of the cost, in view of which, the city now requests cancellation of the entire project. He recommended approval of the request, and that the money thus released be allowed to revert to the unobligated 1949 balance of the funds under discussion, so they will be available for re-allocation to other projects. The Commission approved the recommendation unanimously.

The Commission discussed, and upon recommendation of the Engineer, approved an "option for cooperative construction project" in the city of Dufur, providing for the improvement of North Second Street from its intersection with The Dalles-California Highway to its intersection with Klinger Street, a distance of approximately .4 mile, at an estimated cost of $4,800.

A letter was presented from the City of Klamath Falls, in which the Commission is requested to authorize repairs to Alameda Street between Esplanade Street and Pacific Terrace, future route of the Klamath Falls-Malin Highway, for which the State already has acquired right of way. The request was based on the fact that the State now owns the right of way and at some future time will continue the construction of a highway along this route. The request was denied.

The Engineer requested authority to enter into a supplemental agreement with J. C. Compton, contractor for the improvement of the Smallwood Creek-Benton County Line Section of the Alsea Highway, to furnish an additional 10,000 cubic yards of surfacing material that is required to repair the damage caused by frost action during the past winter. He advised that Mr. Compton has agreed to furnish this rock at $2.95 per yard, which in his estimation is a very fair price, and is lower than the rock could be obtained elsewhere, because his crushing plant is already set up and he would not be put to extra expense of moving in another plant. He suggested, if the Commission approves the arrangement, the transfer of $30,000 from the frost and flood damage account to finance the furnishing of this rock. Upon assurance from the Chief Counsel that the Commission has legal authority to increase the project in the manner planned by the Engineer, the Commission unanimously authorized the Engineer to complete the arrangement with Mr. Compton on the basis of his report.

The Commission had under discussion a request from contractors Hall and Wols that they be relieved from their obligation to paint the steel in

Yaquina Bay Bridge, a contract for which work was awarded to them on April 11, 1949, as a result of competitive bidding. They alleged that in figuring this job they based their bid price on an estimated 556 tons of steel as contained in the written specifications, and that they did not receive the Engineer's letter, sent to them later, changing the tonnage from an estimated 556 tons to an estimated 1029 tons, soon enough to permit them to change the amount of their proposal. The Engineer advised that when the proposal forms were sent to prospective bidders, the tonnage of steel to be painted was shown therein as 556 tons, rather than 1029 tons, and when the mistake was discovered, all bidders interested in this particular project were advised by registered letter on April 4, 1949, of the correct weight of the steel to be painted. He further stated that a return receipt was received from Hall and Wols, signed by William H. Strahn, dated April 5, 1949, however, the contractors allege that does not constitute notice to them because Mr. Strahn is not a member of their firm, but is simply the owner of the building which they rent for storage of their equipment; moreover, neither of the members of the firm were in their office when the letter was delivered, and it wasn't called to their attention so they were not in possession of the information when their bid was prepared. He recommended in view of the circumstances, that Hall and Wols be relieved of their obligation, and their bond be returned to them. The Chief Counsel advised that in his estimation the Commission could not hold the contractors to their bid under the circumstances because it could not be proven that they received the information as to the correct tonnage of steel to be painted in time to use it in bidding the job. He concurred in the recommendation. After careful consideration of this matter, the Commission approved the recommendation unanimously, and instructed the Engineer to readvertise the project for bids to be received at the next meeting.

The Engineer reported the lifting of reduced load limits which have been in effect for the past several weeks on portions of the following highways, conditions being such that the restrictions no longer are necessary or required:

EDDYVILLE-BLODGETT SECONDARY HIGHWAY No. 180, from Nashville to Blodgett, in Lincoln and Benton Counties,

McKENZIE HIGHWAY No. 15, from M.P. 9.0 to M.P. 55.0 and from M.P. 91.17 to M.P. 111.55 in Lane and Deschutes Counties,

MONMOUTH SECONDARY HIGHWAY No. 194, from junction with Kings Valley Secondary Highway to Monmouth, in Polk County,

MT. HOOD HIGHWAY No. 26, from Cooper Spur to junction with Columbia River Highway, in Hood River County,

ALSEA HIGHWAY No. 27, from Hatchery Creek to junction with Corvallis-Newport Highway at Philomath, in Benton and Lincoln Counties,

JOHN DAY HIGHWAY No. 5 from M.P. 257.7 to M.P. 281.36 and from M.P. 191.0 to M.P. 213.5, in Malheur, Grant and Baker Counties,

CORVALLIS-EAST SIDE SECONDARY HIGHWAY No. 210 from Peoria County Road junction to Albany city limits, in Linn County,

---

The Commission approved the Engineer's action in this matter and thereupon adopted by unanimous vote, the attached resolution with respect thereto, marked Exhibit "B", which resolution by this reference is made a part hereof with like effect as though copied in full herein.

The Engineer requested approval of "out of state" travel expense in the amount of $18 for Mr. J. Al Head, Assistant Traffic Engineer, while consulting with the Planning Survey Personnel of the Public Roads Administration in Washington, D. C., in June, 1949. He advised that Mr. Head expects to be in the East on personal business in the early part of June, and will pass through Washington, D. C., which will give him an opportunity to discuss with the Planning Survey Officials several phases of planning survey work, which can be handled better by contact than by correspondance. The Commission unanimously approved the request.

The Commission discussed the designation of personnel to represent the State Highway Department at the annual m eting of the Western Association of State Highway Officials, which is to be held in Denver, Colorado, during June 13, 14, 15, and 16, 1949, and unanimously authorized the following to attend this meeting at State expense:

W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
H. G. Smith, Construction Engineer
E. A. Collier, Maintenance & Equipment Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer

The matter of posting the Snake River Bridges at Weiser, Idaho and Payette, Idaho, for reduced weight loads, had the attention of the Commission. It appears that both of these bridges are maintained by the State of Idaho, which has posted them for reduced loads of six tons and seven tons respectively, but the postings have not been confirmed by the Oregon State Highway Commission, so the Oregon police can not make arrests for overloading until that is done. The Commission confirmed such postings. The attached resolution, marked Exhibit "C", relative thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Engineer reported an offer from the City of Salem to pay $200 for an old boiler stored at the Highway Department shops in Salem. He advised that the boiler was purchased in 1928; that it is obsolete for highway purposes, and to make it usable will require replacement of the flues. He recalled that the boiler was advertised for sale some time ago, and the highest offer received for it was $20, which offer was rejected. He recommended acceptance of the offer of the City of Salem, which in his estimation represents the true value of the boiler. The Commission approved the recommendation unanimously.

The Engineer brought up for discussion the matter of abandoning a portion of the Buell-Salt Creek Section of the Dallas-Coast Secondary Highway. He advised that this highway has been realigned and that the former Highway Commission on November 30, 1935, by resolution, retained portions of the original right of way, particularly along the section over Butler Hill, although it now appears that this particular unit is simply surplus and of no value for State Highway purposes. He further stated that an adjacent property owner, who also owns the small area which lies between the old highway right of way and the new highway, wants to acquire the tract and has agreed to deed to the State in exchange therefor, a strip along this frontage to provide a standard width right of way on the new route. The Engineer recommended approval of such exchange of property, and the adoption of an appropriate order by the State Highway Commission to affect the same. The Chief Counsel concurred. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution, marked Exhibit "D", with regard thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed a letter from Foster and Kleiser Company, Portland, relative to a state-wide survey of roadside occupancies and advertising signs, consisting of a five-day inspection of portions of the major U.S. highways, and of portions of the most important State Highways. The purpose of the survey is to point out the commercial occupancy density; those signs which may be considered a safety hazard; those that may be encroaching on the highway right of way; signs that might conflict with highway directory signs; and density of sign encroachments that might exist in designated scenic areas. It was the thought of the Company, as expressed by Mr. M. D. Cole, its Portland Branch Manager, that such a survey would prove of value to the State, because it might lead to the solution or alleviation of the perplexing fringe problems. It appears that the Foster and Kleiser Company will furnish a car and a representative in connection with this survey, that the outdoor industry will furnish from its Chicago Office an Engineer who is experienced in this type of work, and that they are asking the State Highway Commission to authorize one of its Engineers to join the group. Following discussion, the Commission authorized the Engineer to appoint someone to accompany the group on this survey, it being strictly understood that by so doing the Commission is not obligated in any way to follow the recommendations that might be forth coming as a result, neither is the Commission making any committment, implied or otherwise, as to its subsequent actions concerning this subject.

The Commission discussed a letter from the U. S. Army Engineers, requesting permission to enter upon the right of way of the Pacific Highway West (North Denver Avenue, Portland) for the purpose of reconstructing and enlarging a ring levee around the east side of the North Denver Avenue underpass. A form of permit prepared by the Army Engineers covering the request was presented. The Chief Counsel advised that he has examined the form of permit submitted by the Army Engineers, and so far as legality is concerned, there is nothing to prevent the Commission from granting it, if it so desires. The Engineer advised that he has given the matter study from the engineering standpoint, and that it is his recommendation that the Commission approve the request. As a result of discussion of this matter, the Commission unanimously approved the granting of the permit.

The Commission approved and signed agreements, etcetera, as follows:

Letter directed to the Secretary of State, recommending approval of advancement of State Highway funds in the amount of $88,945 for Polk County, under the provisions of Chapter 358, Oregon Laws, 1949.

Letter directed to the Secretary of State, recommending advance payment of $100,000 to Marion County under the provisions of Chapter 358, Oregon Laws, 1949.

"Consent to vacate" an unnamed street bordering State Highway property and the Portland-Oregon City electric line at Jennings Lodge, Clackamas County.

Permit authorizing the U. S. Army Engineers to enter upon the right of way of the Pacific Highway West (North Denver Avenue, Portland) for the purpose of reconstructing and enlarging a ring levee around the east side of North Denver Avenue underpass.

The meeting adjourned at 5:40 p.m.

IN THE COUNTY COURT OF THE STATE OF OREGON

FOR _____ COUNTY

In the Matter of Application for State Highway Funds under and subject to the provisions and requirements of Chapter 358, Oregon Laws 1949

R E S O L U T I O N

WHEREAS, during the period extending from October 1, 1948, to April 1, 1949, county roads and bridges were damaged and in some instances destroyed by abnormally inclement weather conditions which prevailed throughout _____ County in the State of Oregon; and

WHEREAS, _____ County is without funds adequate to repair the damage to and destruction of said roads and bridges in said County caused by said abnormal inclement weather conditions; and

WHEREAS, the Legislature of the State of Oregon has provided by the enactment of Chapter 358, Oregon Laws 1949, that the State Highway Commission may advance and loan to said County from State Highway funds an amount of money not exceeding one-half of the amount distributed to _____ County under the provisions of Section 100-129, O. C. L. A., and acts amendatory and supplementary thereof, between the dates of July 1, 1947, and April 1, 1949, and

WHEREAS, it appears to this Court and the Court now finds that roads and bridges within _____ County were damaged and in some instances destroyed by reason of said weather conditions to such an extent that it will require the sum of $_____ to repair, reconstruct, rebuild, and recondition said county roads and bridges so that they may be made available again to normal traffic use; and

WHEREAS, _____ County has received under the provisions of Section 100-129, O.C.L.A., and acts amendatory and supplementary thereof, between the dates of July 1, 1947, and April 1, 1949, the sum of $_____; and

WHEREAS, pursuant to the provisions, terms and conditions of said Chapter 358, Oregon Laws 1949, _____ County is entitled to a loan or advancement of State Highway funds in the sum or amount of $_____.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the County Court of _____ County, Oregon, sitting for the transaction of County

Minutes of May 2, 1949

RESOLUTION

Honorable Earl T. Newbry
Secretary of State
Salem, Oregon

Dear Sir:

For the purpose of conforming with the provisions of Chapter 358, Oregon Laws 1949, the State Highway Commission hereby certifies to the Honorable Secretary of State the following facts:

1. That there has been filed with this Commission a resolution duly certified to be a true and correct copy of the original thereof on file in the office of the County Clerk of _____ County, State of Oregon.

2. That it appears from said resolution that the County Court of said County has determined, declared and set forth that the roads and bridges of said County were damaged by the abnormally inclement weather conditions prevailing throughout Oregon during the period from October 1, 1948, to April 1, 1949, and said County has found and declared that to reconstruct, repair and rebuild said roads and bridges will require the sum of $_____.

3. That it is declared and represented in said resolution that there are at this time insufficient funds on hand subject to expenditure by the County for the repair and reconditioning of said County roads and bridges so that commerce and industry may proceed unhampered, and so that further damage to said roads and bridges may be prevented.

4. That it is represented and shown in said resolution that the sum of $_____ does not exceed one-half the amount of funds distributed to _____ County out of State Highway funds under the provisions of Section 100-129, O.C.L.A. and acts amendatory and supplementary thereof between the dates July 1, 1947, and April 1, 1949.

5. That in said resolution it is certified and represented by and said county requests the Oregon State Highway Commission to advance and loan to _____ County the sum of $_____ to be used for the repair and restoration of said roads and bridges which have been damaged, and in some instances, destroyed by the abnormal weather conditions which prevailed in the State of Oregon between October 1, 1948, and April 1, 1949.

(Cont.)

EXHIBIT "A-1" (Cont.)

6. That this Commission represents and certifies that the records in the State Highway Commission's office and in the Secretary of State's office disclose and show that said County has received during the period between the dates of July 1, 1947, and April 1, 1949, highway funds in accordance with the provisions of Section 100-129, O.C.L.A. and acts amendatory and supplementary thereof in the sum of $_____.

7. It is further certified that in the opinion of the Highway Commission, _____ County has by its findings, declarations and disclosures, all of which are set forth in said resolution, met, complied with and satisfied the provisions of said law, and is thereby and therefore entitled to a loan and advancement of State highway funds in the sum of $_____.

THEREFORE, the Highway Commission does hereby recommend and does hereby authorize the Secretary of State to pay to the County Court of _____ County, under the provisions and subject to the terms and conditions of said law, the sum of $_____ out of State Highway funds, and said Secretary of State is authorized and directed to charge said loan and advancement against future allocations of highway funds made to said County.

The Secretary of State hereby is requested and is hereby authorized, within the meaning and purpose of said law, to deduct and withhold from future allocations of State highway funds made to said County under Section 100-129, O.C.L.A. and acts amendatory and supplementary thereof, the several sums and amounts provided for in and authorized by said law until the full amount of said loan and advancement with appropriate interest has been fully paid.

A full and complete copy of this certificate and authorization shall be delivered to the Secretary of State, and a like copy to the County Court of said County.

Dated this _____ day of _____, 1949.

EXHIBIT "B"

Minutes of May 2, 1949

RESOLUTION LIFTING REDUCED LOAD LIMITS

ON CERTAIN STATE HIGHWAYS

WHEREAS, on the 24th day of January, 1949; the 28th day of February, 1949; and the 11th day of April, 1949, at meetings of the Oregon State Highway Commission, all members being present and participating, the said Commission passe and adopted resolutions reducing the maximum load limit on certain state highways, including the following highways, to wit:

EDDYVILLE-BLODGETT SECONDARY HIGHWAY No. 180, from Nashville to Blodgett, in Lincoln and Benton Counties, on January 24, 1949,

McKENZIE HIGHWAY No. 15, from M.P. 9.0 to M.P. 55.0 on January 24, 1949, and from M.P. 91.17 to M.P. 111.55 on February 28, 1949, in Lane and Deschutes Counties,

MONMOUTH SECONDARY HIGHWAY No. 194, from junction with Kings Valley Secondary Highway to Monmouth, in Polk County, on January 21, 1949,

MT. HOOD HIGHWAY No. 26, from Cooper Spur (M.P. 78.4) to junction with Columbia River Highway, in Hood River County, on Feb. 28, 1949,

ALSEA HIGHWAY No. 27 from Hatchery Creek (M.P. 12.0) to junction with Corvallis-Newport Highway at Philomath, in Benton and Lincoln Counties, on January 24, 1949,

JOHN DAY HIGHWAY No. 5 from M.P. 257.7 to M.P. 281.36 and from M.P. 191.0 to M.P. 213.5, in Malheur, Grant and Baker Counties, on April 11, 1949,

CORVALLIS-EAST SIDE SECONDARY HIGHWAY No. 210 from Peoria County Road junction to Albany city limits, in Linn County, on February 28, 1949,

and

WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said above-named highways;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the following highways:

(Cont.)

EXHIBIT "B" (Cont.)

EDDYVILLE-BLODGETT SECONDARY HIGHWAY No. 180 from M.P. 14.25 to M.P. 19.29 in Benton County effective April 12, 1949, and from Nashville to M.P. 14.25 in Lincoln and Benton Counties effective April 25, 1949,

McKENZIE HIGHWAY No. 15 from M.P. 50.0 to M.P. 55.0 in Lane County, effective April 15, 1949,

MONMOUTH SECONDARY HIGHWAY No. 194 from junction with Kings Valley Secondary Highway to Monmouth in Polk County, effective April 18, 1949,

MT. HOOD HIGHWAY No. 26 from M.P. 85.0 to M.P. 86.56, in Hood River County, effective April 18, 1949,

ALSEA HIGHWAY No. 27 from M.P. 14.6 to M.P. 20.52, effective April 18, 1949, and from M.P. 20.52 to 25.3, in Lincoln County, effective April 25, 1949,

JOHN DAY HIGHWAY No. 5 from M.P. 191.0 to M.P. 213.5, in Grant and Baker Counties, effective April 25, 1949,

CORVALLIS-EAST SIDE SECONDARY HIGHWAY No. 210 from Peoria County Road (M.P. 1.25) to M.P. 8.9, in Linn County, effective April 25, 1949,

be and the same hereby is rescinded and cancelled as of the second day of May, 1949, and the maximum load limit permissible on the said sections of said highways hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that certified copies of this resolution be furnished the county clerks of the counties in which said sections of said highways are located, and the Superintendent of the Department of State Police for his information.

Dated this second day of May, 1949

EXHIBIT "C"

Minutes of May 2, 1949

RESOLUTION

WHEREAS, the boundary between the State of Oregon and the State of Idaho is defined and determined by a body of water designated and known generally as Snake River, and

WHEREAS, a state highway in the State of Oregon, to wit: the Weiser Spur, which connects with the Old Oregon Trail Highway in Oregon, is connected with a state highway in the State of Idaho by means of a bridge known as the Weiser Bridge, and

WHEREAS, a state highway in the State of Oregon, to wit: the Payette Spur, which connects with the Old Oregon Trail Highway in Oregon, is connected with a state highway in the State of Idaho by means of a bridge known as the Payette Bridge, and

WHEREAS, there is imposed by law on each of said states a joint and several obligation to maintain each of said bridges in a condition so that each and both will be reasonably safe for public travel thereover, and

WHEREAS, by virtue of a joint agreement between said states, Idaho has undertaken to maintain each and both of said bridges, but notwithstanding the provisions of said agreement, each state is under obligation to cooperate with the other in an effort to safeguard said structures against impairment caused by the movement thereover of a kind and character of traffic which may tend to overstress the structures or any one of the same and thereby make said structures unsafe for traffic, and

WHEREAS, as a result of a careful inspection by representatives of the State of Idaho, it has been found that vehicles and combinations of vehicles permitted to use said structures should be limited as to gross weight, and to that end and for such purpose the State of Idaho has by official act fixed a maximum gross load of vehicle or combinations of vehicles permitted to use said bridges of seven tons for the Weiser Bridge and a maximum gross load for the Payette Bridge of six tons, and

WHEREAS, the State of Idaho has requested the State of Oregon to fix and prescribe like limits on the Oregon side of each of said bridges, which request, the State of Oregon, speaking by and through its State Highway Commission, is of the opinion should be granted, and

WHEREAS, by the provisions of Section 115-394, O.C.L.A., the Commission is empowered to reduce the maximum load which may move over any state highway or section thereof, and may reduce the speed at which traffic may operate over such highways or sections of highways if and when the Commission finds upon investigation that such action is necessary in order to preserve said highway, or that said action is in the interest of the general public, and

(Cont.)

EXHIBIT "C" (Cont.)

WHEREAS, the State Highway Engineer has, after examination of each of said bridges, recommended that the maximum gross load of vehicle or combinations of vehicles be limited to the maximum weights fixed by the State of Idaho, and

WHEREAS, it is the judgment of the Commission, based upon the report of its Highway Engineer and on his recommendation that the total gross weight of vehicle and load, or combinations of vehicles and loads, using said bridges or either of them should be reduced to and fixed at seven tons for the Weiser Bridge and six tons for the Payette Bridge,

NOW, THEREFORE, be it and it hereby is resolved by this Commission as follows:

1. That no vehicle or combination of vehicles shall be permitted to enter or leave the State of Oregon over the Payette Bridge having a gross weight of vehicle and load, or combination of vehicles and loads, in excess of six tons.

2. That no vehicle or combination of vehicles shall be permitted to leave or enter the State of Oregon over the Weiser Bridge having a gross weight of vehicle and load, or combination of vehicles and loads, in excess of seven tons.

3. That this rule, regulation and restriction shall be in full force and effect until rescinded or modified by the Commission.

4. That this resolution be entered in the minutes and records of the Commission as of the 2nd day of May, 1949, and the Commission's Secretary hereby is instructed to deliver a true copy thereof to the following officials or persons: Superintendent of Oregon State Police, Secretary of Bureau of Highways of the State of Idaho, Secretary of the State of Oregon, the Sheriff of Malheur County and W. H. Lynch, Division Engineer, Public Roads Administration.

EXHIBIT "D"

Minutes of May 2, 1949

R E S O L U T I O N

WHEREAS, in order to afford a better alignment and a more satisfactory, safe, and convenient highway for the traveling public, the Highway Commission found it necessary to relocate portions of the Buell-Salt Creek Section of the Dallas-Coast Secondary Highway No. 192 in Polk County; and

WHEREAS, by reason of said relocation and reconstruction of said section of said highway, there were eliminated from the main traveled portion of said highway certain sections or fragments of land, which sections, in the judgment of the Highway Commission, were required and could be used for other public purposes, as expressed in a resolution of the Highway Commission dated November 30, 1935, and filed in the office of the Secretary as A. and R. No. 19; and

WHEREAS, Henry Hockstre, the owner of the land adjacent to Unit "G" mentioned in the aforesaid resolution, has deeded to the State of Oregon, by and through its State Highway Commission, a strip of land adjoining the present right of way, varying in width from ten to twenty feet, and extending from Station 386+00 to Station 395+00; and

WHEREAS, it is now the judgment and opinion of the Commission that the strip of land cited above is equal in value to the remaining portion of the aforesaid Unit "G"; and

WHEREAS, it is also the judgment and opinion of the Commission that there should be recorded in the minutes and records of this Commission the disposition to be made of said Unit "G";

NOW, THEREFORE, the premises being in general as above stated, it is hereby resolved by this Commission, all members being present and affirmatively participating as follows:

1. That the deed for additional right of way from Henry Hockstre between Station 386+00 and Station 395+00 of the Dallas-Coast Highway be accepted, and that the remaining portion of Unit "G" be abandoned as any part of the right of way of said highway, and jurisdiction and control over the section of the old route defined as Unit "G" and not included in the above deed shall pass to the County, and all right, title, and interest which the State may have in said Unit "G" shall vest in the County for such public use as the County may determine, or, at the option of the County Court may revert to the owner of the real property abutting thereon.

(*) 2. There is attached hereto and made a part hereof, a map marked "Exhibit A" on which is shown colored in green the area of land deeded to the State of Oregon for extra right of way by Henry Hockstre, and

(Cont.)

EXHIBIT "D" (Cont.)

shown colored in brown the portion of the aforesaid Unit "G" which is hereby abandoned as part of the right of way of said Dallas-Coast Highway.

3. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Polk County a duly certified copy thereof, and the County Court of Polk County is respectfully requested to take appropriate official action by resolution, or otherwise, by which the County shall accept the said abandoned section of the old right of way of the Dallas-Coast Highway.

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 19, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

Portland, Oregon
May 16, 1949

The State Highway Commission met in regular session at 9:00 a.m. Daylight Saving Time, in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction were opened and read in conformity with previously published notice, following which Chairman Banfield announced that awards of contracts would be made at 3:00 p.m. the same day:

EDDYVILLE-BLODGETT AND HALSEY-SWEET HOME SECONDARY HIGHWAYS
IN BENTON, LINCOLN AND LINN COUNTIES

NASHVILLE-BLODGETT AND BROWNSVILLE-SWEET HOME SECTIONS

O. C. Yocom Company, McMinnville	$ 9,173.50	$ - - -

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following State Park matters:

(1) Proposed gift from Arthur Hallgarth, Elgin, of a 25-acre wayside area on the Weston-Elgin Secondary Highway, two miles west of Elgin, for State Park purposes: The Parks Superintendent advised that he is presenting this matter at the request of the Elgin Chamber of Commerce. He recalled that the Commission had previously considered this offer and at that time decided not to accept the property because it is situated so close to the city of Elgin, and was considered more of a city proposition than a state matter. He further advised that he is still of the opinion that the property should be conveyed to the city for city park purposes, and he so recommended. The Commission approved the recommendation unanimously.

(2) Request of the Jefferson County Farm Bureau for permission to take cinders from Round Butte, located in the Cove State Park: The Parks Superintendent advised that during the wartime period, the Army was authorized to take cinders from this area as an emergency proposition, but the emergency is now over, and were others to be allowed the same privilege it would defeat the purpose for which the park was acquired. He recommended that the request be denied. The Commission approved the recommendation unanimously.

(3) Question of charging a fee for use of accommodations in Emigrant Springs State Park by groups: The Parks Superintendent advised that presently no charge is made for the use of this area;

however, in view of the precedent that the Commission has established at the Silver Falls recreational area, it might be well for the Commission to establish a policy of making a charge at all similar locations. He suggested a charge of $5.00 per day for the use of buildings, water, et cetera, and that the groups also be required to pay extra for firewood. Chairman Banfield explained for the benefit of Commissioner Reynolds why a charge is made for use of the Silver Falls recreational area. As a result of discussion, the Commission unanimously approved a charge of $5.00 per day for the use of the Emigrant Springs area by organizations that use it more than two days, and an additional charge of $12.00 per cord for wood used, upon motion of Commissioner Reynolds, seconded by Commissioner Chandler.

(4) Status of acquisition of Curry County Ocean Waysides: Mr. Forrest Cooper, Right of Way Engineer, reported briefly on this matter in behalf of State Parks Superintendent. He exhibited a map showing the boundaries of the proposed park; the properties already acquired, and those in connection with which negotiations are now being carried on. This being an entirely new matter to Commissioner Reynolds, Chairman Banfield briefly outlined for his benefit what the Commission has in mind for this location. The Commission took no action on the report.

(5) Status report on acquisition of a wayside tract situate between the Deschutes River and the Warm Springs Highway near Warm Springs Agency: The Commission was advised that neither the Parks Superintendent nor the Right of Way Department has anything new to report on this matter.

(6) Proposed construction of a power line into Cape Arago State Park: The Parks Superintendent advised that the Mountain States Power Company has stated a willingness to construct a power line into this park on the condition that the State will assist in placing necessary poles, which is estimated to cost the state about $2,100. He recommended acceptance of the offer. Upon assurance from the Chief Counsel that it has the legal authority to enter into such an arrangement with the Power Company, the Commission approved the recommendation unanimously.

(7) Proposed acquisition of 112 acres of land at Short Sand Beach State Park: The Parks Superintendent exhibited maps showing the location of the tract desired with reference to the present park, and he advised that the additional acreage is necessary to round out and protect the park as it now exists. He recalled that this matter was previously before the Commission and was turned down because of excessive cost.

The matter is being called to the Commission's attention now, he said, because the timber has been cut and, in his estimation, the property can be acquired at reasonable cost. He asked the Commission to authorize negotiations to acquire the property. In the discussion of this matter, the Parks Superintendent pointed out that the State Department of Forestry owns considerable acreage adjoining the park, which should be included in the park area. It was his thought that the State Forester should be requested to give the Highway Commission first refusal for this property, if and when it is disposed of. The matter was discussed at considerable length, and as a result thereof, the Commission authorized the Right of Way Department to negotiate options from the owners of the privately owned land. The Chief Counsel was instructed to direct a letter to the State Forester in conformity with the suggestion of the Parks Superintendent.

(8) Appointment of a District Parks Supervisor for District No. 4 with headquarters at Bend: The Parks Superintendent requested authority to employ a Supervisor with headquarters at Bend to supervise State Parks in the Central Oregon District. The Commission deferred action on this matter until later.

(9) Proposal to furnish restroom facilities for the accommodation of the public at Depoe Bay: The Parks Superintendent advised that pursuant to instructions previously given him by the Commission, he directed an inquiry to the Depoe Bay Chamber of Commerce, whether or not they would guarantee to keep the facilities in a condition satisfactory to the Highway Commission, but to date he has received no reply. The Chief Counsel advised that he had been requested by the Chamber of Commerce to make an inspection of likely locations for the restrooms, and to explain to the members of the Chamber of Commerce just what kind of a guaranty the Highway Commission expects, but he has not as yet had time to comply therewith. The Commission took no action on the matter.

(10) Suggestion of Mr. Ralph Nohlgren with respect to enlargement of his concession at Silver Falls State Park: The Parks Superintendent reported receipt of a carbon copy of a letter directed to the individual members of the Commission, dated May 2, 1949, in which Mr. Nohlgren recommends the following changes in this park set-up:

1. Conversion of the "lodge building" into a museum.
2. Establishment of an improved diningroom with overnight facilities.

He recommended that Mr. Nohlgren's suggestions be refused, because it would adversely affect not only this park, but all other State Parks. The Commission approved the recommendation unanimously.

The Right of Way Engineer, Mr. Forrest Cooper, presented for the Commission's consideration numerous options for the acquisition of real property which are needed in connection with State Highway improvements. The Commission carefully considered each item and the purchase price of each, as contained in the option agreements, and as a result thereof, approved the purchase of properties in the amounts disclosed in the options. The attached resolution with respect thereto, marked Exhibit "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote. (*)

(*) Concerning Item No. 14085-A, covering acquisition of the stock pile site from Burdette L., Jr. and Sibyl F. Dodge, on the Sams Valley Secondary Highway, contained in the above mentioned and attached Exhibit "A", the consideration to be paid to the Dodges was approved by the Commission unanimously upon receipt of a report from the Right of Way Engineer to the effect that the cattle pass construction, which is partial consideration, was an obligation assumed by the Commission when right of way across the Dodges' land was acquired.

In consideration of the foregoing matter, the Commission ordered that hereafter it be kept informed as to the status of right of way acquisition for all construction projects. The reports are to show the total right of way required; that which has already been purchased, and that concerning which negotiations have not been started.

The Assistant Counsel, Mr. J. W. DeSouza, presented for the Commission's consideration, a number of real property acquisitions that cannot be settled by negotiation and concerning which condemnation is necessary, together with the offer that he recommended in the proceedings, as follows:

	Myrtle Point Section of the Coos Bay-Roseburg Highway	
15327	Amy Bell Stephens Cook, Roy Kenneth Cook, Roy Keith Cook, Chester Dale Cook, Vivian Tiko Cook	$ 350.00
15322	Mable C. Laird, a widow	1,100.00
	Charlotte Creek-Murphy's Camp Section of Umpqua Highway	
12838	Theodore E. Davis (Peggy A. Carr, lessee)	3,000.00

He requested authority to proceed with condemnation, if further negotiations reveal it necessary. After careful consideration, the Commission approved the request and the amounts of the offers. The attached resolution relative thereto, marked Exhibit "B", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Engineer reported the results of receiving bids in Salem on May 9, for the sale of buildings generally referred to as the Excelsior Mill buildings, in the city of Eugene. He advised that only one bid was received, being that of C. & D. Wrecking Company of Eugene, at $200, which is $300 less that the appraised value as determined by the Right of Way Department. He recommended that the offer be rejected. The Chief Counsel concurred. The Commission approved the recommendation unanimously, and authorized the Chief Counsel to negotiate the private sale of the buildings.

The Engineer also reported the results of receiving bids in Salem on May 9 for the sale of a number of residence buildings in Sullivans Gulch, in Portland. He advised that six buildings were offered for sale, but only one offer was received, being that of Sullivan Wrecking Company, Portland, in the amount of $61 for the building identified as No. 14747. He recommended rejection of this offer, the appraised value of the building, as determined by the Right of Way Department, being $350. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Right of Way Engineer brought up for discussion the results of receiving bids in Salem on May 2, for the sale of buildings and surplus land located at Newberg. He presented a list of the properties offered for sale, and the high bid received for each, as follows:

Item No.	Item	High Bidder	High Bid	Engr.'s Est.
1.	Bldg.No.14392 (Newberg Motel) incl. personal property	No bids received	$ --	$4500.00
2.	Parcel of land No.14392 (Newberg Motel)	No bids received	--	750.00
3.	Combination (Bldg. & Land) Items Nos. 1 and 2	Dale Compton, Newberg	3125.00	5250.00
4.	Bldg.No.14396 (Arthur M. King)	Dale Compton, Newberg	525.00	550.00
5.	Bldg.No.14397 (Arthur E.McIntosh)	Dale Compton, Newberg	1525.00	1600.00
6.	Parcel of land (Nos. 14396 & 14397) (King & McIntosh)	Dale Compton, Newberg	300.00	600.00
7.	Combination King Bldg. & King-McIntosh land (Items 4 & 6)	Kenneth Dodd, Newport	1000.00	1150.00
8.	Combinations McIntosh Bldg. & King-McIntosh land (Items 5 & 6)	Dale Compton, Newberg	1825.00	2200.00
9.	Bldg. No. 14398 (Green Gables)	Dale Compton, Newberg	1800.00	2950.00

Mr. Cooper recommended the following disposition of the bids:

Item No. 3. Accept offer of Dale Compton for purchase of both land and buildings for $3,125.

Item No. 5. Accept offer of Dale Compton to purchase building for $1,525.

Item No. 6. Reject offer of Dale Compton to purchase for $300.

Item No. 7. Reject the offer of Kenneth Dodd to purchase for $1000.

Item No. 8. Reject offer of Dale Compton to purchase for $1,825.

Item No. 9. Reject the offer of Dale Compton to purchase for $1,800.

Item No. 4. Building No. 14396 (Arthur M. King). The State Highway Engineer reported that since a formal taking of bids on May 2, for the purchase of the buildings at Newberg, an offer has been received from Mr. Cecil Wight, Newberg, to pay $1000 for this particular building, which, he pointed out, is $475 more than the offer made by Dale Compton. He recommended either the acceptance of this offer, or rejection of all offers received for this property and re-advertising it for sale.

The Chief Counsel advised that the Commission could reject Mr. Compton's offer if it so desired, but he questioned the acceptance of Mr. Wight's offer, under the circumstances. In view thereof, the Commission deferred its action until later. Mr. Cooper then reported a subsequent offer by Mr. Compton to purchase the Green Gables buildings, listed as Item No. 9, in the above tabulation, for the sum of $3,000, on the condition that there be deeded to him by the State, a small triangular tract containing 10,650 square feet of surplus property, which is of no particular value for State Highway purposes. He stated that if the Commission will accept this offer, then Mr. Compton will relinquish right of access to the highway at one point, the estimated value of which, he said, is $1000. The Commission deferred action on the entire matter until the following day. (See additional minute entry ahead.)

The Right of Way Engineer presented for the Commission's consideration an offer from the W. J. Conrad Lumber Company, Coos Bay, to purchase surplus property owned by the State Highway Commission in Block 61 of Bennett's addition to Marshfield, which property was acquired in connection with a settlement for right of way involving the Oregon Coast Highway at this place. He advised that the Company has offered to pay $1,000 for this property, in fact has already submitted its check in such sum, and he recommended acceptance of the offer. The Engineer and Chief Counsel concurred. The Commission approved the recommendation unanimously.

Mr. Cooper also presented a request from the State Forestry Department to acquire a small portion of State-owned property containing 0.69 acre situate adjacent to the John Day-Burns Highway in Canyon Creek Canyon. He advised that this property is a portion of a tract which was acquired by the Highway Commission as a gravel pit site and that it could be deeded to the Forestry Department, if the Commission so desires, without damage to the gravel pit. He recommended that the property be deeded to the Forestry Department without cost. The Engineer and Chief Counsel concurred. The Commission approved the recommendation

The Right of Way Engineer presented, and recommended approval of, a deed conveying unto Pauline Matis certain property owned by the City of Portland and the State of Oregon along Front Street in Portland. He advised that this is a Correction Deed, and that it is a substitute for the deed the Commission approved on December 23, 1948, conveying the property to Pauline and Charles Matis; and that the only difference now is in the name of the grantee. The Commission approved the recommendation. (The deed was signed later in the session.)

Right of Way Engineer Forrest Cooper presented an offer from Andrew H. Miller, Coos Bay, to pay the sum of $482 for a dwelling situate on the right of way of the DelMar-China Camp Section of the Oregon Coast Highway. He recalled that this building was advertised for sale some time ago and at that time Mr. Miller submitted the high bid of $400 for the same, which bid the Commission rejected as being too low, and then authorized negotiations for the private sale of the property. As a result of the negotiations, he said, Mr. Miller has increased the amount of his offer to $482.00. He pointed out that the appraised value of the house is $1200, and requested instructions. The Commission decided unanimously not to sell the house to Mr. Miller at the amount of his offer.

The Commission had under discussion the advisability of paying $250 to Mr. and Mrs. Verne Goodman for permission to enter their property, situate adjacent to the Alsea Highway in Lincoln County, for the purpose of prospecting for road-building materials. The Right of Way Engineer advised that the property in question is needed as a source of materials for use on a Forest Highway project which is to be constructed by the Public Roads Administration, and that the Engineer of that Department advises that a careful survey for other possible sources of rock reveals none available in this vicinity. He further stated that the Goodmans are extremely difficult to deal with and will allow the prospecting only on payment of the $250; further, that they have stated they will not sell any of their property, so it appears that if the State wants it, it will have to resort to condemnation. He presented a form of "Permit of Entry" signed by Mr. and Mrs. Goodman authorizing prospecting on their property when paid the sum of $250. This matter was discussed at some length and as a result thereof the Commission, in view of the circumstances, unanimously approved payment of such sum to the Goodmans.

The Right of Way Engineer reported that the Highway Commission owns two houses in Eugene situate in the block which is bounded by Tenth Avenue, Eleventh Avenue, Hays Street and Garfield Street, just south of the railroad overcrossing in the western part of Eugene. He advised that both of these houses are occupied; that one of the occupants pays $27.00 a month rental, and the other $22.50 rental per month; further, that the City of Eugene is constructing a sewer adjacent to this property, and after it is installed the State will have to connect the houses to the sewer if it wishes to keep the houses occupied. He estimated the cost of making such connections at $475.00 and requested instructions. In the discussion of this matter the question arose whether or not the present occupants will continue renting the premises if the rental charge is increased sufficiently to amortize within a reasonable length of time the investment in the sewer connections; also

whether or not the buildings are in suitable condition to justify the expense of making the connections. The Commission deferred action on the matter pending a report from the Engineer and Chief Counsel covering such features.

The Right of Way Engineer reported that in taking an option from Lawrence B. Jennings for right of way for the Bridge-Remote Section of the Coos Bay-Roseburg Highway in Coos County, the State agreed to build a fence on both sides of the new highway and to construct a cattle pass across the highway for Mr. Jennings' use; and in addition thereto it was agreed that the old highway right of way would be given to Mr. Jennings. Mr. Jennings, he said, now wishes this settlement reduced to writing. He presented a form of agreement prepared on the basis of the understanding. The Commission approved the arrangement unanimously and later in the session signed the agreement.

Mr. Samuel A. Hall, Assistant Counsel, brought up for discussion a proposed settlement of the case of State Highway Commission vs. Mable Winkleman et vir concerning right of way acquired for the improvement of the Johns-Glendale Section of the Pacific Highway in Douglas County. He advised that the State is acquiring 7.52 acres of farmland from the owners, who demanded $45,844 for the same, including severances and other damages; that the Commission refused this price and ordered condemnation with an offer of $2,225. The case has not been settled as yet, he said, as it has been held up in court, but the owners now indicate that they will accept the sum of $4,850 by stipulation. He recommended approval of the payment of such sum. The Commission approved the recommendation unanimously.

The Chief Counsel brought up for discussion the question of furnishing insurance coverage on the steel bridge in Portland. He recalled that the Commission previously entered into an agreement with the Southern Pacific Company and the Union Pacific Company regarding the use of the upper deck of this bridge, which agreement provides that the State shall furnish certain insurance to protect the Companies during construction activities of the State Highway Department, and that the State shall assume full responsibility over the upper deck of the bridge when the highway work is completed, and at that time shall also furnish standard insurance coverage for the protection of the Railroad Companies. It appears now that the Railroads are not satisfied with the insurance that has been furnished, and have requested the State to furnish the standard policy now rather than later on. The Chief Counsel advised that the extra expense to the State would be nominal, if the insurance were purchased on a three-year basis, and he recommended that it be purchased for a three year term. The Commission approved the recommendation unanimously.

The Assistant Counsel, Mr. Hall, reported consummation by the City of Portland of acquisition of two properties located near the east end of the steel bridge, Portland, which are needed in connection with the so called "Front Avenue Project". Both cases concern brick apartment houses, one of which is owned by a Mr Arnold, and the other by a Mr. Antilla. He advised that these negotiations have been carried on by the City of Portland and because a satisfactory settlement could not be reached in either case, it was necessary to file condemnation papers; further, that at the request of the City, the services of Mr. Mark McCallister, State Right of Way Buyer, were loaned to the city to assist in the proceedings. It appears that Mr. McCallister

recommended to the city that it offer a maximum of $60,000 for the Arnold property, and $27,500 for the Antilla property, and that the city has reached a satisfactory settlement with the Arnolds out of court, for $56,000, and with the Antillas for $27,500. He recommended approval of such settlements so the City can proceed with the adoption of the resolution to effect payment to the owners. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously with the understanding that the State's share of this expense will not exceed 40% of the total, pursuant to a previous agreement with the city covering the Front Avenue Project.

The Chief Counsel reported briefly as to the law enacted by the 1949 Legislature, which makes it unlawful for any state agency to sell real property appraised at $1000 or more, without advertising it for competitive bids. He advised that he consulted the Attorney General in respect to whether or not this law would affect the Highway Commission's arrangements with the Commonwealth Company in regard to sale of buildings in Sullivan Gulch, Portland, and it is the opinion of the Attorney General that the arrangement with the Company is satisfactory and need not be altered. The Commission took no action on the matter.

The Commission discussed a letter dated May 12, 1949, by Mr. Forrest Cooper, Right of Way Engineer, on the subject of renting houses located on highway right of way in Sullivan Gulch, Portland. Mr. Cooper, who was present, explained details. He pointed out that the Sullivan Gulch project has been broken down into five units and that according to the plan, the first of these units to be constructed will be Unit 2, which is proposed for contracting in 1951, and the balance at yearly intervals thereafter. Based on such time schedule, he recommended that the people now renting the properties in Unit 2 be ordered to vacate the premises about one year in advance of construction, and that the same procedure be followed with respect to the other Units, with some variation to fit individual cases. He gave as his feeling that in most instances, one year's time to vacate the premises is ample for ordinary disposition of the various structures. The Commission took no action on this matter.

In this connection, the Chief Counsel reported on his efforts with the Tax Assessor of Multnomah County to secure the removal of Sullivan Gulch property from the tax rolls. He gave as his opinion that these properties are not subject to tax because they are not being held for investment purposes, but simply for salvage. He advised that he is endeavoring to convince the assessor of the correctness of his belief. He also said that he expected to have this matter ironed out satisfactorily in the near future. The Commission took no action.

The meeting recessed for luncheon at 12:00 noon, and reconvened at 2:00 p.m. in the same room, with the same persons present and participating.

The Engineer reported the results of taking bids in Salem on May 11, 1949, for the sale of three boats stored at the Astoria-Megler Ferry Terminal, as follows:

Item No.	Item	High Bidder	High Bid	Engineer's Estimate
1.	Used 16' Metal Lifeboat Serial No. 660	St.Louis Junk Co., Astoria	$ 5.22	$ 60.00
2.	Used 16' Metal Lifeboat	G. E. Howe, Astoria	33.53	40.00
3.	Used 13' Metal Work Boat	St.Louis Junk Co., Astoria	6.57	20.00

Since receiving these bids, he said, information has been furnished by the State Board of Control to the effect that the Oregon Fish Commission wants all three of the boats, and is willing to pay $75 for them. In view thereof, he recommended rejection of all the bids received on May 11, and that the boats be sold to the Oregon Fish Commission for $75. The Commission approved the recommendation unanimously.

There was presented to the Commission a letter from the Engineer, dated May 11, 1949, regarding the changing of the 1949-51 budget, due to new legislation, and action taken by the Ways and Means Committee. The Commission deferred action on this matter pending adoption of its new construction program.

The Commission discussed a written report of the Engineer dated May 11, 1949, on a new pay plan proposed for State Highway Department employees. The Commission deferred action on this matter pending a thorough report from the Engineer, Chief Counsel and Chief Accountant, which report is to show clearly the entire picture. The Commission indicated, however, that it would approve without question the automatic salary increases, as may be recommended. The Commission ordered this report rendered two weeks prior to its next regular meeting.

The Engineer submitted a supplemental report on sections of highway that were damaged by unusual frost and flood conditions during the past winter season. He advised that he has reviewed his previous report on this matter, and verified his previous statement that it will require an expenditure of $2,580,000 to repair this damage. He suggested the following funds, contained in the 1949 budget, to finance the work:

State construction funds, allocated at present to the Mt. Hood Highway	$ 280,000
Reserve for additional work under special maintenance	200,000
Reserve for maintenance contingencies	500,000
Balance, to be transferred from unappropriated funds	1,600,000
	$ 2,580,000

In addition to the $1,600,000 to be taken from the unappropriated funds, he said, there are additional contingencies of $3,200,000 against unappropriated funds, consisting of an overrun of $200,000 in general maintenance expenditures, to take care of excessive snow removal, and $3,000,000 for possible loans to counties under a special law enacted by the 1949 Legislature. Taking these into consideration, he said, will reduce the unexpended balance to $495,000, as of December 31, 1949, and due to the fact that expenditures for repairs and loans to the counties will be made faster than revenues can be collected, a deficit of about $2,000,000 will accrue on or about November 1, 1949. He presented a summary of the figures involved in the state repair program, divided as to work proposed to be done with State forces, amounting to $909,000, and that to be contracted, amounting to $1,671,000, and recommended approval of the arrangement as outlined. (For further details, see Engineer's written report to the Oregon State Highway Commission dated May 11, 1949, in general files.) Following discussion, the Commission unanimously authorized the contracting of the work proposed by the Engineer to be done in that manner, and which is estimated to cost $1,671,000. The Engineer was also authorized to proceed with the remaining work with State forces, estimated at $909,000. He was instructed to request an additional appropriation to finance the State force work in the event that the available funds prove insufficient for the purpose.

A petition was presented from owners of property abutting upon the Tualatin Valley Highway between West Slope and Beaverton, protesting the installation of curbs in connection with the improvement underway at that place, because they will prevent free access to the highway from their respective properties, and will have a tendency to increase speed of motorists, and create additional hazards. The Engineer advised that the construction of curbs along this section was given very careful consideration in the preparation of the plans for the project, and that the curbs are provided only in congested districts where they are deemed necessary for the control of traffic, and where there is considerable pending development. He gave as his considered opinion that curb construction in this instance is necessary to provide a safe traffic facility, and recommended that the petition be denied. The Chief Counsel advised that right of access to the highway was not acquired along this section, and that the property owners have such right of access to a certain extent, but not unlimited, and if a hazard is created by reason of the access, and if the public welfare justifies it, then the Highway Commission has the authority to restrict it. In view of the statements of the Engineer and Chief Counsel, the Commission decided unanimously to adhere to the present plans for this improvement, including the curbs.

A letter was presented from the County Court of Jackson County, requesting that the following projects be given consideration by the Commission in the formulation of its next construction program:

1st Choice: Replace bridge over the Rogue River on Evans Creek County Road No.276, at the town of Rogue River.

2nd Choice: Replace bridge over Rogue River on Table Rock County Road No. 273.

The County Court advises that if the funds allocated for secondary highway improvements in Jackson County are not sufficient to finance both of these projects, then Jackson County may be able to supplement the funds in sufficient amount so that both projects can proceed. The Commission deferred action on the request pending discussion of its second Postwar Construction Program, later in the session.

A letter was presented from the St. Johns Businessmen's Association, Portland, requesting a survey to determine the approximate cost and other details of a proposed tunnel extending from the westerly end of the Willamette River bridge at St. Johns, to the Tualatin Valley, and a connection with the Sunset Highway. The Engineer advised that such survey would cost several thousand dollars; further, that a tunnel approximately one and one-quarter miles in length would be required to serve any useful purpose. He estimated the cost of a four-lane tunnel at about $9,240,000, which amount together with the cost to construct necessary approach roads, would total approximately $10,000,000. He recommended that the request be denied. The Commission approved the recommendation and ordered that the St. John Businessmen's Association be informed that the magnitude of the project is such that it is impossible to do it now with the limited amount of funds available to the Commission, and that because the project is for a long time in the future, the Commission considers it inadvisable to make a survey at the present time.

The Engineer requested authority for an expenditure of $19,600 for oiling on the Nashville-Blodgett Section of the Eddyville-Blodgett Secondary Highway in Lincoln County. He advised that a 50% reduced load limit was maintained on this road from January 1st to April 12th, which was sufficient to prevent the hauling of logs and lumber, nevertheless, there was considerable breakage of the oiled surface under light traffic. He further stated that he personally inspected this highway a short time ago, and ascertained that patching alone would not provide a satisfactory roadway, and that about 7.5 miles should be reoiled. He recommended, in view thereof, approval of the request and that funds to finance it be taken from the special maintenance budget. The Commission approved the recommendation unanimously and ordered the work done by contract.

The Commission considered and approved "options for cooperative construction projects" in the following cities and towns:

Sweet Home
Harrisburg
Gresham
Gold Beach

(For details of the projects contemplated for construction in connection with each of these options, see copies of the options in the Special State Tax Street Fund file.)

The Engineer reported that the towns of Lexington and Maupin have fulfilled the legal requirements with respect to the expenditure of 1947 State Tax Street Funds, which they received in 1948, and that the plans for the improvements to be financed with such funds have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission approved the recommendation, and thereupon by unanimous vote adopted the

attached resolution relative thereto, marked Exhibit "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that the following cities and towns have met the legal requirements with respect to the expenditure of 1948 State Tax Street funds, which they received in 1949:

Adams	Gold Hill	Maupin
Amity	Helix	Mitchell
Banks	Huntington	Sherwood
Bay City	Lexington	St. Paul
Canyonville	Lone Rock	

He also advised that the plans for the improvements contemplated to be financed with such funds, have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution with regard thereto, marked Exhibit "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A letter was presented from the Harney County Chamber of Commerce, listing projects, as follows, which it considers should have preference over others for early completion. The letter confirms the oral request presented to the Commission on the occasion of its visit to Burns on May 2, 1949:

1st Choice: Completion of the Follyfarm-Princeton Section of the Rome-Princeton Secondary Highway.

2nd Choice: Improvement of the Lawen-Crane Section of the Burns-Crane Highway.

3rd Choice: Improvement of the Burns-Frenchglen Section of the Frenchglen Secondary Highway.

The Commission deferred action on this matter pending discussion of its Second Postwar Construction Program later in the session.

The Engineer reported a request from the City of Vale for the improvement, as a 1949 Special State Tax Street Fund Project, of Washington Street for a distance of eight blocks, and of Main Street for a distance of one block. He presented a map showing the location, and advised that the project consists of oil surfacing, which is estimated to cost $14,500. He further advised that an investigation had been made, and it has been found that there is a heavy volume of truck traffic on this street, particularly during the beet harvest season, when great numbers of trucks use this street over which to transport sugar beets to the railroad. He recommended approval of the project. The Commission approved the recommendation unanimously.

The Commission discussed a request from the City of Port Orford for the improvement of US101 through this city. The Engineer advised that the first Postwar Program, as adopted by the Commission, contained an allotment

of $35,000 of State funds with which to construct the south unit of the Port Orford Section of this highway, 0.56 mile in length. The work has not been done, he said, due to inability to secure certain agreements with the Port Orford City Council, relative to street closures, so work which was previously estimated to cost $35,000 will now cost approximately $61,000. The City Council, he said, is now willing to execute the necessary agreements, but is asking that the work be extended northerly about one-half mile, which is estimated to cost $36,000, making a total cost for both projects of $97,000. He recommended approval of both projects at this time. As a result of discussion, the Commission unanimously authorized the Engineer to proceed with the construction of both units when the City of Port Orford has fulfilled the requirements of the Commission with respect to street closures, et cetera.

The Commission discussed a request from the Corvallis City Council for State cooperation in the widening and repairing of "C" Street between Third Street and Fourth Street in their city. The Engineer recalled that Fourth Street is now a State Highway route, and when the bridge over Mary's River is completed, will be a one-way street for south-bound highway traffic, and that north-bound traffic through Corvallis will use Third Street. "C" Street, he pointed out, is the last connecting street between Third Street and Fourth Street before crossing the river, carries a tremendous amount of log-hauling traffic, is a very necessary connection between these two streets, and is really a part of the State Highway System. He also said that because of the nature of the traffic that uses this street, it should be ten feet wider than the ordinary city street. He estimated the cost to provide such width, and to provide a proper thickness of pavement, at $2,150, which the city is now asking the State to assume. He recommended approval of the request. The Commission approved the recommendation unanimously.

The Engineer reported receipt of numerous requests from residents of Yachats for the elimination of a dangerous condition existing the Yachats River Bridge on the Oregon Coast Highway. It appears there is considerable pedestrian traffic that crosses this bridge, being the result of rapid development which has taken place south of the bridge, and that this traffic volume will be greatly augmented shortly by the opening of "Sherwood Lodge," a large place which will have thirty-five rooms and a restaurant. The Yachats River Bridge, he said, is only 20 feet wide, which allows very little room for pedestrians when cars are passing, and to correct the situation will require construction of a footbridge on the outer rail of the bridge, at an estimated cost of $3,500. He recommended approval of the expenditure, funds to be taken from the 1949 unobligated minor betterment reserve account. The Commission approved the recommendation unanimously.

The Commission discussed with the Engineer the bids received at the morning session, and at 3:00 p.m. Chairman Banfield publicly announced the Commission's decision with respect to each project, as follows, such decision being by unanimous vote of the Commission:

"Recoiling the Nashville-Blodgett and Brownsville-Sweet Home Sections of the Eddyville-Blodgett and Halsey-Sweet Home Secondary Highways in Benton, Lincoln and Linn Counties. Warren Northwest, Inc., Portland, submitted the low bid for this project in the amount of $57,736.75 based on the use of asphalt. They submitted no bid based

on the use of tar. Harr & Horton, Portland, submitted the next low bid of $59,871 based on the use of asphalt and $60,219 based on the use of tar. There was one higher bid. The Commission has awarded the contract to the low bidder, Warren Northwest, Inc. at its bid price.

"Oregon City-Molalla-Estacada rock production project on the Cascade and Woodburn-Sandy Secondary Highways in Clackamas County. The low bid was submitted by Barney B. Helser, Portland, at $41,100. The Linn Gravel Company, Albany, submitted the next low and only other bid at $44,250. The Commission has awarded this contract to the low bidder, Barney B. Helser, at his bid price.

"Grading and paving on Williams Avenue and Third Street in the City of Scappoose, Columbia County. The Commission received only one bid for this project, being that of Parker-Schram Company, Portland, at $7,313.50. The Commission has accepted this offer and awarded the contract to the bidder at their bid price.

"Construction of bridges over Rock Creek and Sandy Creek on the Coos Bay-Roseburg Highway in Coos County. VaDare Construction Co., Portland, submitted the low bid for this work at $109,498 based on the use of asphalt in the approach road construction. They sumbitted no bid based on the use of tar. Lindstrom Bros., Portland, submitted the next low bid at $110,737 based on the use of asphalt. They also submitted no bid based on the use of tar. There were two higher bids. The Commission has awarded the contract to the low bidder, VaDare Construction Co., at its bid price.

"Construction of an addition to the Roseburg Division Office Building. E. A. Shannon, Roseburg, submitted the low bid for this work, at $16,012, basic bid, and at $15,644.38 basic bid less alternate. Fred F. Criteser & Fred A. Bowen, Roseburg, were the second low bidders, at $19,000 basic bid and $18,540 basic bid less alternate. There was one higher bid. The Commission has awarded the contract to the low bidder, E. A. Shannon, at his basic bid price.

"Installation of an electric lighting system in the Elkton Tunnel on the Umpqua Highway in Douglas County. The low bid for this work was submitted by Mill Electric Co., Salem, at $9,786. W. R. Grasle Co., Portland, submitted the next low bid at $10,150. There were five higher bids. The Commission has awarded the contract to the low bidder, Mill Electric Co., at its bid price.

"Surfacing and oiling the Service Creek-Goose Rock Section of the John Day Highway in Grant and Wheeler Counties. Newport Construction Co. and Russell Olsen, Portland, submitted the low bid for this work at $55,625. Babler Bros., Portland, submitted the next low bid at $56,432.50. There were five higher bids. The Commission has awarded the contract to the low bidder, Newport Construction Co. and Russell Olsen, at their bid price.

"Painting structural steel portion of the Yaquina Bay Bridge on the Oregon Coast Highway at Newport, Lincoln County. The low bid for

this work was submitted by L. E. Snell, Albany, at $28,000. Hall & Wols, Portland, submitted the next low bid at $28,373. There were four higher bids. This contract has been awarded by the Commission to the low bidder. L. E. Snell, at his bid price.

"Grading, surfacing and oiling on Second Street in the City of ~~Hillsboro~~, Linn County. Acme Construction Co., Eugene, was the low bidder for this work, at $10,491.25, based on the use of asphalt. The second low bid was submitted by M. L. O'Neil & Son, Eugene, at $11,028 based on the use of asphalt. Neither of these contractors submitted a bid based on the use of tar. There were two higher bids. The contract has been awarded to the low bidder, Acme Construction Co., at its bid price.

"Sandy Boulevard pavement resurfacing project in Portland, Multnomah County. The low bidder for this work was Parker-Schram Company, Portland, at $37,877.50. Porter W. Yett, Portland, submitted the only other bid, at $38,077.50. The contract has been awarded to Parker-Schram Company, low bidder, at its bid price.

"Pavement resurfacing on S. W. 4th Avenue, Portland, Multnomah County. Cascade Construction Company, Portland, submitted the only bid for this work, at $11,532. The Commission has accepted the bid and has awarded the contract to this Company at its bid price.

"Reoiling and furnishing crushed rock in stock piles on the Pine Grove-Maupin Section of the Wapinitia Highway in Wasco County. O. C. Yocom Company, McMinnville, submitted the low bid at $74,366.50. They qualified their bid by stating they would accept the award of the contract only in combination with the Maupin-Criterion Project. Warren Northwest Inc., Portland, submitted the next low bid at $75,705.50. There was one higher bid. Due to the fact that O. C. Yocom Company was also the low bidder for the Maupin-Criterion oiling project on The Dalles-California Highway in Wasco County, the Commission has awarded both contracts to this Company at its combination bid price. Other bids received for the Maupin-Criterion Project were those of Warren Northwest Inc., Portland, at $62,717.50, and Babler Bros., Portland, at $63,915. Warren Northwest Inc. agreed to a reduction of $2,000 in their bid if awarded also the other project.

"Grading, surfacing and oiling on South First Street in Willamina, Yamhill County. O. C. Yocom Company, McMinnville, submitted the only bid for this work, in the amount of $9,173.50, based on the use of asphalt. They submitted no bid based on the use of tar. The Commission has referred the bid to the Engineer with authority to award the contract to O. C. Yocom Company when certain conditions have been satisfied."

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

No. 1. Albina Engine and Machine Works, Inc., Contract No. 2912-A for alterations to the Ferry "M. R. Chessman", requested extension of time of 24 days, from March 4 to March 28, 1949, within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to extreme cold weather conditions extending over an abnormal period of time, which retarded the steel workers on the welding process, and also delayed painting of the incline ladders and canopy covers. The Engineer advised that according to schedule, the contractors should have completed this work within sixty days after delivery of the Ferry to their dock, which would have called for completion of the work by March 4, 1949; however, the extremely cold weather in January and February made it inadvisable to work during such period, and as a consequence, the time limit overran. The State, he said, has suffered no loss because of the delay, because wintertime traffic across the Columbia River has not necessitated the operation of the larger boat. He recommended in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

No. 2. Burkhardt & Schortgen, Contract No. 3050, for construction of a caretakers cottage in Collier State Park, requested an extension of time of sixty days, from March 31 to May 30, 1949, within which to complete this job. They alleged that adverse weather conditions and labor troubles prevented completion of the building within the time limit specified in the contract. The Engineer advised that the contractor completed all the interior work during the winter season, but was requested not to attempt to do the exterior work because such work could not be done satisfactorily during the adverse weather conditions which prevailed. He recommended in view of the circumstances that the extension of time requested be granted without penalty. The Commission approved the recommendation.

No. 3. Archie R. Averill, Contract No. 3059 for construction of an addition to the Highway Department Office Building in Bend, requested an extension of time of 60 days from April 30 to June 30, 1949, within which to complete this job. He attributed his failure to complete the project within the specified time limit to extremely adverse weather conditions. The Engineer advised that the work under this contract required the renewal of one outside wall of the present building, and it was considered inadvisable to do that part of the work during the wintertime because of extremely bad weather. He recommended in view thereof that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

The Commission, in passing on requests for extensions of time as listed above, considered but did not necessarily adopt the recommendations of the Engineer and the reasons given by the contractors for failure to complete their projects within the specified time limits.

The Engineer reported that contracts numbered 3086 and 3015, for State Highway construction have been completed according to the requirements of the contracts and modifications thereof, and that said jobs are now ready

for acceptance. After due consideration of the Engineer's report with respect to the contracts under discussion, the Commission approved and accepted the said contracts as reported, and by unanimous vote adopted the following resolution with regard thereto.

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 3086 with Vernie Jarl for furnishing crushed material in stockpiles on the Baker Section of the Old Oregon Trail, Baker-Homestead and Baker-Unity Highways in Baker County; completed May 4, 1949.

Contract No. 3015 with C. M. Corkum Company for constructing a pedestrian overcrossing at Hooker Street on Front Avenue, Portland, completed April 26, 1949.

NOW THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

A letter was presented from the South Tillamook Coast Road Committee inquiring as to the present status of the proposed Sand Creek-Bewley Creek cutoff extending from Sand Lake, Oregon, to Tillamook, Oregon, via South Prairie, which project they requested some time ago. The Engineer recalled that his report on this subject was rendered to the Commission at its meeting on April 11, 1949, and in that report he recommended that the sponsors of the project be informed that the construction of the route is not justified. The Commission ordered that a copy of this report be forwarded to the Road Committee.

The Engineer reported receipt of a request from people residing along the Salem-Dayton Highway between West Salem and Brush College, for the establishment of a reduced speed zone between these points. This matter, he said, has been investigated by the Traffic Engineer, who recommends that the request be denied, because roadside development is very scattered and the accident rate is very low. He stated his concurrence in the recommendation. The Commission approved the recommendation unanimously.

The Engineer reported receipt of many complaints that employees on the Detroit Dam park their cars on the North Santiam Highway to such an extent that insufficient room is left for highway traffic, and a hazard is created. The Army Engineers, he said, have requested assistance from the Highway Department in correcting the situation, and the District Attorney of Marion County also has requested that the Commission take action to remedy

the situation. Moreover, the State Police have requested action so they can legally enforce any ruling that is made. The width of the highway in the vicinity of the Detroit Dam, he said, is only 20 feet, and if cars are permitted to park on the highway, only a 12-foot width remains for two-way moving traffic, which is insufficient. He recommended the designation of a "No Parking" zone, extending from M.P. 39.4 to M.P. 39.7, a distance of about 1600 feet. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution, marked Exhibit "E", with respect thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A letter was presented from W. H. Lynch, Division Engineer, Public Roads Administration, recommending the designation of a 35 mile per hour maximum speed limit on the North Santiam Highway between Niagara and Detroit, and a maximum speed limit of 25 miles per hour along the section where the Detroit Dam is under construction. The Engineer recommended approval of Mr. Lynch's request and that a 35 mile per hour maximum speed limit be designated for the section between M.P. 34.25 and M.P. 39.01; also between M.P. 40.20 and M.P. 46.75, and that a 25 mile per hour speed zone be designated between M.P. 39.10 and M.P. 40.20. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution, marked Exhibit "F", with respect thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported that on the tenth day of May, 1949, he removed the reduced load limit signs from the Mt. Hood Highway, conditions having changed so that legal weight loads now can be moved over this highway without damaging effect. He asked the Commission to confirm his action in this matter. The Commission approved the lifting of the reduced load limit on this highway as reported, and thereupon by unanimous vote adopted the attached resolution, marked Exhibit "G", relative thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed a letter from the Public Utilities Commissioner advising that it is necessary, immediately, to reprint the log hauling permit forms and special regulations covering the transportation of logs by motor truck, and inquiring whether or not the State Highway Commission desires to change the regulations in any respect before the new forms are sent to the printer. The Engineer advised that there are two things that should be decided by the Commission:

1. Whether or not to prohibit the truck-hauling of logs on Saturday afternoons during the summer months, and

2. Whether or not to permit the truck-hauling of logs over the Sunset Highway between Davies overcrossing, near Banks, and Sylvan, where such operations are now prohibited.

He recommended that no Saturday afternoon hauling be permitted from May 15 to September 15 each year, and that the Commission continue in force its present restrictions on the Sunset Highway between Davies overcrossing and Sylvan. As a result of considerable discussion, the Commission voted unanimously to prohibit the truck-hauling of logs over state highways on Saturday afternoons during the period May 23, 1949, and September 8, 1949. The Commission also voted unanimously to continue the log hauling restrictions on the Sunset Highway between Davies overcrossing and Sylvan. The Secretary was instructed to inform the Public Utilities Commissioner of the action taken and to ask him to circularize the industry as quickly as possible so operators will have the benefit of the information and can make necessary arrangements to comply therewith when the ruling becomes effective on May 23rd.

There was presented to the Commission the application of Riddle and Clark, Cascade Locks, Oregon, for permission to truck-haul logs over the Columbia River Highway from M.P. 35.63, near Dodson, to M.P. 48.47 at the Cascade Locks Lumber Company's plant, using one truck. They advise that their operations will consist of three to four trips daily with short logs, not in excess of 32 feet in length. They declared that because of an order from the Forest Ranger to close down their operations during the fire season they must move this timber this summer and clean up their operations, and that the only way it is possible for them to do so is to truck-haul some of the logs to the Cascade Locks Lumber Company's plant. The Engineer advised that the operation is rather modest in volume and he recommended approval of the application, on the condition that the loads do not exceed the statutory requirements as to weight and dimension in any respect, and that the hauling be entirely completed by September 30, 1949. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Commission discussed a written report from the Engineer on Traffic violations committed by the following operators:

Lawrence Newby, Log hauler, Hillsboro
Lyle Garvin, Log hauler, Eugene
Mitchell Bros. and Columbia Transportation Company,
Commercial carriers, Portland

According to the report, each of the above mentioned operators is a consistent violator of the rules and regulations. The Engineer read aloud excerpts from the report concerning each, particularly pointing out that Mr. Newby, during the month of April, 1949, was apprehended for overloading his trailer 19,100 pounds on one occasion, and 15,000 pounds on another, notwithstanding previous arrests and imposition of fines by the Justice Court. The Engineer recommended that Mr. Newby be officially warned that another violation in the future will result in cancellation of his log hauling permit. The Commission approved the recommendation and so ordered.

As to the operations of Lyle Garvin, the Engineer pointed out that the record since September, 1946, reveals that 36.3% of his loads were overweight, and that of the total of 50 loads weighed, 22% were in violation of the requirements, notwithstanding numerous arrests and imposition of fines by the Justice Court. He recommended that Mr. Garvin be warned that his

permit will be cancelled if he is apprehended for another violation. The Commission approved the recommendation and so ordered.

The Engineer advised that while Mitchell Bros. and the Columbia Transportation Company are two separate concerns, they are very closely connected, Mr. O. J. Mitchell being President of both concerns. Both companies, he said, are engaged in heavy hauling business, and frequently transport machinery and equipment under special, single-movement permits from the State Highway Commission, although they are also engaged in the hauling of lumber, cement and other commodities under Group I and Group II permits. These companies, he said, do not show a tendency to cooperate with the Permit Department as do other operators in the same class of business; the records indicating that they fail to weigh their loads or properly declare them before requesting a permit, and as a result they have many overload violations, varying from 10,000 to 30,000 pounds. He recommended that each company be warned that its permits will be cancelled if it is again apprehended for violating the weight requirement, and that a copy of the record be forwarded to the officers of both companies with such warning. The Commission approved the recommendation unanimously and instructed the Secretary to notify both concerns accordingly.

In this connection, the Commission discussed a letter from Mr. Garfield Priebs, Grants Pass, requesting the reinstatement of his log hauling permit, which was cancelled on November 12, 1948, for consistently violating the rules and regulations covering his operations. Mr. Priebs states in his letter that his truck has been out of service, and that he has received no income from it, since November; that he now has an opportunity to use it on a log hauling job and, if permitted to do so, will make every attempt to comply with the rules and regulations. The Engineer advised that Mr. Priebs' record for 1948 reveals numerous overloads, ranging from 4000 pounds to 17,000 pounds, and that between the period of June 25, 1948, to October 8, 1948, of nine loads weighed, eight were overloaded, which is 88.9%, and it was because of this record that the Commission ordered the cancellation of his permit. He gave as his thought that Mr. Priebs may have suffered sufficient penalty, and he recommended in view of his letter that his permit be reinstated on a probationary basis, subject to cancellation in the event he is again apprehended for violation of the requirements. The Commission approved the recommendation unanimously. The Secretary was instructed to notify Mr. Priebs and the Public Utilities Commissioner accordingly.

The Engineer requested authority to purchase thirteen automobiles of the Ford-Chevrolet class, estimated to cost $1,650 each, a total of $21,450; and nine pickup trucks, estimated to cost $1,300 each, a total of $11,700, involving a total estimated expenditure of $33,150. He advised that provision was made for this purchase in the 1949 budget. The Commission approved the request unanimously.

A letter was presented from Oregon Chapter, The American Institute of Architects, advising that it has approved the plans in sketch form for the proposed Champoeg Memorial Museum as submitted by the Highway Commission's architect, Mr. Frank G. Hutchinson. The Secretary was instructed to extend

to the Chapter the Commission's sincere appreciation for the service rendered in the designing of this structure. The Engineer advised that he expects to be able to advertise this project for bids to be received at the July meeting of the Commission.

The Engineer brought up for discussion the matter of granting to Mr. Chester Conger of Eugene a revocable permit to build and maintain an access road across state-owned property adjacent to the Pacific Highway near the railroad overcrossing in the northern part of Eugene. He recalled that the Commission some time ago granted such privilege to the Southern Pacific Company, which has a lease on property owned by Mr. Conger at this location, for a team track. However, the Southern Pacific Company later asked that the permit be issued in the name of Mr. Conger, in view of which it has been prepared on that basis, the provisions thereof being identical to those contained in the form prepared for the Southern Pacific Company. He recommended approval and execution of the agreement. The Commission approved the recommendation unanimously. (The agreement was signed on the following day.)

The Commission had under discussion resolutions from the following counties requesting loans of State Highway funds under the provisions of Chapter 358, Oregon Laws 1949, to assist the counties in financing repairs to county roads which were damaged during abnormally inclement weather conditions during the past winter:

Tillamook County —	$ 57,000
Yamhill County —	80,000
Baker County —	55,000
Benton County —	50,000
Klamath County —	120,000
Douglas County —	100,000

The Chief Counsel advised that the resolutions are in proper form and meet the legal requirements. The Engineer advised that the amounts are within the limits of loans authorized by the law. In view of this information, the Commission voted unanimously to grant the loans as requested. (Letters to the Secretary of State certifying that each of the above mentioned counties is entitled to the loan requested and recommending that they be granted were signed by the Commission on the following day.)

The Commission discussed and upon recommendation of the Engineer approved a request from the Bonneville Power Commission for permission to construct a power transmission pole line along the right of way to the North Santiam Highway in the vicinity of Sardine Creek. (The permit was signed on the following day.)

The Commission discussed an offer from the City of Salem to pay the sum of $50 for a small building located on the north bank of the Pudding River at Aurora, which building was used as a field office for engineers during the construction of the Pudding River Bridge at that place. The Engineer advised that the building is not worth the cost of moving it to another highway job, and recommended that the offer of the City of Salem be accepted in order to get the building off the State's property. The Commission approved the recommendation unanimously.

The Commission had under discussion a date for its next regular meeging, and decided to hold such meeting in Portland, on Monday and Tuesday, June 27 and 28, 1949. The Secretary was instructed to make the usual arrangements for the use of the Green Room in the Imperial Hotel.

The Engineer requested authority to attend a meeting of the Executive Committee of The American Association of State Highway Officials in St. Louis, Missouri, about the middle of June. The Commission unanimously approved the request, and authorized such attendance at State expense.

The Engineer brought up for discussion the proposition that was presented to the Commission when in Eugene recently, by Mr. William Tugman of that city, for the control of access to Franklin Boulevard, between Walnut Street and Judkins Point, (Pacific Highway) in Eugene, involving purchase by the city of property located on the north side of the highway, and purchase by the State of property located on the south side of the highway. He recalled that a local group has arranged for the purchase of property on the north side of the highway for city park purposes, and has secured options for the acquisition of property on the south side of the highway adjoining the Highway Department's Maintenance Headquarters, totalling approximately $27,500, which it is asking the state to assume. The Secretary of State, he said, is endeavoring to acquire a tract in the same vicinity on which to construct a building for his purposes. In fact, he is negotiating with someone to build a fireproof building which he expects to pay for at the rate of $200 a month. Moreover, the Public Utilities Commissioner wants office space for his Department, and has indicated that he would pay $75 per month for it, making the total of monthly payments by these two departments of $275, which is sufficient, he said, to amortize the building investment over a fifteen year period. He further stated that the Highway Department has nearly enough property now for its purposes, and to house the State Police, and would not need all of the property that Mr. Tugman has in mind, but could use part of it to advantage. The Commission indicated in the discussion of this matter that it might acquire the property in question if the Secretary of State would sign a contract guaranteeing to rent the property from the Highway Department for fifteen years if the Highway Commission bought the property he wants and erected a building thereon. A decision in the matter was deferred until the following day when Mr. Tugman is scheduled to be present. (See ahead for additional Minute entry and final action.)

The Engineer brought up for discussion a claim from School District No. 51, Coos County, for additional compensation in connection with a right of way settlement along the Delmar-Coledo Section of the Oregon Coast Highway, Coos County. He read aloud a report from the Right of Way Engineer to the Chief Counsel on the subject, in which it is pointed out that the original settlement with the School District provided for total payment of $300, representing the cost of land, rebuilding of some steps, and re-establishing a picket fence. It appears that when the negotiations for the right of way were carried on, the School Board was told that the slope line would lie approximately ten feet from their building, but in actual practice it is only three feet from the building, which has necessitated considerable change in the arrangement of school facilities, and has cost the District added

expense. It also appears that the contractor was careless in his operations and wrecked and destroyed certain playground equipment, which will have to be replaced. Moreover, the original settlement provided for the sum of $100 for re-establishing 100 wooden steps for entrance to the property, but it now appears that the steps cannot be moved and will have to be replaced with new steps. The Engineer advised that the total of all the items for which the district wants payment is $300 over and above the amount of the original settlement. In the discussion of this matter, the question arose as to who is responsible for the damage, the state or the contractor. Action in the matter was deferred pending additional facts, which the Engineer and Chief Counsel were instructed to secure and report at the next meeting.

There was presented for the Commission's consideration a proposal for the vacating of a short section of Lombard Street, and an alley adjacent thereto, situate on the east side of Railroad Avenue in the City of North Bend, the portion of Lombard Street to be vacated extending from Railroad Avenue to Tremont Street, and the alley being located in Block 35, Coos Bay, Plat "B". It appears that the Weyerhaeuser Timber Company gave the state a waiver of access for all of its property between Lewis Street and Oregon Avenue on the east side of the Oregon Coast Highway, and is now proceeding to vacate the streets and alleys lying within that section, but needs the consent of the State Highway Commission thereto. The Chief Counsel advised that the Company's request is in order, and he recommended its approval by the Commission. The Commission approved the recommendation unanimously. (The "Consent to Vacate" was signed by the Commission on the following day.)

There was presented to the Commission a supplemental request from the U. S. Army Engineers for permission to enter upon certain portions of the right of way of Denver Avenue, Portland, (Pacific Highway West) for the purpose of reconstructing a ring levee around the east side of Denver Avenue underpass. It was recalled that the Commission at its special meeting in Burns of May 2nd, approved the original request of the Army Engineers to do certain reconstruction work on the right of way at this location, but now because of certain changes in plans, additional area is required to accommodate their work. The Engineer recommended approval of the request. The Commission approved the recommendation unanimously. (Permit authorizing the Army Engineers to use the highway right of way for the purpose desired, was signed by the Commission on the following day.)

The Chief Counsel reported a request from the County Court of Coos County that he be permitted to assist the County in acquiring right of way needed in connection with construction of a bridge on a Federal Aid Secondary Highway in the Town of Myrtle Point. It appears that the County Court is having difficulty with the acquisition of this right of way, and needs assistance. The Commission authorized the Chief Counsel to help out the County if he has time to do it.

The Commission discussed briefly matters concerning which delegations are scheduled to appear on the following day but took no action on any of them.

The meeting adjourned at 4:50 p.m., to reconvene the following morning in the same room at 9:00 a.m.

Portland, Oregon
May 17, 1949

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction work were opened and read aloud, pursuant to previously published notice, after which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. the same day.

COOS BAY-ROSEBURG HIGHWAY IN COOS COUNTY

SOUTH MYRTLE POINT SECTION

Coos Bay Dredging Co., Coos Bay	$ 15,887.00
Martin Kincheloe, Myrtle Point	16,062.67
Loyd Calkins Co., Ocean Lake	17,164.00
Arthur Simonsen & A. C. Baumbeck, Sandy	21,835.00
Oscar E. Joelson, Eugene	25,728.00
George E. Corliss, Ontario	30,315.00

UMPQUA HIGHWAY IN DOUGLAS COUNTY

J. C. Compton Co., McMinnville	24,350.00
D-H Paving Co., Vancouver, Washington	24,885.00

A delegation representing the John Day and Harney County Chambers of Commerce consisting of the following people appeared before the Commission regarding the status of the proposed improvement of the Beech Creek Section of the Pendleton-John Day Highway, and other projects in Central Oregon: Lloyd Ogilvie and John Clay representing the John Day Chamber of Commerce; J. L. McCullough and M. D. Woolley, Burns, of the Harney County Chamber of Commerce. Mr. Ogilvie headed the group. He inquired if any work has been programmed for the Beech Creek Section. Chairman Banfield replied that this project was included in the first three-year Forest Highway program but has not been done because [illegible] funds, however, it is anticipated that the work will be started some time this fall. W. H. Lynch, Division Engineer, Public Roads Administration, who was present, stated that they tried to include the project in this year's program but just couldn't make it because of lack of funds. Mr. Ogilvie then inquired as to when the oiling on the new section of the Ochoco Highway would be done. Chairman Banfield replied that it is not possible to state at this time when the oiling will be done because the job is now only in the grading stage. The Engineer advised that money to complete the grading has been allocated and that the surfacing will very likely be taken care of in the Commission's next program.

Mr. McCullough inquired concerning the completion of the Rome-Princeton Secondary Highway. He was informed that this project would be considered by the Commission in the formulation of its next construction program, to be the subject of a special meeting of the Commission on the following day.

A delegation composed of the following people and representing the Cascade Highway Association, Inc., was present and asked the Commission to authorize a survey of the proposed Cascade Highway along the foothill route from Portland to Eugene via Mount Angel and Lebanon: George Schmidt, President, Mt. Angel Businessmen's Club; Lawrence E. Spraker, Stayton, Secretary of the Cascade Highway Association; Lew Garbutt, Manager, Springfield Chamber of Commerce; Ben Fisher, Brownsville, Director of the Cascade Highway Association; and Oliver C. Larson, Manager, Lebanon Chamber of Commerce. Mr. Schmidt acted as spokesman for the group. Chairman Banfield advised that the Commission has discussed this matter with the Engineer, who estimates the cost to build the road at nine or ten million dollars. The Commission, he stated, does not have such sum of money available, especially for construction of a highway that parallels existing routes. He further stated that the Commission must spend the money at its disposal for highway improvements that the majority of the travelling public wants, and that the highway under discussion is not in that category although it perhaps will be built at some time in the future. It is the Commission's first obligation, he said, to complete the present system of highways and to make such improvements as are necessary to take care of existing traffic, and construction of the Cascade Highway cannot be considered in the immediate future with the amount of funds presently available and anticipated. The request for a survey on the proposed Cascade Highway was thereupon denied.

The delegation also requested construction of a "shortcut" highway extending from the North Santiam Highway to Portland. Chairman Banfield expressed the feeling of the Commission by stating that such highway, nor any other "shortcut" highway can be justified until the main arterial highways are completed.

A delegation from Corvallis and the Lobster Valley District of Benton County, consisting of the following people, appeared before the Commission and requested an extension of the Alsea-Deadwood Secondary Highway south of Alsea to serve Lobster Valley: B. N. Woods, Corvallis, hotel owner; George W. Hendrix, Alsea rancher; Norman Supp, Alsea sawmill owner; John Orr, Alsea Rancher; and Walter Schmidt, Corvallis, Benton County Commissioner.

Mr. Wood, who was spokesman for the group, explained that the only feasible route of travel into Lobster Valley at the present time for the 500 people who live there is over a privately-owned logging road. He advised that the district contains many fine ranches, and that Benton County does not have funds to take over the road. Mr. Hendrix pointed out that the Lobster Valley area was made a part of Benton County by action of the 1949 legislature. He urged favorable consideration by the Commission from the standpoint of the 100 school children of the district who attend school in Alsea; and to facilitate the marketing of produce of the district. He asked the Commission to purchase the road from the owners. Chairman Banfield stated that, according to the Engineer's report on the subject, the road would cost the State about $140,000. He gave as his thought that it is the County's responsibility.

bility. He also said that the Commission has an established policy not to add any more roads to the state highway system until the improvement of the roads now in that system is farther advanced, because it doesn't have the money to construct and maintain them; nevertheless, he added, the Commission will take the request under advisement.

A delegation from Bend, representing the Chamber of Commerce, and composed of the following persons, appeared before the Commission and requested improvement of the Bend-Sisters Highway between Bend and Tumalo: Floyd West, Secretary, Bend Chamber of Commerce; C. L. Allen, County Judge, Bend; A. E. Stevens, County Commissioner, Bend; and Douglas Ward, Chairman of Bend Chamber of Commerce Highways Committee.

Mr. West acted as spokesman for the group. He stated that the section referred to is very narrow and crooked, and its improvement is merited because of the large volume of traffic that it carries, which will be greatly augmented when the North Santiam Highway is completed, and to facilitate the transportation of pumice, lumber and farm produce from the district served to the division rail point in Bend. He predicted a great saving in freight costs to the shippers. Judge Allen also asked the Commission to allocate funds for this road.

Chairman Banfield advised that according to a report from the Engineer, the estimated cost to rebuild this road is between $300,000 and $360,000, which sum the Commission does not have available now. He added that the Commission will be in session on the following day to discuss projects for its next two-year program and will consider this project at that time, but unless a change is made in the program as tentatively set up the improvement probably will not be included.

Mr. Ernest J. Burrows, attorney, Portland, appeared before the Commission in behalf of his client, Mrs. Louise Bissaillon, Oswego, regarding the encroachment of Mrs. Bissaillon's service station on the Oswego Highway right of way near Oswego. Mrs. Bissaillon and her daughter, a Mrs. Richards, were also present. Mr. Burrows stated that Mrs. Bissailon, whose property is under lease to the General Petroleum Company, is selling the property under contract and it appears likely that the deal will be "called off," and her lease arrangement with the General Petroleum Company terminated, unless the servicing of cars on the highway right of way is permitted. The Highway Commission's offer to sell Mrs. Bissaillon the small area involved in the encroachment, he said, is fair and acceptable except for the condition of the sale which would not permit the servicing of cars on the highway side of the pumps. He declared that Mrs. Bissaillon stands to lose a $25,000 investment if a satisfactory solution of the problem cannot be reached, and suggested that the state might deed a sufficient area to Mrs. Bissaillon so cars could be serviced on the highway side of the pumps without encroaching on the highway property. Mr. Burrows was informed that because of legal features involved the Commission cannot take action until it has the recommendation of its Chief Counsel. The matter was thereupon referred to the Chief Counsel for such recommendation.

Mr. William Tugman, Eugene, appeared before the Commission regarding his proposal, previously presented to the Commission in Eugene on May 4, 1949, for the control of access to Franklin Boulevard (Pacific Highway) between Walnut Street and Judkins Point. He recalled the previous offer of local people to acquire necessary property on the north side of the highway, which is to be used for city park purposes, and their request that the State acquire properties on the south side of the highway, adjoining the Highway Department's Maintenance Headquarters. Mr. Tugman presented a memorandum of their proposal, which discloses that options have been secured for purchase of the properties on the south side of the highway at a total cost of $27,250, exclusive of a tract which the Secretary of State is interested in as location for a branch office and for which an option has been secured at a purchase price of $3,000. It appears that the options obtained for the "Byers" tract, at $11,500, and the "Campbell" tract, at $3,150, on the south side of the highway, expire today, (May 17), and will have to be closed immediately in order to get the benefit of the option prices. In the discussion of this matter the question arose whether or not, if the Highway Department acquired the land that the Secretary of State wants and constructed a building thereon to accommodate his forces, the Secretary of State would agree to lease the property on a rental basis sufficient to amortize the investment within a reasonable length of time. Because of uncertainties, the Commission deferred its decision until the afternoon session. The Engineer and Chief Counsel were instructed to study the matter further in the meantime from the standpoint of how much it will cost the State if the proposition is approved, and what benefits will be derived. (The matter was discussed further later in the day, at which time the Commission unanimously approved purchase of the properties under option on condition that the Secretary of State will agree, in writing, to enter into an appropriate lease with the Commission covering use of the building which will be constructed for him by this Commission and will pay $200 monthly for use of the same. See ahead for additional entry.)

A delegation from Salem, including R. L. Elfstrom, mayor; ex-Governor Charles Sprague, publisher; Jim Olson, Capitol Journal; J. L. Franzen, City Manager; and Walter Musgrave, Mayor of West Salem, appeared before the Commission regarding the State Highway Engineer's report on studies made by him of the highway situation in Salem and vicinity. Mr. Elfstrom headed the group. He thanked the Commission for making the report possible, and advised that it was adopted by the City Countil by a six to two vote. He further stated that most of the thinking people in Salem favor the plan as outlined therein. Mr. Franzen, City Manager, read aloud and presented a resolution adopted by the City Council outlining its position with respect to the plan. He pointed out that the resolution provides for further discussion of the matter with the highway Commission, and suggested that the Commission authorize its Engineer and Chief Counsel to confer with the City in an endeavor to formulate a working agreement with respect to carrying the proposed plan into effect as soon as possible. He also said that they do not expect the Commission to do at once everything included in the plan, but the city needs immediate relief in some ways, such as a new bridge over the Willamette River, and the proposed one-way routing for northbound and southbound traffic. Chairman Banfield advised that the Commission has not adopted the Engineer's report and has made no committment whatsoever regarding the overall plan suggested therein, consideration

so far being limited to construction of a new bridge to relieve traffic between Salem and West Salem; moreover, the Commission does not have the money available to finance the entire project now and considers that it would be unfair to obligate future highway commissions to a long-range program such as is now being discussed. Chairman Banfield mentioned that the Commission would discuss program matters on the following day and would then consider the Salem project and do what it could so far as funds would permit. Mr. Sprague, who represented the Long Range Planning Commission of Salem, stated that they realize the completion of the entire project will take a number of years and that the work must be done step by step. He further stated that the Planning Commission concurs in the Highway Engineer's recommendation for the location of the Willamette River Bridge and for the connection on the west end of the bridge. He urged the Commission to include in its plans for construction of the bridge provision for proper approaches on the West Salem side. Edgewater Street in West Salem, he said, is not capable of caring for the traffic that uses it, and in their estimation the Commission should extend its improvement to include the proposed highway along the river bank. Mayor Musgrave endorsed the remarks of Mr. Sprague. He also expressed appreciation for the Engineer's report, which, he said, the people of West Salem have adopted in its entirety. Chairman Banfield concluded the discussion by again stating that the Commission would consider the Salem plan in its deliberations on the following day.

The Commission again discussed the request of the Weyerhaeuser Timber Company to purchase a portion of Simpson State Park at North Bend, particularly a 2.2-acre area including the old ferry landing at this place. Chairman Banfield expressed the feeling that when the Commission acquires property for state park purposes it should be retained for such purpose, but in this particular instance the question arises - is this property of more value as an industrial site than as a park? Commissioner Chandler gave as his considered opinion that it is more essential to industry. The Parks Superintendent advised that the property is not absolutely essential to the Park, and that its sale would not interfere with development of the park but would simply stop the docking of pleasure boats at that point. As a result of discussion, the matter was referred to the Chief Counsel with instructions to appraise the property and report back to the Commission.

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m. with the same persons present and participating.

The Commission resumed discussion of the matter proposed by Mr. William Tugman during the morning session with respect to acquisition of properties along Franklin Boulevard, Eugene, to control access to the highway between Walnut Street and Judkins Point. As a result thereof, the Commission decided unanimously to close the options already secured at the amounts thereof if the Secretary of State will agree to enter into an appropriate lease agreement with the Commission for the use of a building that will be constructed by the Highway Department for his convenience, and will agree to pay $200 per month for such use until the investment is amortized.

Messrs. T. I. Chapman and R. L. Kruse, Eugene, appeared before the Commission and renewed their request to purchase a small tract of state-owned land near the intersection of East Broadway and Alder Street in Eugene. Mr. Chapman recalled his appearance before the Commission in December, 1948, and the Commission's statement to him at that time that he would be given first refusal of the property if the Commission decided to dispose of it. He said they still want to acquire the property with right of access from the property to the highway at one point. He exhibited a map showing the property under discussion and that of numerous others nearby where right of access is not limited or restricted. It was his thought that free access to the highway at one more point will not create any more hazard than now exists. As a result of discussion the Commission decided that, if it sells the property it would be on the basis that the purchaser pay for it a price commensurate with the value of other property in the vicinity as now established; moreover, it will not be sold unless the Commission is advised by the Engineer and Chief Counsel that access to the highway at that point will not create a hazard to other traffic. The matter was referred to the Engineer and Chief Counsel for investigation and report.

A delegation from Milwaukie composed of the following appeared before the Commission regarding a proposed service road along the east side of the Pacific Highway East between Milwaukee and Portland.

Jack Taber, City Manager
Ed Norbeck, Garland Taylor and Pete Mortensen; City Councilmen
Don Calhoun and Ed Jassmer, Lions Club
Dick Williams, Member of Planning Commission
Silas Peake, Chairman of Planning Commission
Judge Marie Thiessen, President of Business Women's Club
Mrs. Cousin and Mrs. Nydegger, members of the Business Women's Club
E. W. Kirkpatrick, City Attorney
M. S. Shrock, member of Chamber of Commerce
Fred Sperr, Mayor

Jack Taber, who was spokesman, urged the Commission to acquire right of way for the road now before developments occur, particularly along the south end. He advised that the International Truck Company already has purchased here, that it intends to develop, and that this Company will need access to the highway. He offered in behalf of the City of Milwaukee to furnish material for the roadway embankment, which, he said, would cost the city about as much as the right of way will cost the state. He declared the construction of the road a matter of urgency because of the plans of the International Truck Company.

The Engineer estimated the total cost of the job at $86,000, and the cost to the state for right of way at about $20,000 to $25,000. He confirmed Mr. Taber's statement that the cost to the city for embankment materials would approximately equal the right of way cost. Chairman Banfield advised that the Commission will have to be assured of the abandonment of the Milwaukee Housing project at the north end of the proposed road before it can make a decision in the matter, so it cannot decide today.

The matter was thereupon referred to the Engineer and Chief Counsel with instructions to secure definite and detailed information and report at the next meeting.

The Commission discussed with the Engineer the matter of including cost of rock on Project Estimate sheets on those jobs where the State furnishes crushed rock gratis to the contractor. The Chief Accountant advised that although the cost of rock is not shown on the Project Estimate sheets, it ultimately is charged to the contract and credited to the job to which it was originally charged. The Engineer was instructed hereafter to show the cost of such rock on future Estimate sheets.

The Commission discussed with the Engineer the bids received at the morning session and at 3:00 p.m. Chairman Banfield publicly announced the awards as follows, the action of the Commission in each instance being unanimous:

"South Myrtle Point Section of the Coos Bay-Roseburg Highway in Coos County. 0.43 mile of grading and surfacing. Coos Bay Dredging Company, Coos Bay, submitted the low bid for this work in the amount of $15,887. Martin Kincheloe, Myrtle Point, submitted the second low bid in the amount of $16,062.67. Four higher bids were received. The Commission has deferred award of this contract pending satisfaction of certain conditions, and all bids have been referred to the Engineer with authority to award the contract to the low bidder when these conditions have been satisfied.

"Luder Creek-Murphys Camp Section of the Umpqua Highway in Douglas County. 2.08 miles of grading, surfacing and oiling. Umpqua River Navigation Company, Reedsport, submitted the low bid for this job at $171,252, using asphalt. No bid was submitted for the use of tar. Loyd Calkins & Company, Ocean Lake, submitted the second low bid in the amount of $210,404, using asphalt. No bid was submitted for the use of tar. One higher bid was received. The Commission has deferred the awarding of this contract pending satisfaction of certain conditions and has referred all bids to the Engineer with authority to award to the low bidder when these conditions have been satisfied.

"Chiloquin Maintenance Buildings in Klamath County. Burkhard and Schortgen, Klamath Falls, submitted the low bid for this job at $13,376.53. R. H. Jones, Hillsboro, submitted the second low bid at $16,017. One higher bid was received. The contract has been awarded to the low bidder, Burkhard and Schortgen.

"Waldport oil mat surfacing project on Mill and Grant Streets. Lincoln County. Baker and Wilson Paving Company, Coos Bay, submitted the low bid for this work at $6,403.50, using asphalt. No bid was submitted for the use of tar. The only other bid received was that of R. O. Dail, Portland, at $7.32?. using asphalt. The contract has been awarded to the low bidder, Baker and Wilson Paving Company.

"Traffic signals on Eighth Street at Madison Street in Albany, Linn County. Mill Electric Company, Salem, submitted the low bid for this work at $4,186.80. W. R. Grasle Company, Portland, submitted the only other bid at $4,940. The contract has been awarded to the low bidder, Mill Electric Company.

"Construction of a concrete slab span bridge over Ames Creek in Sweet Home, Linn County. Werner and Jeske, Inc., Eugene, submitted the low bid for this work at $8,461.50. Archie R. Averill, Portland, submitted the second low bid at $9,725. Six higher bids were received. The contract has been awarded to the low bidder, Werner and Jeske, Inc.

"Idaho State Line-Blue Mountain Pass Section of the I. O. N. and Jordan Valley Highways in Malheur County. 42.46 miles of reciling. J. C. Compton Company, McMinnville, submitted the low bid for this work at $44,084. Tom McCorkle Construction Company, Boise, Idaho, submitted the second low bid in the amount of $49,471. Three higher bids were received. The contract has been awarded to the low bidder, J. C. Compton Company.

"Roberts Avenue paving project in Gresham, Multnomah County. Parker-Schram Company, Portland, submitted the low bid for this work at $3,935. Cascade Construction Company submitted the only other bid at $4,872.50. The contract has been awarded to the low bidder, Parker Schram Company.

"Construct a new roof on Vista House at Crown Point on Columbia River Highway, in Multnomah County. Carl B. Armpriest, Salem, submitted the low bid for this work in the amount of $3,538. Lorenz Bruun, Portland, submitted the second low bid in the amount of $5,849. One higher bid was received. The Commission has rejected all bids for this job as being too high.

"Milton-Freewater surfacing and oiling project on Davis Street in Milton and on Washington Street in Freewater, Umatilla County. Newport Construction Company and Russell Olson, Portland, submitted the low bid for this work at $24,059. Morrison and Fisher, Walla Walla, Washington, submitted the only other bid in the amount of $27,493.50. The Commission has referred both bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Freewater-(Cleveland Street-North City Limits) Landscaping Project on the Oregon-Washington Highway in Umatilla County. C. S. Whitcomb Company, Portland, submitted the low bid for this work in the amount of $14,646.50. Coast Construction Company, Portland, submitted the second low bid in the amount of $17,926.11. One higher bid was received. The contract has been awarded to the low bidder, C. S. Whitcomb Company.

"Columbia County Line-Forest Grove Section of the Nehalem Secondary Highway in Washington County. 10.76 miles of reoiling. Harr and Horton, Portland, submitted the low bid for this work in the amount of $16,783

using tar. They also submitted a bid in the amount of $16,918 using asphalt. Warren Northwest, Inc., Portland, submitted the second low bid in the amount of $17,488 using asphalt. They submitted no bid based on the use of tar. Seven higher bids were received. In the proposal submitted, Harr and Horton offered to reduce the amount of their bid by $1,200 if awarded also the Hillsboro-Tigard-Wilsonville recoiling project. The Commission has awarded the contract to the low bidder, Harr & Horton, on the basis of their combination bid for both projects.

"Hillsboro-Tigard-Wilsonville Recoiling Project on four secondary highways in Washington County. Harr and Horton, Portland, submitted the low bid for this project in the amount of $56,081 using asphalt. They also bid $55,291 using tar. Warren Northwest, Inc., Portland, submitted the second low bid in the amount of $59,776 using asphalt. They submitted no bid for use of tar. Seven higher bids were received. The Commission has awarded the contract to the low bidder, Harr & Horton.

"Dayton Prairie School-Dayton Junction Section of the Amity-Dayton Secondary Highway. Two miles of surfacing and oiling. O. C. Yocom Company, McMinnville, submitted the low bid for this work in the amount of $21,260. J. C. Compton Company, McMinnville, submitted the second low bid in the amount of $24,350. One higher bid was received. The contract has been awarded to the low bidder, O. C. Yocom Company."

County Judge James H. Sturgis of Umatilla County was present and discussed with the Commission a proposal that the Commission deed to the City of Pendleton for park purposes 120 acres of land that the Highway Department acquired in connection with the purchase of right of way for the Pendleton Airport Secondary Highway. He said, if the Commission will give this land to the City, then Umatilla County will take over as a county road the Airport Secondary Highway, thus relieving the State of future maintenance of that road. He also said that there would be no objection to a provision in the deed of conveyance to the effect that the property would revert to state ownership if it were used for any purpose other than as a park. The Commission took the matter under advisement. Following Judge Sturgis' departure the Engineer advised that approximately 120 acres had been purchased in the original acquisition for $9,500 and that of the 120 acres, approximately 85 acres is available for park use, with the exception of a parcel of about 7.2 acres which has a number of houses on it and which the City of Pendleton recently sought to purchase. It was his thought that the 7.2-acre tract, previously requested by the City, should be excluded from consideration in the park deal mentioned by Judge Sturgis. As the result of discussion the Commission referred the matter to the Chief Counsel to appraise the property and report back.

A delegation of residents of the town of Tualatin and vicinity, composed of the following, appeared before the Commission in the interests of the early completion of the West Portland - Hubbard Highway, including a bridge across the Willamette River in the vicinity of Wilsonville: Frank Kohler and Wayne Laird,

members of Tualatin Civic Club; Ben Andrews, Howard Elman and Henry Meares, members of Road Committee; Omer Moore, Councilman; Harry Walrod, Mayor of Tualatin.

Mr. Kohler was spokesman. He cited that the completion of this highway would:

1) Provide a more direct and shorter route from Portland to upper valley points;
2) Relieve congestion on US99E north of Hubbard; and
3) Provide better highway facilities for the area around Tualatin, which, he alleged, has been neglected.

Chairman Banfield advised that a start was made on this highway a number of years ago but the work had to be discontinued because of the war, and since that time the cost of construction has risen so much that the work could not be resumed due to lack of funds. The Commission's primary function, he said, is to take care of existing roads where traffic is heaviest, and to construct highways that are most in demand and will serve the greatest number of people. He added that because available funds are needed for such purposes, there is very little likelihood that the Commission can find money to put into new highway construction such as the delegation requested. This concluded the discussion.

A delegation from Corvallis composed of the following people appeared before the Commission urging improvement of the Corvallis-Newport Highway between Toledo and Newport, and construction of the Pacific Highway West on new alignment immediately north of Corvallis: V. L. Goodnight, Corvallis City Engineer; and Vance Taylor, Mike Baur, Perry Arnesberg, members of the Corvallis Chamber of Commerce.

Mr. Goodnight was spokesman for the group. He urged the major reconstruction of the Toledo-Newport Section in behalf of the people of those towns, rather than a temporary improvement as previously has been proposed, and especially urged acquisition of necessary right of way along the proposed route so people will have such information when planning the development of their holdings. For similar reasons he also requested early action on construction of the proposed new entrance of US99W into Corvallis from the north. He was informed that the Commission considers that it now is doing quite a bit for the people of this district and will continue so to do as is financially possible. Mr. Goodnight was referred to the Engineer for information as to the alignment of the new highway north of Corvallis, right of way for which has partially been acquired. The Commission took both projects under advisement. Mr. Taylor requested that consideration be given to improvement of the road between Nashville and Orton in Lincoln County, and was informed that this road is a county road under the jurisdiction of Lincoln County and that the Commission is not now in position to take it over as a state secondary highway.

The Right of Way Engineer, Mr. Forrest Cooper, again brought up for discussion his report submitted on the previous day, with respect to the sale of buildings and surplus land located at Newberg. He recalled the offer

of Dale Compton, Newberg, to purchase the Arthur M. King building, No. 14396, for the sum of $525, and a subsequent offer of Mr. Cecil Wight to pay $1000 for this building. He also recalled that the Commission deferred a decision with respect to this particular sale pending a recommendation from the Chief Counsel. He advised that subsequent to the discussion of the matter on the previous day, he contacted Mr. Compton, who now states his willingness to meet Mr. Wight's offer of $1000. He recommended acceptance of Mr. Compton's revised offer. The Engineer and Chief Counsel concurred. The Commission approved the recommendation unanimously.

With respect to the remaining items, the Right of Way Engineer renewed his recommendations contained in his previous report, viz: that the offer of Dale Compton to purchase the Newberg Motel (both land and building) for the sum of $3,125 be accepted; that Mr. Compton's offer to purchase the Arthur E. McIntosh building, No. 14397, for $1,525 be accepted; that Mr. Compton's offer to purchase the land only acquired from Arthur M. King and Arthur E. McIntosh, for the sum of $300 be rejected; that Kenneth Dodd's offer to purchase the King building and the King and McIntosh land, for $1000, be rejected, but that Mr. Compton's offer to pay $3000 for the Green Gables buildings on the condition that the State deed to him a small tract containing 10,650 square feet of surplus property, be accepted. The Engineer and Chief Counsel concurred in the recommendations. After due consideration, the Commission approved the recommendations by unanimous vote.

There was presented for the Commission's consideration, a certified copy of an ordinance, No. 383, adopted by the City Council of the City of Oswego, authorizing execution of an agreement between the City and the State Highway Commission, concerning the improvement of the Oswego Highway through this town, and also authorizing the enactment of an ordinance providing for parallel parking of vehicles on State Street, route of the Oswego Highway, between "C" Avenue and Leonard Street. The Chief Counsel advised that the City has executed the agreement mentioned in this ordinance, but he has not as yet seen a copy of the ordinance, which provides for the parallel parking of vehicles, although provision for the same is included in the agreement. He presented a copy of the agreement for the Commission's further consideration, and recommended approval of the same. The Commission approved the agreement unanimously, but ordered that no monies be spent for the improvement of this street until the Chief Counsel advises that the city has complied with, and satisfied, all of the Commission's requirements, including adoption of an ordinance establishing parallel parking for vehicles on this street. (The agreement was signed later.)

Chairman Banfield brought up for discussion a news item concerning a proposal presented by the people of the City of Warrenton, for the rerouting of the Oregon Coast Highway between Astoria and Warrenton, on an alignment closely parallel with the S. P. & S. Railway, with joint construction of a highway-railroad embankment. It appears from the news item that the Railroad Company is proceeding with the construction of its facility, regardless of any ideas the State Highway Commission may have with respect to rerouting the highway. The Engineer was instructed to contact the S. P. & S. Railway Engineers regarding the matter, and ascertain what plans the Railroad Company has for restoring and improving its facility at this place.

The Engineer reported requests for the early removal of snow from the passes on the McKenzie Highway and on the Mt. Hood Highway. He requested authority to proceed immediately with such operations so as to make both of these highways available for travel at the earliest possible time. The Commission approved the request unanimously.

The Commission considered, approved and signed the following agreements, et cetera:

Deed conveying unto W. J. Conrad Lumber Co., Coos Bay, a portion of Block 61, Dennis Addition to Marshfield. (Agenda Item 1-g)

Deed conveying unto Pauline Matis, property owned by the State and the City of Portland, along Front Avenue, Portland. (Agenda item 1-i)

Agreement with Lawrence B. Jennings and wife, re right of way for the Bridge-Remote Section of the Coos Bay-Roseburg Highway, Coos County. (Agenda item 1-n)

Permit authorizing Chester Conger to construct, maintain and use a roadway across state-owned property in the northern part of Eugene. (Agenda item 5-k)

Certificates directing the Secretary of State to advance Highway funds to Tillamook, Yamhill, Baker, Benton and Klamath Counties. (Agenda item 5-l)

Agreement with Bonneville Power Administration authorizing pole line construction on the North Santiam Highway near Sardine Creek. (Agenda item 5-m)

"Consent to vacate a portion of Lombard Street and alley adjacent thereto along Oregon Coast Highway in Coos Bay." (Supp. Agenda item 1-u)

Agreement with U. S. Army Engineers re use of portions of Denver Avenue right of way for reconstructing ring levee around east side of Denver Avenue underpass, Portland. (Supp. Agenda item 1-v)

Agreement with City of Klamath Falls concerning traffic signal installation at intersection of Alameda Street and Esplanade Street in Klamath Falls. (Previously authorized Feb. 28, 1949)

Agreement with City of Beaverton re traffic signal installation at intersection of Cedar Street and Tualatin Valley Highway in Beaverton. (Previously approved on condition that City would assume one half the cost of installation. This condition now satisfied.)

Modification of cooperative agreement with Public Roads Administration covering Niagara-Detroit Section of the North Santiam Highway, Marion County.

Two agreements with Wm. J. Lindsay providing for easements in connection with detour road across Lindsay property in Lane County. (Authorized by Commission on April 11, 1949.)

15334

Easement agreement with Wm. J. Lindsay and Lloyd M. Lewis, et ux, re connection with detour road in Lane County. (Previously authorized by Commission on April 11, 1949)

Deed conveying unto Dale Compton and Myrtle Compton, a parcel of land in Lots 38 and 39 of Home Acres, Yamhill County, Oregon.

Deed conveying unto Oregon State Board of Forestry a parcel of land in Grant County, Oregon.

Agreement with City of Oswego providing for improvement of the Oswego Highway through said city.

The meeting adjourned at 4:30 p.m. to reconvene at 9:00 a.m. the following morning for the special purpose of selecting projects to be included in the Second Postwar Construction Program.

Portland, Oregon
May 18, 1949

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Streamliner Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
W. H. Lynch, Division Engineer, Public Roads Administration
T. M. Davis, District Engineer, Public Roads Administration
H. B. Glaisyer, Secretary
Malcolm H. Hawke, Chief Accountant

The purpose of this meeting was to select projects for the Second Postwar Construction Program, and to provide a program for available federal and state funds, totalling $23,500,000 The Engineer presented a list of eligible projects which were discussed at length.

The entire morning session was taken up in the discussion of this matter, but the final selection of projects was deferred until the afternoon session.

The meeting recessed at 12:00 noon and reconvened at 1:30 p.m. in the same room with the same persons present and participating.

The Commission resumed discussion of the projects to be included in the Second Postwar Construction Program, and as a result of very careful consideration, selected projects totaling $16,267,000, inclusive of right of way, leaving a balance of $4,483,000 in reserve for future allocation and contingencies. The attached resolution relative thereto, marked Exhibit "H", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote, upon motion of Commissioner Chandler, seconded by Commissioner Reynolds.

The following notes apply and have reference to certain projects included in the adopted program, and to other projects which were considered in the distribution of the funds:

PRIMARY FEDERAL AID PROJECTS

1. Grading and paving the Springfield City Section of the McKenzie Highway, Lane County: The Commission approved an allocation of $300,000 to finance this work on the condition that the local people will organize a drainage district to dispose of surplus water, it being considered that the responsibility to take care of drainage water is a local rather than a state matter.

2. Grading, North Unit Canyonville-Johns Section of the Pacific Highway, Douglas County: The Commission authorized an expenditure of $600,000 for this purpose following a conference with Mr. W. H. Lynch, Division Engineer, Public Roads Administration, which resulted in an additional commitment of $884,000 of Forest Highway Funds and $816,000 of State match money to finance the grading, surfacing and paving of the South Unit of the Canyonville-Johns Section of this highway.

3. 4.5 miles of grading, surfacing and bituminous macadam, Barkley Spring-Algoma Section of The Dalles-California Highway: The Commission allotted $825,000 for this project on the condition that there is sufficient room for the highway between the railroad and the adjacent rock hillside. The Engineer was instructed to ascertain the facts and report his findings.

SECONDARY FEDERAL AID PROJECTS

1. County road bridge over the North Yamhill River, Yamhill County: The Commission allocated $75,000 to finance this construction, subject to the condition that Yamhill County will contribute an additional $30,000, making a total of $105,000 for this project.

2. Grading and topping a three-mile section of the Sumpter Valley Secondary Highway between Salisbury and Poker Creek in Baker County: The Commission allocated $150,000 to finance this work, subject to the condition that the Sumpter Valley Railroad Company will donate right of way, pursuant to a previous agreement.

1950

URBAN FEDERAL AID PROJECTS

1. Willamette River Bridge on the Salem-Dallas Highway, Salem, Marion County: The Commission allocated $1,250,000 to finance the bridge structure, and authorized the Engineer and Chief Counsel to negotiate with the Salem City Officials concerning improvement of necessary street connections at the easterly end thereof, such negotiations to be based on a future allocation of $750,000 for revamping the existing bridge over the Willamette River on Center Street, and $330,000 for connecting City streets as may be necessary, making a total proposed expenditure in Salem of $2,330,000. The Engineer was authorized to make surveys ... are necessary in connection with this project on consummation and execution of an agreement with the City of Salem, but not before.

The following projects were considered by the Commission in the formulation of the program under discussion, but approval of the same was held in abeyance for the time being:

PRIMARY FEDERAL AID PROJECTS

1. Grading Judkins Point-Goshen Section of the Pacific Highway, Lane County, $580,000.

2. Structures on the Judkins Point-Goshen Section of the Pacific Highway, Lane County, $220,000.

SECONDARY FEDERAL AID PROJECTS

1. Graveyard Point Bridge over the Coos River on the Coos River Secondary Highway, Coos County, $455,000.

2. Grading, surfacing and oiling Holland County Road, Josephine County, $102,000: The Engineer was instructed to report further on this project.

3. Grading and surfacing the Wocus Marsh-Pelican Bay Section of the Klamath Lake Secondary Highway in Klamath County, $210,000.

4. Grading and surfacing the Pelican Bay-Fort Klamath Section of the Klamath Lake Secondary Highway in Klamath County, $210,000.

5. Grading, surfacing and oiling the Lawen-Crane Section of the Burns-Crane Highway in Harney County, $210,000.

6. Bridge over the Snake River on the Wieser Spur Section of the Old Oregon Trail in Malheur County, $185,000. (Oregon's share)

7. Bridge over the Snake River on the Payette Spur Section of the Old Oregon Trail in Malheur County, $365,000: (Oregon's share) Approval

of these two Snake River Bridge Projects was held in abeyance pending satisfactory agreement with the State of Idaho not only with respect to financing these structures, but also new bridges across the Snake River at Ontario and Nyssa at some future time.

The Commission discussed matters pertaining to the Sullivans Gulch Project in Portland, particularly right of way matters. The Engineer was instructed to render a complete and up-to-date report on this subject.

Commissioner Chandler brought up for discussion the improvement of the South Santiam Highway in the Town of Sweet Home. He gave as his understanding that the Commission some time ago authorized this improvement, but it seems that no provision has been made to finance it. Chairman Banfield gave as his understanding that the Commission did approve this project on the condition that the city would meet the state's requirements with respect to right of way. He expressed his willingness to proceed on such basis. The Engineer was instructed to check the records on this subject and report his findings.

The Commission discussed the matter of employing Mr. Ralph Watson, former political editor of the Oregon Journal, to prepare special articles for the newspapers on activities of the State Highway Department. It was the thought of the Commission that much good would be accomplished and the general public would have a better feeling toward the State Highway Department if it were given more detail than in the past, as to highway financing, programming projects, construction, et cetera. The Commission decided unanimously to employ Mr. Watson on a contract basis as a trial proposition. The Chief Counsel was instructed to prepare an appropriate form of agreement covering the matter.

Commissioner Reynolds brought up for discussion a request from the Rod and Gun Club of Union, Oregon, that they be allowed the use of a larger building than the one they are now using on State Highway property at Union. It appears that the building that they now occupy is too small for their purposes, but there is another building on the premises which would satisfy their needs very nicely, if the Commission will authorize the substitution. It was recalled that both buildings are owned by the State Highway Department and were acquired from the State Fish and Game Commission several years ago when that Board discontinued its hatchery at this place. The Commission referred the matter to the Engineer for recommendation.

Dr C. D. Byrne, Secretary, Board of Education, was present and asked the Commission to loan the services of one of its engineers to make such surveys as are necessary for a road which they propose to build to their new hospital building adjoining the Doernbecher Hospital, Portland. The Commission instructed the Engineer to check into the matter and report back to the Commission by telephone his estimate of the cost to make such survey. The Commission indicated that it will approve the request if the survey is not too costly.

The Engineer requested authority to have someone from the Engineering Department contact graduate engineering students in the colleges and universities of the northwest in an endeavor to interest them in employment with the Oregon State Highway Department. The Commission approved the request unanimously

There being no further business to come before the Commission at this time, the meeting adjourned at 4:00 p. m.

EXHIBIT "A"

Minutes of May 16 and 17, 1949

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Dodge, on the Sams Valley Secondary Highway, was approved by the Commission upon assurance from the Right of Way Engineer that a cattle pass, mentioned as part consideration, was obligated at the time the right of way for the highway improvement was acquired.

EXHIBIT "B"

Minutes of May 16 and 17, 1949

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Code and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Coos Bay-Roseburg and Umpqua Highways are highways under the jurisdiction and control of the State and are, in addition, a part of the federal highway system; and

WHEREAS, for the purpose of providing highways with better alignments and which will more adequately serve the traveling public, the Highway Commission relocated the sections of the said highways as hereinafter set forth, and for such purpose and in connection therewith the real properties hereinafter described are necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition, the Commission is authorized to take all rights of access from property abutting a highway; and

WHEREAS, Coos Bay-Roseburg and Umpqua Highways are major highways of the State, and as such carry large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highways should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that the properties described on the attached sheets are needed and required for use in connection with the construction and maintenance of the section of highway set forth on said sheets; that the specific use for which each particular parcel of real property is needed and required is as expressly stated thereon; that the name of the record owner, or reputed owner thereof, is likewise set forth, together with the Commission's record file number of each parcel. (*)

2. That the highway facility for which each of said parcels of property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That in addition to the acquisition of the respective parcels, it is necessary that there be acquired all rights of access from abutting properties to the highways to be constructed in part upon the parcels described

(Cont.)

EXHIBIT "B" (Cont.)

upon the attached sheets, except such access reservations as are noted as to each parcel. In this connection, a private access is defined as a right of access from and to land abutting the highway of a width of twenty-five feet; said access to be for ordinary travel only, and shall not be used in connection with any commercial institution or activity which in any manner caters to, invites, solicits from, or is dependent upon the users of said highway. A farm crossing is defined as a right to establish, maintain, and use a crossing of the highway for farm purposes only having a width of not to exceed twenty-five feet; provided, however, that upon the alienation of either of the portions of the property severed by the highway, such right of crossing shall cease. A commercial access is defined as a right of access from and to land abutting the highway of a width of twenty-five feet, said access to be for all lawful purposes. (*)

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said parcels of land as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said parcels.

5. That upon the trial of any suit or action instituted to acquire either of said parcels of real property, or any interest therein, the Chief Counsel, or, in his absence the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That the real properties sought to be acquired are described on the attached sheets, consisting of three pages, on which sheets are set forth the right of way file number assigned by the Commission, the respective record or reputed owners, the section of highway for which the property is necessary, and the use and purpose for which the property is sought, together with such access reservations as apply to the particular property. (*)

7. That this resolution be entered in full in the minutes and records of the Commission as of the 16th day of May, 1949.

FOOTNOTE (*)

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 129, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "C"

Minutes of May 16 and 17, 1949

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, as amended, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1948 for street purposes as provided in said law, the several sums of amounts set opposite the names of the respective cities or towns:

Lexington	$ 953.57
Maupin	1,141.71

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That the Resolution Forms 1 and 2, adopted by the City of Lexington in September of 1948 and approved by the Highway Commission on January 24, 1949, shall be cancelled in accordance with the request of the City of Lexington on file in the records of the State Highway Department; and the resolution form adopted by the City of Lexington on May 3, 1949, be substituted therefor.

4. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 16th day of May, 1949.

EXHIBIT "D"

Minutes of May 16 and 17, 1949

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, as amended, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1949 for street purposes as provided in said law, the several sums of amounts set opposite the names of the respective cities or towns:

Adams	$ 753.58	Huntington	$ 4,231.62
Amity	2,430.17	Lexington	994.37
Banks	1,498.24	Lonerock	205.12
Bay City	2,398.96	Maupin	1,190.56
Canyonville	3,509.26	Mitchell	976.53
Gold Hill	2,844.86	Sherwood	2,510.44
Helix	816.00	St. Paul	816.00

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 16th day of May, 1949.

EXHIBIT "E"

Minutes of May 16 and 17, 1949

R E S O L U T I O N

WHEREAS, by the provisions of Section 115-353 O.C.L.A. "No person shall park or leave standing any vehicle, whether attended or unattended, upon the paved or improved or main traveled portion of any highway, outside of a business or residence district, when it is practicable to park or leave such vehicle standing off the paved or improved or main traveled portion of such highway; provided, in no event shall any person park or leave standing any vehicle, whether attended or unattended, upon any highway unless a clear and unobstructed width of not less than 16 feet upon the main traveled portion of said highway opposite such standing vehicle shall be left for free passage of other vehicles thereon, nor unless a clear view of such vehicle may be obtained from a distance of 200 feet in each direction upon such highway;" and

WHEREAS, said section further provides that "Whenever any police officer shall find a vehicle standing upon a highway in violation of the provisions of this section, he is hereby authorized to move such vehicle or require the driver or person in charge of such vehicle to move such vehicle to a position permitted under this section;" and

WHEREAS, the paved or improved or main traveled section of the North Santiam Highway lying and being between M.P. 39.4 and M.P. 39.7 does not exceed the width of 20 feet, and by reason of said limited width it is not possible to park a vehicle on said section of said highway and leave at the same time an unobstructed width of 16 feet upon the main traveled portion of said highway opposite such parked vehicle for the free passage of other vehicles. Nor can a car or vehicle be parked on the paved or improved or main traveled portion of said section of said highway, and provide and maintain at the same time a clear view of such vehicle for a distance of 200 feet in each direction from said vehicle; and

WHEREAS, in the opinion of this Commission, the welfare, the convenience and the safety of the general public demands that all such illegal parking be discontinued and prohibited;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED that the State Highway Engineer be and he is hereby instructed and directed to erect and maintain at M.P. 39.4 and M.P. 39.7 on the North Santiam Highway and at such other points between said mile posts suitable signs on which shall be the words, "Parking of Vehicles Illegal."

BE IT FURTHER RESOLVED that a copy of this resolution be delivered to the Superintendent of State Police and a like copy to the Sheriff of Marion County, and that said officials be requested to give special attention to the enforcement of the provisions of Section 115-353 O.C.L.A. with respect to the North Santiam Highway.

BE IT FURTHER RESOLVED that this resolution be entered in the minutes and records of the Commission as of May 16, 1949.

EXHIBIT "F"

Minutes of May 16 and 17, 1949

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of Highway: North Santiam Highway Number: 162 Route Number: 222

Location of Termini	Established Speed
M.P. 34.25 (Niagara). . . . to M.P. 39.10	35 miles per hour
M.P. 39.10 . . . . . to M.P. 40.20	25 miles per hour
M.P. 40.20 . . . . . to M.P. 46.75 (Detroit)	35 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

EXHIBIT "G"

Minutes of May 16 and 17, 1949

RESOLUTION LIFTING REDUCED LOAD LIMIT

ON THE MT. HOOD HIGHWAY NO. 26

WHEREAS, on the 28th day of February, 1949, at a meeting of the Oregon State Highway Commission, a majority of members being present and participating, the said Commission passed and adopted a resolution reducing the maximum load limit on certain state highways, including the following highway, to wit:

> MT. HOOD HIGHWAY No. 26, in Hood River County, between Cooper Spur (M.P. 78.4) and a junction with the Columbia River Highway (M.P. 102.30)

and

WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said above-named highway;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the

MT. HOOD HIGHWAY No. 26, between mile points 78.40 and 85.0

be and the same hereby is rescinded and cancelled as of the 10th day of May, 1949, and the maximum load limit permissible on the said section of said highway hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that certified copies of this resolution be furnished the county clerk of Hood River County, in which county said highway is located, and the Superintendent of the Department of State Police for his information.

Dated this 16th day of May, 1949.

OREGON STATE HIGHWAY COMMISSION

T. H. Banfield, Chairman
Ben R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner

R. H. Baldock
State Highway Engineer

ATTEST:
H. B. Glaisyer, Secretary

EXHIBIT "H"

Minutes of May 16, 17 and 18, 1949

R E S O L U T I O N

WHEREAS, there is or will be available to the State Highway Commission during the fiscal years 1950 and 1951 for use and disbursement in connection with and for highway construction, including the purchase of necessary right of way, a sum of money amounting to $23,500,000, which said sum or amount is composed of $11,100,000 federal aid funds and $12,400,000 of state funds; and

WHEREAS, of the said sum of $23,500,000 there is available $18,189,000 to be used for federal aid construction projects and the remainder, or balance; namely, $5,311,000 is available for state construction projects and for the acquisition of necessary rights of way; and

WHEREAS, it has been deemed by the Commission in the interest of the state and in furtherance of an efficient administration of the work of the Highway Department to create five divisions, which divisions so created are these:

DIVISION NO. 1 consisting of the following counties or portions of counties:

Clackamas County, all, except that portion of the county lying in T. 5 and 6 S., R. 1 E. and 1 W.

Clatsop County, only T. 4 N., R. 6 W.

Columbia County, only that portion of the county lying in T. 3, 4, 5 and 6 N., R. 1 and 2 W., and the W½ of T. 4 N., R. 5 W.

Hood River County, all, except that portion of the county lying in the east 2 miles of T. 1, 2 and 3 N., R. 9 E., T. 1, 2 and 3 N., R. 10 and 11 E., T. 1 S., R. 10 E., the N½ of T. 2 S., R. 10 E., the east 3 miles of T. 1 S., R. 9 E., and the north 3 miles of the east 3 miles of T. 2 S., R. 9 E.

Multnomah County, all.

Tillamook County, only that portion of the county lying in T. 3 N., R. 6 W., T. 1 and 2 N., R. 5 and 6 W., and the north 2 miles of T. 1 S., R. 6 W.

Wasco County, only that portion of the county lying in T. 4 S., R. 8, 9 and 10 E., the west 4 miles of T. 4 and 5 S., R. 11 E., the north 2 miles of T. 5 S., R. 9 E., and that part of T. 5 S., R. 10 E., lying south of the Wapinitia Highway.

Washington County, all.

Yamhill County, only that portion of the county lying in T. 2 and 3 S., R. 4, 5 and 6 W., T. 2 S., R. 2 and 3 W. and the N½ of T. 3 S., R. 2 and 3 W.

DIVISION NO. 2, consisting of the following counties or portions of counties:

Benton County, all, except that portion of the county in T. 15 S., R. 5 W., lying west of the Long Tom River.

Clackamas County, only that portion of the county lying in T. 5 and 6 S., R. 1 E. and 1 W.

Clatsop County, all, except T. 4 N., R. 6 W.

Columbia County, all, except that portion of the county lying in T. 3, 4, 5 and 6 N., R. 1 and 2 W., and the W½ of T. 4 N., R. 5 W.

Lane County, only that portion of the county in T. 15 S., R. 4 and 5 W., lying north of Junction City and east of the Long Tom River.

Lincoln County, all.

Linn County, all, except that portion of the county lying in T. 11, 12, 13, 14 and 15 S., R. 5, 6, 7 and 8 E., and in T. 10 S., R. 6, 7, and 8 E.

Marion County, all, except that portion of the county lying in T. 8, 9 and 10 S., R. 6, 7, and 8 E.

Polk County, all.

Tillamook County, all, except that portion of the county lying in T. 3 N., R. 6 W., T. 1 and 2 N., R. 5 and 6 W., and the north 2 miles of T. 1 S., R. 6 W.

Yamhill County, all, except that portion of the county lying in T. 2 and 3 S., R. 4, 5 and 6 W., T. 2 S., R. 2 and 3 W., and the N½ of T. 3 S., R. 2 and 3 W.

DIVISION NO. 3, consisting of the following counties or portions of counties:

Benton County, only that portion of the county in T. 15 S., R. 5 W., lying west of the Long Tom River.

Coos County, all.

Curry County, all.

Douglas County, all.

Jackson County, all.

Josephine County, all.

Klamath County, only the W½ of T. 32, 33, 34, 35, 36, 37, 38, 39, 40 and 41 S., R. 5 E.

Lane County, all, except that portion of the county in T. 15 S., R. 4 and 5 W., lying north of Junction City and east of the Long Tom River, and except that portion of the county lying in the east 4 miles of T. 20, 21, 22, 23 and 24 S., R. 5 E., and in T. 20, 21, 22, 23, and 24 S., R. 5½ and 6 E.

DIVISION NO. 4, consisting of the following counties or portions of counties:

Crook County, all.

Deschutes County, all.

Gilliam County, only that portion of the county lying in T. 3 N., R. 17 E., T. 2 and 3 N., R. 18 E., and T. 1, 2 and 3 N., R. 19 E.

Harney County, all that portion of the county lying west of the range line between R. 28 and R. 29 E.

Hood River County, only that portion of the county lying in the east 2 miles of T. 1, 2 and 3 N., R. 9 E., T. 1, 2 and 3 N., R. 10 and 11 E., T. 1 S., R. 10 E., the N½ of T. 2 S., R. 10 E., the east 3 miles of T. 1 S., R. 9 E., and the north 3 miles of the east 3 miles of T. 2 S., R. 9 E.

Jefferson County, all.

Klamath County, all, except the W½ of T. 32, 33, 34, 35, 36, 37, 38, 39, 40 and 41 S., R. 5 E.

Lake County, all.

Lane County, only that portion of the county lying in the east 4 riles of T. 20, 21, 22, 23 and 24 S., R. 5 E., and in T. 20, 21, 22, 23, and 24 S., R. 5½ and 6 E.

Linn County, only that portion of the county lying in T. 11, 12, 13, 14 and 15 S., R. 5, 6, 7 and 8 E., and in T. 10 S., R. 6, 7, and 8 E.

Marion County, only that portion of the county lying in T. 8, 9 and 10 S., R. 6, 7 and 8 E.

Sherman County, all.

Wasco County, all, except that portion of the county lying in T. 4 S., R. 8, 9 and 10 E., the west 4 miles of T. 4 and 5 S., R. 11 E., the north 2 miles of T. 5 S., R. 9 E., and that part of T. 5 S., R. 10 E., lying south of the Wapinitia Highway.

Wheeler County, that portion of the county lying in the south 4 miles of T. 9 S., R. 19, 20, 21, 22 and 23 E., T. 10 and 11 S., R. 20, 21, 22 and 23 E., the south half of T. 11 S., R. 24 and 25 E., and all that portion lying south of the township line between T. 11 and 12 S.

DIVISION NO. 5, consisting of the following counties or portions of counties:

Baker County, all.

Gilliam County, all, except that portion of the county lying in T. 3 N., R. 17 E., T. 2 and 3 N., R. 18 E., and T. 1, 2 and 3 N., R. 19 E.

Grant County, all.

Harney County, all, except that portion of the county lying west of the range line between R. 28 and 29 E.

Malheur County, all.

Morrow County, all.

Umatilla County, all.

Union County, all.

Wallowa County, all.

Wheeler County, all that portion of the county lying north of the township line between T. 8 and 9 S., the north 2 miles of that portion of the county lying in T. 9 S., R. 19, 20, 21, 22 and 23 E., T. 9 and 10 S., R. 24 and 25 E., and the north half of T. 11 S., R. 24 and 25 E.

AND WHEREAS, the funds subject to expenditure by the Commission are allocated to the several divisions in harmony with and pursuant to the following approved and adopted formula of distribution:

Division No. 1	23.95%
Division No. 2	18.83%
Division No. 3	20.41%
Division No. 4	17.83%
Division No. 5	18.98%

AND WHEREAS, by application of the foregoing formula said funds are now for highway construction purposes, including acquisition of rights of way,

allocated to the several divisions into which the State has been divided in the following amounts:

Division	Shares (By formula) In Total Construction Program ($23,500,000 Per Cent	Amount	Program Totals Federal Aid Program	State Major Betterment Program	Sullivan Gulch Right of Way	Total
1	23.95	$ 5,628,250	$ 2,755,000	$ 123,250	$2,750,000	$ 5,628,250
2	18.83	4,425,050	4,167,000	258,050	- -	4,425,050
3	20.41	4,796,450	4,512,000	284,450	- -	4,796,450
4	17.83	4,190,000	3,943,000	247,000	- -	4,190,000
5	18.98	4,460,000	4,196,000	264,250	- -	4,460,250
Totals	100.00	$23,500,000	$19,573,000*	$1,177,000	$2,750,000	$23,500,000

* With respect to the above allocations $18,264,000 has been set aside for construction and $1,309,000 is for right of way.

AND WHEREAS, the Commission at this time, after due consideration of all facts and information gathered as a result of the state-wide inspection of highway problems and highway finance and after giving due consideration to facts and recommendations made by the Legislative Interim Committee provided for in Senate Joint Resolution No. 9 of the 1947 legislative session, is of the opinion that the accomplishment of the matters and things hereinafter in this resolution set forth and adopted will be in the interests of the general public and will further and advance public welfare;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. That the highway construction projects enumerated in Exhibit A consisting of eight sheets, which exhibit is attached hereto and by this reference is made an inseparable part of this resolution, be, and said projects and the whole thereof hereby are, approved, and each and all are incorporated in and declared to constitute the federal aid construction program for the fiscal

years 1950 and 1951.

2. That the unallocated balance shown in Exhibit B, which said exhibit is attached hereto and made a part hereof and which balance totals the sum of $3,306,000 available for federal aid projects and $1,177,000 available for state construction projects, shall be held as a reserve fund or account subject to allocation and distribution by the Commission, for such purpose or purposes, in such amount or amounts, at such times and under such conditions as the Commission may find to be in the public interest.

3. That funds for the purchase of rights of way and for the construction of the projects listed in said Exhibit A hereby are allocated to the said projects in the amounts set out therein. The allocations with respect to divisions are as follows:

	For Construction	For Right of Way	Total
Division No. 1	$ 2,450,000	$ 285,000	$ 2,735,000
Division No. 2	3,360,000	80,000	3,440,000
Division No. 3	2,925,000	428,000	3,353,000
Division No. 4	3,218,000	150,000	3,368,000
Division No. 5	3,075,000	296,000	3,371,000
Totals	$15,028,000	$1,239,000	$16,267,000

4. That with respect to Division 1 there hereby is set aside out of funds herein allocated the sum of $2,750,000, which allocation is to be used for the acquisition of necessary rights of way for the construction of the proposed Sullivan Gulch project in Portland, Multnomah County, Oregon. In this connection it is understood that the said sum includes sums already expended on or allocated to the said project.

5. That the amounts listed in Exhibit B, which exhibit is attached hereto and by this reference made a part hereof, are hereby approved by the Commission as reserve amounts available for allocation by the Commission to specific projects in the several and respective divisions in such amounts and for such

purpose or purposes as the Commission from time to time may find and deem advisable.

6. That it is conceded that funds allocated to the several counties shall be available for the acquisition of necessary rights of way for primary and secondary state highways as well as for highway construction.

7. That the Engineer is hereby authorized and directed to make all necessary surveys and prepare all plans and specifications required for and in connection with the construction of the projects listed in Exhibit A, and said Engineer is further authorized and directed to prepare all necessary descriptions covering all real properties required for use in connection with said projects and deliver to the Commission's Chief Counsel correct and true copies of all descriptions of real properties needed in connection with each and all of said projects.

8. That the Commission hereby reserves the right of decision with respect to the order in which the several projects covered in Exhibit A are to be processed for accomplishment and the Engineer is instructed from time to time to consult with the Commission with respect to the order of the making of surveys of the several projects and with respect to other details incident to preparing said projects or any of them for contract and construction.

9. That the Chief Counsel is hereby authorized and directed as soon as proper real property descriptions are made available to him to proceed in the regular manner to procure appraisals and options covering all real properties, the acquisition of which is necessary and required for each and all of said projects, and submit said options and appraisals to the Commission for consideration, acceptance, rejection or other appropriate action.

10. In instances where real properties cannot be acquired by agreement the Chief Counsel shall report at once such fact and condition to

the Commission with all necessary information for the Commission's consideration and action.

11. The action and orders of the Commission as disclosed herein may be changed or in any respect amended if and when the Commission finds such action to be in public interest.

12. A complete and true copy of this resolution with the exhibits attached shall be delivered to W. H. Lynch, District Engineer of the Public Roads Administration. When approval of the proposed federal aid construction program has been given by the Public Roads Administration it shall be formally recorded in the minutes and records of the Commission.

13. This resolution shall be entered in the minutes and records of the Commission as of the 18th day of May, 1949.

14. The Commission's Secretary hereby is instructed to deliver by mail to the County Judge of each county of the state or to the Chairman of the Board of County Commissioners, as the case may be, a true and complete copy of this resolution.

Portland, Oregon
June 27, 1949

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction work were opened and read aloud in conformity with previously published notice, following which Chairman Banfield announced that awards of contracts would be made at 3:00 p.m. in the same room:

KINGS VALLEY HIGHWAY IN BENTON AND POLK COUNTIES

PEDEE-KINGS VALLEY SECTION

J. C. Compton Co., McMinnville	458,298.40	- - -
Porter W. Yett, Portland	459,255.00	- - -

The Commission unanimously approved the minutes of the meetings held on April 11 and 12; May 2; and May 16, 17 and 18, 1949.

The Parks Superintendent was present with respect to the following State Parks matters:

1. Question of approving H. R. 440, which authorizes the National Park Service to develop and manage reservoir recreational areas at Federal Reservoir sites: The Parks Superintendent advised that this bill particularly provides for the development of a recreational area at Owyhee Dam in Malheur County, and that request has been made that the Highway Commission endorse it. It was the feeling of the Commission that the State would be better off being less obligated to the Federal Government, rather than to ask it for additional funds for such purposes; moreover, it might prove to be a costly undertaking in the event it became necessary for the State to take over the development. In view of this feeling, the Commission decided unanimously not to endorse the bill.

2. Renewal of sheep grazing leases in Cape Sebastian State Park, Humbug Mountain State Park, and in Colvin Waysides: The Parks Superintendent advised that Messrs. J. H. Turner, Robert Fromm and Clyde B. Miller now have permits authorizing them to graze sheep in these areas, which they wish renewed. He recommended the leases be extended for one year each, on the basis of the former leases. The Commission approved the recommendation.

3. Naming a recreational area on the Deschutes River, north of Bend: The Parks Superintendent advised that this park contains forty acres, bordering The Dalles-California Highway, and the Deschutes River, about two miles north of Bend. He suggested that the area be named

"Robert W. Sawyer Timber Waysides" honoring Mr. Sawyer, whose residence is Bend, and who was formerly a member of the State Highway Commission. The Commission approved the recommendation unanimously, upon the condition that it is acceptable to Mr. Sawyer.

4. Renewal of Vista House concession lease: The Parks Superintendent advised that the arrangement now in effect with Mr. and Mrs. Jack Flaucher expires on March 31, 1950, and the question now arises whether or not to renew this arrangement or to advertise the concession for bids. He advised that the present concessionnaires have been operating very successfully and have been returning considerable money to the State Highway fund, so in his mind there is a question if any advantage would be gained by making a change. He pointed out that several inquiries had been received concerning this concession. It was the feeling of the Commission, in view of the fact that the present concessionnaire is operating this place in a very satisfactory manner, that it would be proper to renew the present arrangement. Accordingly, the Commission voted unanimously to extend the present arrangement for one year, through March 31, 1951.

5. Request of the Waldport Lions Club Auxiliary to use a portion of the Waldport Ocean Waysides strip for propogation of flowers: The Parks Superintendent advised that this is a very small wayside and recommended that the request be denied. The Commission approved the recommendation.

6. Acquisition of surplus property bordering the Rogue River and Butte Creek within the boundaries of Camp White, Jackson County: The Parks Superintendent advised that the property referred to is that which has been under discussion for some time, and that the procedure has now reached the point where the U. S. War Assets Administration submitted a form for the Commission to sign, formally applying for the area. He submitted the form for the Commission's consideration, and recommended approval of the same. The Commission approved the recommendation. (The application forms were signed on the following day.)

7. Letters of commendation to Crown Zellerbach Corporation, Pope and Talbot, Inc. and the St. Helens Pulp and Paper Company, for adopting a policy to preserve highway wayside timber: The Parks Superintendent recommended that a letter be sent to each of these firms complimenting them on the action taken, and that similar letter be sent to the Portland Chamber of Commerce for its efforts in securing the adoption of the policy by the concerns mentioned above. The Commission approved the recommendation and referred the matter to the Chief Counsel to prepare appropriate letters.

In this connection the Commission also discussed a request from the Crown Zellerbach Corporation for permission to maintain signs along State Highway rights of way, advising the travelling public that they are entering certain "tree farms" belonging to the Corporation. The Commission deferred action on this matter pending recommendations from the Chief Counsel and the Parks Superintendent covering the matter from the legal and park standpoints.

8. Boat concession at Sunset Bay State Park, Coos County: The Parks Superintendent recalled that the Commission, in 1948, entered into an agreement with a Mr. Smith to operate a boat concession at this park, and advised that he has requested renewal of this permit for 1949. The Chief Accountant advised that Mr. Smith still owes the State $225.00 in connection with last year's arrangement, which he has been unable to collect. As a result of the discussion, the Commission decided unanimously not to renew the arrangement with Mr. Smith, it being the Commission's feeling that he is not a satisfactory operator.

In this connection, the Parks Superintendent brought up for discussion the matter of developing this area. He advised that there is a question whether the State Land Board or the State Highway Commission has jurisdiction over the area, and because of this he is precluded from spending any money in this park for development or for keeping the premises in a clean condition. The 1949 budget, he said, contains provision for this purpose, but expenditure of funds has not as yet been authorized by the Commission. He was instructed by the Commission to proceed with the development of this park in accordance with the plans, and to maintain it in satisfactory condition.

9. Proposed addition to Umpqua Lighthouse State Park, Douglas County: The Parks Superintendent advised that he has been trying for the past five years to obtain this property from the Menasha Wooden Ware Company, but to date has been unsuccessful in his attempts. He further advised that there are 240 acres involved, 60 acres of which will be required for right of way for the improvement of the Oregon Coast Highway, and the balance will be used for State Park purposes. He recommended that one more attempt be made to acquire the property by negotiation and if that fails, that the Chief Counsel be authorized to acquire it by condemnation. The Commission approved the recommendation.

10. Request of Royal Wilde, Union County, for permission to construct and maintain a stock fence across Catherine Creek State Park in Union County: The Parks Superintendent recommended approval of this request in order to keep cattle out of the park. He presented a form of agreement prepared by the Chief Counsel, covering the installation. The Commission approved the recommendation. (The agreement was signed the following day.)

11. Proposed agreement with Abston and Johnston covering construction and operation of a logging road across Humbug Mountain State Park in Curry County: The Parks Superintendent advised that Abston and Johnston require an easement across this park in order to market their timber. He recommended that they be allowed such privilege, and presented for the Commission's consideration an agreement prepared by the Chief Counsel, covering the matter. The Commission approved the recommendation. (The agreement was signed on the following day.)

Mr. Forrest Cooper, Right of Way Engineer, presented for the Commission's consideration a list of options secured for real property that is needed in connection with highway improvements throughout the state. After

careful consideration of each item listed therein, the Commission approved the options and the consideration to be paid for the properties as contained therein. The attached resolution relative thereto, marked Exhibit "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The following footnote applies to the above mentioned and attached Exhibit "A":

> Item 15119. Acquisition of right of way from R. C. Blough and Lilith A. Blough, for the Lafayette-Dayton Junction Section of the Pacific Highway West, which provides for an allowance of $46.25 to pay for a wheat crop on 1.835 acres, which may be destroyed by reason of highway construction. This settlement was approved with the strict understanding that payment of the $46.25 will not be allowed if the crop is ready to be harvested before the contractor enters the premises, and Mr. Blough neglects to harvest it at that time.

In the discussion of real property acquisitions listed in the above mentioned resolution, the Commission ordered that hereafter releases shall be obtained from the owners of real property to show that the State Highway Commission has fulfilled all of its obligations with respect to the acquisition of real property as are outlined in the option agreements.

The Assistant Counsel, Mr. J. W. DeSouza, reported inability to negotiate settlements for certain parcels of real property that are needed for highway improvements, and he requested authority to acquire them by condemnation. He presented a list of such properties as follows, together with the offers that he recommended in the condemnation proceedings:

Highway Section		Offer Recommended
Dodson-Bonneville Section of the Columbia River Highway		
13610	Noyes E. Tyrrell and Violet Tyrrell	$ 4,500
15263	Walter McElroy and Vinelda McElroy	3,500
Lafayette-Dayton Junction Section of the Pacific Highway West		
15117	Joseph Kudrna and Sena Kudrna	15,000
Front Street Section of the Oregon Coast Highway		
12611	Percy F. Phillips and Grace L. Phillips	6,400
13769	Sam Gold, et al.	5,000
Big Eddy-Dune Section of the Columbia River Highway		
14786A	Seuffert Bros. Co.	1,000
14786B	Seuffert Bros. Co.	500
Bly Section of the Klamath Falls-Lakeview Highway		
15338	C. C. Husband and D. D. Whitmore	1,500

After careful consideration, the Commission approved the request and the offers, and thereupon by unanimous vote adopted the attached resolution relative thereto, marked Exhibit "B", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The meeting recessed at 12:00 noon, and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The following persons composed a delegation which appeared before the Commission regarding the financing of the proposed bridge across the Columbia River at The Dalles: Chris Fauerso, County Engineer, Wasco County; Ward R. Webber, County Judge, Wasco County; Colonel Ralph Tudor, Consulting Engineer, San Francisco; Ralph Moody, Attorney, Salem. Mr. Fauerso headed the group. He referred to the report submitted by Colonel Tudor and his associates covering investigations and studies with respect to this bridge, and asked the Commission to approve it. He also mentioned difficulties in financing their project, particularly the matter of payment of taxes that may be assessed by Klickitat County in the State of Washington, which is estimated at about $23,500 annually. He asked the Commission to assist them in solving this problem. Colonel Tudor explained details of his report, particularly covering the selection of the bridge site, and the financing of the construction. He recommended adoption of the site known as the "Covington Site," and the construction of the bridge at that point at an estimated total cost of $2,661,000, including all items of expense such as right of way, bridge approaches, and purchase of The Dalles Ferry, which will be used to accommodate cross-river traffic during construction of the bridge. The A. C. Allen Company of Chicago, he said, has stated its willingness to finance the project so neither the State of Washington nor the State of Oregon will be required to contribute funds to meet such expenses. However, he said, there is one item of taxes, as mentioned by Mr. Fauerso, which has not been provided for. He suggested that the State of Oregon might loan funds to pay this expense, with the understanding that it would be reimbursed later on from bridge revenues. Colonel Tudor gave the following breakdown of costs of the bridge approaches: approaches in the State of Oregon, $185,000, plus $8,000 for right of way; approaches in the State of Washington, $403,000, including right of way expense He gave as his understanding that the Oregon Law which provides for the assessment of taxes against that portion of the inter-state bridge structure located in the State of Oregon, will not be effective after 1954, and that there are possibilities that this law may be repealed by the 1951 legislature, in which event, he said, taxes will not be assessable against the bridge because it will not be completed at that time. Colonel Tudor also gave the following as the amounts of initial expense which he said would be financed by A. C. Allen Company by an issue of bonds: purchase of The Dalles Ferry, $300,000, engineering and other essentials, $100,000. He also said that the $8,000 which the State of Oregon is advancing for preliminary studies will be refunded if and when the bridge project materializes, and he reiterated that the only questionable item on the bridge setup is the tax item. A general discussion followed during which the Commission's Chief Counsel advised that the Commission has authority to advance State Highway funds which could be used to pay the tax item, but the loan would have to be made to Wasco County by agreement, since the Commission does not have authority to pay taxes direct. In other words, the Commission could lend the amount of the taxes to Wasco County, which

in turn could pay the tax. Col. Tudor advised that the $400,000 bond issue to be sold by A. C. Allen Company to finance preliminary operations will be paid off with revenue from the ferry operations; further that the company will not finance the bridge construction if a satisfactory bid is not received. He estimated that it would take twelve years to pay off the bridge bonds and advised that the option to purchase the ferry from the present owner, Captain Smith, expires in September.

Chairman Banfield briefly reviewed the detailed expense items, and gave as his understanding that all that the Oregon State Highway Commission is being asked to do is to guarantee payment of the taxes, which are estimated to cost $23,500 annually, and which will be refunded later from the bridge toll revenues. Col. Tudor confirmed the understanding, whereupon the conference was concluded by Chairman Banfield, who advised that the Commission would probably take action on the entire matter within the next thirty days.

Mr. J. W. DeSouza, Assistant Counsel, brought up for discussion a right of way settlement with Hazel Potter Meyer and Elmer W. Meyer, concerning property at Bonneville. The property concerned is situate opposite the Columbia River Highway from the entrance to Bonneville, and is needed in connection with the proposed improvement of the Columbia River Highway at this point. It appears that an option was secured from the Meyers to purchase this property, but before the deal was closed, a fire occurred which destroyed two of the main buildings that were used for business purposes and were valued at $19,000. Subsequently, the Meyers were informed that the state would not take up the option at the price mentioned therein, $26,500, because the buildings were destroyed and could not be delivered. However, the Meyers are demanding payment of the full amount less $2,500, which they allege was the true value of the buildings. This matter was discussed at considerable length, but a decision was deferred pending the appearance of Mr. and Mrs. Meyer and their attorney, Mr. George W. Mead, Portland, on the following day. (Mr. Mead and Mr. Meyer appeared before the Commission the following day, but action was again deferred pending a recommendation from the Chief Counsel and the Right of Way Department. The matter was referred to the Chief Counsel to handle. See ahead for additional minute entry.)

The Right of Way Engineer requested authority for the Legal Department to sell miscellaneous buildings and scrap materials connected therewith up to a value of $100 without prior approval from the Commission. He explained that the reason he is asking for such authority is to relieve the Commission from bothersome details. Chairman Banfield stated that he preferred that such matters be brought to the Commission's attention. Commissioners Chandler and Reynolds expressed themselves similarly, and it was thereupon decided that if quick action is required for any sale in this category, the matter shall be taken up with at least two members of the Commission by telephone. If the sale is approved, then the action shall be confirmed by the Commission at its next meeting.

In this connection, the Right of Way Engineer presented an offer from a party in Eugene to pay $10.00 for a supply of corrugated roofing that was severely damaged when fire destroyed a building recently purchased by the

State Highway Department, in Eugene, commonly known as the Excelsior Building. He said that the material is absolutely worthless, and recommended acceptance of the offer in order to get rid of it. The Commission approved the recommendation unanimously.

The Right of Way Engineer requested instructions concerning the method of handling minor revisions in points of access to highways after right of way settlements have been approved. He pointed out that when right of access to the highway is allowed the former owner of land that is being acquired as right of way, a clause is inserted in the deed of conveyance reserving to him such access, the locations of which are described in the deed. However, frequently minor changes in the locations are required. He inquired whether or not the Commission wishes to approve such changes if they are of minor nature, and advised that in any case the change in location of the access point would be effected in writing, and the document recorded in the county deed records. He particularly mentioned a proposed modification of the access for the D. B. Appling property on the Pleasant Hill-Lost Creek Section of the Willamette Highway, which was made necessary by reason of a change in plans for the highway improvement. Mr. and Mrs. Appling, he said, have approved the change in writing. In thediscussion of this matter, Chairman Banfield expressed the thought that such changes are the responsibility of the Engineer and Chief Counsel. Commissioners Chandler and Reynolds concurred. The Commission accordingly authorized the Engineer and Chief Counsel to pass on such matters when they simply involve minor changes. The Commission by unanimous vote approved the change affecting the D. B. Appling property, as reported.

The Commission had under discussion the offer of the Weyerhaeuser Timber Company to pay $1,000 for 2.2 acres of land comprising the old ferry landing adjacent to Simpson State Park in North Bend. The Right of Way Engineer, Forrest Cooper, advised that the property has been appraised and a value of $1,000 set thereon. Chairman Banfield expressed the thought that if the Commission accepts the offer it should be on the basis that the property is used perpetually for industrial purposes. Commissioners Chandler and Reynolds concurred, whereupon the matter was referred back to the Chief Counsel to negotiate a settlement with the company on such basis. (This matter was discussed further on the following day, at which time the Commission definitely accepted the offer of the Weyerhaeuser Timber Company to pay $1,000 for this property, subject to the perpetual use of the area as an industrial site, and that ownership of the same will revert to the State in the event that it is used for any other purpose.)

The Commission had under discussion the matter of renewing the lease of a parking area between Harbor Drive and Front Avenue along the section extending from the Journal Building to the Morrison Bridge, in Portland. The Engineer advised that the City of Portland has received an offer of $700 a month for a three-year lease of this area, which is considerably more than is now being received, and that it is the city's desire to accept it if the Highway Commission will approve. He pointed out that the original plan provides for landscaping the area. However, no provision has been made to finance the work, neither are there any plans to utilize the property for highway purposes in the immediate future, so in his opinion, it

seems advisable to allow the city to re-lease the property for off-street parking of cars, as proposed. Mr. William Bowes, City Commissioner, was present, and entered into the discussion. He advised that the Harbor Master and the City Engineer are quite concerned about the landscaping of that portion of the area between Harbor Drive and the sea wall, and would much prefer that this area, extending from Burnside Street to Morrison Street, be paved, because ships frequently tie up to the sea wall at this location, and in their opinion, the crowds of people who visit these ships would trample on and ruin any landscape development which the State might foster; moreover, it is necessary to service these ships, and the only way for trucks to contact them is over this area. He particularly referred to a British ship that tied up to the sea wall during the recent Rose Festival and was visited by thousands of people. In the discussion of this matter, it was pointed out that the Federal Government is interested in the matter, because Federal Aid funds will be used to finance the landscaping work, so the plans could not be changed without the sanction of the Public Roads Administration. Mr. T. M. Davis, District Engineer, Public Roads Administration, was present and advised that his agency had already approved the project for landscaping, but will consider a change in plans if requested. The Commission reached no decision on the matter, action being deferred until the following day when Mr. Bowes is to return for further discussion of this matter, and other matters. (See ahead for additional paragraph and final action.)

The Commission discussed with the Engineer the bids received at the morning session for highway construction, and at 3:00 p.m. Chairman Banfield publicly announced the awards of contracts, as follows, the action of the Commission being by unanimous vote:

"Pedee-Kings Valley Section of the Kings Valley Highway in Benton and Polk Counties; 6.78 miles of recoiling. J. C. Compton Co., McMinnville, submitted the low bid for this work at $39,080 based on the use of asphalt. They submitted no bid based on the use of tar. Warren Northwest, Inc., Portland, submitted the next low bid at $41,287 based on the use of asphalt. They also submitted no bid based on the use of tar. There were two higher bids. The Commission has awarded the contract to the low bidder, J. C. Compton Co., on its bid price.

"Grading, surfacing and oiling the Terrebonne-Crook County Line Section of the Smiths Rock Market Road in Deschutes County. Babler Bros., Portland, submitted the low bid for this work at $48,741. The only other bid was submitted by Parker-Schram Co., Portland, at $53,986.50. This company qualified their bid by stating that they would accept the award of this contract only in combination with the contract for construction of the Redmond "A" Street Project. The contract has been awarded to the low bidder, Babler Bros., at their bid price.

"Surfacing and Oiling on "A" Street in the City of Redmond, Deschutes County. Babler Bros., Portland, submitted the low bid for this work in the amount of $10,680.84. They stated that they would accept the award of this contract only in combination with the contract for the Terrebonne-Crook County Line improvement. Parker-Schram Co., Portland, submitted the next low and only other bid at $12,694. They

also stated that they would accept the award of this contract only if awarded also the Terrebonne-Crook County Line contract. The Commission has awarded this contract to the low bidder, Babler Bros., at its bid price.

"Grading and surfacing on Depot and Main Streets in the City of Rogue River, Jackson County. The only bid received for this work was that submitted by Snook Bros., Corvallis, at $11,545. The bid is satisfactory, and the Commission has awarded this contract to Snook Bros. at the amount of their offer.

"Veneta-Fisher Road Section of the Richardson-Eugene Secondary Highway in Lane County; 5.32 miles of pavement-resurfacing. Central Heating Co., Eugene, submitted the low bid for this project at $78,654. The next low bid was submitted by Acme Construction Co., Eugene, at $78,825. There were five higher bids. The Commission has awarded the contract to the low bidder, Central Heating Co., at its bid price.

"Traffic Signals in the City of Eugene, Lane County. W. R. Grasle Co., Portland, submitted the low bid on this project at $19,480. The next low bid was submitted by Mill Electric Co., Salem, at $19,881. There was one other higher bid. The Commission has awarded this contract to the low bidder, W. R. Grasle Co., at its bid price.

"Irrigating system, seeding and planting on the Eugene (High Street-Judkins Point) Section of the Pacific Highway in Lane County. The low bidder for this project was Stoen's Rock & Landscape Co., Seattle, Washington, at $25,920. C. S. Whitcomb Co., Inc., Portland, submitted the next low bid at $28,053.50. There were two higher bids. The Commission has awarded the contract to the low bidder, Stoen's Rock & Landscape Co., at their bid price.

"Surfacing, oiling and furnishing crushed rock in stockpiles on the Jamieson-Vale Section of the John Day Highway in Malheur County. D. F. McKenzie, Salem, submitted the low bid for this work, at $104,446. Babler Bros., Portland, submitted the next low bid at $110,446. There were four higher bids. The contract has been awarded by the Commission to the low bidder, D. F. McKenzie, at his bid price.

"Construction of two culverts and one bridge on the Central Oregon Highway in Malheur County. George E. Berry, Beaverton, submitted the low bid on this project at $30,520. He qualified his bid by stating that he would accept only one contract at this letting. Snook Bros., Corvallis, submitted the next low bid at $35,715. There were six higher bids. The Commission has awarded this contract to George E. Berry, the low bidder.

"Furnishing and placing a new roof on the Vista House at Crown Point on the Columbia River Highway, in Multnomah County. The only bid received for this work was that submitted by Carl B. Armpriest, Salem, at $3,638. The bid is satisfactory, and the Commission has awarded this contract to Mr. Armpriest at his bid price.

"Construction of the Ash Creek Bridge on the Monmouth-Independence Highway, in Polk County. Werner & Jeske, Eugene, submitted the low bid on this project at $22,995. Archie R. Averill, Portland, submitted the next low bid at $25,610. There were five higher bids. This contract has been awarded to the low bidder, Werner & Jeske, Eugene, at their bid price.

"Grading, surfacing, oiling and furnishing crushed rock in stockpiles on the Big Eddy-Dune Section of the Columbia River Highway, in Wasco County. Newport Construction Co. and Kern & Kibbe, Portland, submitted the low bid on this project, at $200,000. The next low bid was submitted by Stevenson Construction Co., Salem, at $219,517. There were eight higher bids. The Commission has deferred the award of this contract pending satisfaction of certain conditions. The bids have been referred to the Engineer with authority to award the contract to the low bidder when these conditions have been satisfied.

"Murray Road-Multnomah County Line Section of the Sunset Highway in Washington County; 3.8 miles of bituminous pavement seal. R. O. Dail, Portland, was the low bidder on this work at $6,044. The next low bid was submitted by Harr & Horton, Portland, at $6,370. There was one higher bid. The Commission has awarded this contract to the low bidder, R. O. Dail, Portland, at his bid price.

"Grading and paving on the Newberg (First Street-Willamette Street) Section of the Hillsboro-Silverton Secondary Highway, in Yamhill County. Porter W. Yett, Portland, submitted the low bid for this project at $40,347. J. C. Compton Co., McMinnville, submitted the next low and only other bid at $46,295. The Commission has deferred the award of this contract pending satisfaction of certain conditions. The bids have been referred to the Engineer with authority to award the contract to the low bidder when these conditions have been satisfied.

"Grading and paving on the Newberg-McMinnville Section of the Pacific Highway West in Yamhill County. J. R. Taggart & Co., Inc., and J. R. Taggart, Salem, submitted the low bid for this project at $414,346.40, based on the use of asphalt. They submitted no bid based on the use of tar. O. C. Yocom Co., McMinnville, submitted the next low bid at $427,581.90, based on the use of asphalt. He also submitted no bid based on the use of tar. There were two higher bids. The Commission has deferred the award of this contract pending satisfaction of certain conditions. The bids have been referred to the Engineer with authority to award the contract to the low bidder when these conditions have been satisfied."

The Commission discussed a proposal to lease from the State Land Board a forty acre tract of land in Deschutes County from which to secure borrow materials for use in highway construction. The Chief Counsel advised that he has negotiated a ten-year lease for which the Highway Commission will have to pay a lump sum of $500, which is only one-half of the amount originally demanded by the Land Board. He recommended approval of

the settlement. The Engineer concurred therein. The Commission approved the recommendation. (The lease agreement covering the matter was signed on the following day.)

The Right of Way Engineer submitted a status report on right of way acquisitions in Sullivans Gulch. The Commission took no action on the matter, reserving the same for study.

The Right of Way Engineer requested instructions relative to the sale of two small buildings acquired in connection with right of way purchases in Sullivans Gulch, Portland, one of the buildings being located at 9141 N. E. Hassalo, and the other at 2844 N. E. Sullivan Street. He advised that the first of these buildings was advertised for sale some time ago, but no bids were received for it, although subsequently an offer of $60 was submitted. The other building, he said, was not advertised for sale, but he has received an offer of $40 for the same. He declared that both buildings are practically valueless, being small shacks that the Commonwealth Company, which is handling properties in Sullivans Gulch for the Commission, does not want to list. He recommended acceptance of both offers, which are approximately the appraised value of each. The Commission approved the recommendation unanimously.

The Chief Counsel inquired as to the Commission's general policy with respect to the disposal of houses on the Sullivans Gulch Project, Portland, which had been acquired through right of way negotiations, the question being whether to sell the houses now or to rent them and secure the revenue until the section of highway on which they are situate is placed under contract for construction. The Commission ordered the continuance of past practice, which is to buy only that property which the Right of Way Department considers would be to the State's advantage to acquire now, and to sell property when the Right of Way Department considers that it would be to the State's best interest to sell.

The Assistant Counsel, Mr. J. W. DeSouza, reported the proposed sale by Multnomah County of tax lot No. 26, on the Sullivan Gulch Project. He advised that the County has acquired this lot for non-payment of taxes, that the exemption period has expired, and that the county expects to dispose of it at a tax sale some time next month. He further stated that the county has set a price of $1500 on the property, but he recommended that the Commission bid as much as $3,500 for it, if necessary. It appears that the county had been asked to sell the tract to the state direct, but the county Land Department has been advised by the District Attorney to the effect that it is necessary to dispose of it at a tax sale in compliance with a certain statute. In the discussion of this matter, Chairman Banfield expressed the opinion of the Commission that it is bad practice for any public body to be required to bid against the general public for property that is needed for public purposes. The matter was referred back to the Chief Counsel to see what can be done to avoid bidding against the general public for this tract of land.

The Chief Counsel presented for the Commission's approval a form of "certificate of acceptance" prepared by the U. S. Department of the Interior, providing for acceptance by the State of additional property in the Silver Creek Falls recreational area, Marion County. He advised that this is simply a formal

acceptance of the area heretofore turned over to the state, and recommended approval of the same. The Commission approved the recommendation unanimously. (The Certificate of Acceptance was signed on the following day.)

The Commission approved payment of $700 to Mr. A. C. Baumback, house mover, for extra work performed by him in connection with moving the Gold Beach Agate Shop building on the Oregon Coast Highway in Gold Beach, Curry County. The Chief Counsel explained that it was the obligation of the state to move the building referred to, and that Mr. Baumback was engaged to do the work. After the building had been re-established, it was found that the back-fill pressed too hard against the building, necessitating the construction of a wall, which work Mr. Baumback completed for the sum mentioned.

The Chief Counsel requested approval of a settlement with Mrs. Sarah Rise on land situate in the block on which it is proposed to construct a Highway Office Building in Salem. He advised that this is a settlement of a controversial matter covering property that has been appraised at values roughly from $13,000 to $17,500. He further advised that the Commission originally authorized the payment of $14,000 for the property, for which Mrs. Rise demanded $22,000, but as a result of negotiations, Mrs. Rise has now indicated a willingness to settle for $16,250. He recommended an offer of $16,000 and that he be authorized to pay as much as $16,250 if absolutely necessary. The Commission approved the recommendation.

In this connection the Commission inquired as to the occupancy of the buildings on the proposed highway building site, and was informed by the Chief Counsel that for the most part the buildings are now being rented to the Secretary of State but the leases expire in September. He inquired whether or not they should be renewed. Because of possibilities that the construction of the Highway Office Building will be advertised for bids to be received in September, the Commission ordered that the tenants be notified to vacate the premises not later than September 1, 1949.

The Chief Counsel brought up for discussion a proposed settlement of the condemnation case of the State of Oregon vs. Bertha Bachman, covering acquisition of right of way for the Milwaukie-Estacada Section of the Clackamas Secondary Highway in Clackamas County. He advised that the Commission's original offer to Mrs. Bachman was $100, which Mrs. Bachman refused, although she stated that she would donate the land to the state if the state would fill in the balance of her lot, which the Engineer estimated would cost between $3,000 and $5,000. Further negotiations, he said, resulted in settlement of the case by payment of $1,000 cash. He recommended approval of the same. The Commission approved the recommendation.

The Commission also approved settlement of the condemnation case of the State Highway Commission vs. Roy Philippi, concerning acquisition of right of way on the John Day River-Quinton Section of the Columbia River Highway in Gilliam County. The Chief Counsel advised that this case has been pending since August, 1947, and that recently he was able to effect a settlement with Mr. Philippi whereby Mr. Philippi agrees to accept the sum of $2,500, and the state is securing a larger area of land than was contemplated when the condemnation action was filed. The Commission by unanimous vote

adopted the attached resolution with respect thereto, marked Exhibit "J", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Chief Counsel reported a proposed settlement of the condemnation case of the State Highway Commission vs. Herman B. Jacobs, concerning property needed as right of way for a revision of the Oregon Coast Highway between Tillamook and Pleasant Valley in Tillamook County. He advised that Mr. Jacobs owns a dairy ranch containing 40 acres of land near the City of Tillamook, and that the highway cuts the ranch in two, leaving twenty-one acres on the opposite side of the highway from Mr. Jacobs' buildings. Moreover, the State is taking controlled access so there will be no access to the highway from the property which has no contact with any other road. He further explained that Mr. Jacobs is asking $1,000 an acre for his land, and wants the state in addition thereto to construct a cattle pass for his use, which is estimated by the Engineer to cost about $3,000. The state, he said, is taking four acres of Mr. Jacobs' land for right of way, making a total of twenty-five acres which is being severed. He offered the following settlement: that the state buy the twenty-one acres severed, and the four acres needed for right of way, a total of twenty-five acres, for the sum of $25,000. The twenty-one acres, for which he has already received inquiries from two prospective buyers, can then be sold for about $15,000. Such settlement, he said, would eliminate the necessity for the cattle pass, thereby creating an additional saving of $3,000. The result would be that the state would be able to acquire the right of way for about $6,000 or $7,000, compared with a cost of from $11,000 to $15,000 were the condemnation proceedings followed through. The Commission approved the settlement unanimously.

The Engineer reported on a request from the Union Rod and Gun Club, Union, Oregon, to exchange the building that it is now using on state maintenance property at Union, for another larger building on the same premises. He advised that the building that the Gun Club wants to use is a larger building than the one that they presently occupy, but it is being used for storage of highway equipment and supplies, and while not entirely occupied at the present time, it is planned to store additional materials that will take up all the room available. He recommended in view thereof that the request be denied. The Commission approved the recommendation.

The Right of Way Engineer reported on the matter of constructing a sewer connection to two state-owned buildings, between 10th and 11th Avenues and Hayes and Garfield Streets, in the western part of Eugene, which matter was brought up at the previous meeting. He advised that as instructed by the Commission, he contacted the present tenants of these buildings, both of whom have agreed to a $10 increase in monthly rentals, which would mean an additional revenue of $240 annually from these buildings, and that the sewer connections, which are estimated to cost a maximum of $450, would be paid off in two years' time. The Engineer advised that it would be several years before the land on which the buildings are situated would have to be used for right of way, because the Commission has no immediate plans for construction; moreover, according to a City Ordinance, the buildings must be connected to the city sewer if they are to be occupied. In view of these reports, the Commission unanimously approved connecting both houses to the city's new sewer.

The Chief Counsel reported briefly on the matter of sale to the City of Pendleton land acquired in connection with purchase of right of way for the Pendleton-Airbase Secondary Highway situate on the north side of the Old Oregon Trail, a short distance west of Pendleton. The Commission deferred action in the matter pending confirmation of another transaction with the City of Pendleton for the sale of a 7.2-acre tract in the same location. The matter was referred back to the Chief Counsel for further handling.

The Chief Counsel presented for the Commission's approval a proposed agreement with the State of Idaho covering early construction of new bridges across the Snake River at Payette and Weiser, Idaho, and the construction of additional bridges across the Snake River at Ontario and Nyssa, Oregon, at some future date. He pointed out that this agreement has been signed by the highway officials of the State of Idaho. Following discussion, and it appearing that the agreement has been prepared in conformity with its ideas on the subject, the Commission approved the agreement as presented. (The agreement was signed by the Commission on the following day.)

The Chief Counsel recommended and the Commission approved salaries, as follows, for members of the legal staff not covered by Civil Service regulation:

Clifton W. Enfield, Assistant Counsel . .	$ 425.00	per month
Samuel A. Hall, Assistant Counsel	425.00	" "
J. W. DeSouza, Assistant Counsel	425.00	" "
G. E. Rohde, Assistant Attorney	400.00	" "

It was understood that these salaries shall be effective as of July 1, 1949.

The Commission discussed briefly a report from the Chief Counsel relative to its authority to regulate and prohibit the use of the shore of the ocean by transient merchants. The Chief Counsel advised that to date he has been unable to find any statute directly covering this matter, in view of which he knows of no way that the Commission can control these activities. He gave as his personal opinion that it would be unwise for the Commission to prohibit the use of the ocean beaches for such purposes. He was instructed by the Commission to make further search of the statutes in an endeavor to find a law that would cover the situation.

The Engineer reported the results of receiving bids in Salem on June 6, for the sale of merchantable dead timber located along the Sunset and Wilson River Highways in Clatsop, Columbia and Tillamook Counties. He recommended acceptance of the offers of the high bidders in each instance, as follows:

(Cont.)

Area No.	Location	High Bidder	High Bid (Per M-FBM)
1	Sunset Highway	No Bids Received	$ --
2	" "	" " "	--
3	" "	" " "	--
4	Radar Road	Earl E. Evans, Seaside	1.50
5	Saddle Mt. Park Road	No Bids Received	--
6	Wilson River Highway	H & J Logging Co., Tillamook	3.75
*7	" " "	Lu A. Baneke, Tillamook *	5.10
8	" " "	Shaw, Johnson, Saling; Tillamook	12.75
9	" " "	Franck Bros. Logging Co., Forest Grove	3.00

* One bidder, Harry A. Cooley, Tillamook, offers lump sum bid of $500.00 for all merchantable dead timber in Area No. 7.

The Chief Counsel and the State Parks Superintendant concurred therein. The Commission approved the recommendation unanimously.

The Commission discussed briefly a letter from Mr. C. F. Thomas, Chief Engineer of the S. P. & S Railroad Company, stating reasons why the company started the reconstruction of its facilities across Youngs Bay near Astoria, notwithstanding a previous proposal by the West End Development League of Astoria that the Oregon Coast Highway be routed parallel to the railroad at this point, and an embankment constructed as a joint proposition. The Engineer advised that a joint fill construction is not the answer to the problem presented by the West End Development League. In any event, it is now too late to construct the embankment as a joint undertaking; moreover, separate structures would be required for each facility, and no particular saving would accrue in attempting to confine both facilities to the one embankment. The Commission took no action on the matter other than to order that the railroad company be informed accordingly.

Pursuant to previous instructions from the Commission, the Engineer reported on the designation of a "no parking" zone on the north side of the Pacific Highway East (Fifth Street) in Oregon City, between the Southern Pacific Undercrossing and Main Street. He advised that investigation reveals that parking on the north side of this street is now prohibited by city ordinance, except for two small spaces which are well outside of the established portion of the highway, and do not in any way interfere with highway traffic. He recommended no further action in the matter. The Commission approved the recommendation.

The Engineer presented for the Commission's consideration a request from the City of Portland that the State pay fifty percent of the cost of certain traffic signal installations heretofore made on State Highway Routes in this city, particularly on 6th Avenue, 4th Avenue, Front Avenue, and S E. Union Avenue. He presented a map showing the location of the several installations, and advised that they were made at a total cost of $30,390.44,

fifty percent of which, $15,195.22, would be the state's share if the Commission approves. He pointed out that the installations were not covered by written agreements, but were made as a result of oral understanding. He recommended approval of the expenditure. The Commission unanimously approved reimbursing the city in the amount of $15,195.22 at this time, with the strict understanding, however, that hereafter the state will not contribute toward the cost of future installations unless they are covered by a written agreement between the city and the state, prior to the time that the installations are made.

The Commission discussed a suggestion from the Engineer that consideration be given to the allocation of the unallocated balance available for the Second Postwar Federal and State Programs, totalling approximately $4,500,000, and to his further suggestion that the Commission program additional projects totalling approximately $25,000,000 for contracting in the future when funds are available. The Engineer explained that if the Commission would approve these suggestions, it would permit the making of surveys and securing of options for rights of way for a certain number of projects in each division, and in this manner progress could be made toward the assembling of a "stockpile" of construction jobs. This matter was discussed at considerable length, and as a result thereof, the Commission deferred the programming of the unallocated balance of the Second Postwar Program funds. However, it authorized the Engineer to present for the Commission's consideration in the next two or three months a list of projects for which surveys are required.

The Commission had under consideration approval of the proposed Civil Service Pay Plan effective July 1, 1949, covering classified State Highway Department employees, other than those employed in the Accounting Division. In the discussion of this matter, the Commission had the benefit of a report from the Engineer, dated June 8, 1949, and a report from the Chief Accountant dated June 2, 1949, and a report from the Chief Counsel. (See copies of reports in general files for details.) The Engineer advised that the proposed plan has been approved by the State Budget Director in writing, and that it also has been approved in writing by the Civil Service Commission, insofar as it covers all employees except those in the Accounting Division, which are now being studied by the Civil Service Commission. He further stated that the revised pay plan is a revised wage schedule which includes all adjustments for cost of living increases. He recommended adoption of the plan as prepared, and that it be made effective as of July 1, 1949. The Commission approved the recommendation unanimously upon motion of Commissioner Chandler, which was duly seconded by Commissioner Reynolds. The Commission took no action on the wage adjustments for the employees of the Accounting Division because the new rates have not as yet been cleared through the Civil Service Commission and the Budget Director; however, the Commission declared that any adjustments made for the employees in this division will be made retroactive to July 1, 1949.

In this connection the Commission also discussed salary adjustments for the following unclassified employees: State Highway Engineer, Chief Counsel, and Commission Secretary. As the result of discussion, the

Commission unanimously approved an annual salary of $9600 for Mr. R. H. Baldock, State Highway Engineer; an annual salary of $7800 for Mr. J. M. Devers, Chief Counsel, subject to approval by the Attorney General; and an annual salary of $6960 for Mr. H. B. Glaisyer, Commission Secretary.

The Engineer brought up for discussion amendments to the State Pension and Retirement Act enacted by the 1949 legislature, particularly the features concerning the State Highway Department. He pointed out a new provision which is to the effect that until July 1, 1955, an employee who has reached the compulsory retirement age, may petition to be continued in service for successive periods of one year each, provided he presents convincing proof which is acceptable to his employer and the Retirement Board, establishing his ability to perform the duties that would be required of him, and that continued service on his part would be in the public interest. The Engineer presented a list of employees who are approaching the age limit of sixty-five years and who will soon be retired from State Highway Department service in accordance with the provisions of the Public Employees Retirement Law. He recommended that the following employees be retained on the State Highway Department payroll for a period of one year from date of retirement:

Name	Classification	Age	Date of Retirement
Wm. D. Cowgill, Jr.	Civil Engineer I	65	November 1, 1949
Sanford O. Leash	Laborer I	65	September 1, 1949
John W. Student	Laborer I	65	July 1, 1949
August Moser	Automotive Mech.	65	September 1, 1949
Henry D. Ricks	Truck Driver	65	October 1, 1949
Harry E. Sitler	Truck Driver	65	July 1, 1949

The Commission approved the recommendation unanimously.

In this connection, the Engineer also recommended re-employment of Mr. J. H. Scott, Civil Engineer II, age 67, who was retired on December 31, 1947. He advised that Mr. Scott has fulfilled all of the requirements with respect to reinstatement, that he is physically fit to carry on the duties which will be assigned to him, and that he is a competent engineer whose services can be used to very good advantage in the State Highway Department. The Commission by unanimous vote authorized the reinstatement of Mr. Scott for a one-year period.

The Engineer reported that plans for the proposed State Highway Department Office Building in Salem would be ready for final inspection and approval by the Commission between the first and the middle of August, and if approved by the Commission, then bids can be received for construction of the building about the middle of September, which would permit a contractor to excavate the basement and have the building well under way before bad weather sets in. The Commission deferred action on the matter pending a conference with the Capitol Planning Commission recently appointed by Governor McKay. In view of this decision, Chairman Banfield signed a letter directed to the members of the Capitol Planning Commission, outlining what the Highway Commission has accomplished to date with respect to the building, and requesting a meeting with

that Commission to obtain its approval to proceed with the contracting of the work when the plans are completed. (See copy of Mr. Banfield's letter in general files.)

The Engineer presented a letter from Mr. J. L. Hope, Attorney at Law, Astoria, in behalf of Captain F. V. Elfving, concerning the sale of property at the foot of 14th Street in Astoria, which the Highway Commission is now leasing from the Columbia Transportation Company for a ferry landing. It appears that Captain Elfving is offering the property to the state for the sum of $20,000, and that the present lease expires on May 31, 1950. It also appears that subsequent to this first offer, Mr. Hope explained in a second letter that the offer did not include water frontage purchased by Captain Elfving in March, 1949, for which he wants an additional $500 cash. The Engineer advised that the Columbia Transportation Company has agreed to extend the present lease, for which the state is now paying $2,040 annually, for a two-year period at the rate of $3,000 annually; the increased charge being to compensate the Company for taxes in the amount of $500 per year on the additional water frontage that Captain Elfving purchased since the first lease agreement was entered into. The Engineer recommended rejection of the offers, and that the Commission authorize preparation of plans and specifications for a new terminal to be located between 17th and 18th Streets, for which an item of $175,000 has been set up in the 1949 budget. (See copy of the Engineer's written report on this subject dated June 23, 1949, in general files, for details.) The Commission unanimously approved the Engineer's recommendation and so ordered.

A letter was presented from the Warrenton Chamber of Commerce inquiring as to the status of the improvement on the Warrenton Secondary Highway No. 105, in the City of Warrenton, which, they stated, was authorized by the Commission in 1948 for 1949 construction. The Engineer advised that the Commission discussed this matter at a meeting held on April 20, 1948, and at that time authorized an expenditure of $30,000 for the purpose on the condition that the extra right of way that is needed would be furnished free of cost to the state by the city and county, the work to be done as a Special Major Betterment Project of 1949, if the conditions are satisfied. He recommended approval of the project under the same conditions, funds required therefor to be taken from the unallocated Major Betterment funds set up for Division 2 in the 1950-51 Program. The Commission approved the recommendation unanimously.

A letter was presented from Mr. R. E. Borland, City Manager, City of Silverton, inquiring whether or not the city could arrange with the State Highway Commission for the construction of a replacement bridge over Silver Creek on a city street, known as James Avenue, in Silverton. Mr. Borland estimates the cost of the bridge at $26,910 and advises that the city does not have funds available to finance the structure on its own account. He suggested that the Highway Commission might enter into an agreement with the city to advance state funds to finance this work, the state to be reimbursed within two and not to exceed three years' time from the city's share of state highway revenues. The Commission denied the request because of the precedent that would be established, it being the Commission's thought that were it to embark on a program of this nature, other cities and towns would request similar assistance, which, if granted, eventually would result in tying up a huge amount of state highway funds.

The Engineer reported the necessity to place a new deck on the Steel Bridge in Portland, which bridge has been designated as the route of US99W in connection with the Portland Front Avenue Project. He estimated the cost of a new deck at $176,000, and recommended the expenditure, the work to be done when the bridge is closed later in the year to allow the contractor who is building the west bridge approach to make connections with the main bridge structure. It was the thought of the Commission that the railroad company that owns the bridge should participate in the cost of the redecking. Accordingly, action on the Engineer's request was deferred and the Engineer was instructed to confer with the railroad officials relative thereto.

The Engineer requested authority to spend $1,660 for additional repair work on the pier fenders at the Coos Bay (McCullough) Bridge, and at the Ene gren Ferry slip. He advised that the Commission now has a contract with Hillstrom Ship Building Company of Coos Bay to renew nine dolphins at the McCullough Bridge and that since this contract was awarded, four additional dolphins have been broken off. It was his thought that now would be the proper time to have this work done, while the Hillstrom Company contract is still active. He estimated the cost of this work at $1,165. As to the Enegren Ferry slip, he advised that some of the dolphins had been pushed out of line, and should be straightened up, and rewrapped. He estimated the cost of the work at $495, making a total additional cost of $1,660. He recommended approval of the total expenditure. The Commission approved the recommendation.

The Commission had under discussion the matter of including the improvement of the Lawen-Crane Section of the Burns-Crane Highway in the Second Postwar Construction Program. The Engineer advised that this project was considered by the Commission on May 18th in arranging the program, but in the final selection of projects this one was omitted. Action on this matter was deferred until the next meeting of the Commission.

A request was presented from the City of West Linn for sidewalk or trail construction along the Oswego Highway northerly from Dillow Road junction to the city limits of West Linn. The Engineer advised that the section of highway referred to lies entirely within the city limits of West Linn, hence according to the Commission's established policy, it would be the city's obligation and responsibility to construct the sidewalk. He recommended that the request be denied, and that the city be informed accordingly. The Commission approved the recommendation.

A petition was presented from 132 residents of Sutherlin and vicinity, requesting the oiling of a section of the Elkton-Sutherlin Secondary Highway for a distance of about 1.3 miles, near the city limits of Sutherlin, in order to allay the dust nuisance that prevails during the summer months. The Engineer advised that there has been considerable building expansion along the section of highway referred to, and in his estimation there is justification for the improvement because it would alleviate a bad dust condition created by heavy log-hauling traffic. He estimated the cost of the improvement at $20,000 and recommended approval of the project, the work to be financed with unallocated Secondary Highway Funds in Division 3, when a program is arranged for such funds. The commission deferred action on the matter until its next meeting.

The Commission discussed a resolution from the Klamath Irrigation District requesting that the borrow pits along the Henley-Lost River Section of the Klamath Falls-Malin Highway, which is now under construction, be not filled, it being their allegation that the filling in of these pits will result in irreparable damage to adjoining farms by preventing proper drainage of the same. The Engineer advised that the borrow pits referred to are being used by adjacent land owners as drainage ditches contrary to the purpose for which they were opened. He recalled that it was the original intention to acquire a right of way 100 feet wide for this section, but because of the vigorous protests by adjoining property owners, the width was reduced to 60 feet, all of which is required for highway roadbed and slopes. Moreover, the borrow pits will have to be filled in to accommodate the improvement. He recommended that the request be denied, and that the District be informed that it is essential to the construction of the highway that the borrow pits be filled. The Commission approved the recommendation unanimously.

A request was presented from the City Council of Klamath Falls that the proposed West Side By-pass for The Dalles-California Highway be given priority status by the Highway Commission for construction over other contemplated highway improvements in the vicinity of Klamath Falls. In the discussion of this matter, the Commission recalled previous statements and information given to the people of Klamath Falls, that it had authorized a location survey of the route and acquisition of right of way along the adopted by-pass line simply to make certain that the right of way would be available at such time as the Commission was able to construct the project, without any commitment whatsoever as to when the work would be undertaken. The Commission confirmed the statements and instructed the Secretary to inform the City Council accordingly.

The Commission discussed a letter from Mr. Ben S. Morrow, City Engineer, Portland, in which Mr. Morrow requests cooperation from the Highway Commission in the construction of the sewer system on Southeast 82nd Avenue, route of the Cascade State Secondary Highway. Mr. Morrow estimates the cost of such sewer construction at $250,000; and the state's share to take care of drainage on the State Highway, at $122,573. The Engineer advised that in the past the Highway Commission has cooperated only to a very limited extent in the construction of storm sewers, it being the belief of the Commission that this is a city obligation, so if the Commission should approve the present request, which involves no highway improvement, it would be establishing a precedent that might prove undesirable in the future. He disputed Mr. Morrow's statement of the cost to complete the sewer on the highway right of way, stating that in his estimation the state's portion of this expense would be approximately $30,000 rather than $122,573. He requested instructions.

In the discussion of this matter, the Chief Counsel advised that if present highway facilities are capable of taking care of normal runoff and drainage, then the Commission would be precluded from spending State Highway funds to finance the work contemplated by Mr. Morrow; however, if in the construction of a highway the Highway Department assembles water in greater volume and discharges it in certain places to the detriment of certain people, then it is the responsibility of the state to do what is necessary to correct

the conditions. The Commission deferred a decision in this matter pending discussion with Commissioner Wm. A. Bowes of the City of Portland on the following day. (As a result of the discussion with Mr. Bowes, the Commission referred the matter back to the Engineer for additional information.)

The Engineer reported that the City of Portland plans to construct a sewer to serve the Binnsmead School, which is located east of S. E. 82nd Avenue near S. E. Harrison Street, and that the city advises that it will be possible for the Highway Commission to make a connection with this sewer to drain 82nd Avenue, route of the Cascade Secondary Highway, if the Commission desires. The estimated cost to make this connection, he said, is $3,100. He recommended the expenditure because it would eliminate an annual cost of $375.00 to maintain five blind drain sumps that are now being used to drain the highway for a distance of four blocks in the vicinity of Harrison Street, and which do not operate satisfactorily during heavy storms; moreover, they will have to be rebuilt within the next eight to ten years. The Commission unanimously approved the expenditure of $3,100 for this purpose.

The meeting adjourned at 5:00 p.m. to reconvene on the following morning in the same room.

Portland, Oregon
June 28, 1949

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction were opened and read aloud by the Secretary, in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

BAKER-UNITY HIGHWAY IN BAKER COUNTY

DEWEY AVENUE GRADE SEPARATION IN BAKER

Valley Constr. Co., Portland *	$ 434,547.50
E. C. Hall Co., Portland	438,462.50
Natt McDougall, Portland	544,090.00

* Bidder will not accept projects totaling more than $600,000.00.

OSWEGO HIGHWAY IN CLACKAMAS COUNTY

OSWEGO SECTION

Perkins Bros., Portland	$ 49,366.20
K. F. Jacobsen & Co., Inc., Portland	51,109.50
Parker-Schram Co., Portland	53,127.00

Heavy Hauling Co., Astoria	381,492.50

June 28, 1949

The County Court of Lane County, including Clinton Hurd, County Judge; L. G. Raish and W. J. Holland, County Commissioners; and P. M. Morse, County Engineer, was present and asked the Commission to designate the Jasper-Lowell County Road a State Secondary Highway. The Court offered in exchange to take over as a county road one of the roads now on the State Secondary Highway system in Lane County.

Mr. Morse, who acted as spokesman, recommended the exchange on the basis that the proposed secondary from Jasper to Lowell would provide a direct connection between the McKenzie and Willamette Highways. The Commission denied the request because it would mean an expenditure of a large amount of state funds to bring the road to state standards, and the Commission does not have funds available for this purpose.

Mr. Holland inquired as to the Commission's plans for completion of the Crow-Luskey Corner Section of the Territorial Secondary Highway No. 200. He was informed that the Commission was not in a position to include this highway in its second two-year Postwar Program.

A delegation representing the West Slope Lions Club, Portland, consisting of the following persons, was present and asked the Commission either to install traffic signals or to provide other protection for traffic at the intersection of the Canyon Road (Tualatin Valley Highway) with the Multnomah Club Road: R. H. Gollihur, Chairman of the Safety Committee; Gill Tarrance, Earl Bowman, Keith Smally, J. T. Ward, Carl Gestring, Joel Ward, and Mrs. Freeman Young, members of the Safety Committee.

Mr. R. H. Gollihur presented a petition signed by approximately 500 residents requesting that a traffic survey be made at this intersection between the hours of 4:00 p.m. and 6:30 p.m. He pointed out that there is a considerable volume of vehicle cross-traffic at this point, in addition to a large number of children and pedestrians, and that a signal and a pedestrian lane or a combination of the two is particularly needed. The delegation was informed that the Engineer has investigated this matter and that his report on the subject would be discussed later in the day. Following departure of the group the Commission discussed the matter at further length, and as a result thereof and upon recommendation of the Engineer, unanimously approved installation of a "Stop and Go" traffic signal and mercury vapor luminaires at this point, at a total estimated cost of $6,500.

The Josephine County Court represented by County Judge W. A. Johnson and Lucius Robinson, County Commissioner; and Mayor Elwood Hussey of the town of Cave Junction appeared before the Commission regarding the improvement of Federal Aid Secondary Highway No. 267 which passes through a town called Holland.

They urged improvement of this road in the current highway program. Chairman Banfield advised that a tentative allotment of $100,000 has been set up for this road, but it now appears that such sum will not be sufficient to do a satisfactory job because of the condition of the bridges, and it is estimated that an allotment of an additional $100,000 will be required. He inquired if the county's financial position will permit county contribution to help finance the project. Judge Johnson replied that the county might be

able to do so, whereupon the matter was referred to the Engineer with instructions to discuss the matter further with the County Court.

Mr. Hussey then asked the Commission to pave the Redwood Highway full width between curbs through the town of Cave Junction. He was informed that the city's request is now being investigated by the Engineer and that as soon as data is available consideration will be given to it.

A delegation representing the Milwaukie City Council and interested citizens consisting of the following was present concerning a proposed service road along the easterly side of US99E between Portland and Milwaukie: Jack Taber, City Manager; Fred Sperr, Mayor of Milwaukie; E. W. Kirkpatrick, City Attorney; H. O. Fixott and Irwin S. Adams, property owners, Milwaukie.

Mr. Taber headed the group. He urged construction of such service road from Milwaukie to the south end of the Federal Housing Project to minimize the hazards of direct access to the highway along this section. He advised that the delegation has nothing to add to the statements made at the previous meeting of the Commission. The Engineer recalled certain facts that were presented when this matter was first discussed some time ago, particularly pointing out that the city was to furnish the right of way consisting of a twenty-foot strip on the east side of the highway with complete restriction of access. He estimated the cost of the road at $90,000. Chairman Banfield pointed out that were the service road constructed along the east side of the highway it would be necessary to construct a similar facility on the opposite side.

Mr. Adams advised that in the settlement of the old Scott estate the heirs have first opportunity to re-purchase the property from the Federal Government when disposal is made. Mr. Fixott objected to construction of a service road unless some better reason is advanced for its construction than that already presented by the City of Milwaukie. He declared that the road would destroy his garden and homesite and would be within twenty-five feet of his house. This matter was discussed at considerable length, but action thereon was deferred pending an additional report from the Engineer and Chief Counsel to whom the matter was referred.

Mr. O. J. Mitchell, representing the Columbia Commercial Transportation Company and Mitchell Brothers, Portland, appeared before the Commission regarding violations of hauling permits heretofore granted these concerns. He stated that he had been notified of the extent of his violations and that he has taken corrective measures so there should be no difficulties in the future. The cancellation of their permits, he said, would put them out of business. He was informed by the Commission that it is up to the two companies to abide by the regulations; otherwise, they must suffer the penalty of having their permits cancelled, because the Commission cannot overlook the violations of one concern and penalize others for the same offense. Moreover, the Commission will not sanction the hauling of overweight loads to state scales for weighing purposes; it is up to the hauler to determine for himself whether or not his loads are within the prescribed limits. Following Mr. Mitchell's departure the Commission unanimously authorized the cancellation of the permits issued to the concerns under discussion, without further hearing, if another violation is committed. The Secretary was instructed to inform them accordingly.

The Engineer reported that for the past several years there have been requests for improvements at the intersection of Roads End Road with the Oregon Coast Highway immediately north of Ocean Lake in Lincoln County, to eliminate a dangerous condition that exists by reason of the fact that the intersection is on a curve at the top of a hill. He recommended that the highway be widened and that a left turn refuge for vehicles entering Roads End Road from the south be provided to permit such traffic to get out of the main stream of traffic to await an opportunity to cross with safety. He estimated the cost of the work at $3,000. The Commission unanimously approved the Engineer's recommendation.

A request was presented from the Medford City Council for the installation of traffic signals at the intersections of (1) Jackson Boulevard and Central Avenue (US99), (2) Jackson Boulevard and Riverside (US99), (3) Edward Street and Central Avenue (US99), and (4) McAndrews Road-Riverside Avenue and Court Street (US99). The Engineer advised that an investigation by the Traffic Engineer reveals that there is justification for signals at Jackson Boulevard and Central Avenue, and at Jackson Boulevard and Riverside, but not at the other points, and he recommended approval of those two, which he estimated would cost $6,000. The Commission approved the recommendation unanimously on the condition that the city shall pay one-half of the installation cost, will completely maintain them and will furnish electrical energy to operate them at no cost to the state.

The Commission considered a request from the City of Elgin for the installation of a traffic signal at the intersection of Front Street and "C" Street in Elgin, this being the junction of the Wallowa Lake and Weston-Elgin Highways. The Engineer reported that the intersection warrants the installation of a beacon flashing red on the secondary highway side and amber on the Wallowa Lake Highway. He estimated the cost at $300, and recommended that it be installed at state expense. The Commission unanimously approved the Engineer's recommendation.

A request was presented from Leland P. Linn, Superintendent of Schools, Ashland, for some sort of signal installation at the intersection of a crossroad with the Pacific Highway near the Bellview School, close to Ashland, to protect school children. The Engineer advised that during the past two years there has been only one accident, a fatality, occuring at 7:30 p.m. on Sunday. He further stated that the alignment of the state highway at this point is excellent, that there is very little roadside development, that schoolboy patrols now operate during school hours at this intersection, and in addition thereto oversize "School Zone Be Careful" signs are being maintained. It was his thought that the signal installation would serve no effective purpose, as it would interpose a hazard to vehicle traffic. He recommended that the request for traffic signals be denied. The Commission approved the recommendation.

The Commission considered a request from the City of Cottage Grove for the installation of two traffic signals, one at the intersection of 6th Street with the Pacific Highway and one at the intersection of Main Street with the Pacific Highway. The Engineer reported that an investigation has been made and that the volume of traffic at the intersection of Main Street with the Pacific

Highway warrants a signal installation but the other does not. He recommended that a "Stop and Go" signal be installed at Main Street, at an estimated total cost of $3,300, with the requirement that the city pay half of the installation cost and assume maintenance of the signal and furnish electrical energy to operate it, and that the request for a signal at 6th Street be denied. The Commission unanimously approved the Engineer's recommendations.

A request from citizens of Umatilla County for the installation of a flashing beacon at the intersection of the Old Oregon Trail with the entrance road to the Umatilla Ordnance Depot was considered by the Commission. The Engineer reported that the alignment of the highway at this intersection is very good and consequently traffic moves at a high rate of speed; also, that there is a considerable volume of cross traffic, both pedestrian and vehicular. He recommended the installation of a flashing beacon showing yellow on the highway and red on the Ordnance Depot Road, which he estimated would cost about $300 and would have to be paid by the state because the intersection is not within an incorporated city. The Commission approved the Engineer's recommendation unanimously.

The Commission considered a request from the suburban volunteer fire department of Klamath Falls for: (1) Controlled parking at the intersection of South 6th Street and Gettle Street, where the fire department headquarters station is located; (2) Installation of electric stop and go lights manually controlled from the fire station. The Engineer reported that both requests have been investigated. He recommended that the request for the manually controlled signal be denied as the investigation disclosed that a better remedy would lie in controlling nearby parking. The Commission unanimously approved the Engineer's recommendation.

With reference to the request for controlled parking to enable the fire equipment to get in and out of the fire station rapidly, the Engineer recommended (1) that only parallel parking be permitted on South Sixth Street from the east city limits of Klamath Falls (M.P. 1.61) to Kane Street (M.P. 3.52), South Sixth Street being the route of the Klamath Falls-Lakeview Highway; and (2) that no parking be allowed on the south side of Sixth Street for a distance of thirty feet both easterly and westerly from the property lines of Gettle Street. He suggested also that the fire department officially contact the Klamath County Court and ask them to prohibit parking on both sides of Gettle Street between South Sixth and Crosby Streets. The Commission approved the Engineer's recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A request from the City of Astoria and the Astoria Central Labor Council for a traffic control light survey of the downtown business district in Astoria was considered by the Commission. The Engineer advised that traffic congestion in Astoria is bad, and that in order to provide an overall picture of the traffic needs it would be necessary to study a number of intersections that are not on the State Highway System. Such a study he estimated would cost $2,000. He recommended approval of the request on the

condition that the City of Astoria will agree to pay half of the cost. The Commission unanimously approved the Engineer's recommendation.

The Engineer presented a report on the request of the Portland Union Stock Yarks and Swift and Company for protection of pedestrians crossing the Swift Secondary Highway near the Swift and Company plant in North Portland. He advised that many requests have been received for some sort of traffic control at this point, and that investigation discloses a great amount of pedestrian traffic which must cross this highway, particularly between the hours of 7:00 and 8:00 a.m., and 4:00 and 5:00 p.m. It was his thought that the situation might be alleviated were two pedestrian lanes painted at the more heavily travelled crossings and advance signs erected reading "Crosswalk Ahead - Stop if Occupied." He recommended that this be done and that the situation be watched to see if further action is required. The Commission unanimously approved the recommendation.

The Commission considered a request from citizens of Douglas County for the elimination of hazardous traffic conditions on the Pacific Highway immediately north of Roseburg. The Engineer advised that in the past numerous letters had been received citing the hazards on this section and suggesting corrective treatment ranging through traffic signals, intersection treatment, widening, and speed zoning. During the past three years, he stated, this section has developed from a rural to a completely built up urban section. The 1948 daily traffic average on this section, he said, was 7550 vehicles, and during the three-year period from 1946 through 1948 there were forty-nine accidents. He advised that the proper treatment of this section is the construction of a four-lane curb and sidewalk facility when it can be financed. He recommended that in the meantime the 35-mile per hour speed zone established in 1946 be extended northerly from its present terminus at M.P. 197.68 to M.P. 196.60 (Mud Creek Road), and that traffic signals and flood lights be installed at Garden Valley Road at a cost of $5300. The Commission approved the Engineer's recommendations and thereupon by unanimous vote adopted the attached resolution, marked EXHIBIT "D", extending the restricted speed zone, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A request from James Frankland, acting Regional Forester, U. S. Forest Service, for construction of a parking area at Willamette Pass on the Willamette Highway was considered by the Commission. The Engineer advised that under present conditions, cars parking at the summit create a bad congestion and hamper snow plowing operations in the winter. A reconnaissance survey, he said, has been made showing that a suitable parking area large enough to accommodate 150 cars can be constructed for $6,000. He recommended approval of the project at this time so the work can be done before next winter, if possible. The Commission unanimously approved the Engineer's recommendation.

The Commission discussed a petition from numerous residents of the Corbett-Troutdale district that more parking space be provided on the south side of the railroad at Corbett; that the grade crossing over the Union Pacific tracks be widened and signals installed, that at least one of two docks heretofore removed by the State Highway Department be replaced; that a public landing

be built in the river, and that the connecting road between Upper and Lower Corbett be improved by widening. The Engineer advised that the road referred to is a county road which the state is under no obligation to improve or maintain; moreover, the conditions at the railroad grade crossing are extremely hazardous and the crossing should be closed to general public use if anything is done with it. He suggested, however, that the crossing might be gated for use by fishermen only, at their own risk. He expressed objections to the improvement of the road because it would encourage people to use it and thereby invite accidents at the railroad crossing. As to the restoration of the dock and boat landings, the Engineer advised that the state has no legal obligation to replace them inasmuch as such matters were disposed of when right of way for the highway was acquired in 1938. The Commission postponed action in the matter pending the appearance of a delegation later in the day. (See delegation ahead.)

The Commission confirmed a loan of $100,000 from State Highway funds to Washington County to assist in financing repairs to county roads damaged during the winter, as authorized under Chapter 358, Oregon Laws of 1949, and thereupon signed a letter directed to the Secretary of State certifying the loan and authorizing him to advance the money to the County.

The Commission also confirmed a loan of $87,000 from State Highway funds to Malheur County for assistance in financing county roads damaged by winter weather, as authorized by Chapter 358, Oregon Laws of 1949. A letter directed to the Secretary of State authorizing the loan to the County was thereupon signed.

The Commission considered and approved a request from Wallowa County for a loan of $20,000 from State Highway funds to assist in financing repairs to county roads, as authorized by Chapter 358, Oregon Laws of 1949. The Commission signed a letter directed to the Secretary of State authorizing the loan to the County.

The Engineer reported that the cities of Bonanza and Prairie City have satisfied the legal requirements with respect to the expenditure of 1947 State Tax Street funds received by them in 1948, and that the plans of the projects which they expect to finance with such funds have been examined and found satisfactory. He recommended approval of the plans. The Commission approved the recommendation and by unanimous vote adopted the attached resolution with respect thereto marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that the following cities and towns have satisfied the legal requirements with respect to the expenditure of 1948 State Tax Street funds received by them in 1949, and that the plans of the projects which they expect to finance with such funds have been examined and found satisfactory:

Aurora	Florence	Oceanlake
Barlow	Gervais	Scappoose
Bonanza	Granite	Sisters
Columbia City	Ione	Stanfield
Condon	Island City	Summerville
Dundee	Lostine	Talent
Echo	Merrill	Turner
Fairview	Monument	Waldport

He recommended approval of the plans. The Commission approved the Engineer's recommendation and by unanimous vote adopted the attached resolution with respect thereto marked EXHIBIT "F", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered, and upon recommendation of the Engineer unanimously approved, "Options for Cooperative Construction Projects" for the improvement of city streets within the following cities and towns, the costs involved to be paid with funds in the "Special State Tax Street Fund" account:

Prairie City	$15,000	Lebanon	
Lakeview	10,000	City's share	$29,000
Vale	14,500	State's share	15,000

A request of the county courts of Crook and Deschutes Counties that a portion of the Powell Butte State Secondary Highway No. 371 be placed on the Federal Aid Secondary Highway System was considered by the Commission. The Engineer recommended approval of the request. The Commission deferred action on the matter until it is known whether the Public Roads Administration has any objections to such designation. The matter was referred to the Engineer to ascertain such information.

The Engineer requested confirmation of the telephonic authority given him by Commissioners Chandler and Reynolds to modify the terms of the Commission's agreement with the City of Freewater with respect to the financing of a Special State Tax Street Fund project in that town. He explained that under the terms of the original agreement the City was to pay $8,750. The City advised, however, that it does not have funds to meet its obligation and asked the State to advance its share of the cost, which the City will repay by assigning to the State Highway Department fifty percent of its share of future state highway revenues until the Highway Commission has been repaid in full, probably in January, 1952. The agreement, he said, has been revised accordingly. The Commission confirmed the arrangement unanimously. Chairman Banfield thereupon signed the agreement which previously had been signed by Commissioners Chandler and Reynolds.

The Engineer requested authority for an additional expenditure of $7,500 to complete construction of eleven roadside picnic areas. He recalled that in December, 1947, $7,000 had been set up for construction of fourteen such areas, of which amount $2,250 was expended in 1948. It now appears that the original estimates, which were not based on detailed surveys, were erroneous, so it has been necessary to reduce the number of feasible sites to eleven and

to augment the original authorization by the amount stated ($7500). The Commission approved the Engineer's request by unanimous vote with the stipulation that the source of the funds with which to finance the work shall be decided later.

The meeting recessed for luncheon at 12:00 noon and reconvened at 1:30 p.m. in the same room with the same persons present and participating.

The Commission considered plans for a caretaker's cottage at Wallowa Lake State Park. The Engineer explained the features of several cottage plans. The matter was referred to Commissioner Reynolds, the Engineer and the State Parks Superintendent to select a suitable plan.

The Engineer reported on the need for a new maintenance headquarters site and buildings on the Mt. Hood Highway near Government Camp. He advised that the present quarters at Government Camp, constructed in 1928, are too small so most of the equipment assigned to this place is unsheltered. It is impractical, he said, to expand the present site due to the smallness of the tract, and to the fact that the surrounding area has been developed and the residents object to the noise of equipment which many times is operated throughout the night. He proposed the development of the new site on U. S. Forest land near the junction of the Wapinitia Highway and Timberline Road which will adequately serve the purpose. He estimated the cost of complete development at $192,940, of which $44,000 would be expended in 1949 and the balance in 1950 and 1951. He pointed out that Timberline Road, which is now being improved as a Forest Highway project, is scheduled for completion in 1949, and that according to agreement, upon completion the road will be taken over by the State Highway Department, so the headquarters site as recommended would be advantageous. In the discussion of this matter the question arose whether or not the existing buildings belonging to the U. S. Forest Service are adequate and can be obtained. The Engineer was instructed to contact Forest Service officials relative thereto.

The Commission discussed a request from people residing along US99W south of Corvallis for construction of a footpath along this highway in the vicinity of Lincoln School. The Engineer advised that a petition containing 228 signatures has been received, requesting such footpath, and that investigation reveals that a footpath is warranted since both vehicular and pedestrian traffic is heavy. The accident record for the past three years, he said, shows twenty-three accidents and five personal injuries. He estimated the cost of the footpath at $2600 and recommended approval of the project, funds to be taken from the 1949 capital outlay reserve account. The Commission unanimously approved the Engineer's recommendation.

The Engineer reported that pursuant to authority previously given him by the Commission he has awarded contracts for which bids were received by the Commission on May 16 and 17, 1949, the conditions of the awards having been satisfied. He requested confirmation of the awards as follows:

(1) Grading and oil mat surfacing on South First Street, Willamina; contract awarded May 24 to O. C. Yocom Co., low bidder.

(2) Surfacing and oiling on Davis Street, Milton, and on Washington Street, Freewater, Umatilla County; contract awarded June 9 to Newport Construction Co. and Russell Olsen, low bidders

(3) South Myrtle Point Section of the Coos Bay-Roseburg Highway, Coos County; contract awarded June 14 to Coos Bay Dredging Co., low bidder

(4) Grading, surfacing, and oiling Luder Creek-Murphy's Camp Section of the Umpqua Highway in Douglas County; contract awarded June 14 to Umpqua River Navigation Co., low bidder.

The Commission unanimously confirmed the awarding of contracts as reported.

The Engineer requested confirmation of telephone authority given him by Commissioner Chandler and Commissioner Reynolds to make a survey of that section of the Wallowa Lake Highway that extends from the end of the recent improvement at the north end of the lake through the terminus of the secondary highway at the resort, including the roadway in Wallowa State Park. The Commission unanimously confirmed such authority with the understanding that no commitment whatsoever is being made as to construction.

The Commission considered a request from the Jackson County Court that Federal Aid Secondary Funds now allocated for construction on the Sams Valley State Secondary Highway be transferred to the construction of bridges across Rogue River in the town of Rogue River and on the Table Rock Market Road adjacent to Touvelle State Park. The Engineer estimated the cost of constructing the bridge at Rogue River at $170,000, and the one near Touvelle State Park at $200,000. He recommended that the funds not be transferred, as the Sams Valley Highway needs improvement; however, he suggested that the state might build one of the bridges requested, financing the same with reserve secondary construction funds in Division III, if the county will agree to construct the other at county expense. The Commission deferred a decision until its next meeting and instructed the Engineer to submit another report at that time.

The Engineer requested authority to transfer $15,000 of special maintenance funds, now budgeted for reconstruction of a log bridge across North Falls Creek in Silver Falls Park, to finance reconstruction of a bridge over Tunnel Creek on the North Santiam Highway at Mile Post 57.08. Recent timber borings on the bridge at Tunnel Creek, he stated, reveal that the bridge is more badly decayed than had been anticipated when the budget was prepared, and that it should be reconstructed this year; whereas reconstruction of the bridge at Silver Falls Park can be safely postponed for one year. The Commission unanimously approved the Engineer's request.

The Commission considered the following requests for extensions of time within which to complete highway contracts:

1. Fred Neikes, Contract No. 3090 for construction of a building at the Newport Maintenance Headquarters in Lincoln County, requested an extension of time of fourteen days from March 31 to April 14, 1949,

within which to complete the job. He alleged that the delay had been caused by inclement weather which prevented completion of the exterior painting, and that the plumbing contractor was unable to furnish all of the material within the specified time. The Engineer advised that the contractor's explanation is substantially true and he recommended that the extension of time be granted as requested, without penalty. The Commission accepted the Engineer's recommendation.

(2) R. & M. Construction Company, Contract 2995 for bridge construction on the Willamette Highway near Pleasant Hill in Lane County, requested an additional extension of time of sixty days from May 31 to July 30, 1949, within which to complete this job. They alleged that completion of the work was delayed by severe weather conditions during the winter months. The Engineer advised that the starting of work on this contract was delayed because of failure of the U. S. Engineer's grading contractor on adjacent railroad work to complete his work until August 15, 1948, thereby causing the state's contractor to overrun his time limit. As neither the railroad nor the highway are yet in use, the extension of time requested will not cause any loss to the State. He recommended in view of these facts that the extension of time be granted as requested without penalty. The Commission approved the Engineer's recommendation.

(3) Erwin E. Batterman, Contract No. 3081 for construction of a building at the Salem Highway Shops, requested an additional extension of time of thirty days from May 30 to June 30, 1949, within which to complete this job. He attributed the overrun of time limit to inability to procure certain plumbing fixtures. The Engineer advised that all work on the project with the exception of the installation of one plumbing fixture was completed within the time allowed under the previous extension of time. He recommended that as the building is now in use the extension of time be granted as requested without penalty. The Commission unanimously approved the Engineer's recommendation.

(4) Coast Construction Company, Contract No. 3083 for roadside improvement on the Barnes Road-Multnomah County Line Section of the Sunset Highway in Washington County, requested an extension of time of six and one-half months, from May 1 to November 15, 1949, within which to complete this job. They alleged that adverse weather conditions prevented completion of the work within the limits specified in the contract. The Engineer advised that because of the extremely dry weather near the end of the specified time limit, the Landscape Engineer ordered the contractor to postpone his planting until fall rains set in. He recommended, in view therof, that the extension of time be granted as requested, without penalty. The Commission unanimously approved the Engineer's recommendation.

(5) Del R. Beebe Construction Company, Contract No. 3056 for construction of the Manning Slough Bridge on the Oregon Coast Highway,

in Coos County, requested an extension of time of ninety-two days from May 31 to August 31, 1949, in which to complete this job. The contractor gave inclement weather which prevented final painting of the handrail and stoning of the concrete piers as the reason for failure to complete the project within the specified time. The Engineer advised that the bridge is complete except for handrail painting and finishing of concrete piers, and that the bridge is now being used by traffic. He further stated that the public has not been inconvenienced by the delay nor has the state incurred any extra engineering costs. He recommended, in view thereof, that the extension of time be granted as requested without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission unanimously approved the recommendation.

(6) K. F. Jacobson and Company, Inc., Contract No. 2891 for grading and bituminous macadam surfacing on the West Union-Cornelius Pass Section of the Hillsboro-Cornelius Pass County Road, in Multnomah and Washington Counties, requested an additional extension of time of 153 days, from April 30 to September 30, 1949, in which to complete this job. They alleged that the job had not been completed within the limits of the previous extension of time because the first two coats of paint applied to the guard rail in September, 1948, scaled badly during the winter season necessitating considerable scraping and repainting, which cannot be successfully accomplished on this type of treated timber until after several months' drying out. The Engineer advised that the work was completed except for the painting work, and the highway opened to traffic in September, 1948; also that the state has incurred no extra expense, nor has the traveling public been inconvenienced due to the necessity of repainting the guard rail. He recommended that the extension of time be granted as requested and without penalty. The Commission unanimously approved the Engineer's recommendation.

The Commission, in discussing requests for extensions of time as listed above, considered but did not necessarily adopt the recommendations of the Engineer and the reasons given by the contractors for failure to complete their projects within the specified time limits.

The Engineer reported that Contracts Nos. 3007, 3018, 3037, 3039, 3050, 3065, 3071, 3072, 3079, 3080, 3087, 3090, 3132, 3148, 3062, 3133, 3070, 3078, 3168 have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. After due consideration of the Engineer's report with respect to contracts under discussion, the Commission approved and accepted the said contracts as reported and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 3132 with Jack Robinson for grading and surfacing on the Harris Beach Park Section approach road in Curry County, completed June 15, 1949.

Contract No. 3148 with Parker-Schram Company for paving in the City of Scappoose (Williams Avenue-Third Street) in Columbia County, completed June 2, 1949.

Contract No. 3062 with Snook Brothers for construction of Gales Creek Bridge on the Tualatin Valley Highway in Washington County, completed June 15, 1949.

Contract No. 3133 with Hall & Wols for painting Smith Ferry Bridge on the Elkton-Sutherlin Highway in Douglas County, completed June 19, 1949.

Contract No. 3070 with D. F. McKenzie for grading and oil mat surfacing on the Medical Springs Highway in Baker County, completed June 15, 1949.

Contract No. 3078 with E. C. Hall Co. for grading and oil mat surfacing on the Oakridge (Commercial St.) Section in Lane County, completed June 23, 1949.

Contract No. 3168 with O. C. Yocom Co. for oil mat surfacing on the Dayton Prairie School-Dayton Junction Section of the Amity-Dayton Secondary Highway in Yamhill County, completed June 21, 1949.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

In considering the acceptance of the contracts completed, Commissioner Chandler mentioned a complaint from one of the contractors that an unusually long time elapses between completion of a project and payment of the final amount. The Engineer advised that in the past few years it has taken from three to six months to effect final payment to a contractor due to a shortage of help in the checking department, but that as additional help is now being secured he anticipated that payments could be made within thirty days. The Commission instructed the Engineer to expedite all payments to contractors.

The Engineer requested confirmation of authority granted by the Commission by phone for the Sportsmen Pilots of Oregon to use the shore of the ocean west of Netarts as a temporary landing field for aircraft, on June 19. The Commission unanimously confirmed such authority.

The Commission considered a request from the Board of County Commissioners of Multnomah County that reconsideration be given to the closing of the SunDial Road in Multnomah County. It was alleged that the closing of the road pursuant to the provisions of an agreement entered into January 25, 1949, between the State, Multnomah County, and Port of Portland will eliminate the

Contract No. 3007 with Tom Lillebo for construction of Salmon River Bridge on Oregon Coast Highway in Lincoln County, completed June 10, 1949.

Contract No. 3018 with Shoreline Construction Co. for grading and oil mat surfacing on the Hood River Junction-Odell Creek Section of the Odell Secondary Highway in Hood River County, completed May 19, 1949.

Contract No. 3037 with Vernie Jarl for grading, topsoiling and seeding on the Troutdale Section of the Columbia River Highway in Multnomah County, completed April 25, 1949.

Contract No. 3039 with Parker-Schram Co. for grading and paving on the Scappoose Section of the Columbia River Highway in Columbia County, completed May 31, 1949.

Contract No. 3050 with Burkhard and Schortgen for construction of Caretaker's Cottage in Collier State Park in Klamath County, completed May 21, 1949.

Contract No. 3065 with F. L. Somers for furnishing crushed materials in stockpiles on the Keno-Midland Section of the Lower Klamath Lake, The Dalles-California, and Green Springs Highways in Klamath County, completed May 24, 1949.

Contract No. 3071 with Rogers Construction Co. for grading and bituminous macadam surfacing on the John Day River-Squally Hook Section of the Columbia River Highway in Gilliam County, completed May 5, 1949.

Contract No. 3072 with Gilbert Roberts for construction of maintenance building at Hereford on the Baker-Unity Highway in Baker County, completed May 31, 1949.

Contract No. 3079 with Gilbert Roberts for construction of maintenance building at Jordan Valley on the I.O.N. Highway in Malheur County, completed May 31, 1949.

Contract No. 3080 with N. A. Toole Construction Co. for furnishing crushed materials in stockpiles on the Juntura-Hope Section of the Central Oregon Highway in Malheur County, completed May 20, 1949.

Contract No. 3087 with A. H. Saxton & Sons for furnishing crushed materials in stockpiles on the Birkenfeld-Washington County Line Section of the Nehalem Secondary Highway in Columbia County, completed May 3, 1949.

Contract No. 3090 with Fred Neikes for construction of the Newport Building in Lincoln County, completed April 14, 1949.

use of the middle portion thereof and cause traffic to use a much longer route to reach the Reynolds Aluminum Plant. The Engineer advised that the agreement provides for abandonment as a State Secondary Highway of a portion of the SunDial road and reversion of the same to county road status under control of the county -- that the procedure was regular and proper, and in his opinion there is nothing further for the Commission to do about it. The Commission ordered the communication filed.

A request was presented from the Memorials Committee of the Oregon Historical Society for the erection of a textboard on the New Columbia River Highway about one-half mile west of Corbett commemorating the expedition headed by Lt. William Robert Broughton which explored this area and camped overnight near this spot on October 30, 1792. He presented a text prepared by the Memorials Committee, as follows, for inscription on the board, and recommended approval of the request which would cost the State about $250:

BROUGHTON'S EXPEDITION

CAPTAIN GEORGE VANCOUVER IN A VOYAGE OF EXPLORATION TO THE NORTHWEST COAST OF AMERICA ORDERED BY THE BRITISH ADMIRALTY OFFICE ASSIGNED LIEUTENANT WILLIAM ROBERT BROUGHTON, COMMANDER OF H.M.S. CHATHAM, TO EXPLORE THE NAVIGABLE WATERS OF THE COLUMBIA RIVER WITH BOAT CREWS FROM HIS SHIP. THIS POINT MARKS THE FARTHEST INLAND REACHED BY BROUGHTON WHO CAMPED OVERNIGHT ON AN ISLAND WITHIN SIGHT OF THIS POINT ON OCTOBER 30, 1792. BY APPROPRIATE CEREMONIES HE TOOK POSSESSION OF THE TERRITORY IN THE NAME OF THE BRITISH CROWN. HE MADE COMPASS OBSERVATIONS ON THE HEADLAND WHICH HE CALLED POINT VANCOUVER AND ON THE MOUNTAIN WHICH HE NAMED AFTER VISCOUNT HOOD, ADMIRAL OF THE BRITISH FLEET.

The Commission approved the recommendation unanimously.

The Commission considered a resolution from the Oregon Cattlemen's Association requesting that the State Highway Department assume full responsibility for the control of noxious weeds growing on state highway rights of way, and that full cooperation be extended to county agents in their elimination. The Commission ordered that the Association be informed that it is the Commission's desire to cooperate with the counties in this matter and to that end has instructed the Engineer to contact the County Courts relative thereto. The Secretary was instructed to send the Association a copy of the Landscape Engineer's report on the subject when it has been rendered and approved by the Commission.

Mr. George W. Meade, Attorney, Portland, and Mr. Elmer W. Meyers, Bonneville, appeared before the Commission regarding settlement of a right of way case involving Mr. Meyers' property on the Columbia River Highway at Bonneville. Mr. Mead advised that the Highway Commission took an option from Mr. Meyers to purchase this property for $26,500, but before the option was closed a fire destroyed the buildings on the property. Shortly thereafter, he said, a State Highway right of way agent called on Mr. Meyers relative to a reduction in the amount to be paid in view of the loss of the buildings,

such agent alleging that there was now due Mr. Meyers only the sum of $7500, the difference between the amount of the option and the appraised value of the buildings. He declared that the value of the buildings as appraised by the state, $19,000, was entirely too high, as the buildings were old and in a bad state of deterioration. It was his thought that $2500 is a reasonable value for the buildings and he asked the Commission to settle on such basis. Chairman Banfield advised that the Highway Commission must act in the best interests of the state, which in this instance is not responsible for the loss of the buildings; and that, moreover, the Commission's Chief Counsel, who guides the Commission in legal matters, has stated that the Commission can pay out state funds only for things that are delivered to it, and in this case the buildings cannot be delivered. This matter was discussed at considerable length and as a result thereof the Commission referred it back to the Chief Counsel for further study and recommendation.

Mr. William A. Bowes, City Commissioner, Portland, and Mr. L. G. Apperson, Assistant City Engineer, were present and conferred with the Commission on the following matters:

On the subject of the Front Avenue Project, Commissioner Bowes stated that according to the agreement between the City of Portland and the State Highway Commission covering this project, when the funds that the city has provided to pay its share of the costs are exhausted then the state will take over and complete the project, including acquisition of right of way, titles to which are then to be taken in the name of the state. The city, he said, has now exhausted its funds and is asking the state to assume the responsibility for the balance of the right of way. He suggested a joint audit of the city's books pertaining to this account by the State, the Federal Government, and the City. The Commission indicated approval of the suggestion and instructed Mr. Bowes to submit an audit of the account for checking by the Chief Counsel, the Engineer and the Chief Accountant, following which, action will be taken.

Commissioner Bowes next requested that the area between Harbor Drive and the seawall, extending from Burnside Street to Morrison Street, which is a portion of the Front Avenue landscaping project, be paved rather than landscaped. He repeated statements made on the previous day concerning this subject. Mr. Apperson also spoke in behalf of such change in plans. He declared that it is impractical to maintain landscaping in the area when circumstances are such that thousands of people swarm over it to view visiting vessels that tie up to the seawall at this point, which occurs three or four times annually.

Chairman Banfield pointed out that the plans as presently prepared provide for development of the area as a viewpoint and could not be changed without the consent of the Federal Government, whose funds are being used to finance the work; moreover, in his estimation the change would detract greatly from the appearance of the highway. He strongly indicated his objections to altering the present plans. Commissioner Chandler expressed himself similarly, stating that he, personally, would rather see the area landscaped. The Commission took no final action on the matter at this time. Following the departure of Messrs.

Bowes and Apperson, the Commission resumed discussion of the subject and at that time unanimously decided to adhere to the original plan of landscaping the area, and authorized the contracting of the work. The action was taken upon the motion of Commissioner Chandler, which was duly seconded by Commissioner Reynolds, upon advice from Mr. T. M. Davis to the effect that the Public Roads Administration will not approve changing the original plans if the Highway Commission feels that the change would not be in the best public interest.

Mr. Bowes brought up for discussion the continued use of the area between Harbor Drive and Front Street, just north of Morrison Street, for the off-street parking of cars. He inquired if the Commission has any objections to designating this a permanent parking area. The Commission decided unanimously against such use of this property.

Request was made by Mr. Bowes for permission to erect a small concrete block building under one of the viaducts in the west side district in which to store city park equipment. The matter was referred to the Engineer and Chief Counsel for recommendation.

Mr. Apperson mentioned the untidy condition under some of the viaducts and inquired who is to maintain such places. The Engineer stated that this is the state's responsibility and that clean-up would be made in the near future.

Mr. Bowes also brought up for discussion proposed cooperation by the State and the City of Portland in the construction of storm sewers on 82nd Street, route of the Cascade Secondary Highway No. 160. Mr. Apperson explained that plans now prepared provide for the care of all water that comes onto 82nd Street, and that the property owners are unable to pay the cost of the sewers, so the city is asking the state to cooperate, inasmuch as it would benefit both agencies.

Chairman Banfield advised that according to advice received from the Engineer and Chief Counsel, the state's responsibility is limited to the disposal of surface water on 82nd Street only, which does not include the draining of adjacent properties nor the providing of sanitary sewer facilities, which it appears is proposed in the plan, and that the Commission is without legal authority to spend state money for the things proposed. He pointed out that the city is asking the state to contribute $123,000 of state funds for this purpose, whereas the Engineer estimates the state's share at about $30,000. He concluded the discussion by stating that the Commission will give the matter further consideration if it is presented on the basis of the State Highway Engineer's estimate. The Engineer was thereupon instructed to consult with the Portland City Engineer regarding the details.

A delegation from the town of Corbett and vicinity, consisting of the following persons, appeared before the Commission regarding the road connecting "Upper" and "Lower" Corbett, the railroad grade crossing at "Lower" Corbett, and boat landing facilities in the Columbia River at this place:

Robert Ellis, Richard Ellis, Vernon Jamison, Albert Soderstrom, Albert Mershon, and Henry Freeman, general farmer, all of Troutdale; Clark North, Corbett; Clifford Reed, Principal of Corbett Grade School; Frank Windust, President NEMCO Community Association, Corbett; M. K. Evans, Chairman of Road Committee of NEMCO Community Association; Mrs. V. Courtright, member of School Board, District #39, Corbett; Leslie Emerson, Principal of Columbia High School, Corbett; and M. F. Dunkin, Secretary of NEMCO Community Association, Troutdale.

They requested orally and by petition that more parking area be provided to take care of public patronage of the fishing industry; that the connecting road between "Upper" and "Lower" Corbett be widened; that illumination and signals be installed for public safety at the railroad crossing; that at least one of the two fishermen's docks in the Columbia River heretofore removed by the state be replaced; that an area be set aside for public boat landings for the use of the general public; and that full and free access to the Columbia River for the fishing industry and for sportsmen be allowed.

Mr. Freeman headed the group. He urged approval of their requests from the standpoint of farmers. Mrs. Courtright stated that the road improvement and signal installation are necessary for the safety of school children riding in the schoolbus. One member of the group, driver of the schoolbus, also spoke from that standpoint, particularly requesting improvement of the road. Mr. North urged favorable consideration from the standpoint of fishermen, who, he said, badly need more parking facilities.

Chairman Banfield advised that the road under discussion is a county road under the jurisdiction of Multnomah County. He admitted the hazards of the crossing of the railroad at grade because of the short sight distance, and advised that it would cost about $250,000 to construct a grade separation structure to insure safety. As to the request for docks and public boat landings, Chairman Banfield advised that according to the Engineer and Chief Counsel all rights to those facilities were acquired by the state in connection with negotiations for right of way for the new highway.

The Engineer read aloud a letter by the Counsel dated May 3, 1938, wherein he states that the state is the owner of upland and shoreland at this point, and fishermen have no legal right to occupy or use the premises. Nevertheless, the Commission at that time approved the granting of revocable permits for fishing purposes. In concluding the discussion, Chairman Banfield expressed appreciation for the community interest that has been displayed by the group and advised that the Commission can do nothing for them because up to the present time, insofar as the state is concerned, no road existed at this point, and the state has no responsibility to make the connection as requested nor to spend $250,000 of state money to build a grade separation structure. However, he added, the Commission will discuss with the Engineer and Chief Counsel the feasibility of providing parking space for cars, which, if it is approved, absolutely will not be on the river side of the railroad.

The Commission discussed with the Engineer the bids received at the morning session and at 3:00 p.m., Chairman Banfield publicly announced awards of contracts as follows, the action of the Commission with respect to each project being by unanimous vote:

"Dewey Avenue Grade Separation Project on the Baker-Unity Highway in Baker, Baker County. Construction of reinforced concrete and steel highway-railroad separation structure; one double 8' x 4' x 34' reinforced concrete box culvert and two railroad trestles. Valley Construction Company, Portland, submitted the low bid for this job at $434,547.50 with the qualification that they would not accept awards totaling more than $600,000 at this meeting. E. C. Hall Company, Portland, submitted the second low bid at $438,462.50. One higher bid was received. All bids have been referred to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Oswego Section of the Oswego Highway, in Clackamas County. 0.45 mile of grading and paving. Perkins Brothers, Portland, submitted the low bid for this job at $49,366.20. K. F. Jacobsen & Company, Inc., Portland, submitted the second low bid at $51,109.50. Four higher bids were received. The contract has been awarded to the low bidder, Perkins Brothers.

"Mail Creek Section of the Sunset Highway, in Clatsop County. 0.02 mile of grading and replacement of bridge with sectional plate metal culvert. Loyd Calkins and Company, Oceanlake, submitted the low bid for this job at $15,585. Jed Wilson, Seaside, submitted the second low bid at $16,650. Eight higher bids were received. The Commission has awarded the contract to the low bidder, Loyd Calkins and Company.

"Drain and Yoncalla grading and oil mat surfacing project on "B" Street in Drain and on Second and "D" Streets in Yoncalla, in Douglas County. 0.33 mile of grading, surfacing and oiling. Acme Construction Company, Eugene, submitted the low bid for this job at $16,455.50, using asphalt. Baker Paving Company, Coos Bay, submitted the second low and only other bid at $22,043.50, using asphalt. Neither submitted a bid based on the use of tar. The contract has been awarded to the low bidder, Acme Construction Company.

"Prairie City (Bridge Street) Section. City project in Grant County. 0.05 mile grading and 62 feet reinforced concrete bridge on a city street. Leslie W. Stoker, Nyssa, submitted the low bid for this work at $15,515. George E. Berry, Beaverton, submitted the second low bid at $15,890. Two higher bids were received. The contract has been awarded to the low bidder, Leslie W. Stoker.

"North Medford Landscaping Project on the Pacific and Crater Lake Highways, in Jackson County. Western Golf Course Supply Company, Portland, submitted the low bid for this job at $4,919. Stoen's Rock and Landscape Company, Seattle, submitted the second low bid at $5,327.40. Two higher bids were received. The contract has been awarded to the low bidder, Western Golf Course Supply Company.

"Grants Pass-Provolt-Jacksonville surfacing, oiling and rock production on three state highways, in Jackson and Josephine Counties. 0.8 mile of gravel surfacing and 6.74 miles of oiling. No bids were received on this project.

"Cave Junction recoiling and rock production project on the Redwood and Oregon Caves Highways, in Josephine County. 19.36 miles of recoiling and 17,900 cubic yards crushed gravel in stock piles. J. C. Compton Company, McMinnville, submitted the low bid for this job at $101,860.50. M. C. Lininger and Sons, Medford, submitted the second low and only other bid at $110,390.50. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Klamath Falls Traffic Signals at Esplanade and Main Streets in Klamath Falls, Klamath County. Trowbridge and Flynn Electric Co., Medford, submitted the only bid for this work in the amount of $4,625. The Commission has rejected this bid as being too high.

"Ferry Street Bridge over the Willamette Highway on Coburg County Road in Eugene, Lane County. Tom Lillebo, Reedsport, submitted the low bid for this work at $447,885. E. C. Hall Company, Portland, submitted the second low bid in the amount of $459,625. Eight higher bids were received. The Commission has referred all bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Toledo, Lincoln County, pavement resurfacing project on South Main Street. 0.25 mile of pavement resurfacing. Parker-Schram Company, Portland, submitted the only bid for this job in the amount of $7,740. The Commission has referred the bid to the Engineer with authority to award the contract to this company when certain conditions have been satisfied.

"Lebanon grading and paving project on Milton and Williams Streets. City project in Linn County. 0.61 mile grading and paving. Warren Northwest, Inc., Portland, submitted the only bid for this job in the amount of $33,580. The bid has been referred to the Engineer with authority to award the contract to this company when certain conditions have been satisfied.

"State Office Building-Supreme Court Building parking area in Salem, Marion County. T. J. Patzer, Salem, submitted the low bid for this job at $3,923.96. Salem Sand and Gravel Company, Salem, submitted the only other bid in the amount of $4,032. The bids have been referred to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Front Avenue (Alder Street-Bancroft Street) planting project on the Pacific Highway West in Portland, Multnomah County. Knight Pearcy and Parkrose Nursery, Salem, submitted the low bid for this job at $43,257.70. Rich and Sons, Hillsboro, submitted the second low bid at $43,757.00. One higher bid was received. The contract has been awarded to the low bidder, Knight Pearcy and Parkrose Nursery.

"Parkrose-Larch Mountain Road Section of the Columbia River Highway in Multnomah County. 17.22 miles of bituminous pavement seal. Oregon Asphaltic Paving Company, Portland, submitted the low bid for this job at $14,667. Harr and Horton, Portland, submitted the second low bid at $17,190. One higher bid was received. The contract has been awarded to the low bidder, Oregon Asphaltic Paving Company.

"North Unit, Washington State Line - Flora Junction Section of the Enterprise-Lewiston Highway, in Wallowa County. 13,800 lineal feet of metal guard rail. George H. Clausen, Gladstone, submitted the low bid for this job at $29,463. R. A. Heintz Construction, Portland, submitted the second low bid in the amount of $37,605. Seven higher bids were received. The contract has been awarded to the low bidder, George H. Clausen.

"Forest Boundary-Jones Ranch Section of the Ochoco Highway, in Wheeler County. 3.06 miles of grading. Leonard and Slate, Oregon Ltd., Portland, submitted the low bid for this job in the amount of $262,851. M. L. and C. R. O'Neil, Creswell, submitted the second low bid in the amount of $266,302.50. Twelve higher bids were received. The contract has been awarded to the low bidder, Leonard and Slate, Oregon Ltd."

A delegation consisting of citizens of Malheur County, Oregon, and of the State of Idaho in the vicinity of Payette and Weiser, and including the following, appeared before the Commission regarding possible lifting of the reduced load limit on the Payette Bridge over the Snake River: J. T. Hanigan, Chamber of Commerce, Payette; Edward E. Parsons, farmer, Payette; L. J. Josephson and Sam Rennilli, growers and shippers, Payette; J. V. Chamberlin, Chamber of Commerce, Weiser; William Carson, President of Beet Growers' Association and Vice-President of Chamber of Commerce, Weiser; Elmer Gibb, President of Farm Bureau, Weiser; and Ray Larson, Amalgamated Sugar Company, Nyssa, Oregon.

Mr. Hanigan headed the group. He presented a copy of a resolution adopted by the Board of County Commissioners of Payette County, Idaho, on October 14, 1940, ordering a ten-ton reduced load limit for this structure and advised that recently the State of Oregon posted the bridge for a six-ton maximum limit and ordered patrolmen to enforce the order. They are enforcing it and this is greatly handicapping Oregon farmers who market their produce in Idaho. He read aloud a resolution from the Payette Chamber of Commerce in which the Commission is urged to refrain from stopping and unnecessarily delaying produce trucks transporting produce between the Payette, Oregon, slope and Payette, and suggesting that the policing of such traffic be vested in the Board of County Commissioners of Payette County, Idaho, subject to load limitations designated by such Board.

Chairman Banfield advised that the Oregon Highway Commission was reluctant to place a reduced load limit on this bridge, but was forced to do so because of advice from its Legal Counsel to the effect that it could be held responsible and liable for anything that occurred to the bridge. Hence, it posted the bridge for a six-ton limit, which, according to the Engineer, is the maximum load that it can carry with safety. The solution of the problem, he said, is an engineering matter. There followed a general discussion of the

matter during which a telegram was presented from Mr. James Reid, Director of Highways, State of Idaho, concurring in the capacity rating for which the bridge is now posted. As a result of the discussion the Engineer was authorized and instructed to join with the Idaho Engineering Department during the following week in an inspection of the bridge to determine whether or not there is any practical way to increase the maximum weight of loads that use this bridge. Chairman Banfield, in concluding the discussion, pointed out that the Commission could act only on the basis of safety for people using the bridge and that even though there had been reports of loads crossing the bridge in excess of the reduced limits that the Commission could not take any action in changing the limits unless the Engineer could justify such action. He added that if the Engineer advises that the bridge can carry a heavier load than that for which it is presently posted then the Commission will act accordingly.

The Engineer requested approval for an expenditure of $6,600 from the 1949 Budget for the purchase of ten automatic traffic counters. He explained that use of the counters will eliminate the necessity of manual counts at fixed stations, thereby reducing the cost of such counts. The Commission unanimously approved the Engineer's request.

The Engineer also requested authority for an expenditure of $7,204.43 for purchase of office equipment as listed in his letter of June 21 addressed to the Commission. He explained that the purchase of the equipment was largely due to re-organization and expansion of the Right of Way Division and that a small part of the cost was incurred by the Office Engineering Department and the County and City Relations Department. The Commission unanimously approved the request with the admonition that the amount set up in the budget must not be overrun.

The Commission considered abandoning portions of the old route of the Hood River Junction-Odell Creek Section of the Odell Secondary Highway, in Hood River County. The Engineer advised that these sections are no longer of value for state highway purposes since the highway has been reconstructed on new alignment. He recommended that they be abandoned. After due consideration, the Commission approved the recommendation and by unanimous vote adopted the attached resolution, marked EXHIBIT "G", abandoning such areas, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered and, upon recommendation of the Engineer, approved an agreement with Curry County covering abandonment of parts of the Port Orford-Rocky Point Section of the Oregon Coast Highway, in Curry County, which will no longer be of value for highway purposes when the reconstruction of this section of highway is completed. The agreement was thereupon signed.

The Commission also signed an agreement with the City of Port Orford providing for the grading, surfacing, and oiling of the Oregon Coast Highway from a point 400 feet north of the intersection of the highway and 20th Street to a point 219 feet east of the intersection of the highway and Jefferson Street.

The Engineer requested authority to post the following bridges for maximum gross loads of 54,000 pounds:

(1) Deep Canyon Bridge on the McKenzie Highway at M.P. 99.18;
(2) Deschutes River Bridge on the McKenzie Highway at M.P. 107.16;
(3) Deschutes River Bridge on the McKenzie-Bend Highway at M.P. 16.06.

These bridges, he stated, have been inspected by the Bridge Engineer, who advises that such posting is required as a safety measure. The Commission approved the Engineer's request and thereupon unanimously adopted the attached resolution pertaining thereto, market EXHIBIT "H", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer requested confirmation of his action in removing the fifty percent reduced load limit, imposed on February 25, 1949, on the Weston-Elgin Secondary Highway and removed June 6, 1949, as the necessity for the load limit no longer exists. He also requested confirmation of his action in removing the fifty percent reduced load limit, imposed on March 7, 1949, on the Medical Springs Secondary Highway, and removed on May 23, 1949. The Commission confirmed the Engineer's action in both instances and thereupon by unanimous vote adopted the attached resolution pertaining thereto, market EXHIBIT "I", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered a request from the Coos County Highway Council that log haulers be permitted to haul logs on the Oregon Coast Highway between Coquille and Coos Bay between the hours of 8:00 p.m. and 10:00 p.m., PST, in order to provide a "backlog" of timbers for use by the mills during the winter season. The Engineer recommended that the request be denied because of the hazard that would be created to other traffic, and that it be suggested to the Highway Council that the haulers employ additional trucks to increase their stockpile of logs. The Commission unanimously approved the Engineer's recommendation.

The Commission discussed a written report from the Engineer on the operations of two log haulers, viz: Albert H. Strain, Bandon, Oregon; and S. O. Wilson, Trail, Oregon, who are consistent and flagrant violators of the requirements covering their activities. According to this report, both operators have very little respect for the requirements, notwithstanding repeated warnings. Their violations consist of transporting overweight loads, laying out to avoid having their loads weighed, by-passing scales, transportation of over-dimension loads, and neglect in payment of fines imposed by justice courts. (See copy of the report dated June 23, 1949, in General Files for details.) After very careful consideration of the record of both haulers and pursuant to recommendations of the Engineer, the Commission ordered the immediate cancellation of the permits of both operators for an indefinite period, and instructed the Secretary so to recommend to the Public Utilities Commission.

The Commission considered the adoption of revised permit forms reflecting changes made necessary by the 1949 Legislature in its "Big Truck

Bill". The Commission unanimously approved the revised forms by the adoption of the attached resolution relative thereto, marked EXHIBIT "P", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered a recommendation from the Engineer that portions of the Adrian-Arena Valley and the Adrian-Caldwell State Secondary Highways, in Malheur County, be placed on the Federal Aid Secondary Highway System. The Engineer advised that the State of Idaho has made satisfactory connections with these highways and in his estimation Oregon should do likewise. The Commission approved the Engineer's recommendation and thereupon by unanimous vote adopted the attached resolution pertaining thereto, marked EXHIBIT "K", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer requested authority for J. Al Head, Assistant Traffic Engineer, to attend, at state expense, a conference of the Western Section of the Institute of Traffic Engineers, in Seattle, July 13-15. He estimated the expense at $45.00. The Commission approved the request.

The Engineer brought up for consideration the designation of a "no parking" area on the north side of Edgewater Street (Salem-Dallas Highway) in West Salem, between the Willamette River Bridge and the easterly line of Clarke Street (Salem-Dayton Secondary Highway). He advised that pursuant to authority from the Commission a traffic signal has been installed at this point which permits a right turn movement at all times for traffic moving from the bridge north onto Clarke Street. In order to provide unobstructed use of the "right-turn-at-all-times" lane, he said, the City of Salem has adopted an order prohibiting parking at any time on the northerly side of Edgewater Street and to make this order most effective he suggested adoption of a companion order by the Commission. The Commission approved the Engineer's recommendation and thereupon adopted by unanimous vote the attached resolution pertaining thereto, marked EXHIBIT "O", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered an agreement with the city of Athena providing for the installation of a flashing beacon at the intersection of Third and Main Streets in that city, this being an intersection on the Oregon-Washington State Highway No. 8. The Engineer advised that the agreement provides the signal be installed at state expense but the city is to maintain it and furnish electrical energy for its operation. He recommended that the agreement be approved. The Commission accepted the Engineer's recommendation and thereupon signed the agreement.

A letter was presented from the Parkrose Chamber of Commerce requesting installation of a traffic signal at the intersection of Northeast 82nd Avenue and Prescott Street; the oiling of shoulders along Sandy Boulevard; and a conference with the Engineer. The Engineer was instructed to investigate the need for a signal and to confer with the Chamber at his convenience. No action was taken by the Commission on the request for shoulder oiling.

The Commission considered a letter from Roy C. Wright, County Extension Agent, Baker County, requesting state aid in eradication of noxious weeds along state highways in Baker County. The Engineer advised that the Landscape Engineer is making a state-wide study of such matters and that he will instruct him to contact Mr. Wright in connection therewith. The Commission took no action.

A letter was presented from the Azalea Garden Club of the Brookings-Harbor area in Curry County, expressing appreciation for construction of the roadway leading from the Oregon Coast Highway to Harris Beach State Park near Brookings. The Commission ordered an appropriate acknowledgment.

A request from the Gresham Chamber of Commerce for permission to route a parade over the Mount Hood Highway from North Roberts Avenue to Main Avenue in the City of Gresham on July 4 was considered by the Commission. The Engineer recommended approval of the request on the condition that the parade be confined to the northerly half of the highway, leaving the southerly half open for two-way traffic, and that the parking of cars along the southerly side of the highway be prohibited. The Commission unanimously approved the Engineer's recommendation.

The Commission discussed a date for its next regular meeting and decided to hold such meeting in Portland on Monday and Tuesday, August 1 and 2, 1949. The Secretary was instructed to make the usual arrangements for use of the Green Room in the Imperial Hotel.

Matters pertaining to proposed highway improvements in the City of Salem, particularly those covered by the Engineer's report, heretofore rendered, were discussed by the Commission. The Chief Counsel advised that an agreement covering the situation has been prepared and discussed with the city officials who indicated that it is satisfactory to them, although objections have been filed by some of the residents along the Pacific Highway north of the underpass who oppose the "no parking" provisions, and by some residents along Pine Street who object to the routing of truck traffic on that street. The proposed agreement, he said, has been amended to provide that the state shall widen parts of the highway to provide for a certain amount of parking and that the city shall provide off-street parking. The Engineer advised that the changes requested by the city had raised the estimated cost of the project by about $50,000. The Commission went on record as opposed to the expenditure of any money in connection with the Salem project until the agreement and other details have been consummated to the Commission's entire satisfaction. The Commission ordered an additional report from the Engineer, to be rendered in writing prior to its next meeting, outlining in detail the several items of work to be done; the estimated cost of each item; a map showing the proposed "grid" system of city streets and what is necessary to put it into effect and the cost thereof.

The Commission considered the matter of rerouting a section of the Hillsboro-Silverton Secondary Highway No. 140 in Newberg. The Engineer advised that the new route, on which bids for construction were received this morning, covers a distance of four blocks on Fourth Street and three

blocks on College Street. The section to be abandoned consists of three blocks on River Street. He recommended that the new route be approved and that the three-block section of the old route be abandoned. Resolutions from the City, and Yamhill County Court, approving the change were presented. The Commission approved the Engineer's recommendation and thereupon by unanimous vote adopted the attached resolutions pertaining thereto, marked EXHIBIT "L" and EXHIBIT "M", which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Commission thereupon considered, approved, and signed an agreement with the City of Newberg outlining the things that the state shall do and the things the city shall do in connection with construction, and the participation of each in cost of the work.

A resolution from the Mill City Planning Commission, urging construction of the North Santiam Highway on proposed alignment on the north side of the Santiam River between Mehama and Mill City was considered by the Commission. The Engineer estimated the cost of this project at $600,000 and advised that no provision for it has been made in any immediate program. The Commission ordered the request acknowledged and filed.

The Engineer reported that the location survey for the Rome-Princeton Secondary Highway from its junction with the Diamond Valley Secondary Highway to Follyfarm, in Harney and Malheur Counties, is completed and ready for the Commission's approval. He exhibited a map showing the proposed permanent alignment and recommended approval of the survey and that authority be given the Right of Way Department to negotiate options for right of way. The Commission approved the Engineer's recommendation and thereupon by unanimous vote adopted the attached resolution pertaining thereto, marked EXHIBIT "N", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission considered Special State Tax Street Funds projects as follows: Gladstone, estimated total cost, $15,000, all state funds; Myrtle Creek, estimated total cost, $20,000, of which the state contributes $15,000 and the city $5,000. The Engineer advised that the street in Gladstone carries heavy log traffic and acts as a connection for a large amount of traffic between the Cascade Secondary State Highway and the Pacific Highway East. The project in Myrtle Creek, he advised, is a change from the one approved January 24, 1949, on 3rd Street, as it now develops that the Douglas County Court, by arrangement with the Fir Manufacturing Company, permits illegal loads on this street. It was his thought that highway funds should not be spent on this street but that a section of Oak Street between First and Third Streets be substituted. He recommended that both projects be approved as presented. The Commission unanimously approved the recommendation.

The Commission considered cancelling permits as follows, previously issued to the War Assets Administration covering use of state property at Pendleton Airbase:

1. Telephone cable crossing of certain highways in Umatilla County,
2. Four-inch pipe line installation upon and across highway right of way in Umatilla County,
3. Lease of certain state-owned property at Pendleton Airbase, Umatilla County.

The Engineer advised that these leases were granted the U. S. Government during the war, and that there is no longer any need for them, hence the War Assets Administration has requested that it be released from further obligation. He recommended that the releases be approved. The Commission approved the Engineer's recommendation and thereupon signed the releases.

The Chief Counsel presented a request from J. J. Hollender, Portland, for use of state-owned property to provide access to McLaughlin Boulevard (US99E) near Oak Grove. He stated that Mr. Hollender plans to build on property abutting King Street, which is unopened, and is asking for access to the state highway across a triangular strip of land owned by the state. The Commission deferred action pending investigation and report by the Engineer, to whom the matter was referred.

The Engineer requested authority to lease a small building from the Union Pacific Railroad Company at the west approach to the Steel Bridge in Portland for use by state engineering forces who are engaged in work in that vicinity. He advised that the rent will be $10.00 per month. The Commission unanimously approved the request.

The Chief Counsel reported receipt of a letter from A. C. Burnworth, dba G. I. Junkers Company, requesting that the contract they entered into on April 3, 1948, for removal of metal pipe in John Yeon State Park be cancelled and their deposit returned. Action on this matter was deferred by the Commission pending a complete report on the facts involved.

Commissioner Chandler presented a request from Mr. Forrest, County Assessor of Coos County, to remove sand from the ocean beach a short distance north of the Cape Arago Lighthouse. It appears that if permission is granted Mr. Forrest will enter into an agreement with the Coos Bay Dredging Company on a royalty basis and will pay the state on the same basis. Due to the fact that this is a controversial subject, the Commission decided not to grant the permit, at least not for the time being.

The Commission again discussed the offer of the Weyerhaeuser Timber Company to purchase for $1,000 the old ferry landing adjacent to the Simpson Park in North Bend consisting of 2.2 acres of land, and decided unanimously to accept the offer subject to the condition that the land be used perpetually as an industrial site and that the deed of conveyance contain provision to that effect.

The matter of sale of property in Eugene, near the intersection of East Broadway and Alder Streets, to R. L. Kruse and T. I. Chapman of that city was considered by the Commission. The Commission approved the sale of

the property for the sum of $1,800, with access rights to the highway from the property at two points as recommended by the Engineer and Chief Counsel.

The Right of Way Engineer reported a proposed settlement of the controversy with Mrs. Louise Snyder Bisaillon concerning use of the highway right of way when serving the public at her service station in Oswego. He recommended sale of 117 square feet on which the service station pump islands are located and the granting of an easement or permit to use state highway right of way in front of the pumps for the servicing of cars, with the restriction that in the event the service station is destroyed or removed, then the 117 square feet shall revert to the state. The Acting State Highway Engineer concurred therein. The Commission unanimously approved the recommendation.

The Commission considered the appointment of a Public Relations Consultant to advise the public of the work of the Commission. After some discussion the Commission unanimously confirmed the appointment of Ralph Watson in this capacity, and instructed the Chief Counsel to prepare an appropriate form of agreement with Mr. Watson covering the matter.

The Chief Counsel advised that he had been requested to present a paper at the meeting of the National Association of County Officials in Oakland, California, on July 19, 1949. The Commission unanimously authorized him to attend such meeting at state expense.

The Commission considered and signed agreements and other papers as follows:

War Assets application forms covering surplus property bordering Rogue River and Butte Creek within Camp White area

Agreement with Royal Wilde covering construction and maintenance of a stock fence across Catherine Creek State Park, Union County.

Certificate of Acceptance from U. S. Dept. of the Interior covering additional area in the Silver Falls Recreational Area.

Agreement with State of Idaho covering reconstruction of the Payette and Weiser Bridges over Snake River.

Agreement with Curry County covering abandonment of portions of the Port Orford-Rocky Creek Section of the Oregon Coast Highway.

Agreement with City of Port Orford covering improvement of the Oregon Coast Highway through Port Orford.

Agreement with City of Athena covering installation of a flashing beacon at state highway intersection in this town.

Agreement with City of Newberg covering redesignation, relocation, and improvement of Hillsboro-Silverton Secondary Highway.

Lease with State Land Board covering tract of land in Deschutes County from which to secure road building materials.

Extension rider to agreement with U.P. RR. Co. covering construction, maintenance, and use of roadway on railroad property on Columbia River Highway at Oneonta. (Original agreement entered into August 18, 1939, extended to August 17, 1949. Present extension covers period to August 18, 1952)

Form of release cancelling permit given War Assets Administration in connection with its telephone cable crossing of certain highways adjacent to Pendleton Airbase, Umatilla County.

Form of release cancelling permit given War Assets Administration in connection with its installation of a pipeline across highway right of way adjacent to Pendleton Airbase, Umatilla County.

Form of release cancelling lease given War Assets Administration in connection with its use of certain highway property adjacent to the Pendleton Airbase, Umatilla County. (Originally leased on January 5, 1943. Property to be returned to state at time airport property conveyed to City of Pendleton)

Form of resolution for Wallowa County to file application for a loan of State Highway Funds to assist in financing repairs to county roads.

Agreement with City of Klamath Falls covering signal installation at Main and Esplanade Streets in Klamath Falls.

Agreement with City of Freewater for improvement of certain streets in City of Freewater.

Agreement with Abston and Johnston covering logging road maintenance across Humbug Mountain State Park.

There being no further business to come before the Commission at this time the meeting adjourned at 5:00 p.m.

EXHIBITS "A" THROUGH "P"

Minutes of June 27 and 28, 1949

EXHIBIT "A"

Minutes of June 27 and 28, 1949

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Minutes of June 27 and 28, 1949

RESOLUTION

WHEREAS, by virtue by the laws of the State of Oregon as set forth and defined in the Oregon Code and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Columbia River, Pacific Highway West, Oregon Coast, and Klamath Falls-Lakeview highways are highways under the jurisdiction and control of the State and are in addition, a part of the federal highway system; and

WHEREAS, for the purpose of providing highways with better alignments and which will more adequately serve the traveling public, the Highway Commission relocated the sections of the said highways as hereinafter set forth, and for such purpose and in connection therewith the real properties hereinafter described are necessary; and

WHEREAS, said Commission is authorized to take fee title to said property for right of way and other highway purposes, and in addition, the Commission is authorized to take all rights of access from property abutting a highway; and

WHEREAS, Columbia River, Pacific Highway West, Oregon Coast, and Klamath Falls-Lakeview highways are major highways of the State, and as such carry large volumes of traffic, both intrastate and interstate, and it is, therefore, the judgment of the Commission that access to and from said highways should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that the properties described on the attached sheets are needed and required for use in connection with the construction and maintenance of the section of highway set forth on said sheets; that the specific use for which each particular parcel of real property is needed and required is as expressly stated thereon; that the name of the record owner, or reputed owner thereof, is likewise set forth, together with the Commission's record file number of each parcel. (*)

2. That the highway facility for which each of said parcels of property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and least private injury or damage.

(Cont.)

EXHIBIT "B" (Cont.)

3. That in addition to the acquisition of the respective parcels, it is necessary that there be acquired all rights of access from abutting properties to the highways to be constructed in part upon the parcels described upon the attached sheets, except such access reservations as are noted as to each parcel. In this connection, a private access is defined as a right of access from and to land abutting the highway of a width of twenty-five feet; said access to be for ordinary travel only, and shall not be used in connection with any commercial institution or activity which in any manner caters to, invites, solicits from, or is dependent upon the users of said highway. A farm crossing is defined as a right to establish, maintain, and use a crossing of the highway for farm purposes only having a width of not to exceed twenty-five feet; provided, however, that upon the alienation of either of the portions of the property severed by the highway, such right of crossing shall cease. A commercial access is defined as a right of access from and to land abutting the highway of a width of twenty-five feet, said access to be for all lawful purposes. (*)

4. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said parcels of land as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said parcels.

5. That upon the trial of any suit or action instituted to acquire either of said parcels of real property, or any interest therein, the Chief Counsel, or, in his absence the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

6. That the real properties sought to be acquired are described on the attached sheets, consisting of eight pages, on which sheets are set forth the right of way file number assigned by the Commission, the respective record or reputed owners, the section of highway for which the property is necessary, and the use and purpose for which the property is sought, together with such access reservations as apply to the particular property. (*)

7. That this resolution be entered in full in the minutes and records of the Commission as of the 27th day of June, 1949.

FOOTNOTE: (*)

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 130, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "C"

Minutes of June 27 and 28, 1949

RESOLUTION

WHEREAS, the Klamath Falls-Lakeview Highway, extending from a junction with The Dalles-California Highway in Klamath Falls, easterly via Dairy, Beatty, and Bly to a junction with the Fremont Highway in Lakeview, is a state highway, and as such is under the jurisdiction and control of the State Highway Commission, and said highway is identified in the Highway Commission's records as Highway No. 20; and

WHEREAS, the promiscuous parking of cars along and on the said highway in the vicinity of the east city limits of Klamath Falls creates a traffic hazard which, in the opinion of the Highway Commission, should be restrained; and

WHEREAS, the parking of vehicles upon said highway near the intersection of said highway and Gettle Street, which said intersection is frequently on the route of fire-fighting vehicles departing from and returning to a suburban fire station located at the corner of Gettle Street and Crosby Street, obstructs the view of such fire-fighting vehicles entering from Gettle Street by motorists upon the said highway; and

WHEREAS, the Commission, based upon the report of its Traffic Engineer, is of the opinion that for the safety of traffic, parallel parking only should be permitted upon said highway between the eastern city limits of Klamath Falls and Kane Street, and that parking of vehicles should be prohibited on the southerly side of said highway for a distance of thirty feet on each side of the intersection of Gettle Street;

NOW, THEREFORE, all members of the Commission being present and voting affirmatively, the Commission does hereby order:

1. That based upon the facts and recommendations placed before this Commission, the Commission does hereby find and declare that the promiscuous parking of motor vehicles on both sides of said highway between State Highway Engineer's Station 17+20 and State Highway Engineer's Station 108+24, and that any parking of vehicles on the south side of said highway between Engineer's Station 87+40 and Engineer's Station 88+80, creates a hazard to traffic on said highway, which hazard in the opinion of the Commission should be removed.

2. That for the purpose of protecting the general public, and especially the motoring public using said highway in said vicinity, it is hereby ordered that parallel parking only shall be permitted on both sides of said highway between State Highway Engineer's Station 17+20 and State Highway Engineer's Station 108+24, except that all parking of vehicles shall be prohibited on the south side of said highway between State Highway Engineer's Station 87+40 and State Highway Engineer's Station 88+80.

(Cont.)

EXHIBIT "C" (Cont.)

3. Attached hereto, marked "Exhibit A," and by this reference made a part hereof, is a print showing colored in yellow that portion of the said highway upon which parallel parking only shall be permitted, and also showing colored in red the portion of said highway upon which all parking shall be prohibited. (*)

4. That the State Highway Engineer hereby is directed to erect and thereafter maintain on and along said highway suitable and adequate signs to provide the motoring public reasonable information and direction.

5. A copy of this resolution shall be delivered to the Superintendent of State Police.

6. This resolution shall be entered in the minutes and records of the Highway Commission as of the twenty-eighth day of June, 1949.

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 35, under the heading "Resolutions Designating 'No Parking Areas'," and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "D"

Minutes of June 27 and 28, 1949

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Pacific Highway
Highway number: I Route number: 99

Location of Termini	Established Speed
M.P. 196.60 (Newton Creek Road) to M.P. 197.68 (0.09 mi. s. of Alameda St., Roseburg)	35 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

EXHIBIT "E"

Minutes of June 27 and 28, 1949

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, as amended, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1948 for street purposes as provided in said law, the several sums of amounts set opposite the names of the respective cities or towns:

Bonanza	$ 996.33
Prairie City	2,997.54

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by apropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 28th day of June, 1949.

EXHIBIT "F"

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 28th day of June, 1949.

EXHIBIT "G"

Minutes of June 27 and 28, 1949

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Odell Secondary Highway known as the Hood River Junction-Odell Creek Section in Hood River County, the northerly terminus of which is at Highway Engineer's Station 1+95 of the reconstructed line and the southerly terminus of which is at Highway Engineer's Station 102+44 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway a portion or unit of the right of way of the highway, as formerly located, has been eliminated from the boundaries of the new location, which eliminated section or area is no longer needed as a part of said secondary highway, but is needed and must be retained for county road uses; and

WHEREAS, Hood River County and the Highway Commission have heretofore entered into an agreement under date of June 9th, 1948, relating to the use and jurisdiction of the abandoned section; and

WHEREAS, the contract for the construction of said relocated section of the Odell Secondary Highway was completed on May 20th, 1949, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation, which proposed action is within the meaning and purpose of said State-County agreement.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the section of the old right of way of the Odell Secondary Highway, which, by reason of the relocation of the said highway, is no longer within the boundaries of the new right of way, and which section lies between Highway Engineer's Station 70+05.4 and Highway Engineer's Station 82+00, and is shown colored in red on map filed in the office of the State Highway Commission and marked "Exhibit A" and by this reference made a part of this resolution, is hereby abandoned as any part of the right of way of said secondary highway, but all of said abandoned section of the right of way of said highway is to remain and be maintained as a public highway under the jurisdiction of the County Court of Hood River County. The Commission hereby surrenders all jurisdiction over said section of said secondary highway, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Hood River County, and said road shall hereafter be maintained by the County as a county road. (*)

(Cont.)

EXHIBIT "G" (Cont.)

2. The area shown colored in green on said "Exhibit A" includes new right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. (*)

3. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Hood River County a duly certified copy thereof, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned section of the said old right of way shown colored in red on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes. (*)

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 185 under the heading "Abandonment and Retention Resolutions", and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "H"

Minutes of June 27 and 28, 1949

R E S O L U T I O N

WHEREAS, the roads or highways hereinafter named have been designated and declared to be and are State Highways and have been improved and are being maintained by the State Highway Commission, pursuant to the laws of the State of Oregon as state highways;

AND WHEREAS, on each of the said state highways there are located certain bridge structures which, in the judgment of the State Highway Commission, are incapable of safely carrying the traffic to which they are being subjected, and in order to protect said bridge structures against damage and injury and in order to safeguard traffic over said bridge structures it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said bridge structures and each of them and of the traffic which uses the said bridge structures that the maximum weights now permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has, after due investigation, determined and found and it is the judgment of the Commission that the maximum gross loads which shall be permitted upon any single span of any of the said structures at any time shall be reduced and fixed as in this order provided.

NOW, THEREFORE, the premises being in part as above stated and the State Highway Commission having as a result of due investigation found that the bridge structures above referred to and hereinafter designated are incapable of safely sustaining or supporting a total gross load in excess of that specified in the table given hereinbelow;

IT IS HEREBY ORDERED that the total gross weight of combined load and vehicle, or the maximum gross weight of any combination of vehicles and load which at any one time shall be permitted upon any single or individual span of the bridge structures hereinbelow designated shall not exceed the limits given and set forth hereinbelow. In computing the total weight of any single vehicle, the total gross weight of any trailer or trailers attached to said vehicle shall be considered as a component part of the total gross load and shall not be considered as a separate vehicle. This combined gross weight shall not exceed the limits given hereinbelow, to wit:

McKENZIE HIGHWAY NO. 15

15-99.18 Bridge No. 945 crossing Deep Canyon	27 tons (54,000 lbs.)
15-107.16 Bridge No. 3373 over Deschutes River	27 tons (54,000 lbs.)

McKENZIE-BEND HIGHWAY NO. 17

17-16.06 Bridge No. 3378 crossing Deschutes River	27 tons (54,000 lbs.)

(Cont.)

EXHIBIT "H" (Cont.)

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 115-394 O.C.L.A. shall be in full force and effect from the 28th day of June, 1949, until rescinded, modified or revoked by order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that R. H. Baldock, as Chief Highway Engineer, be and he hereby is instructed to post a notice in a conspicuous place and manner at each end of the above-named bridge structures, so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the County Court of each county in which any of said highways are located, and that a certified copy of said order be furnished the Superintendent of the Department of State Police for his information.

Dated this 28th day of June, 1949.

11300

EXHIBIT "I"

Minutes of June 27 and 28, 1949

R E S O L U T I O N

WHEREAS, on February 28, 1949, at a meeting of the State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on certain state highways, including the following highway, to-wit:

WESTON-ELGIN SECONDARY HIGHWAY NO. 330, entire length, from Weston to Elgin, in Umatilla and Union Counties; effective February 25, 1949;

and

WHEREAS, on April 11, 1949, at a meeting of the State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on certain state highways, including the following highway, to-wit:

MEDICAL SPRINGS SECONDARY HIGHWAY NO. 340, from M.P. 0.0 to M.P. 21.6, in Union County; effective March 7, 1949;

and

WHEREAS, subsequent to the passage of each of said resolutions, conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolutions on the said above-named highways;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on each of the following sections of state highways be and the same hereby is rescinded and cancelled as of the date hereinafter set forth, and the maximum load limit permissible on each of the said sections of highways shall hereafter be the maximum load limit provided by law:

	Load limit lifted
WESTON-ELGIN SECONDARY HIGHWAY NO. 330, entire length, from Weston to Elgin, in Umatilla and Union Counties . .	June 6, 1949
MEDICAL SPRINGS SECONDARY HIGHWAY NO. 340, from M.P. 0.0 to M.P. 21.6, in Union County	May 23, 1949

IT IS FURTHER ORDERED that a certified copy of this resolution be furnished to the county clerk of each county in which any of said above-named highways are located, and a like copy to the Superintendent of the Department of State Police for his information.

Dated this 28th day of June, 1949

EXHIBIT "J"

Minutes of June 27 and 28, 1949

RESOLUTION

WHEREAS, the Commission, on the twenty-fifth day of August, 1947, adopted a resolution by which the Commission declared the necessity for the acquisition of certain parcels of real property, which properties were owned by Roy Philippi and Myrtle Philippi; and

WHEREAS, because of a failure on the part of the State and the property owners to reach an agreement with respect to the consideration to be paid for said properties, condemnation proceedings were instituted pursuant to instructions from the Commission; and

WHEREAS, after said condemnation action had been instituted it was found necessary, and because of such necessity, the descriptions of parcels Nos. 1 and 2 were changed, and by reason of said changes, additional property was taken; and

WHEREAS, after the commencement of said condemnation action, and as a result of repeated conferences between the Commission's Counsel and attorneys for the defendants, an agreement was reached and a consideration fixed, which consideration Counsel has recommended be paid by the State;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, as follows:

1. That the descriptions of parcels Nos. 1 and 2, as revised, and by which additional land is taken from the defendants, be and the said descriptions hereby are approved.

2. That the consideration which the defendants are willing to accept and which the Commission's Counsel recommends be accepted, namely: the sum of Two Thousand Five Hundred and No/100 ($2,500.00) Dollars, be and the same hereby is approved, and payment is hereby authorized.

3. That this resolution be entered in the minutes and records of the Commission as of the twenty-seventh day of June, 1949.

EXHIBIT "K"

Minutes of June 27 and 28, 1949

R E S O L U T I O N

WHEREAS, the Highway Commission on July 30, 1945, submitted to the Public Roads Administration a proposed Federal Aid Secondary System in the State of Oregon which included portions of the Adrian-Arena Valley and Adrian-Caldwell State Secondary Highways; and

WHEREAS, the Public Roads Administration on January 29, 1946, deferred approval of said portions of the Adrian-Arena Valley and Adrian-Caldwell State Secondary Highways as part of the Federal Aid Secondary System pending designation of a Federal Aid Secondary System in the State of Idaho; and

WHEREAS, Idaho Federal Aid Secondary Route 174 has since been approved by the Public Roads Administration; and

WHEREAS, it is now the desire of the Public Roads Administration that a suitable connection with the Idaho route be designated in the State of Oregon;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THE OREGON STATE HIGHWAY COMMISSION, all members being present and affirmatively voting as follows:

1. That the portion of the Adrian-Arena Valley State Secondary Highway No. 453 and the portions of the Adrian-Caldwell State Secondary Highway No. 454 generally described as follows; to wit:

PORTION OF THE ADRIAN-ARENA VALLEY STATE SECONDARY HIGHWAY NO. 453

From a junction with State Secondary Highway No. 454 in Section 23, T.21 S., R. 46 E., W.M., easterly and southerly to a junction with State Secondary Highway No. 454 on the section line that is common to Sections 25 and 36, T. 21 S., R. 46 E., W.M., the total length of which is 2.26 miles,

(Cont.)

EXHIBIT "K" (Cont.)

PORTIONS OF THE ADRIAN-CALDWELL STATE SECONDARY HIGHWAY NO. 454

From a junction with F. A. S. Highway No. 520 in Section 23, T. 21 S., R. 46 E., W.M., southerly to a junction with State Secondary Highway No. 453 in Section 23, T. 21 S., R. 46 E., W.M.; and from a junction with State Secondary Highway No. 453 on the section line that is common to Sections 25 and 36, T. 21 S., R. 46 E., W.M., southerly and easterly to the Idaho State Line, the total length of which is 2.16 miles,

be and hereby are designated as Federal Aid Secondary Highway No. 540, and are shown colored in yellow on the accompanying map marked Exhibit "A". (*)

2. That a copy of this resolution be presented to the Public Roads Administration, and that said administration be requested to approve said routes or roads as Federal Aid Highways.

3. That this resolution be entered in the minutes and records of the Commission as of the 28th day of June, 1949.

FOOTNOTE: (*)

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 3 under the heading "Federal Highway Designations, Secondary," and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "L"

Minutes of June 27 and 28, 1949

R E S O L U T I O N

WHEREAS, under the provisions of Title 100 O.C.L.A. and in particular, Subsection 36 of Section 115 of said Title, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Yamhill County Court of the State of Oregon, has heretofore selected and regularly adopted, as provided by law, the Hillsboro-Silverton Secondary State Highway No. 140 in Yamhill County, and

WHEREAS, it is now the intention of the State Highway Commission, by mutual agreement with the Yamhill County Court of the State of Oregon, to eliminate and remove from the system of secondary state highways, under the provisions of Title 100 O.C.L.A., Subsection 36, Section 115, the hereinafter described section of the Hillsboro-Silverton Secondary State Highway No. 140, and

WHEREAS, it is mutually understood and agreed by the State Highway Commission and the County Court of Yamhill County of the State of Oregon, that from and after the adoption of this resolution by the State Highway Commission the hereinafter described section of the Hillsboro-Silverton Secondary Highway No. 140 shall, under the provisions of the laws of Oregon, become a county road or city street, and the construction, repair, maintenance or improvement, and the jurisdiction thereof, shall be exclusively under the County Court of Yamhill County or the City of Newberg, as the county and city authorities may agree;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating as follows:

1. That the following described section of the Hillsboro-Silverton Secondary State Highway No. 140 is hereby eliminated and removed from the Secondary State Highway System, to wit:

(Cont.)

EXHIBIT "L" (Cont.)

A SECTION OF THE HILLSBORO-SILVERTON SECONDARY STATE HIGHWAY NO. 140

Beginning at the intersection of 4th Street and River Street in the City of Newberg, Oregon; thence northerly via River Street to the intersection of 1st Street and River Street, a distance of 0.16 mile.

2. That the said above described section is hereby declared to be eliminated and removed from the secondary system of highways and from and after the adoption of this resolution shall become a county road or city street, and the construction, repair, maintenance or improvement, and the jurisdiction thereof, shall be exclusively under the County Court of Yamhill County or the City of Newberg, as the city and county authorities may agree, and as provided by law.

FOOTNOTE:

A map showing the section of highway mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 208, under the heading "Abandonment and Retention Resolutions," and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

R E S O L U T I O N

WHEREAS, under the provisions of Title 100 O.C.L.A. and in particular, Subsection 36 of Section 115 of said Title, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Yamhill County Court of the State of Oregon, has selected the road, street or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said road, street, or highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described section of city street in the City of Newberg, Yamhill County, Oregon, shall be added to and become a part of the state secondary highway system, to wit:

A Section of the Hillsboro-Silverton Secondary State Highway No. 140:

Beginning at the intersection of 4th Street and River Street in the City of Newberg, Oregon; thence westerly via 4th Street to the intersection of 4th Street and College Street; thence northerly via College Street to the intersection of 1st Street and College Street, a distance of 0.37 mile.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Title 100 O.C.L.A., Subsection 36, Section 115.

Minutes of June 27 and 28, 1949

RESOLUTION

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the following section of a state highway, to-wit:

DIAMOND VALLEY SECONDARY HIGHWAY JUNCTION - FOLLYFARM SECTION of the ROME-PRINCETON SECONDARY HIGHWAY, in Harney and Malheur Counties

and in connection therewith to prepare maps showing the route and location of said section of highway and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps, and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That the survey of the above-mentioned section of state highway, together with the maps, which for identification purposes bears the map file Nos. 6B-34-5, 6B-34-6, 6B-34-7, 6B-34-15, and 6B-34-16; field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed, the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the 28th day of June, 1949.

EXHIBIT "O"

Minutes of June 27 and 28, 1949

R E S O L U T I O N

WHEREAS, Edgewater Street in the City of West Salem is a street heretofore selected and designated by the Highway Commission as a street over which to route state highway traffic using the Salem-Dallas State Highway within the corporate limits of West Salem, and

WHEREAS, it has been demonstrated that the parking of vehicles on the northerly side of said street between the Marion-Polk County Bridge and the easterly line of Clarke Street in said City constitutes and is a hazard to traffic and interferes with the safe and easy flow or movement of vehicles over said street, and

WHEREAS, it appears that the Common Council of the City of Salem on the 23rd day of May, 1949, adopted Resolution No. 5787, by which the parking of vehicles on the northerly side of said Edgewater Street between said termini is prohibited, and

WHEREAS, it is the judgment of the Commission that the State, through its State Highway Commission, should cooperate with the City of Salem in the accomplishment of the purpose of said Resolution No. 5787,

NOW, THEREFORE, be it and it hereby is resolved by this Commission, all members being present and affirmatively voting as follows: that the Commission does hereby ratify and approve Resolution No. 5787 adopted by the Common Council of the City of Salem on the 23rd day of May, 1949, and hereby offers the cooperation of the Highway Commission and the Highway Department to the end that the full benefit of said resolution may be accomplished and the convenience and safety of the travelling public thereby advanced.

That this resolution be entered in the minutes and records of the Commission as of June 28, 1949.

EXHIBIT "P"

Minutes of June 27 and 28, 1949

RESOLUTION

WHEREAS, on July 21, 1947, pursuant to authority granted by Chapter 156, Oregon Laws 1947, the State Highway Commission adopted a resolution permitting the movement, over certain state highways, of vehicles or combinations of vehicles having a length and combined and gross weight in excess of statutory limits; and

WHEREAS, said resolution was approved on August 4, 1947, by the Honorable Earl Snell, then Governor of the State of Oregon; and

WHEREAS, the State Highway Commission has, by subsequent resolutions, added from time to time certain additional highways designated as Group 1 highways over which combinations of vehicles having a length of sixty (60) feet are permitted to move; and

WHEREAS, the Oregon Legislature in 1949 enacted Chapter 450, Oregon Laws 1949, amending Chapter 156, Oregon Laws 1947; and

WHEREAS, under the amended statute it appears necessary and desirable to reissue permits issued subsequent to July 21, 1947, under authority of the resolution adopted on that date; and

WHEREAS, it appears desirable to facilitate the movement of overlength, overheight and overweight vehicles or combinations of vehicles by means of three forms of permit; and

WHEREAS, the State Highway Commission is authorized by Sec. 115-385 (b) to issue permits for movement of vehicles having a height in excess of 11 feet but not in excess of 12½ feet; and

WHEREAS, based upon the advice and recommendation of the State Highway Engineer, it is the judgment and opinion of the Commission that permits be issued upon application therefor, which permits shall authorize the movement over highways enumerated therein vehicles or combinations of vehicles having a length, height and combined gross weight in excess of statutory limits but not in excess of the limits stated in the form of permit.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED AND ORDERED by this Commission, a majority of the members being present and voting affirmatively:

1. That subject to such action as the Commission may hereafter deem to be in the public interest, the issuance of permits hereby is authorized on the following forms of permit, which forms are attached hereto, by this reference made a part hereof and are hereby approved:

Exhibit A - Transportation Permit for Group No. 1 Highways - Permit Form 242 Rev.

EXHIBIT "P" (Cont.)

This permit authorizes the movement over Group 1 highways enumerated therein of vehicles or combinations of vehicles and loads having a length not in excess of sixty (60) feet, a combined gross weight not in excess of the maximum weight permitted by Chapter 450, Oregon Laws 1949, and a maximum height not in excess of 12 feet 6 inches.

Exhibit B - Transportation Permit for Group No. 2 Highways - Permit Form 242 Rev.

This permit authorizes the movement over Group 2 highways enumerated therein, and also, over Group 1 highways, of vehicles or combinations of vehicles and loads having a length not in excess of fifty (50) feet, a combined gross weight not in excess of the maximum weight permitted by Chapter 450, Oregon Laws 1949, giving due allowance to the maximum axle spacing that may be obtained within the fifty-foot length limitation, and a maximum height not in excess of 12 feet 6 inches over Group 1 highways, and not in excess of 12 feet over Group 2 highways.

Exhibit C - Temporary Group 1 or Group 2 Transportation Permit - Form E-271 Rev.

This permit authorizes the movement over such highways as may be specified therein of vehicles or combinations of vehicles having a length and of a description as specified therein but in no event to exceed sixty (60) feet overall length, twelve feet six inches (12'6") in height and a combined gross weight not in excess of the maximum weight permitted by Chapter 450, Oregon Laws 1949. The principal use of this permit form shall be to facilitate movement of vehicles operating under temporary authority from the Public Utilities Commissioner and which, by reason thereof, would not be eligible for a Group 1 or Group 2 permit, and, also, to facilitate movement of truck tractor and semitrailer combinations having a length in excess of fifty (50) feet but not in excess of sixty (60) feet, which combinations are not authorized to operate under Group 1 or Group 2 permits, over certain Group 1 highways heretofore or hereafter designated by the State Highway Engineer, which highways, by means of trial runs, have been found capable of safely accommodating such combinations.

2. That permits on said forms marked "Exhibit A" or "Exhibit B" may be issued for and in the name of the State Highway Commission by the State Highway Engineer, within the meaning, purpose and scope of this resolution, and said permits when so issued either shall be signed by the State Highway Engineer or shall bear a rubber-stamped facsimile of the signature of the State Highway Engineer, and be countersigned by either the Director of Permits or the Supervisor of Transportation Permits, and when so signed, said permit shall be valid and in full force and effect until revoked by the State Highway Commission.

3. That permits on said form marked "Exhibit C" may be issued for and in the name of the State Highway Commission by the State Highway Engineer, within the meaning, purpose and scope of this resolution, and said permits when so issued shall bear the printed signature of the State Highway Engineer, and shall

be countersigned either by the State Highway Engineer or the Director of Permits or the Supervisor of Transportation Permits, or his assistants. or, when issued from a field office only upon prior approval of the Director of Permits or the Supervisor of Transportation Permits, said permits shall be countersigned by any one of the following designated persons: Division Engineer. Acting Division Engineer, Assistant Division Engineer, Division Office Engineer, District Maintenance Superintendent, or District Maintenance Officeman; and when so signed, said permits shall be valid and in full force and effect until their expiration or earlier revocation by the State Highway Commission. All said permits shall bear an expiration date, and in no event shall said permits be valid for more than a period of one (1) year.

4. That hereafter, when the State Highway Engineer, upon careful and proper investigation, finds that any of the highways or sections of said highways classified in Exhibit B as Group 2 highways are of such character and design to accommodate the movement of combinations of vehicles in excess of fifty (50) feet in length, then said engineer is hereby authorized and directed to reclassify said highway or section of highway and transform the same to Group 1 highways, and report such action to the Commission for appropriate record in the Commission Minutes.

5. That the Commission hereby reserves the right to change or modify the action hereby taken, but any change or modification shall be evidenced by a formal resolution or order entered in the minutes and records of the Commission.

6. That before any permits are issued pursuant to this resolution the resolution shall be submitted to His Excellency, Douglas McKay, for his approval.

7. That this resolution, when executed by the State Highway Commission and the Governor. be entered in the minutes and records of the Commission as of the 28th day of June, 1949, that the original of this resolution be filed in the office of the Secretary of the State Highway Commission, and that a copy of this resolution be furnished to each the Superintendent of State Police and the Public Utilities Commissioner.

Dated this 2nd day of August, 1949.

STATE OF OREGON, by and through its
State Highway Commission

By /s/ T. H. Banfield Chairman

By /s/ Ben R. Chandler Commissioner

By /s/ Chas. H. Reynolds Commissioner

Attest: /s/ H. B. Glaisyer
Secretary

Within the meaning of Chapter 450, Oregon Laws 1949, and for the purpose of making it possible for the State Highway Commission to issue permits as authorized by said act and to extend permits already issued, I hereby give my approval to the action of the Commission as expressed by the foregoing resolution.

Dated this 8th day of August, 1949.

er designated, and over such other highways as may from time to time be added, the truck or truck-tractor described below, or on the attached sheet,
nation as described in paragraph 1:

F TRUCK OR TRACTOR	MOTOR NUMBER	PUC PLATE NUMBER	LICENSE NUMBER	FIRM NUMBER

his permit is issued under authority of Chapter 450, Oregon Laws 1949, and within the meaning and purpose of the resolution adopted by the State
Commission on June 28, 1949.

. This permit covers the operation of a truck and full trailer combination or combinations commonly known as "double headers", consisting of a
ctor, semi-trailer and full trailer, or a truck-tractor, double semi-trailer and converter dolly. The overall length of any combination of such vehicles
under this permit shall not exceed 60 feet.

. The gross weight of any single axle of a vehicle operated under this permit shall not exceed 18,000 pounds, nor shall the gross weight of any dual
vehicle exceed 32,000 pounds. The gross weight on any group of axles of any vehicle or combination of vehicles operated under this permit shall
ed the gross weight set forth in the table of weights on page 3 of this permit.

. The maximum height of any vehicle and load thereon operated under this permit shall not exceed 12' 6", except that such maximum height shall
ed 10' 6" at the Great Northern Railway undercrossing on the Central Oregon Highway in Bend.

. Except as otherwise expressly provided herein, the size, weight and dimensions of all vehicles will be subject to the provisions of existing

. All equipment operated under authority of this permit shall be properly licensed, shall carry proper Oregon P. U. C. plates, and shall conform
spects with all Oregon Motor Vehicle Laws.

. Notwithstanding anything in this permit to the contrary, the permitee shall be subject to all regulatory powers vested in the Interstate Commerce
sion, and shall be subject also to the regulatory powers vested in the Public Utilities Commissioner, but any such regulatory power, or any order
Federal or State office, Board, or Commission, having regulatory power over transportation, shall not be construed as permitting the operation of
exceeding in any respect the provisions of this permit in regard to weight or dimensions.

. Any vehicle operated pursuant to this permit shall at all times keep to the extreme right hand side of the traveled roadway. At no time shall
h vehicle or any portion of the load carried thereon extend over, beyond or to the left of the painted center stripe except when overtaking or
other vehicles or obstruction on the highway. The driver of any vehicle listed in this permit shall, at all times, maintain a clearance of 500 feet
his vehicle and another truck or bus except when overtaking or passing such other truck or bus. The driver of any vehicle listed in this permit
t all times, operate his vehicle at a reasonable speed, giving due consideration to existing conditions, provided that at no time shall the vehicle be
d on curves at a speed in excess of 35 miles per hour.

. Furnished in connection with this permit is an identification certificate for each truck or truck-tractor that is to be operated hereunder. This
ate must be carried at all times in the cab of the truck for which it has been prepared, and shall be available for inspection by the State Police and
ntatives of the State Highway Commission or the Public Utilities Commissioner.

. **This permit may be revoked at any time by the State Highway Commission for violation of any of the conditions herein or if the commission deems
vocation necessary in order to preserve highway facilities or to protect the public welfare. This permit shall remain in effect until revoked by the
Highway Commission.**

0. If the gross weight on any single axle does not exceed 18,000 pounds, or the gross weight on any dual axle does not exceed 32,000 pounds, there given a tolerance of five per cent over and above the following table of permissible weights, providing that in no event shall the gross weight of nation of vehicles (unless engaged in hauling bulk petroleum products) exceed 72,000 pounds.

1. If the vehicle or combination of vehicles is engaged in the transportation of petroleum products in bulk and the axle weights are within the m axle weights set forth above, there shall be given a tolerance of five per cent over and above the following table of permissible weights, pro- hat in no event shall the gross weight of such a combination of vehicles exceed 75,600 pounds.

2. If the axle weights are within the maximum axle weights set forth above, the gross weight on any group of axles of a vehicle or combination les shall be limited to the weights shown in the following table of weights plus any tolerance authorized above. Otherwise the gross weight on any f axles shall be limited to the weights shown in the following table and no tolerance is allowed.

TABLE OF PERMISSIBLE WEIGHTS

Wheelbase of Any Group of Axles of a Vehicle or Combination of Vehicles (feet)	Maximum Gross Weight of Group (pounds)	Wheelbase of Any Group of Axles of a Vehicle or Combination of Vehicles (feet)	Maximum Gross Weight of Group (pounds)
4	32,000	31	53,490
5	32,000	32	54,330
6	32,000	33	55,160
7	32,000	34	55,980
8	32,610	35	56,800
9	33,580	36	57,610
10	34,550	37	58,420
11	35,510	38	59,220
12	36.470	39	60,100
13	37,420	40	60,800
14	38,360	41	61,580
15	39,300	42	62,360
16	40,230	43	63,130
17	41,160	44	63,890
18	42,080	45	64,650
19	42,990	46	65,400
20	43,900	47	66,150
21	44,800	48	66,890
22	45,700	49	67,620
23	46,590	50	68,350
24	47,470	51	69,070
25	48,350	52	69,790
26	49,220	53	70,500
27	50,090	54	71,200
28	50,950	55	71,900
29	51,800	56	72,000
30	52,650	57	72,000

The maximum gross weights in the above table are for axle spacings to the nearest foot. If the axle spacing as actually measured is a fractional foot the gross weight allowed is that given in the table for the next higher spacing.

Example: For an axle spacing of 31′ 3″ (actual measurement) the allowable gross weight is that shown in the table opposite the axle spacing of 32′.

This permit is issued under authority of Chapter 450, Oregon Laws 1949, and within the meaning and purpose of the resolution adopted by the Highway Commission on the 28th day of June, 1949.

1. The overall length of any combination of vehicles operated under this permit shall not exceed 50 feet.

2. The gross weight of any single axle of a vehicle operated under this permit shall not exceed 18,000 pounds, nor shall the gross weight of any xle of a vehicle exceed 32,000 pounds. The gross weight on any group of axles of any vehicle or combination of vehicles operated under this shall not exceed the gross weight set forth in the table of weights on page 4 of this permit.

3. The maximum height of any vehicle and load thereon operated under this permit shall not exceed 12′ 0″ except that such maximum height shall ceed 11′ 6″ on the Calapooia River bridge at mile post 13.01 on the Halsey-Sweet Home Highway. If the movement is entirely over Group I ys, listed on the reverse side hereof, the maximum height of vehicle and load may equal but shall not exceed 12′ 6″, providing that the maximum shall not exceed 10′ 6″ at the Great Northern Railway undercrossing on the Central Oregon Highway in Bend.

4. Except as otherwise expressly provided herein, the size, weight and dimensions of all vehicles will be subject to the provisions of existing a.

5. All equipment operating under authority of this permit shall be properly licensed, shall carry proper Oregon P. U. C. plates, and shall conform respects with all Oregon Motor Vehicle Laws.

6. Notwithstanding anything in this permit to the contrary, the permittee shall be subject to all regulatory powers vested in the Interstate Commerce Commission, and shall be subject also to the regulatory powers vested in the Public Utilities Commissioner, but any such regulatory power, or any of any Federal or State office, Board, or Commission, having regulatory power over transportation, shall not be construed as permitting the operation f vehicles exceeding in any respect the provisions of this permit in regard to weight or dimensions.

7. Any vehicle operated pursuant to this permit shall at all times keep to the extreme right hand side of the traveled roadway. At no time shall ach vehicle or any portion of the load carried thereon extend over, beyond or to the left of the painted center stripe except when overtaking or g other vehicles or obstruction on the highway. The driver of any vehicle listed in this permit shall, at all times, maintain a clearance of 500 feet en his vehicle and another truck or bus except when overtaking or passing such other truck or bus. The driver of any vehicle listed in this permit at all times, operate his vehicle at a reasonable speed, giving due consideration to existing conditions, provided that at no time shall the vehicle be ed on curves at a speed in excess of 35 miles per hour.

8. Furnished in connection with this permit is an identification certificate for each truck or truck-tractor that is to be operated hereunder. This cate must be carried at all times in the cab of he truck or truck-tractor, as the case may be, for which it has been prepared, and shall be available for tion by the State Police and representatives of the State Highway Commission or the Public Utilities Commissioner.

9. **This permit may be revoked at any time by the State Highway Commission for violation of any of the conditions herein or if the commission deems evocation necessary in order to preserve highway facilities or to protect the public welfare. This permit shall remain in effect until revoked by the State ay Commission.**

10. If the gross weight on any single axle does not exceed 18,000 pounds, or the gross weight on any dual axle does not exceed 32,000 pounds, there be given a tolerance of five per cent over and above the following table of permissible weights. Otherwise the gross weight on any group of axles be limited to the weights shown in the following table and no tolerance is allowed.

TABLE OF PERMISSIBLE WEIGHTS

Wheelbase of Any Group of Axles of a Vehicle or Combination of Vehicles (feet)	Maximum Gross Weight of Group (pounds)	Wheelbase of Any Group of Axles of a Vehicle or Combination of Vehicles (feet)	Maximum Gross Weight of Group (pounds)
4	32,000	28	50,950
5	32,000	29	51,800
6	32,000	30	52,650
7	32,000	31	53,490
8	32,610	32	54,330
9	33,580	33	55,160
10	34,550	34	55,980
11	35,510	35	56,800
12	36,470	36	57,610
13	37,420	37	58,420
14	38,360	38	59,220
15	39,300	39	60,100
16	40,230	40	60,800
17	41,160	41	61,580
18	42,080	42	62,360
19	42,990	43	63,130
20	43,900	44	63,890
21	44,800	45	64,650
22	45,700	46	65,400
23	46,590	47	66,150
24	47,470		
25	48,350		
26	49,220		
27	50,090		

Because the maximum overall length on Group II Highways is limited to 50 feet, the table of weights for axle spacings greater than 47 feet does not apply.

The maximum gross weights in the above table are for axle spacings to the nearest foot. If the axle spacing as actually measured is a fractional foot, the gross weight allowed is that given in the table for the next higher spacing.

Example: For an axle spacing of 31′ 3″ (actual measurement) the allowable gross weight is that shown in the table opposite the axle spacing of 32′.

	☐
	☐

Subject to all the conditions, terms and agreements printed, typed or written below, and on the reverse hereof, and not otherwise, the above mentioned permittee is hereby authorized to

DESCRIPTION OF HAULING EQUIPMENT

E OF TRUCK OR TRACTOR	MOTOR No.	PUC PASS. or PLATE No.	LICENSE No.	FIRM No.

This permit is issued under authority of Chapter 450, Oregon Laws 1949.

1. The overall length of the combination of vehicles operated under this permit shall not exceed ..... feet ..... inches, provided, however, no single vehicle shall exceed an overall length of 35 feet.

2. The gross weight of any single axle of a vehicle operated under this permit shall not exceed 18,000 pounds, nor shall the gross weight of any axle of a vehicle exceed 32,000 pounds. The gross weight on any group of axles of any vehicle or combination of vehicles operated under this permit not exceed the gross weight set forth in the table of weights on the reverse side of this permit.

3. The maximum height of any vehicle and load thereon operated under this permit shall not exceed ..... feet ..... inches.

4. Except as otherwise expressly provided herein, the size, weight and dimensions of all vehicles will be subject to the provisions of existing ites.

5. All equipment operating under authority of this permit shall be properly licensed, shall carry proper Oregon P. U. C. plates, and shall conform ll respects with all Oregon Motor Vehicle Laws.

6. Notwithstanding anything in this permit to the contrary, the permittee shall be subject to all regulatory powers vested in the Interstate Com- ce Commission, and shall be subject also to the regulatory powers vested in the Public Utilities Commissioner, but any such regulatory power, or any r of any Federal or State office, Board, or Commission, having regulatory power over transportation, shall not be construed as permitting the operation ehicles exceeding in any respect the provisions of this permit in regard to weight or dimensions.

7. Any vehicle operated pursuant to this permit shall at all times keep to the extreme right hand side of the traveled roadway. At no time shall any vehicle or any portion of the load carried thereon extend over, beyond or to the left of the painted center stripe except when overtaking or passing r vehicles or obstruction on the highway. The driver of any vehicle listed in this permit shall, at all times, maintain a clearance of 500 feet between his cle and another truck or bus except when overtaking or passing such other truck or bus. The driver of any vehicle listed in this permit shall, at all s, operate his vehicle at a reasonable speed, giving due consideration to existing conditions, provided that at no time shall the vehicle be operated on es at a speed in excess of 35 miles per hour.

8. This permit must be carried at all times in the cab of the truck or truck-tractor, as the case may be, and shall be available for inspection by the e Police and representatives of the State Highway Commission or the Public Utilities Commissioner.

9. **This permit is of a temporary nature only and will expire on ..... providing that any time prior thereto permit may be revoked by the State Highway Commission for violation of any of the conditions herein or if the commission deems such revocation essary in order to preserve highway facilities or to protect the public welfare.**

Title .....

(OVER)

10. If the gross weight on any single axle does not exceed 18,000 pounds, or the gross weight on any dual axle does not exceed 32,000 pounds, there may be given a tolerance of five per cent over and above the following table of permissible weights, providing that in no event shall the gross weight of a combination of vehicles (unless engaged in hauling bulk petroleum products) exceed 72,000 pounds.

11. If the vehicle or combination of vehicles is engaged in the transportation of petroleum products in bulk and the axle weights are within the maximum axle weights set forth above, there shall be given a tolerance of five per cent over and above the following table of permissible weights, providing that in no event shall the gross weight of such a combination of vehicles exceed 75,600 pounds.

12. If the axle weights are within the maximum axle weights set forth above, the gross weight on any group of axles of a vehicle or combination of vehicles shall be limited to the weights shown in the following table of weights plus any tolerance authorized above. Otherwise the gross weight on any group of axles shall be limited to the weights shown in the following table and no tolerance is allowed.

TABLE OF PERMISSIBLE WEIGHTS

Wheelbase of Any Group of Axles of a Vehicle or Combination of Vehicles (feet)	Maximum Gross Weight of Group (pounds)	Wheelbase of Any Group of Axles of a Vehicle or Combination of Vehicles (feet)	Maximum Gross Weight of Group (pounds)
4	32,000	31	53,490
5	32,000	32	54,330
6	32,000	33	55,160
7	32,000	34	55,980
8	32,610	35	56,800
9	33,580	36	57,610
10	34,550	37	58,420
11	35,510	38	59,220
12	36,470	39	60,100
13	37,420	40	60,800
14	38,360	41	61,580
15	39,300	42	62,360
16	40,230	43	63,130
17	41,160	44	63,890
18	42,080	45	64,650
19	42,990	46	65,400
20	43,900	47	66,150
21	44,800	48	66,890
22	45,700	49	67,620
23	46,590	50	68,350
24	47,470	51	69,070
25	48,350	52	69,790
26	49,220	53	70,500
27	50,090	54	71,200
28	50,950	55	71,900
29	51,800	56	72,000
30	52,650	57	72,000

The maximum gross weights in the above table are for axle spacings to the nearest foot. If the axle spacing as actually measured is a fractional foot, the gross weight allowed is that given in the table for the next higher spacing.

Example: For an axle spacing of 31′ 3″ (actual measurement) the allowable gross weight is that shown in the table opposite the axle spacing of 32′.

Portland, Oregon
August 1, 1949

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction were opened and read aloud by the Secretary in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room.

Quinn Brothers & Robbins, Boise, Idaho	233,377.00

* Bidder will accept only one project

The Commission unanimously approved the minutes of the meeting held June 27 and 28, 1949.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following parks matters:

1. Request of the U. S. Forest Service to construct and operate a logging road across Neptune State Park, about four miles south of Yachats: The State Parks Superintendent recommended approval of this request. The recommendation was unanimously approved by the Commission. (An agreement covering the matter was signed on the following day.)

2. Construction of a caretaker's house in Armitage State Park, near Eugene, and in Wallowa Lake State Park: The Commission unanimously approved the construction of houses at both parks, at an estimated cost

of $14,000 each. The Engineer was authorized to advertise for bids for construction of the buildings. The Commission ordered that hereafter plans for caretakers' houses in all locations shall be constructed to one standard design.

3. Construction of a boat channel at Wallowa Lake State Park: The Parks Superintendent estimated the cost of deepening the present channel at $10,000 and recommended the expenditure. In support of his recommendation, he advised that the water level in the lake this year has receded so much that the boat channel as it now exists is dry, and it is proposed to deepen this channel by removing 24,000 cubic yards of material, which will be deposited on the lake bank for improving the roadway and parking area. He urged the improvement this year while the water in the lake is at an unusually low level. Chairman Banfield questioned the advisability of authorizing this expense, stating that the Commission is spending in this park considerably more than was originally anticipated. It was his thought that a decision should be deferred pending a report from the State Parks Superintendent outlining the eventual plans for this park and the estimated cost of the entire development. Commissioner Reynolds advised that boating at Wallowa Lake is a very popular pastime, and that as many as 65 power boats are placed in the lake every weekend. He pointed out that it is a case of either throwing away money already spent, and reviving the use of the old gravel bar at the lake for the purpose of launching boats, or the expenditure of an additional sum to deepen the new channel. Commissioner Chandler expressed his feeling that the project should be approved in order to protect the present investment. As a result of lengthy discussion, the Commission unanimously authorized the expenditure of $10,000 to improve the existing channel. The Parks Superintendent and Engineer were instructed to work together in the preparation of a master plan for the development of each state park, that will provide a work program for each of these parks during the next ten years.

4. Question of overnight camping in the larger parks of the state: The Parks Superintendent recommended approval of the granting of overnight camping privileges on a fee basis. The matter was given careful consideration by the Commission, but a decision was deferred pending a joint report from the Engineer, Chief Counsel and Parks Superintendent as to what is essential to provide proper facilities, the cost thereof, and what the expense would be to maintain the parks were such privileges permitted. The Engineer, Chief Counsel and Parks Superintendent were instructed to render such report and were authorized to send competent individuals to parks in other states, if necessary, to secure necessary information. It was understood that each park must be analyzed on its own merits.

5. Construction of a latrine at Emigrant Springs State Park, Umatilla County: The Parks Superintendent advised that the restroom facilities at this park are very unsatisfactory, the present latrine being located in the caretaker's house. He recommended approval of construction of a new latrine at a different location, which he estimated would cost about $3,000. The Commission approved the expenditure unanimously and ordered that the present latrine be remodeled for use as a utility room for the caretaker.

6. Purchase of property at Depoe Bay: The Chief Counsel reported this matter in behalf of the Parks Superintendent. He advised that pursuant to instructions from the Commission, he instituted condemnation proceedings to acquire this property, which is situate at the mouth of the inlet, and the jury in the case rendered a verdict in the amount of $14,500. He gave as his opinion that the property is not worth the price set by the jury, and requested instructions. The Commission unanimously decided not to purchase the property.

7. Acquisition of surplus property in Camp White, Jackson County, for recreational purposes: The Parks Superintendent advised that there are 182 acres of land involved in this transaction, and that the Federal Government has placed an evaluation of $70,000 on the property, which sum the State Highway Department must pay it if wants it. On the other hand, the federal statutes are such that the property can be deeded outright to the State Game Commission without cost. He further stated that he contacted the Game Commission and ascertained that it would be willing to accept the property and would amend its application for acquisition of the adjoining land to include the property that the Highway Department had in mind. He recommended in view of the fact that the property would be saved for public use if the State Game Commission secures it, that the Commission let the Game Commission have it. The Commission approved the recommendation unanimously.

8. Proposal of the Coquille Chamber of Commerce and the Coquille Post of the American Legion, that the myrtle tree lane along the Coos Bay-Roseburg Highway between Coquille and Myrtle Point, be designated a living memorial to World War II dead: The Parks Superintendent recommended approval of the request. The Commission approved the recommendation on the condition that it is assuming no obligation in connection with the matter.

9. Permit for the grazing of sheep in Cape Sebastian State Park: The Parks Superintendent advised that on June 27, 1949, the Commission authorized an extension of an agreement with Mr. J. H. Turner to graze sheep in this park, but Mr. Turner since has passed away, and now his wife, Mrs. Belle Turner, wants her name substituted for her husband's. He recommended approval of the request and execution of the new lease in favor of Mrs. Turner. The Commission approved the recommendation. (The agreement with Mrs. Turner was signed on the following day.)

10. Request of Franck Brothers to purchase dead timber along the Wilson River Highway: The Parks Superintendent advised that Franck Brothers want to salvage the timber on a twenty-acre tract that adjoins a forty-acre tract which they are now logging under a previous agreement with the State Highway Commission. Franck Brothers, he said, have offered to pay $3.00 per thousand for the timber, which is the amount they are now paying for the timber on the other tract. He recommended approval of the request. The Commission approved the recommendation.

11. Purchase of additional equipment for the State Parks: The Parks Superintendent requested authority to purchase a power mower and a fire pump for use in the areas under his control, at an estimated cost of

$1,000. The Engineer advised that the 1949 budget contains an item of $6,000 for the purchase of park equipment, and there remains at this time an unexpended amount of $1,000. He recommended approval of the request. The Commission unanimously approved the recommendation.

The Right of Way Engineer, Mr. Forrest Cooper, presented for the Commission's consideration a list of options for acquisition of properties that are needed for various state highway improvements throughout the state, and requested authority from the Commission to close the options at the amounts stated therein. After careful consideration of each item listed, the Commission approved the amounts of the options and authorized the Right of Way Engineer to proceed with purchase of the properties. The attached resolution relative thereto, marked Exhibit "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

In the consideration of Item No. 10164, in the above mentioned resolution, pertaining to the purchase of right of way from Francis M. and F. Imogene Arnold, for the Interstate Avenue-Steel Bridge Section of the Pacific Highway West in Portland, the Commission made it clear that it is approving the purchase of this property on the basis of the recommended settlement, but it does not intend to obligate any more money for contract work on the Front Avenue Project, with the possible exception of the Tillamook Street-Broadway Bridge Section, for which bids are to be received on the following day, until the books and accounts of the City of Portland relative to the Front Avenue Project have been audited and a report in respect thereto has been rendered and approved by the Commission.

Also in connection with the discussion of real property matters, the question arose as to how the actual cost of right of way compares with the estimated cost of the same for each project. The Engineer was instructed to prepare and render at the next meeting a report on this subject, and to render similar reports at frequent intervals thereafter.

The meeting recessed for luncheon at 12:00 noon, and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Assistant Counsel, Mr. J. W. DeSouza, was present and requested authority to institute condemnation proceedings to acquire certain parcels of real property which are needed as right of way for highway improvements. He presented a list of such properties, together with the offers that he recommended in condemnation, as follows:

Highway and Section		Recommended Offer
Scott Creek Section of the Alsea Highway		
14568	Robert S. Barclay Estate	$ 2,600.00
14569	C. H. Loudenbeck	450.00
Sullivan Gulch, Unit 2, Section, Sullivan Gulch Highway		
14686	Harold C. Bayley and Agnes M. Bayley	1,300.00

After careful consideration, the Commission approved the request and the recommended offers. The attached resolutions relative thereto, marked "B-1" and "B-2", which resolutions by this reference are made a part hereof with like effect as though extended in full herein, were thereupon adopted by the Commission by unanimous vote.

The Chief Counsel brought up for discussion the matter of sale to the City of Pendleton of a 7.2 acre parcel of state-owned land situate adjacent to the Pendleton Airport State Secondary Highway, on which a value of $1,080 has been placed by the Right of Way Department. Chairman Banfield expressed the attitude of the Commission by stating that the Commission feels that it should not sell this land to anyone unless the purchaser is willing to pay for it the amount that the state has invested in the property and will purchase also the entire acreage (86.24 acres) less two small parcels near the junction of the airport road with the Old Oregon Trail, which the Commission wishes to reserve for highway use; moveover the Commission also wants to get rid of the road itself, which is of no value from a state highway standpoint. The Commission took no further action on the matter at this time, postponing discussion until the following day when the delegation from Pendleton is scheduled to appear concerning the matter. (See ahead for additional paragraph.)

The Assistant Counsel, Mr. J. W. DeSouza, presented for the Commission's approval a form of deed conveying unto Mrs. Louise Snyder Bisaillon a small parcel of land containing 117 square feet, being a portion of the right of way of the Oswego Highway at Oswego, on which encroaches a service station building belonging to Mrs. Bisaillon. He advised that this deed has been prepared in conformity with ideas expressed by the Commission at its previous meeting, and recommended approval of the same. He also presented a form of agreement with Mrs. Bisaillon whereby Mrs. Bisaillon is granted the right to use a strip of highway right of way eight feet wide, abutting on the property conveyed by the deed, which strip of land is to be used by Mrs. Bisaillon for the purpose of servicing motor vehicles at her station. He advised that the agreement has been so prepared that the rights granted to Mrs. Bisaillon are revocable if and when the area is needed for highway purposes. He recommended approval of this agreement. The Chief Counsel and the Engineer concurred in both recommendations. The Commission unanimously approved the recommendations. (The deed and agreement were signed on the following day.)

The Commission discussed and upon recommendation of the Chief Counsel approved an agreement with the United States of America terminating a previous agreement executed on October 14, 1942, providing for use by the Federal Government of a portion of Helmick State Park, for national defense purposes. (An agreement covering this matter was signed by the Commission on the following day.)

The Right of Way Engineer requested approval of the purchase of a gravel pit on the Lost Creek-Lowell Section of the Willamette Highway, Lane County, at a cost of $400. He advised the property is owned by a Mr. Mohler, and that about 8,000 cubic yards of material would be taken from this pit. The Commission approved the purchase of the property at the price quoted.

The Right of Way Engineer reported the results of the taking of bids in Salem on July 25, for the sale of two residence buildings situate on the site of the proposed Highway Department office building, in Salem, as follows:

Building No. 14200, (945 Chemeketa Street)	
1. Chris Madson, Salem	$175.50
Building No. 14588, (975 Chemeketa Street)	
1. Chris Madson, Salem	$291.50

He recommended acceptance of the offer for each building. The Chief Counsel and the Engineer concurred. The Commission approved the recommendation unanimously.

The Right of Way Engineer requested instructions concerning the sale of a house located at 2866 N. E. Sullivan Street, Portland. He advised that Commonwealth, Inc., which is handling the sale of buildings for the Highway Commission in the Sullivan Gulch district, is unable to sell this house, which is not worth very much. He further stated that he has received an offer of $60.00 for the house from a Mr. Foy K. Elwell, who has stated a willingness to clear the premises to the satisfaction of the State Highway Department. He recommended acceptance of this offer, as previously approved by Chairman Banfield and Commissioner Chandler over the telephone. The Commission approved the recommendation unanimously

The Commission discussed the offer of Chester J. Irelan to pay $100.00 for a small parcel of state-owned land adjacent to Ecola State Park, Clatsop County, being a portion of the old access road to this park. The Secretary presented a letter bearing the signatures of the Right of Way Engineer, Chief Counsel, Assistant State Highway Engineer, the State Highway Engineer and the State Parks Superintendent recommending acceptance of this offer. Following considerable discussion, the Commission decided that it would be in the best interests of the state if this property were retained in state ownership, and accordingly refused the offer.

The Commission confirmed telephonic authority previously given to the Right of Way Engineer through the State Purchasing Department, to sell to the State Penitentiary for the sum of $75.00 bed linens, etc., secured in connection with the right of way settlement involving the Antone Poquette Auto Camp on the upper Columbia River Highway.

The Commission had under discussion the matter of acquiring a small parcel of land from the U. S. Indian Service for use as right of way in connection with the relocation of the Big Eddy-Dune Section of the Columbia River Highway in Wasco County. The Right of Way Engineer advised that the Indian Service is asking $41.00 for this property, and recommended purchase of it at that price. The Commission approved the recommendation. (A form of application directed to the U. S. Department of Interior and providing for the State's purchase of this property was signed on the following day.)

The Right of Way Engineer reported that Mrs. Louis Statzer, from whom the Highway Commission is purchasing certain property in Eugene, has presented a demand for an additional payment of $250 for her property, on which it is proposed to construct a building for use by the Secretary of State. He advised that when the original option was secured the Right of Way Agent was not aware that the property is needed for immediate use, and allowed the owner six months' possession. However, in renegotiating the settlement, Mrs. Statzer agrees to vacate the premises immediately upon payment of $250, which represents three months' rental of the premises and additional expense of moving. In the discussion of this matter, the question arose whether or not the property would be needed before the option expires. The Engineer advised that it is planned to advertise the building for bids to be received at the next meeting of the Commission. In view thereof, the Commission voted unanimously to pay Mrs. Statzer the extra $250.

The Engineer brought up for discussion the matter of completing the purchase of right of way for the Mehama-Mill City Section of the North Santiam Secondary Highway. He advised that right of way for the most part was acquired by Marion County prior to the war, but there still remains four parcels to be obtained in the immediate vicinity of Mill City. He pointed out that there is considerable development around Mill City at the present time, occasioned by construction of the Detroit Dam, and there are possibilities that buildings will be constructed on this property unless the state acquires it. He recommended in view thereof that the Right of Way Department be authorized to secure options for the purchase of the remaining four parcels. The Commission approved the recommendation.

The Engineer reported on the difficulties which the Walter Berndt Construction Company is experiencing in connection with its Contract No. 3115, for grading and surfacing the Snider Creek-Crater Lake Junction Section of the Sams Valley Secondary Highway in Jackson County. He stated that the contractor was in grave financial difficulties; that he appealed to his surety to assist him, but was refused; and that he was given notice in writing, pursuant to the provisions of the contract, that his employment as a contractor would be terminated within seven days if satisfactory arrangements were not made to satisfy outstanding claims and others as they arise. Subsequently, he said, the contractor arranged to alleviate his financial troubles and now has on deposit with the First National Bank of Portland, Main Branch, the sum of $25,000, which is to be disbursed under a special setup, for the payment of claims against this job. Moreover, with the Commission's approval, a warrant in the amount of $16,452.54, representing money earned by the contractor in connection with this job, but as yet unpaid, will be deposited in this account for disbursement in the same manner, and for the same purposes. He presented for the Commission's approval an agreement between the State Highway Commission, Walter Berndt Construction Company and George F. Douglas, trustee, covering the future handling of this job and the disbursement of moneys earned in connection with it, and he recommended approval of the same by the Commission. The provisions of the agreement were read aloud by the Chief Counsel, who concurred in the recommendation. (For details, see copy of agreement attached to Contract No. 3115.) Following discussion, the Commission approved the recommendation unanimously. (The agreement was signed by the Commission the following day.)

The Commission had under discussion an exchange of properties with Mr. R. L. Bourke and wife, adjacent to the Oregon Coast Highway, between Fisher Point and Manzanita. The Engineer explained that the state now owns a small parcel of excess right of way containing 1.01 acres, which Mr. Bourke, who owns the adjoining property, wishes to acquire. This land, he said, is outside of the normal width right of way, and is of no apparent use to the state, and Mr. Bourke has offered to deed to the state an additional strip of land ten feet wide on the easterly side of the highway if the state will deed him this small parcel. He recommended the exchange of the properties in order to provide a minimum right of way width of 50 feet along the easterly side of the highway at this point. The Commission approved the recommendation unanimously. (The deed conveying the property to Mr. Bourke was signed on the following day.)

The Chief Counsel brought up for discussion the matter of acquiring land for the widening of the Pacific Highway East along the frontage of property owned by Mr. J. McNally, a short distance south of Salem. It appears that Mr. McNally's property fronts on the highway for a distance of about 600 feet; that he wants to develop his property and to have access to the highway. It also appears that the highway needs to be widened along this section at some future time, and that Mr. McNally is willing to negotiate the sale of a strip along his frontage. The Chief Counsel stated that Mr. McNally appreciates that he will not be given unlimited access to the highway and that he would have to be content with a service road, although pending the construction of such service road he would like to have access to the highway at three points. The Engineer advised that the highway at this location is permanently aligned, but somewhat narrow. He suggested that the Right of Way Department be authorized to negotiate purchase of extra width, and for one point of access on Mr. McNally's frontage. Following discussion, the Commission authorized negotiation to limit access to the highway to one point only along Mr. McNally's frontage. These negotiations are not to include purchase of land for widening the highway at this time.

The Right of Way Engineer presented a claim of Pauline Walton, Eugene, in the amount of $318.10 for the replacement of shrubs along the curbing of her property, adjacent to the Pacific Highway. He said that one of the provisions of the right of way settlement with Mrs. Walton was that the state would replace and rearrange the flowers and shrubs in her yard, and would construct a concrete curb along the right of way line because the house was so close to the sidewalk. The work has been done, he said, and Mrs. Walton is now requesting reimbursement for the expense, provision for which has not previously been authorized notwithstanding that the work was provided for in the original settlement. The Commission unanimously approved reimbursing Mrs. Walton for the sum expended.

The Right of Way Engineer presented a request from the Port of Portland for acquisition of the Columbia Airport access road to the Portland Army Air Base. He advised that the Port of Portland needs this road in connection with a proposed extension of an air field runway to accommodate large aircraft. The access road, he said, was constructed by the State Highway Department in 1942 at a cost of $10,425 and the state was later reimbursed by the Federal Government in the amount of $10,359. The Commission deferred

action on the matter until it is known definitely that the Port of Portland is going to extend the runway. The Engineer was instructed to bring the matter again to the Commission's attention at that time, it being understood that the Commission would make the road available to the Port of Portland for runway purposes if necessary.

The Right of Way Engineer brought up for discussion a proposed exchange of property with Suter and Starnes, Grants Pass, at the junction of the Redwood and Pacific Highways. He advised that Suter and Starnes are ready and willing to comply with the Highway Commission's requirements as previously stated and will deed to the state a satisfactory portion of their property in exchange for a deed for the state's property. Moreover, they have agreed to pay an additional cash consideration as required. He recommended approval of the transaction. The Engineer and Chief Counsel concurred. The Commission approved the arrangement unanimously, with the understanding, however, that the deed conveying the property to Suter and Starnes shall not be delivered to them until they have delivered to the state a deed to their property and have paid the cash consideration.

The Commission considered a claim from Mr. D. A. Kaseberg, Condon, in the amount of $77.00 for the loss of crop resulting from highway construction on the East Cottonwood Canyon Section of the Wasco-Heppner Secondary Highway, Gilliam County. The Right of Way Engineer advised that the right of way settlement with Mr. Kaseberg contained provision for the payment of $20.00 per acre for the destruction of Mr. Kaseberg's crop, if such destruction occurred before the crop was ready to harvest. Actually, he said, the crop on 3.85 acres of Mr. Kaseberg's property was destroyed and the compensation asked is on the basis of the agreement. He recommended payment of the claim. The Commission approved the recommendation.

The Engineer reported a request from the General Petroleum Corporation for temporary use of a small portion of the right of way of the Pacific Highway at the south city limits of Roseburg. He advised that the right of way at this point is 100 feet wide on the westerly side of the center line, and that the area which the Petroleum Company desires is only about 20 feet wide and extends outside of the highway embankment. The Corporation, he said, will relinquish the property as soon as it is needed for highway purposes. He recommended that the request be approved and that the Corporation be granted a revocable lease for a nominal sum to use the area until it is needed for state highway purposes. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Assistant Counsel, Mr. J. W. DeSouza, reported on the acquisition of tax lot No. 26, located in Sullivan Gulch, Portland. He recalled that at the previous meeting of the Commission he reported the refusal of Multnomah County to remove this item from its tax sale, making it appear necessary for the Commission to submit a bid for the lot at the time of the sale. The county has subsequently changed its attitude, however, has withdrawn the property from the tax sale and made it available to the Highway Commission at the fixed price of $1500. The Commission authorized the purchase of the property at the price quoted.

The Assistant Counsel also brought up for discussion a request from the City of Bandon that the Highway Commission join in the abandonment of an alley which extends through Block 10 of the City of Bandon. He exhibited a map showing the location of the alley and its proximity to the Oregon Coast Highway. In the discussion of this matter it developed that the vacating of the alley will not adversely affect the highway, in view of which the Commission stated its willingness to join with the city in the vacation proceedings. The Commission thereupon authorized the Chief Counsel to execute and file with the city the Commission's "consent to vacate."

The Engineer reported a request from the North Bend Chamber of Commerce that it be permitted to construct a building (construction already started) immediately adjacent to the right of way line of the Oregon Coast Highway at the south end of the Coos Bay Bridge. The Chamber proposes, he said, to landscape the area between the building and the sidewalk. He recommended that the Highway Commission grant to the city a revocable permit to use the state's property. The Commission approved the recommendation subject to the condition that the area between the building and the sidewalk shall be landscaped only, and shall not be used for driveway purposes.

The Chief Counsel presented for the Commission's consideration a form of resolution amending a resolution adopted by the former Highway Commission on July 27, 1939, prohibiting or controlling the use of state highway rights of way for parking of cars for commercial purposes. He advised that because the provisions of the former resolution have been applied to the shore of the ocean, persons parking their cars thereon in connection with the sale of ice cream cones, soft drinks, et cetera, have been arrested on a charge that they are violating the Commission's order. He suggested that the Commission clarify the situation so as to confine the application of the rule to operations on public highways, as distinguished from the shore of the ocean, and advised that the resolution now before the Commission has been prepared to that end. Following discussion, the Commission unanimously adopted the resolution, a copy of which is attached hereto, marked Exhibit "C" and by this reference made a part hereof with like effect as though extended in full herein.

The Chief Counsel recommended salary adjustments as follows for three members of the Legal Department staff, which adjustments, he said, have the approval of the Attorney General:

Clifton W. Enfield, Assistant Counsel	$450.00 per month
Samuel A. Hall, Assistant Counsel	450.00 per month
J. W. DeSouza, Assistant Counsel	450.00 per month

The Commission unanimously approved such salary increases.

Pursuant to instructions from the Commission at the previous meeting, the Chief Counsel reported on the type of sign which the Crown Zellerbach Corporation proposes to use to point out the locations where they are preserving timber stands adjacent to state highway rights of way. He advised that he has examined the statutes on the subject, and that he has also examined the design of signs which the Crown Zellerbach Corporation proposes to erect and maintain on state highway property, and in his opinion the proposed sign is not in conflict with the provisions or the spirit of

the law which prohibits certain types of advertising. The proposed sign, he said, does not indicate that anything is for sale, or that any monetary gain will result, but merely discloses the purpose and policy of the Crown Zellerbach Corporation to maintain certain tree growths along state highways, which, in his estimation, is commendable. He recommended that the Corporation be permitted to maintain signs on state highway rights of way, of the type and design they have submitted. The Commission approved the recommendation unanimously.

The Commission discussed with the Engineer the bids received at the morning session, and at 3:00 p.m. Chairman Banfield announced the awards of contracts, as follows, the decision of the Commission, as reflected by the announcement, having been by unanimous vote:

"Grading and bituminous macadam surfacing on the Summit-Tolovana Park Section of the Oregon Coast Highway, Clatsop County. Leonard & Slate, Oregon Ltd., Portland, submitted the low bid for this work, in the amount of $325,675, based on the use of asphalt, and $325,674.60 based on the use of tar. E. C. Hall Co., Portland, submitted the next low bid in the amount of $370,274 based on the use of asphalt and $370,613 based on the use of tar. There were six higher bids. The Commission has referred the bids to the Engineer, with authority to award the contract to the low bidder, Leonard & Slate, Oregon Ltd., based on the use of tar, when certain conditions have been satisfied.

"Surfacing and oiling the Provolt-Jacksonville Section of the Medford-Provolt Secondary Highway in Jackson County. M. C. Lininger & Sons, Medford, submitted the only bid for this work, in the amount of $35,817. This bid is satisfactory, and the Commission has awarded the contract to M. C. Lininger & Sons at their bid price.

"Construction of a double reinforced concrete box culvert at Tunnel Creek, M.P. 59.08, on the North Santiam Highway above Detroit, Marion County. R. & M. Construction Co., Central Point, submitted the low bid for this work in the sum of $9,255. The next low bid was submitted by Port Construction Company, Port Angeles, Washington, at $9,960. There were four higher bids. The Commission has awarded this contract to the low bidder, R. & M. Construction Company at its bid price.

"Landscaping three areas on the Front Avenue (Ash Street-Alder Street) Section of the Pacific Highway West in Portland, Multnomah County. Western Golf Course Supply Co., Portland, submitted the low bid in the sum of $7,233.15; Benedict Nursery Co., Portland, submitted the next low bid at $8,601.09. There was one higher bid. The contract has been awarded to Western Golf Course Supply Company at its bid price.

"City street-paving project in the City of Dallas (Levens Street), Polk County. The low bid for this work was submitted by The United Contracting Company, Portland, at $8,312.50. Warren Northwest, Inc., Portland, submitted the only other bid at $8,502.50. The Commission has awarded this contract to the low bidder, The United Contracting Company, at its bid price.

"Grading, surfacing and oiling on the North Unit of the Enterprise-Forest Boundary Section of the Enterprise-Lewiston Highway in Wallowa County. The low bid for this work was submitted by Durbin Bros., Eugene, at $171,015. A. H. Saxton & Sons, Corvallis, submitted the next low bid at $173,064. There were ten higher bids. The contract has been awarded to the low bidder, Durbin Bros., at their bid price. "

The Engineer reported the results of receiving bids in Salem on July 22 for the sale of used equipment located at the Highway Department shops in Salem. The list he presented of high bids received is as follows:

Item No.	Item	High Bidder	High Bid
1.	Paving plant, Dept.No.30-651	Cascade Const.Co.,Portland	$1,125.00
2.	Allis-Chalmers engine, Dept. No. 38-888	Holt Equip.Co.,Independence	156.00
3.	Retort, no dept. number	No bid	- - -
4.	Road oiler less truck	No bid	- - -
5.	Cornish boiler, Dept. No. 28-555	C & M Wreckers, Portland	5.00
6.	Littleford Kettle, Dept. No. 30-540	C & M Wreckers, Portland	2.50
7.	Aeroil kettle, Dept. No. 34-543	Harlan A. Wilson, Salem	7.30
8.	Oliver mower, Dept.No.38-637	Harlan A. Wilson, Salem	8.05
9.	Oliver mower, Dept.No.35-648	Harlan A. Wilson, Salem	7.30
10.	1939 Ford sedan, Dept. No. 39-50	Arthur Nelson, Independence	125.00
11.	1937 Chevrolet station wagon Dept. No. 37-151	Arthur Nelson, Independence	125.00
12.	1937 Chevrolet station wagon Dept. No. 37-154	Holt Equip.Co.,Independence	52.00
13.	1936 Chevrolet dump truck Dept. No. 36-204	Holt Equip.Co.,Independence	87.00
14.	1938 Chevrolet dump truck, Dept.No. 38-207	C & M Wreckers, Portland	87.50
15.	1935 Chevrolet dump truck Dept. No. 35-213	Holt Equip. Co.,Independence	107.00
16.	1937 Chevrolet dump truck, Dept. No. 37-215	Holt Equip.Co.,Independence	127.00
17.	1936 Chevrolet dump truck Dept. No. 36-229	Holt Equip.Co.,Independence	127.00
18.	Cletrac tractor and dozer, Dept.No.38-814	Harlan A. Wilson, Salem	379.00

The Engineer recommended rejection of all bids received for items 5, 6 and 12, because they are materially lower than the appraised value of the equipment. He also recommended acceptance of the high bid for each of the remaining items for which bids were submitted. The Commission unanimously approved the Engineer's recommendation.

Pursuant to instructions from the Commission at the previous meeting, the Engineer reported on an additional study of the plans of the City of Portland for installation of a storm sewer drainage system on 82nd Avenue (route of the Cascade State Secondary Highway). He advised that a check of the plans reveals that the city is installing a combination storm and sanitary sewer, which is estimated to cost a total of $250,000. To construct a storm sewer, however, which is the only portion of the work that would be of benefit to the state, will cost only $122,600. The sewer system, he said, will drain all of 82nd Avenue between Division Street and Foster Road, a distance of 1.53 miles, and the addition of storm sewers along this section will eliminate all of the troublesome drainage conditions on this street. Between Division Street and Boise Street, he said, the city limits extend down the center of 82nd, which precludes the city from assessing property on the east side of that street, but from Boise Street to Foster Road, 82nd Avenue is entirely within the Portland city limits, which will permit the city to assess a portion of the sewer cost against the properties on both sides of the street. He gave as his thought that it would be reasonable for the state to assume 50% of the cost of a storm sewer on that portion of 82nd Avenue between Division Street and Boise Street, where the properties on the east side of the street cannot be assessed by the city. Also, that on that portion where the city can assess properties on both sides of 82nd Avenue, it would be fair for the state to pay 25% of the cost. On such basis, he said, the state's share of the cost for the portion of the work in which the state is interested would be approximately $50,000 and the city's $72,600, the balance to be assumed by the city as additional cost for sanitary sewer, and he so recommended. Following discussion, the Commission unanimously approved the recommendation, on the condition, however, that the state's money shall not be paid to the city until the city has completed the work, that the state's share shall be determined by the ratio of $50,000 to $122,000, and that in no event shall the state's share exceed $50,000. It was also understood that the state's expense for this item shall be charged against Division No. I in the next state construction program.

The Engineer brought up for discussion a request from J. J. Hollender, Portland, to maintain a roadway across state-owned property adjacent to the Pacific Highway East in the vicinity of Oak Grove, for access from his property to the highway. He advised that investigation reveals that Mr. Hollender's property does not front on the highway, but rather on a street known as King Street, which extends in a northerly and southerly direction approximately parallel to the highway and intersects with Maple Street about one block north of the Hollender property. Mr. Hollender's proper access to the highway, he said, is by way of Maple Street, which is a regularly designated street, and which will also serve other business establishments that are situated back of the highway. He recommended that the request be denied because any additional access created on the Pacific Highway would be dangerous. The Commission approved the recommendation unanimously and ordered that Mr. Hollender be so informed.

Chairman Banfield brought up for discussion the further improvement of Harbor Drive in the City of Portland, and particularly proposed paving and landscaping work. He recalled that ships tie up to the seawall along the section to be improved and the City of Portland provides these ships with water, in connection with which operation it is necessary to extend the city's water mains. It was his thought that the City of Portland and the Portland Chamber of Commerce, which is interested, should be furnished plans for the

Harbor Drive improvement and should be requested to install such water mains as may be required before the contractor on the street improvement starts the paving and landscaping work. The Engineer was instructed to notify these agencies accordingly.

The Engineer reported that pursuant to instructions from the Commission, the Bridge Engineer, Mr. G. S. Paxson, conferred with the Bridge Engineer for the State of Idaho, Mr. Walter J. Alberthson, relative to increasing the load limits on the Payette and Weiser Bridges over the Snake River, and that these Engineers made an extensive research and found nothing contrary to their original findings, although they advise that the maximum load limit could be increased to eleven tons if certain repair work were done and traffic limited to one-way movements under signal control. It was their recommendation, he said, in which he concurs, that the repairs be made, and the traffic-actuated stop and go signals be installed; and that when this has been done, the load limit on each bridge be increased to eleven tons. Due to the fact that both of these bridges are being maintained by the State of Idaho, he added, the work would be done by that state. The Commission approved the recommendation unanimously. A resolution raising the load limits as reported is to be adopted by the Commission when the repair work is completed.

The Engineer brought up for discussion the matter of designating additional highways as "through-stop" highways. He stated that there are a considerable number of highways on both the primary and secondary systems that have not as yet been so designated, and that traffic should be required to stop before entering them because motorists generally feel that any highway on a state route is a "through-stop" highway, and drive accordingly. He exhibited a map showing in one color the highways which were designated "through" highways by the Commission in April, 1943; December, 1945, and August, 1947; and in another color the additional highways which he recommended be made "through-stop" highways. In the discussion, it became evident that not all the highways on the state primary and secondary highway systems have been included in this proposed designation, in view of which the Commission referred the matter back to the Engineer with instructions to give it more study and render a full report at the next meeting.

The Engineer reported briefly on the status of action that is required in order that the State Highway Commission comply with legislation adopted by the 1949 Legislature, as follows:

H.R.10, providing for construction of additional parking space between the State Office Building and the Supreme Court Building: the Engineer advised that the contract for this work has been awarded and the work is under way.

H.B.80, specifying that payments to cities and towns shall be made semiannually, immediately following June 30 and December 31 each year: the Engineer stated that a form of resolution has been prepared by the Chief Counsel providing for the apportionment to cities and towns of the state, as of June 30, 1949, the sum of $1,205,534.33 in conformity with this amendment. He presented the resolution for the Commission's consideration, and advised that the amounts shown therein have been carefully checked and are correct. The Commission unanimously

approved and adopted the resolution, a copy of which, marked Exhibit "D", is attached hereto, and by this reference is made a part hereof with like effect as though extended in full herein.

H.B.481, which sets up a new schedule of weights in respect to axle groupings: the Engineer recalled that the Commission at the previous meeting approved his report on this matter, particularly the new forms for Group I and Group II highway transportation permits, and ordered it covered by appropriate resolution. He presented a form of resolution prepared by the Chief Counsel, covering the matter, and recommended its adoption as of June 28, 1949. The Commission unanimously approved and adopted said resolution and instructed the Secretary to enter the resolution as an exhibit in the minutes of the meeting held on June 28, 1949.

H.B.484, which provides for a "Capitol Planning Commission" and stipulates that "no plans for public buildings to be erected in the capitol group, or selection of the location of such buildings, shall be finally approved by any officer or agency of the state of Oregon until the planning commission shall have considered such plans and made recommendations concerning the same to the Board of Control." The Engineer expressed the thought that the Commission, in view of this law, would wish to consult with the Capitol Planning Commission before advertising for bids for the construction of the proposed Highway Department Building in Salem. Following discussion, it was arranged that Commissioners Chandler and Reynolds should meet with the Capitol Planning Commission at its meeting in Salem on the following day.

S.B.167, which requires property owners to construct and maintain road approaches to state highways at their own expense in accordance with rules and regulations established by the State Highway Commission, and only after obtaining written permission: the Engineer advised that permit forms, regulations and policy recommendations are now being prepared and it is expected that they will be ready to present to the Commission at its next meeting.

The Commission discussed a written report from the Engineer and Chief Counsel regarding the situation at the Town of Corbett, on the new Columbia River Highway, particularly with reference to the railroad grade crossing at this point, the former fishing docks on the river opposite the crossing, and the road from the new highway to the old highway between upper and lower Corbett. According to the report, the record clearly shows that the Highway Commission owns the right of way over which the highway is located and has no commitments or obligations in any manner to the fishing interests at Corbett, save and except, perhaps, to permit the crossing of the highway and access to the river. The report also states that, according to the records, the roadway extending from lower Corbett to upper Corbett is a county road for which the state has no obligation whatsoever, and that the state would entirely fulfill its obligations to the public were provisions made for the parking of motor vehicles on the river side of the highway, and for the construction of a roadway and turnaround from the highway to the ordinary level of the river, which the Engineer estimated would cost about $4,000. As to the railroad track crossing at Corbett, the report reveals that this is a very dangerous crossing, and that as a matter of safety, crossing signals should be provided, cost of which should be

paid by the railroad company and Multnomah County, since it is a county-road crossing of the railroad. After due consideration of this report, the Commission authorized the Engineer to proceed with the construction of the parking area for motor vehicles on the river side of the highway, and with the building of the roadway and turnaround from the highway to the river at an estimated cost of $4,000. The Commission made no further commitments. (For details, see copy of the joint report in general files.)

The Commission discussed a report from the Engineer on the request of the County Court of Josephine County that the improvement of the Holland Loop Federal Aid Secondary Highway be included in the Second Postwar Program. The Engineer recalled that the Commission at the previous meeting discussed a tentative allocation of $100,000 for this road, but deferred action pending further inspection and discussion of the subject with the Josephine County Court. He advised that there are ten bridges on this section of highway, all of which should be reconstructed, at an estimated cost of $97,200. He estimated the cost of surfacing and oiling the road itself at approximately $130,000. He further stated that in his discussion of the matter with the County Court, the court stated that if the Commission will allocate $100,000 for the reconstruction of the bridges the county will grade and surface the highway at county expense as funds become available to the county. The county court also requested, he said, that the state make a survey of the road so the county's part of the work can be done on proper alignment. He recommended approval of the county court's requests. The Commission approved the recommendation unanimously, on the condition that the county court will confirm its offer of cooperation in writing.

The Engineer presented a written report on the probable status of highway finances at the end of 1949. The Commission took no action on the report.

A letter was presented from the Jackson County Court requesting that two county road bridge projects be substituted for the Sams Valley Secondary Highway project in the Commission's Second Postwar Construction Program for Federal Aid Secondary Highway Funds, one of the bridges being over the Rogue River in the Town of Rogue River, and the other, known as Bybee Bridge, on the county road near TouVelle State Park. The Engineer recommended against such substitution of projects because of the importance of the Sams Valley Highway improvement. He suggested, however, that it might be advisable to construct one of the bridges, if the county will agree to construct the other at county expense. The Commission indicated a favorable attitude toward the Engineer's suggestion, but deferred action until the following day when the county court is scheduled to be present to discuss the matter in person. (See additional paragraph ahead.)

In the discussion of this matter the question of programming the balance of available funds was mentioned, and it was decided to consider such matter at the next meeting of the Commission. The Engineer was instructed to present at that time a list of eligible projects.

The Engineer presented an outline of specifications for the proposed State Highway Office Building at Salem, as prepared by Whitehouse, Church, Newberry and Roehr, architects who have been engaged by the

Commission to prepare the plans for this structure. Action on this matter was deferred by the Commission pending consultation with the architects. Additional matters pertaining to this building were also discussed The Commission ordered that the plans be revised to eliminate, insofar as possible, a division of office space into private offices. The Commission also expressed its desire for additional information, such as the type of fixtures that are to be used in the building, the color scheme, materials, etc. All of these features are to be discussed with the architects. The Engineer was instructed to arrange a meeting on Friday, August 19, 1949, for this purpose. (August 19 was later definitely set for this conference, which is to be held in Portland.)

A letter was presented from Mr. W. L. Crissey, Brookings, Oregon, advising that he is developing his property, which is situate on the west side of the Oregon Coast Highway at Brookings, by landscaping, etc., but has incurred the obstacle of a ditch which conducts drainage from the east side of the highway across his property and which, he says, completely ruins two of his finest oceanfront sites. Mr. Crissey requests that this ditch be blocked and the water from the highway carried in a deepened ditch along the east side of the highway. The Engineer advised that this matter has been investigated and it is his recommendation that the request be refused because the culvert under the highway and the open ditch across Mr. Crissey's land serve a well defined drainage area and the Highway Commission has no right legally to divert the water across property belonging to others, which would be the case were Mr. Crissey's request approved. He gave as his opinion that the only obligation of the Highway Commission is to provide necessary facilities to carry the water that accumulates in the natural drainage area from one side of the highway right of way to the other side, from which point it would follow natural courses to eventual discharge. He estimated the cost to do the things requested by Mr. Crissey at $700. The Chief Counsel concurred in the recommendation that the request be denied. The Commission approved the recommendation unanimously.

Chairman Banfield brought up for discussion the matter of deeding to the Weyerhaeuser Timber Company a 2.2-acre tract of state-owned land comprising the old ferry landing at North Bend, and particularly referred to a letter from the company stating its objections to accepting a deed to the property if the deed contained the provision that the tract must be used perpetually as an industrial site. The Chief Counsel was instructed to give the restriction feature study and report back to the Commission on the following day. (The rendition of this report was held up until the next regular meeting of the Commission.)

The Commission discussed a proposed agreement with the Union Pacific Railroad Company concerning the landscaping of embankment slopes on the new water grade Columbia River Highway, where the highway encroaches upon the right of way of the railroad company between Troutdale and Dodson. The Engineer advised that plans for the highway improvement include landscaping of many of these slopes either by the seeding of grass or by the planting of shrubbery, but before the work can go forward, it is necessary to secure the approval of the railroad company insofar as the slopes are on its property. He presented a form of agreement covering the matter and recommended approval of the same. The Chief Counsel advised that he has examined this agreement, and in his estimation

it is satisfactory. He concurred in the recommendation. The Commission approved the recommendation unanimously. (The agreement was signed the following day.)

The Engineer reported the necessity to increase the amount authorized for the construction of the Harris Beach Park Roadway, Contract No. 3132, by the amount of $1,292. He advised that during construction operations by the contractor, underground water was encountered, which necessitated additional excavation and the installation of drainage pipe, costing $500, which accounted for the overrun in the amount originally authorized for the project. He requested authority for the increase. The Commission approved the request unanimously.

The Engineer also requested an increase of $46,692 in the project authorization for the High Street-Walnut Street Section of the Pacific Highway in Eugene, State Highway Contract No. 3033. He advised that the original project authorization was $445,307.77, but it will have to be increased to $492,000 in order to complete the project satisfactorily and to perform certain work for the University of Oregon as provided in an agreement between the Commission and the University in 1941. He itemized the expense making up the total amount of the project authorization increase. (See written report of Engineer in general files for details.) Following discussion, the Commission unanimously approved such increase in the project authorization for this project.

The Engineer brought up for discussion the matter of allowing Contractor Porter W. Yett an extra amount for clearing and grubbing in connection with the grading and paving project in the City of Newberg, for which he submitted the low bid at the meeting of the Commission held on June 27, 1949 He recalled that Mr. Yett's bid contained no price for this particular item, although the total amount shown for the job was $4,000 more than the sum of the amounts shown for the individual items and Mr. Yett alleges that he inadvertently overlooked entering the $4,000 for the clearing and grubbing work. The Engineer gave as his belief that Mr. Yett made an honest mistake and that he clearly intended to enter $4,000 for this item. He suggested that the Commission might allow Mr. Yett $3,000 for the clearing and grubbing work, which is less than the amount for which the J. C. Compton Company, only other bidder for the job, offered to do the work. The Chief Counsel concurred in the recommendation, stating that in his estimation, if the matter were taken to court Mr. Yett would have no difficulty proving that his mistake was an honest one. As a result of careful consideration of this matter, the Commission unanimously approved an allowance of $3,000 to Mr. Yett for this item.

The Engineer reported that in connection with the water-grade Columbia River Highway, a lake was formed at Multnomah Falls when the hydraulic embankment was constructed. The water in this lake, he said, is about ten feet deep around power poles belonging to the Cascade City Light Department, and during the past winter the water froze, pushing some of the poles out of line. He further stated that the power line is now in such condition that it will have to be replaced in another location because the depth of the water will not permit re-establishing the line in its original location, and due to the fact that the existing pole line occupies the right of way of the Union Pacific

Railroad Company by franchise, the re-establishment of the pole line becomes the obligation of the state. He estimated the cost to reconstruct the power line at approximately $5,200 and recommended approval of the expenditure as soon as final plans can be worked out with the light company. The Commission approved the recommendation unanimously.

A letter was presented from the Seaside Chamber of Commerce requesting the widening of the pavement on Holladay Street (route of the Oregon Coast Highway) between "A" Avenue and "K" Avenue in Seaside. The Engineer advised that the present pavement on this street is only 20 feet wide and that investigation reveals that it will cost about $15,000 to widen it to 36 feet. He suggested that consideration be given to the project in the programming of future funds, if the city will take action to prohibit the parking of vehicles on one side of the street at all times, because the street carries a large volume of traffic, particularly during weekends, and in his estimation, the widening is necessary in order to eliminate traffic congestion and accidents. In the discussion of this matter, it was recalled that the Commission had previously discussed a plan for the eventual routing of this highway along Roosevelt Drive. In view of the fact that the present routing of the highway is only temporary, the Commission decided that it is not justified in going to the expense of the widening work, and accordingly denied the request.

The Commission had under discussion a letter from the Southern Pacific Company to the City of Oregon City, and referred by the City to the State Highway Department, in which letter the company calls attention to the impaired vertical clearance at the 14th Street underpass under the railroad company's tracks at Oregon City, and suggests that the city institute a more effective policing of overheight loads that use this street, to the end that they are within the required dimensions, or that the street be lowered to provide additional overhead clearance. The company makes the request because overheight loads passing under the structure frequently strike the girders and the company is fearful that derailment of one of its trains will occur unless remedial action is taken.

The Engineer advised that this underpass is on the route of the Cascade Secondary Highway; that he is aware of the impaired clearance and has issued instructions to the Permit Department not to issue any overheight permits which would authorize the loads' being transported through this underpass. Moreover, a check of the permit files reveals that none whatsoever has been granted, so if anyone has ever taken an overheight load under this structure, he has done so without any authority and in an illegal manner. He gave as his opinion, in view of the circumstances, that the State Highway Commission has no responsibility in the matter whatsoever, and recommended that the request be denied. The Commission approved the recommendation.

The Engineer reported that the City of Chiloquin has fulfilled the legal requirements with respect to the expenditure of 1947 State Tax Street Funds which it received in 1948, and that the plans for improvements contemplated to be financed with such funds have been examined and are satisfactory. He recommended approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted the attached resolution, marked Exhibit "E-1", relative thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that the following cities and towns have fulfilled the legal requirements with respect to the expenditure of 1948 State Tax Street Funds which they have received in 1949, and that the plans for the projects which they propose to finance with such funds have been examined and found satisfactory:

Antelope	Arlington	Athena	Aumsville	Canyon City
Cave Junction	Chiloquin	Clatskanie	Coburg	Cornelius
Cove	Creswell	Dayton	Dayville	Eagle Point
Elkton	Empire	Falls City	Gaston	Glendale
Gold Beach	Grass Valley	Halsey	Harrisburg	Hines
Hubbard	Imbler	Jefferson	John Day	Joseph
Madras	Malin	Manzanita	Monroe	Moro
Mosier	Myrtle Creek	Nehalem	North Powder	Oakland
Pilot Rock	Port Orford	Prairie City	Riddle	Shaniko
Sodaville	Sumpter	Troutdale	Umatilla	Wallowa
Willamina	Yoncalla			

He recommended approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted the attached resolution, marked Exhibit "E-2", relative thereto, which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer brought up for discussion a request from the City of Chiloquin for the improvement of Chocktoot Street, easterly from the end of the bridge over Williamson River to First Avenue, which is the center of their town, as a Special State Tax Street Fund Project. He advised that this street connects with the State Secondary Highway at the bridge and due to the heavy traffic that uses the street, the city is unable to keep it in a good state of repair, and has requested assistance from the state. The improvement, he said, qualifies for Special State Tax Street Funds, and an investigation reveals that the proposed improvement will cost about $8,500, all of which will have to be paid by the state. He recommended approval of the project. The Commission approved the recommendation unanimously.

The Commission, on recommendation of the Engineer, unanimously approved an "Option for Cooperative Construction Projects" in the City of Dallas, providing for the improvement of Levens Street from Ellendale Avenue to the north end of the Rickreall Creek bridge at an estimated cost of $10,000

The Commission also unanimously approved a modification of a previously approved Cooperative Construction Project in the City of Gold Beach, whereby, at the request of the city, there has been included in the project construction of certain sidewalks at city expense. An agreement prepared by the Chief Counsel and signed by the city covering the increased work, was presented and approved by the Commission. (The agreement was signed on the following day.)

The Engineer brought up for discussion the Commission's agreement with the City of Lebanon covering street improvements, particularly Milton and Williams Streets, consisting of .61 mile of grading and paving. He advised that the work was estimated to cost $44,000, and because of the

Commission's ruling that limits state cooperation to $15,000 on projects of this kind, the city agreed to pay $29,000 and the agreement was prepared accordingly. At its meeting on June 28, however, the Commission received a satisfactory bid for the construction of this work at $33,580, being $10,420 under the estimated cost, all of which would accrue to the state's benefit if the provisions of the agreement were strictly followed. He advised that there is considerable criticism by certain property owners in Lebanon because the state gets the benefit of this reduction. He gave as his belief that the city entered into the agreement in good faith on the assumption that the state's share would actually be $15,000 and he recommended, in view thereof, that the "Option for Cooperative Construction Projects" be revised to the extent that the state pay the full amount of $15,000 and the city the balance. The Commission approved the recommendation unanimously.

The Commission discussed a request from Mr. A. C. Suratt, Madras, Oregon, for the installation of a four-way traffic signal on The Dalles-California Highway, opposite the high school in Madras. The Engineer advised that this matter has been investigated by the Traffic Engineer, who recommends that the request be denied, and that the matter be taken care of by a schoolboy patrol system. The Engineer advised that he concurs in the recommendation. The Commission approved the recommendation unanimously.

The Commission also discussed a request from residents of Prineville for illumination at the junction of the Madras-Prineville Secondary Highway with the Ochoco Highway in Prineville. The Engineer advised that the Traffic Engineer has investigated this matter, and that it is his recommendation, in which he concurs, that the existing directional sign be equipped with fluorescent light units, and that signs be erected requiring traffic from the Madras-Prineville Secondary Highway to come to a stop before entering the Ochoco Highway. To accomplish this, he said, would require an expenditure of about $1,600 for the following:

1. Installation of mercury vapor luminaire units at the intersection.
2. Illumination with fluorescent light units of existing directional signs.
3. Installation of stop signs on the Madras-Prineville Secondary Highway.

He pointed out that the state would have to pay all of this expense because the intersection is outside of the city limits. The Commission approved the recommendation.

The Commission unanimously approved an agreement with the City of Eugene relative to the installation of traffic control signals at certain intersections on Broadway and on Franklin Boulevard, route of the Pacific Highway in Eugene, involving a total cost of approximately $23,500, of which $10,071.42 is to be paid by the city and the balance by the state. The agreement was signed on the following day.

The Engineer requested authority to conduct a location survey for the permanent location of the Mt. Vernon-John Day Section of the John Day Highway in Grant County. The present highway, he said, was constructed in the early 1920's and is of a very low standard. The cost to maintain this section,

he said, is high, and the inconvenience to public travel is material. Moreover, the improvement of this section should be included in an early construction program. The survey was authorized by the Commission by unanimous vote, on the condition that it is making no commitment whatsoever as to construction of the section.

The Engineer requested authority to enter into a contractual agreement with Leonard and Slate, Oregon Ltd., contractors, to back-fill the Oneonta Tunnel on the upper Columbia River Highway with material from the Oneonta slide, and to remove the balance of the loose material in the slide area so as to relieve the pressure against the bulkheads. He estimated the total cost involved at $6,200, of which amount $4,200 was previously authorized by the Commission to finance the filling of the tunnel. The Commission approved the request and the additional expenditure.

The Engineer brought up for discussion the matter of improving the underpass on the Wallowa Lake Highway in the city of LaGrande so as to prevent the seepage of water, which in the wintertime is particularly hazardous when ice forms. He advised that the elevation of the highway at the underpass is four and one-half feet lower than the highest known ground water elevation. Consequently, water seeps through cracks which have opened up and the intensity of the seeping is increasing. In fact, at one spot the reinforcing bars are exposed. He requested authority to enter into a contractual arrangement with Dr. J. J. Polivka, Consulting Engineer, Berkeley, California, to seal the cracks chemically using a process which has been patented. He estimated the cost at about $4,500, which includes the salary and expenses of Dr. Polivka's assistant; Dr. Polivka's fee; and royalty to be paid to Mrs. Jorgenson, whose husband patented this process. In addition to sealing the cracks, he said, it will be necessary to spend about $2,500 for an asphaltic concrete surface over the present surface, making a total expenditure of about $7,000. He advised that this is the most feasible and least costly solution for a problem which is getting worse, and if the Commission does not approve this method of handling the situation, it then would be necessary to spend a much greater sum to make repairs in another manner. Commissioner Reynolds confirmed the Engineer's statement as to the need for the improvement and advised that something must be done to correct a situation that is rapidly becoming worse. Following discussion, the Commission unanimously approved the arrangement recommended by the Engineer.

The Commission had under discussion a request from the County Court of Klamath County, for the substitution of the Crescent Lake county road for the Midland Secondary Highway in the State Secondary Highway System. The court advises that the Crescent Lake road is in an isolated district where it is very inconvenient and costly for the county to maintain it, whereas it is in close proximity to the state maintenance section of the Willamette Highway. In the discussion of this matter, it was pointed out that the Midland road has recently been improved as a Federal Aid Secondary Highway Project, and there is a question whether or not the Bureau of Public Roads would approve of the substitution. In view thereof, the Commission deferred action on the matter until such information has been obtained. The matter was referred to the Engineer to handle.

The Engineer requested authority for the construction of two buildings to house equipment and supplies assigned to section maintenance crews, one being at Fort Klamath, the other at Stayton. He estimated the total cost involved at $35,000. Concerning sites that are available, the Engineer advised that the Commission had at the morning session authorized acquisition of a site at Fort Klamath, and that the state already owns a suitable site at Stayton. The Commission approved the request unanimously.

There was presented for the Commission's approval a proposed agreement with the Union Pacific Railroad Company, the Oregon-Washington Railroad Company, the City of Baker, and the Sumpter Valley Railroad Company, covering construction of the Dewey Avenue Undercrossing on the Baker-Unity Highway in the city of Baker. The Engineer and the Chief Counsel both recommended approval of the agreement as prepared. The Commission approved the recommendation. (The agreement was signed on the following day.)

There was also presented to the Commission for approval, a form of agreement between the Union Pacific Railroad Company, Western Union Telegraph Company, and the Oregon-Washington Railroad Navigation Company providing for the encroachment of the Front Avenue Project, Portland, on railroad property, between Tillamook Street and the Broadway Bridge. The Commission unanimously approved this agreement as prepared, upon recommendation of the Engineer and Chief Counsel. (The agreement was signed on the following day.)

The Engineer reported urgent need to resurface a portion of N. E. Union Avenue, Portland, over which the Portland Traction Company heretofore has been operating streetcars. The section, he said, is approximately two and one-half miles in length and it is proposed to resurface over the rails, inasmuch as the use of streetcars has been abandoned. He estimated the cost of the project at $76,000, of which amount $32,000 would be charged to the Portland Traction Company, the balance to be the state's share. The Traction Company, he says, does not have funds immediately available to pay its share of the expense, but Commissioner Bowes of the City of Portland advises that the city will do the work if the state will agree to pay its proportionate share of the cost, and the city in turn will collect from the Portland Traction Company its share. The Engineer recommended approval of the project and requested authority to enter into a written agreement with the city of Portland covering the matter. The Commission approved the recommendation unanimously, it being understood that the surfacing work shall be done pursuant to state highway specifications, and the state's share of the expense shall not be paid until the city of Portland has completed the job and the actual amount of the respective shares is determined.

Chairman Banfield reported increased interest concerning the West Portland-Hubbard Highway (Wilsonville Cut-off, State Highway No. 51). The Engineer was instructed to render a report on the subject, outlining a history of the project, obligations which the State Highway Commission has incurred in connection with it, cost of construction, saving in distance between Portland and Salem, and other factors.

The Engineer requested confirmation of the authority heretofore given him orally to spend $4,950 for construction of a car-parking area in Sunset Bay State Park, in Coos County. He advised that the work has been underway since

the Commission granted oral authority for him to proceed, and he anticipates that it will be completed within the next week or so. The Commission unanimously confirmed the action.

The Engineer also requested confirmation of his award of several contracts for which bids were received at the meeting on June 27 and 28, 1949, and which were referred to him with authority to award the contracts when certain conditions had been satisfied. The conditions, he said, have been satisfactorily disposed of. The Commission unanimously confirmed the awards of said contracts, as follows:

1. Construction of State Office Building-Supreme Court Building Parking Area, Salem; contract awarded July 1 to T. J. Patzer, low bidder;

2. Grading and paving the Newberg-McMinnville Section of the Pacific Highway West, Yamhill County; contract awarded July 1 to J. R. Taggart & Co., Inc. and J. R. Taggart, low bidder;

3. Pavement resurfacing on South Main Street in Toledo, Lincoln County; contract awarded July 5 to Parker-Schram Co., low bidder;

4. Ferry Street Bridge construction over Willamette River on Coburg County Road, Eugene, Lane County; contract awarded July 5 to Tom Lillebo, low bidder;

5. Reoiling and rock production project in Cave Junction on the Redwood and Oregon Caves Highways, Josephine County; contract awarded July 12 to J. C. Compton Company, low bidder;

6. Grading and paving on the First Street-Willamette Street Section of the Hillsboro-Silverton Secondary Highway in Newberg, Yamhill County; contract awarded July 21 to Porter W. Yett, low bidder;

7. Grading, surfacing, and oiling on the Big Eddy-Dune Section of the Columbia River Highway, Wasco County; contract awarded July 22 to Newport Construction Company and Kern & Kibbe, low bidder;

8. Grading and paving on Milton and Williams Streets, Lebanon, Linn County; contract awarded July 25 to Warren Northwest, Inc., low bidder;

9. Construction of Dewey Avenue Undercrossing structure on Baker-Unity Highway in Baker; contract awarded July 27 to Valley Construction Company, low bidder.

The Commission had under consideration the following requests for extensions of time within which to complete certain highway contracts:

1. General Construction Company, Contract No. 2959 for construction of a bridge over the Sandy River on the Upper Columbia River Highway, Multnomah County, requested an additional extension of time of 106 days,

from June 1, 1949 to September 15, 1949, within which to complete this job. They attributed their failure to complete the job within the previously extended time limit to unfavorable highwater conditions in the Sandy River which prevented the delivery of steel onto the job until highwater occurred in the Columbia River. The Engineer advised that the contract called for completion of the project by December 31, 1948. It was expected, he said, that the contractor would be able to complete the piers prior to normal Columbia River highwater and to erect the steel during this highwater, from barges. Due to the height of the flood and its duration, he said, the piers could not be constructed as scheduled; however, the steel is now in place and the concrete deck has been poured, which ensures the opening of the bridge for traffic by September 1, when the road work on the section involved will also be ready to open for traffic. The Engineer recommended, in view of the circumstances, that an extension of time be granted without penalty to August 31, only, on the condition that the deck of the structure be in condition to carry travel by August 1, 1949. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

2. Erwin E. Batterman, Contract No. 3081 for construction of a temporary office and storage building on the Highway Shops premises in Salem, requested an additional extension of time of thirty-one days, from July 1 to August 1, 1949, within which to complete this project. He attributed his failure to complete the job within the previously extended time limit to delay in securing certain equipment, which will be installed as soon as received from the factory. The Engineer advised that all the work on this building with the exception of the installation of one fixture in the toilet was completed prior to May 31, 1949, and the state then took possession of the building. The fixture referred to was received by the contractor on July 1 and the installation of same was completed on July 7. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

3. Warren Northwest, Inc., Contract No. 3125, for construction of oil mat surfacing on the Corvallis-Albany Section of the Corvallis-East Side Secondary Highway in Linn County, requested an extension of time of thirty-one days, from July 1 to July 31, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulties in producing large size oil rock. The Engineer advised that the gravel pit used in connection with this job contained far more fine materials than was anticipated, and the contractor required additional time to produce material of a satisfactory size, notwithstanding his making every effort to do it in the allotted time. He recommended in view of the circumstances that the extension of time requested be granted without penalty. The Commission approved the recommendation.

4. Oscar E. Joelson, Contract No. 3064, for rock production on the Endicott Creek-Mystic Creek Section of the Coos Bay-Roseburg Highway in Coos and Douglas Counties, requested an extension of time of sixty-one days, from June 15 to August 15, 1949, within which to complete this job. Mr. Joelson attributed his failure to complete the project within the specified time limit to the fact that his equipment was tied up on a

California-Oregon Power Company project on the North Umpqua Highway until March, 1949, due to an early fall of snow, and to the fact that six miles of county road he was using as a hauling road was not fit for transporting heavy loads until it had dried out. The Engineer advised that the reasons given by the contractor for the overrun of the time limit are substantially correct. He further stated that the state has incurred no additional expense for engineering supervision, nor has the lack of material caused travellers any inconvenience. He recommended that an extension of time as requested be granted without penalty. The Commission approved the recommendation.

5. Inter City Sand and Gravel Company, Inc., Contract No. 2990, for regrading and surfacing the Mud Creek—Drake Creek Section of the Warner Secondary Highway, requested an additional extension of time of sixty days, from May 29 to July 28, 1949, within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to adverse weather conditions. The Engineer advised that because of extremely heavy snow conditions on Warner Summit, the contractor was unable to work for approximately four months during the winter season. Since resuming operations, he said, the contractor has succeeded in completing this project and all work was done by June 15, 1949. He recommended an extension of time up to June 15, 1949, only, without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

6. Denton Construction Company, Contract No. 2944, for grading and bituminous macadam surfacing on the Gardiner Section of the Oregon Coast Highway in Douglas County, requested an extension of time of 303 days from August 31, 1948 to June 30, 1949, within which to complete this job. This request was made by Glens Falls Indemnity Company, surety on the bond furnished by Denton Construction Company in connection with this job, due to the failure and default of Denton Construction Company. No reason was given for failure to complete the project within the specified time limit. The Engineer advised that the prime contractor defaulted his contract and the job was completed by the surety company. The prime contractor, he said, was very negligent in the handling of his work and apparently made no particular effort to complete the work within the specified time limit. Because of his method of operation it was necessary to maintain an engineering crew on the job almost continuously, with the result that the state incurred considerable extra expense for supervision. He recommended, in view of the circumstances, that the extension of time requested be granted but that the contractor be required to reimburse the state for all engineering expense incurred in connection with the project from August 31, 1948, to date of completion. The Commission approved the recommendation unanimously.

7. T. W. Thomas, Contract No. 2982, for grading and oil mat surfacing on the Campbell Ranch-Gerking School Section of the Athena-Holdman Secondary Highway, in Umatilla County, requested an extension of time of sixty days from June 30, 1949 to August 31, 1949, within which to complete this job. Mr. Thomas advised that surfacing on this

section was completed and the road ready for oiling by June 9, 1949. However, because of conflicting schedules of their equipment the J. C. Compton Company, sub-contractor for the oiling work, was unable to start such work early enough to guarantee completion within the specified time limit, with the result that additional time is required. The Engineer advised that the J. C. Compton Company did not start the oiling work until July 5 due to prior requests from the Highway Department to complete other projects. However, the work was entirely completed on July 19. Because of the fact that the oiling work was delayed through no fault of the prime contractor, the Engineer recommended that an extension of time to July 19, 1949, actual date of completion of the job, be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

8. Kuckenberg Construction Company, Contract No. 2873, for grading, paving and structures on the Front Avenue (Sheridan Street to Bancroft Street) Section of the Pacific Highway West, Portland, requested an additional extension of time of twenty-five days, from May 30, 1949 to June 24, 1949, within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to minor adjustments in electrical work which prevented final cleanup of the premises. The Engineer advised that all work in connection with this project, except that mentioned by the contractor, was completed last Fall. The traveling public, he said, has not been inconvenienced by the delay. He recommended that the extension of time now requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

9. C. J. Eldon, Contract No. 2997, for regrading, surfacing and oiling the Yellow Creek-Calapooya Creek Section of the Elkton-Sutherlin Secondary Highway, in Douglas County, requested an extension of time of ninety-two days, from July 31, 1949 to October 31, 1949, within which to complete this job. He attributed his failure to complete the project within the specified time limit to the following: delay in the delivery of culvert pipe due to the Columbia River flood in May, 1948, which inundated the plant of the Collins Concrete and Steel Pipe Company; extremely adverse weather conditions during the winter of 1948-1949; highwater difficulties in the Umpqua River which prevented access to specified gravel bars. The Engineer advised that the contractor has been very dilatory in handling this project and in his estimation there is no reason why the work cannot be completed by September 30, 1949. The contractor was delayed somewhat, he said, by exceptionally high water in the Umpqua River, which covered the bar from which he was securing his gravel, and in view thereof he recommended that the Commission grant an extension of time to September 30 without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

10. Coast Construction Company, Contract No. 3054, for topsoiling and seeding on the Front Avenue (Sheridan Street to Bancroft Street) Section of the Pacific Highway West in Portland, requested an additional extension of time of fifteen days, from June 1, 1949, to June 15, 1949, within which to complete this job. They gave the following reasons for

overrunning the previously extended time limit: another contractor had not finished his work on the areas; the contract work was increased about ten percent. The Engineer explained that this project was extended to take in an additional area south of Pennoyer Street, which necessitated additional time. He also stated that the work was delayed because of failure of the Kuckenberg Construction Company to clean up the area to be landscaped. He recommended in view of the circumstances that the extension of time requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission unanimously approved the recommendation.

11. E. C. Hall Company, Contract No. 3091, for repairs to the Vancouver Avenue Bridge over the Columbia Slough, on Secondary Highway No. 122 in North Portland, requested an extension of time of fifty-three days, from May 31, 1949 to July 23, 1949, within which to complete this job. They alleged that the overrun of time limit resulted from inability to obtain concrete finishers from the local Union, and from difficulties experienced in obtaining clear cedar for handrail construction. The Engineer advised that this contract was completed, except for the finishing of the concrete surfaces and for painting the handrail, on May 25, within the time limit specified for completion of the entire job. Traffic, he said, has not been inconvenienced by the delay, neither has the state incurred any extra expense for engineering supervision. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

12. R. & M. Construction Company, Contract No. 2995, for bridge construction on the Pleasant Hill-Lost Creek Section of the Willamette Highway in Lane County, requested an additional extension of time of sixty days, from July 31, 1949 to September 29, 1949, within which to complete this job. They gave no reason for failure to complete the project within the previously extended time limit. The Engineer advised that this contract was awarded on March 15, 1948, with a specified completion date of October 31, 1948. However, due to adverse weather conditions the U. S. Engineers' grading contractor, who built the railroad grade under the structure, was delayed in his work, with the result that R. &. M. Construction Company could not start work on the structure until September 1, 1948, which did not allow time to complete the job during the 1948 construction season. All of the concrete work, he said, has been placed and the additional time now required is simply to finish the concrete surfaces and to clean up the site. He recommended that the extension of time now requested be granted without penalty. The Commission approved the recommendation.

The Commission, in discussing requests for extensions of time as listed above, considered but did not necessarily adopt the recommendations of the Engineer and the reasons given by the contractors for failure to complete their projects within the specified time limits.

The Engineer reported that Contracts Nos. 2873, 2891, 2947, 2968, 2990, 3010, 3054, 3059, 3081, 3088, 3091, 3092, 3136, 3234, 3142, 3143, 3145, 3164 and 3197 for State Highway construction have been completed according to

the requirements of the contracts and modifications thereof, and that said jobs are now ready for acceptance. After due consideration of the Engineer's report with respect to the contracts under discussion, the Commission approved and accepted the said contracts as reported, and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2873 with Kuckenberg Construction Company for structures, grading and paving on the Front Avenue (Sheridan Street-Bancroft Street) Section of the Pacific Highway West, in Multnomah County; completed June 24, 1949.

Contract No. 2891 with K. F. Jacobsen & Co., Inc. for grading and bituminous macadam surfacing on the West Union-Cornelius Pass Section of the Hillsboro-Cornelius Pass County Road, in Multnomah and Washington Counties; completed April 30, 1949.

Contract No. 2947 with Leonard & Slate, Oregon Ltd. for grading and paving on the Roseburg-Dixonville Section of the North Umpqua County Road, in Douglas County; completed June 27, 1949.

Contract No. 2968 with M. L. O'Neil & Son for grading and oil mat surfacing on the Gunnell Road-Robertson Bridge Section of the Rogue River Loop Highway, in Josephine County; completed July 9, 1949.

Contract No. 2990 with Inter City Sand and Gravel Company for regrading and surfacing on the Mud Creek-Drake Creek Section of the Warner Secondary Highway, in Lake County; completed June 15, 1949.

Contract No. 3010 with Warren Northwest, Inc., for grading, paving and structure on the Oregon City-New Era Section of the Pacific Highway East, in Clackamas County; completed June 18, 1949.

Contract No. 3054 with W. D. Redeman, dba Coast Construction Company, for topsoiling and seeding on the Front Avenue (Sheridan Street-Bancroft Street) Section of the Pacific Highway West, in Multnomah County; completed June 15, 1949.

Contract No. 3059 with Archie R. Averill for constructing Division Office building at Bend, in Deschutes County: completed June 27, 1949.

Contract No. 3081 with Erwin E. Batterman for constructing an office and storage building at Salem, in Marion County; completed July 7, 1949.

Contract No. 3088 with Archie R. Averill for constructing a maintenance building at Lapine, in Deschutes County; completed June 30, 1949.

Contract No. 3091 with E. C. Hall Company for repairs to the Vancouver Avenue Bridge on the Vancouver Avenue Secondary Highway, in Multnomah County; completed July 21, 1949.

Contract No. 3092 with Vernie Jarl for furnishing crushed material in stockpiles on the Burns Section of the Central Oregon, the John Day-Burns, and the Burns-Crane Highways, in Harney County; completed June 14, 1949.

Contract No. 3136 with J. N. & M. J. Conley for reoiling on the Toledo-Simpson Creek Section of the Corvallis-Newport Highway in Lincoln County; completed July 15, 1949.

Contract No. 3139 with Archie R. Averill for constructing an addition to maintenance station building at Albany, in Linn County; completed June 22, 1949.

Contract No. 3140 with Erwin E. Batterman for constructing a storage shed at Salem, in Marion County; completed July 8, 1949.

Contract No. 3143 with Newport Construction Company and Russell Olsen for grading and oil mat surfacing on the Umatilla Section of the Columbia River Highway, in Umatilla County; completed July 18, 1949.

Contract No. 3145 with Durbin Bros. for grading and oil mat surfacing on the Amity-Hopewell (Units 1 & 2) Section of the Bellevue-Hopewell Secondary Highway, in Yamhill County; completed July 8, 1949.

Contract No. 3164 with Parker-Schram Company for paving on the Gresham (Roberts Avenue) Section of Gresham City Streets, in Multnomah County; completed July 28, 1949.

Contract No. 3197 with Parker-Schram Company for pavement resurfacing on the Toledo (South Main Street) Section of Toledo City Streets, in Lincoln County; completed July 20, 1949.

NOW THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission discussed a proposed agreement with the City of Bend covering installation and maintenance of radio receiving equipment on the site of the city's reservoir on Overturf Butte. The Engineer advised that the agreement covers a period of five years and provides for an annual payment by the state of $30.00 for power consumption of the equipment. He recommended approval of the agreement. The Commission approved the recommendation unanimously. (The agreement was signed on the following day.)

Assistant Counsel J. W. DeSouza reported a request from Mr. H. C. Burnworth for release from his obligation with respect to salvaging some culvert pipe in John Yeon State Park adjacent to the Columbia River Highway in Multnomah County. He advised that Mr. Burnworth is one of two brothers who some time ago entered into an agreement with the Commission for the removal of this pipe from the park, and in connection therewith they posted a bond in the amount of $500 to guarantee satisfactory completion of the arrangement. They have removed some of the pipe, he said, a quantity valued at $170.63, and wish to be relieved of the further obligation because they have run out of money and the removal is costing them more than they can realize out of the pipe. They are willing to pay for the pipe that has been taken if the Commission insists. The Assistant Counsel also stated that the State Parks Superintendent reports that Burnworth Brothers caused no damage whatsoever to the park and it is his recommendation that they be relieved of their obligation. He recommended cancellation of the agreement without penalty, and that Burnworth Brothers not be required to pay for the pipe they have removed, due to the fact that they lost money on the deal. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The meeting adjourned at 5:00 p.m. to reconvene the following morning in the same room.

Portland, Oregon
August 2, 1949

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben. R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction were opened and read aloud by the Secretary in conformance with previously published notice, following which Chairman Banfield announced that the awarding of contracts would be announced at 3:00 p.m. the same day.

JOHN DAY HIGHWAY IN BAKER COUNTY

FOREST BOUNDARY-UNITY JUNCTION SECTION

E. C. Swaggart, Eugene	$ 182,677.00
C. E. Leseberg, Nyssa	199,880.50
Vernie Jarl, Gresham	205,375.00
P. B. Doherty & Son, Portland	208,968.00

Werner & Jeske, Eugene	19,084.00

August 2, 1949

Mr. Tom Watters, Chairman of Road Committee, Klamath Falls Chamber of Commerce, appeared before the Commission and urged acquisition of right of way for the proposed improvement of the Klamath Falls-Lakeview Highway on South Sixth Street, in Klamath Falls, particularly at the proposed overpass of the Southern Pacific Railroad tracks. Mr. Watters stated that the overpass is their No. 1 project and that the right of way should be acquired now before the area is industrially developed. He gave figures on the cost of the property and advised that they are 'rock-bottom' figures set by the owners. Chairman Banfield advised that this matter is comparatively new to the Commission and that even were the Commission to acquire the right of way now it would make no commitment as to construction. He inquired if the people of Klamath Falls feel that this project should be given preference over the improvement of the Algoma Section north of Klamath Falls, to which Mr. Watters replied that while it is the city's No. 1 project they do not want it given priority status over the other project. Chairman Banfield concluded the discussion by stating that the Commission will discuss the matter with the Engineer and Chief Counsel and determine how much, if any, money it would be possible for the Commission to allocate to the project. The Engineer was thereupon instructed to render a complete report on the subject at the next meeting, including maps, estimates of cost of construction and right of way.

The following persons, representing the Lincoln County Court and the U. S. 20 Association, appeared before the Commission regarding improvement of the Corvallis-Newport Highway between Toledo and Newport: H. G. Rumbaugh, member of Chamber of Commerce, Albany; Kurt Kiesow, member of Toledo Chamber of Commerce and President of Highway 20 Association; County Judge T. E. Gilkey, Newport; State Senator Russell L. Gardner, Newport; County Commissioner Jack S. Patterson, Depoe Bay; County Commissioner L. T. Grant, Harlan; County Engineer D. B. Ambler, Newport; State Representative Jerry Wade, Newport; President Tom Becker of Newport Chamber of Commerce; Mayor Claude Hall of Waldport; Theo S. Stansbie, Lincoln Hotel, Toledo; B.F. Updike, Highway 20 Association, Toledo; Manager L. R. Stockton of Newport Chamber of Commerce; Mayor M. G. Hammerness of Toledo; James M. Howes, Secretary-Treasurer of U. S. Highway 20 Association, Newport; and Mayor Martin Shriver of Newport.

President Kurt Kiesow of Highway 20 Association headed the group. He pointed out that the existing highway is extremely crooked and that the proposed new alignment would shorten the distance between Toledo and Newport about two miles as well as reduce the curvature by about 90 percent. He recalled that the Commission some time ago stated that it might flatten some of the curves on the present road so as to cut down accidents, which he alleged are now abnormally high on this section; however, he added, after giving the matter further thought the people he represents have decided that it would be better were right of way acquired for the new line, and that is what they are recommending today, construction to follow later when the Commission can finance it. Mr. Ambler endorsed the remarks of Mr. Kiesow and urged a survey and acquisition of right of way while it can be purchased at reasonable cost. Chairman Banfield stated that the Commission has had this section in mind for some time and realizes that its improvement is necessary, but the work will have to be done in short sections because funds available will not permit doing it all at one time. The Commission at its next meeting, he said, will consider survey projects and will keep this project in mind when the matter is discussed.

City Attorney B. D. Iseminger and City Manager C. V. Signor, representing the city of Pendleton, appeared before the Commission regarding purchase by the city of 7.2 acres of State Highway property adjacent to the Pendleton Airport Road, which matter previously had been discussed by the Commission. Mr. Iseminger was spokesman. He reviewed the history of negotiations to date and advised that the City Council has authorized them to deal with the Commission for the purchase of the tract. Chairman Banfield advised that when this matter first came to the Commission's attention it was on the basis that the city wanted the property for city use, but since then it has developed that the property is to be used for other purposes, in view of which the Commission has decided that it will not sell the 7.2 acres unless the purchaser will also take the balance of the tract of which the 7.2 acres is a part, less two small tracts fronting on the Old Oregon Trail which the Commission wishes to retain, and will pay for it the amount that the state has invested in it, such transaction being contingent also upon the state's being relieved of future responsibility for the Pendleton Airport Road. If the State can realize from the sale of the property approximately the same amount that was paid for it and can get rid of the road, then, he said, the Commission will sell it, but not otherwise. He added that it is up to the city and the county to get together and take over the property and the road, else the Commission will dispose of it to private parties. He reiterated that the Commission is not interested in selling the property unless it sells all in one transaction and gets rid of the road. That concluded the discussion

The County Court of Jackson County, represented by County Commissioner L. G. Morthland and County Engineer Paul B. Rynning, appeared before the Commission regarding construction of two bridges over the Rogue River as a substitute for the Sams Valley Highway project in the Second Postwar Construction Program, one of the bridges being in the town of Rogue River and the other, known as Bybee Bridge, being near TouVelle State Park

Mr. Rynnirg declared that the bridges are of far more importance to the county than is the improvement of the Sams Valley Secondary Highway, and he urged that they be included in the program. Chairman Banfield brought into the discussion the matter of county cooperation, in view of the fact that both bridges are on the county road system. He inquired whether the county would construct one of the bridges if the state constructed the other. Mr. Morthland replied in the affirmative, whereupon the Commission decided unanimously to include construction of one of the bridges in its Federal Secondary Highway program as well as the Sams Valley project, on the condition that the county actually constructs the other bridge at county expense. The decision as to which bridge the county would build was decided on the flip of a coin. The toss was won by the County, whereupon Messrs. Morthland and Rynning elected to build the bridge in the town of Rogue River. The Commission ordered the matter covered by appropriate written agreement.

Mr. Albert Strain, log hauler, Bandon, appeared before the Commission concerning reinstatement of his log hauling permit which was cancelled on June 27, 1949 for consistent violation of the rules and regulations governing his operations on state highways. The Engineer recited the violations and read aloud a letter from Mr. Strain stating his intentions hereafter to abide by the rules and regulations to the best of his ability. After

discussion, during which the seriousness of his offenses was impressed upon Mr. Strain, the Commission authorized the immediate reinstatement of his permit, with the admonition, however, that another violation would cause permanent cancellation of his permit.

The Commission also considered a request from Mr. S. O. Wilson, log hauler, Trail, for reinstatement of his permit which was also revoked on June 27, 1949, for similar violations of the rules and regulations. The Engineer read aloud a letter from Mr. Wilson stating his intention hereafter to abide by the rules and to purchase a set of scales to weigh his loads to insure against overloading. He recommended reinstatement of the permit, subject to the same condition - that his permit will be cancelled permanently if he commits another violation. The Commission approved the recommendation and so ordered.

The Commission considered a request from the Sportsmen Pilots of Oregon that a strip of the ocean beach approximately one mile in length and 500 feet in width, about three miles south of Netarts in Tillamook County be set aside as a landing area for aircraft. The Commission deferred action on this matter pending the filing of an application in conformity with the requirements of law, and ordered that the Sportsmen Pilots be advised thereof.

A request from Clatsop County for the loan of $99,091.27 under the provisions of Chapter 358, Oregon Laws, 1949, was considered by the Commission. The Engineer advised that this application is in order, and recommended approval of the same. The Commission unanimously approved the recommendation.

The Engineer requested authority to purchase equipment as follows, which the Commission unanimously approved:

15	Medium trucks, 4-wheel drive	at $ 6,000 -	$ 90,000	
1	Large truck, 28,000 lbs. gross	at 11,000 -	11,000	
2	Light rotary snowplows	at 9,000 -	18,000	
8	A-1 snowplows	at 500 -	4,000	
	Subtotal			$ 123,000
10	Transits	at $ 650 -	6,500	
6	Levels	at 300 -	1,800	
	Subtotal			8,300
	Lathe (La Grande)		$ 8,500	
	Pedestal grinder (Salem)		300	
	Car and truck lift (La Grande)		2,200	
	Small tools and torches		650	
	Subtotal			11,650
	Outboard motor for use by the bridge department inspecting bridges			175
	TOTAL			$ 143,125

The Engineer brought up for discussion the matter of extending the reduced speed zone on the Pacific Highway south of Grants Pass, particularly from Mile Post 279.62, near the C. & O. C. Railroad grade crossing, to Mile Post 280.12, near Parkdale Drive. He advised that numerous oral requests have been received to extend the existing 25-mile-per-hour speed zone which ends near the railroad crossing, but investigation reveals that a limit of 45 miles per hour is all that is required. He recommended designation of a 45-mile-per-hour speed zone for this section. The Commission approved the Engineer's recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto, marked Exhibit "F", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported numerous verbal requests from local residents of Corvallis and from the Corvallis City Council for designation of a reduced speed zone on US99W immediately north of Corvallis. He said investigation shows that a 45-mile-per-hour speed zone is warranted between Mile Post 83.22, at Walnut Drive, and Mile Post 84.7, at the north city limits of Corvallis, and he recommended approval of the same by the Commission. The Commission approved the Engineer's recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto, marked Exhibit "G", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed requests for a speed limit lower than the 40-miles-per-hour limit that is now in effect on the Eugene-Junction City Secondary Highway through the town of Santa Clara, and a request for extension of the existing 40-mile-per-hour speed zone on the Klamath Falls-Lakeview Highway easterly from the Klamath Falls city limits. Action on both requests was deferred by the Commission pending further study and report by the Engineer.

The Commission considered a request from the Coos County Highway Council for a study of the traffic situation at the junction of the Powers Secondary Highway with the Coos Bay-Roseburg to eliminate the hazard that is created when logging trucks enter the Coos Bay-Roseburg Highway from the other. The Engineer advised that this matter has been investigated and it has been determined that what these people want is the removal of the existing stop sign which would permit traffic to enter the Coos Bay-Roseburg Highway without stopping. He gave as his opinion that allowing traffic to enter this highway without stopping would not alleviate the hazardous condition referred to, but in effect would tend to increase it, because traffic on the main highway expects traffic approaching from side roads to stop. The accident rate at this intersection is not bad, he said, the records disclosing only three accidents during the period from January 1, 1946 to March 31, 1949. It was his thought that the situation would be relieved by simply installing oversized 'slow' signs on the Roseburg-Coos Bay Highway near the intersection, and he so recommended. The Commission unanimously approved the recommendation.

A request was presented from Mr. J. W. Defiell, Credit Manager of the Archer Blower and Pipe Company, Inc., that measures be taken to relieve traffic congestion at the west end of the Sellwood Bridge in Portland. The

Engineer said investigation reveals traffic confusion at this point which in his estimation could be relieved by forcing northbound traffic to use the easterly lane under the bridge. In order to accomplish this he recommended installation of a sign reading, "Form One Lane," to be followed at a distance of 200 feet by another sign, reading, "Keep to Right," and a simulated traffic divider painted on the pavement. The Commission unanimously approved the Engineer's recommendation.

The Commission considered an ordinance from the City Council of Klamath Falls, being Ordinance No. 4264, requesting that the state install and maintain pedestrian lanes at the intersection of Oregon Avenue and Donald Street and at the intersection of Riverside Street and West Main Street, both intersections being on state highway routes. The Engineer recommended that the request be denied, because the streets concerned are city streets and it is contrary to the Commission's established policy to paint pedestrian lanes within a city other than at school crossings. Moreover, the city has full authority to paint such crosswalks as it desires. The Commission unanimously approved the Engineer's recommendation.

A form of resolution prepared by the Chief Counsel designating a "No Parking" zone on Edgewater Street (Salem-Dallas Highway) between the Willamette River Bridge and Clark Street in West Salem was considered by the Commission. It was explained that the section concerned is within the City of Salem, that the City Council has already adopted an ordinance providing for such "No Parking" zone, and that the resolution now under discussion is simply to supplement the city's ordinance. The Engineer recommended adoption of the resolution to confirm action taken by the Commission at the previous meeting. The Commission unanimously approved the Engineer's recommendation and thereupon adopted the resolution and instructed the Secretary to insert it in the minutes of the meeting held on June 27 and 28, 1949.

The Right of Way Engineer presented an inquiry from the U. S. Department of the Interior as to whether or not the Highway Commission has objections to the granting of oil and gas leases on Federal land under lease by the State Highway Department in Lake County. The Engineer advised that the land in question is a forty-acre tract situate adjacent to the Fremont Highway about two and one-half miles west of Paisley, which was acquired for use as a gravel pit, and the inquiry concerns the granting of oil and gas leases on a portion of the property. He recommended approval of such leases provided the state's use of the area is not interfered with and the state's interests are fully protected. The Commission adopted the recommendation unanimously, subject to approval by the Chief Counsel of the form of lease proposed to be used.

A delegation from Portland including members of the Parkrose Chamber of Commerce and others, as follows, was present and requested the widening of Sandy Boulevard (route of the Columbia River Highway) to accommodate four lanes of traffic between Portland and Troutdale: M. W. Bowerman, President, Robert A. Freeman, Treasurer, and Harry H. Pearce, Director, all of Parkrose Chamber of Commerce; Charles B. Rutherford and George Denfeld, members of the Upper Sandy Organization, Portland, F. M. Hathaway, Oregon State Motel Association, Portland; and Douglas Gerow, Eastside Commercial Club, Portland.

Mr. Bowerman headed the group. He alleged that the existing three-lane facility is very dangerous and that a four-lane highway is a necessity. Chairman Banfield advised that the Commission has had no favorable discussion whatever as to providing a four-lane facility along this section. He gave as his considered opinion that it would not be good business to build a four-lane highway here, and later on to construct a two-lane highway out Sullivan Gulch, which would mean providing six lanes, a greater total than the Commission can either justify or finance. The matter was discussed at considerable length during which Messrs. Pearce and Rutherford endorsed the remarks of Mr. Bowerman and the Commission reasserted that it has no intention to widen Sandy Boulevard for four traffic lanes. Mr. Pearce complained of the maintenance of the shoulders between 109th Avenue and 122nd Avenue. He declared that these shoulders have had no maintenance for three or four years, and urged that they be oiled. He also urged construction of a four-lane highway as far as 122nd Street if the Commission cannot see its way clear to provide such a highway as far as Troutdale. He was informed that the Commission previously ordered the oiling of the shoulders and that the Engineer would look into the matter within the next ten days; also, that the Engineer will investigate the matter of widening between 109th and 122nd Avenues.

The meeting recessed for luncheon at 12:15 p.m. and reconvened at 2:00 p.m. in the same room, with the same persons present and participating.

A delegation headed by Eberly Thompson of the M. & M. Woodworking Company, Portland, and including the following, appeared before the Commission regarding the proposed abandonment of the railroad along the North Santiam River between Mill City and Idanha, and the acceptance of the North Santiam Highway by the State Highway Commission:

Mrs. R. D. Johnson, President, and Mesdames Zetta Schlador, J. A. Wright, Crystal Taylor and Janet Nelson, of the Detroit Women's Civic Club;
Ed Vickery, President, and Messrs. H. D. Burt and J. L. Taylor, representing the Canyon Commercial Club, Detroit;
R. D. Johnson, Mr. and Mrs. Bruce Houck, Wm. Coulter, Mrs. J. C. Fowler, E. R. Stevens, Otto Russell, all of Detroit;
Mr. and Mrs. S. A. Beck and Mrs. Perry Fry, of Canyon Garage, Detroit;
Otis J. White, Superintendent of Schools, Detroit;
Clay Cochran, Manager, Salem Chamber of Commerce;
Howard J. Baldwin, representing the American Legion Post, Detroit,
R. P. Veness, representing the Mill City Chamber of Commerce;
S. Parzy Rose, representing the Silverton Chamber of Commerce,
Ivan E. Oakes, representing the Willamette Basin Project Commission;
C. G. Hovey, Manager, Logging Division, Vancouver Plywood Company, Vancouver, Washington;
Herbert Malarkey, President, Walter Hoffman and Henry Sause, representing M. & M. Woodworking Company, Portland;
Walter Bell and Joe Devers, Jr., attorneys, Stayton;
Vern Alvin, representing Idanha Veneer Company, Idanha;
Sam Palmerton, representing Idanha Shingle Company;
R. C. Haseman, representing Haseman Trucking Company;
Huber Ray, representing Ray & Adams Logging Company;
John Sunquist, representing Idanha Lumber Company;
Milo Harris, representing Pamelia Lumber Company;
Fred Sievers and Mr. and Mrs. Morris Van Someren, all of Idanha

Also present and entering into the discussion were the following:

Frank E. Andrews, Principal Highway Engineer)
R. N. Kellogg, Senior Highway Engineer) Representing the Bureau of Public Roads
Tom Davis, District Engineer)

Lt. Col. D. A. Elliget, Acting District Engineer)
O. L. Hoffman, District Real Estate Supervisor) from the U. S. Engineers

Following introduction of the members of the group by Mr. Alvin, Mr. Thompson made a statement to this effect: "We represent a group of industries and enterprises on the Mill City-Idanha Section of the North Santiam Highway. We are here today to place our case before you with regard to the abandonment of the railroad and acceptance of the highway by the State Highway Commission. It was our understanding at the beginning of the construction of the dam and the changing of the highway, that we were to be given a Class 'A' completed highway over which we could operate economically. We have been informed that the Army Engineers and the railroad are anticipating the abandonment of the railroad on either the 8th or 11th of this month, whereas it is our belief that the highway is not acceptable economically from the standpoint of operators who will use this road. We are here today as a representative group of the enterprises concerned. We think that the problem that we are here to discuss is one that could be handled best by interrogation on your part. We have one premise on which to proceed, and that is that we were assured that upon abandonment of the railroad we would be given a highway over which we could economically truck our produce and logs. Indications are, however, that that is not going to be the case. We wish today to make a case of the problem by appealing to you to appreciate our position and forestall the abandonment of the railroad until the highway has been constructed in an acceptable manner."

Chairman Banfield advised that the acceptance by the Highway Commission of the new highway is predicated upon its being completed to the Highway Commission's entire satisfaction. The Highway Commission, he said, is not being asked to accept the highway at the present time, but is simply being asked to approve the abandonment of the railroad so that the building of the Detroit Dam can proceed. He further stated that the Highway Commission is naturally interested in a highway that will take care of traffic in an easterly and westerly direction and do it in a substantial and satisfactory manner, but the Commission does not wish to interfere with the development of the Detroit Dam. He inquired what is necessary, in the opinion of the group, to make the highway one which will be acceptable to general travel through the canyon of the North Santiam River. He pointed out, however, that it must be recognized that the highway will not be finished upon abandonment of the railroad, because there will be approaches to construct and other work to be done after the highway has been opened to travel which would not very much concern or interfere with general travel back and forth over the highway. The main idea, he said, would be to provide a roadway over which traffic could move back and forth without too much restriction as to speed, roughness of road, and dust. He inquired if that is what the group desires or does it want an entirely finished highway before the railroad is abandoned. There followed a general discussion of the matter, during which Mr. Thompson stated that their main interest lies in the road surface and in the economic hauling of their produce out of this area, rather than a finished highway. Mr. Bell stated that they were assured

that they would be provided with a good highway when the railroad was abandoned, and naturally they thought it would be an oiled road. If only a rock-surface road is provided it will create a terrific traffic hazard because of the large volume of traffic which will have to use the road. He named some fifteen or more operators in the Detroit area alone. In reply to an inquiry from Chairman Banfield as to what percentage of traffic uses the railroad, Mr. Bell stated that about 95% of the logs and lumber taken out of this area is transported by rail. Mr. Alvin advised that about ninety car loads of logs and lumber are shipped daily from this district. He declared that the abandonment of the railroad at this time is premature.

Chairman Banfield again inquired as to what the group wants done to provide a satisfactory facility, and would a smooth surface with a reasonable amount of oil to allay the dust be satisfactory. He pointed out that the railroad must eventually be abandoned and that during the construction of the Detroit Dam and the highway, the public must expect to be inconvenienced somewhat. If the highway were fixed up so that traffic could use it at the rate of 25 miles per hour, he said, would that be satisfactory? Mr. Ray gave as his opinion that such a remedy would be satisfactory, provided the operators are not held up twenty-five to thirty days during the time the oiling operations are underway. In reply to an inquiry of Chairman Banfield, the Engineer stated he had the road checked yesterday and believed that a smooth road could be provided in about one week's time, but it would be quite dusty. He suggested a dust palliative as a temporary means of alleviating the nuisance. Mr. Malarkey and Mr. Vickery spoke in behalf of the group. Mr. Andrews, Bureau of Public Roads, under whose supervision the highway work is being carried on, advised that the Bureau of Public Roads wishes to complete the highway just as soon as possible, but it is not practical to construct a permanent oil surface on the road until next year. He gave as his thought that smoothing up the rock surface and sprinkling with water would provide a better road than the one now in use. He discouraged the use of a palliative of oil as being a waste of funds. Col. Ellijet advised that the Army Engineers are most anxious to open up the road so the railroad can be abandoned. If the railroad were not abandoned at once, he said, it would mean slowing down the construction operations for one year, which would mean the loss of annual benefits amounting to $2,500,000 Chairman Banfield inquired whether the program for construction of the Detroit Dam would be unduly retarded if the abandonment of the railroad were delayed until August 15, 1949, a matter of only eight days from the date now proposed for such abandonment. Col. Ellijet replied that he could not say definitely whether or not any harm would be done, although two weeks' delay would definitely hinder them. Chairman Banfield concluded the discussion by saying that the Commission will take the matter under advisement and will discuss it with the State Highway Engineer, the Bureau of Public Roads, and the U. S. Army Engineers and then announce its decision.

Following the departure of the group, the Commission resumed discussion of the matter with the State Highway Engineer. The Engineer recommended that the Commission join with the Bureau of Public Roads in opening the highway on or before August 14, 1949, on the condition that the Bureau of Public Roads, which is supervising the construction, will in the meantime smooth the grade, remove large stones, place a dust palliative of oil, and

will proceed to keep the surface of the roadway in a smooth condition by constant blading at all times.

The Commission adopted the recommendation unanimously, and then called into further discussion on the matter Col. Elliget and Mr. Hoffman of the U. S. Engineers, and Messrs. Andrews, Kellogg and Davis of the Bureau of Public Roads. Chairman Banfield repeated for the benefit of these Engineers the action the Commission had just taken and advised that the Commissioners are in agreement to join with the Bureau of Public Roads in recommending to the Interstate Commerce Commission the abandonment of the railroad when the highway is placed in a satisfactory condition, which he anticipated would take about two weeks' time. It is now up to the Engineers, he said, to determine whether or not the conditions can be met.

Mr. Andrews pointed out that July 1, 1949, was the date originally set for abandonment of the railroad, it being their thought from the construction standpoint, that the road would be sufficiently completed in that time. Progress was such, however, that the opening of the highway had to be postponed until a more opportune date. It was then set for August 1, and later advanced for safety reasons to August 8. He further stated that they contemplate keeping the roadway dustless by application of water, which is less expensive and in their estimation would serve the purpose just as well as an oil treatment. However, if the Highway Commission feels that a palliative of oil should be used, then the Bureau of Public Roads will agree. He suggested, though, that water be used for the first four miles at the west end, and oil for the rest of the way. He further stated that the Bureau of Public Roads does not have the facilities to apply the oil treatment by August 8 but will endeavor to do the job if the state will help out by furnishing equipment for this purpose.

Col. Elliget advised that the Army Engineers will support the Bureau of Public Roads as much as possible. He pointed out that the railroad company has gone ahead with its proceedings to abandon the railroad at 12:01 a.m. on August 11, and that the tariff rates have been declared abandoned effective August 10.

At the request of the Commission, the Engineer read aloud his recommendations as follows:

> The Engineer recommends that the Highway Commission join with the Bureau of Public Roads in opening the Niagara-Detroit Section of the North Santiam Highway on or before August 14, 1949, provided that the Bureau of Public Roads will in the meantime smooth the subgrade, remove the large stones and place a dust-palliative oil to lay the dust and proceed to keep the surface in a smooth condition by constant blading at all times

Chairman Banfield advised that the Commission feels that the application of oil palliative to allay the dust is not a waste of funds because it will take care of traffic in the emergency and will avoid extra expense and losses which would result from delay in the construction of the dam. The responsibility for placing the road in a satisfactory condition, he said, rests with the Bureau of Public Roads, and if the State Highway Commission can help to expedite the

opening of the road for general use, it will be pleased to do so. The Commission, he added, will proceed on the basis of the Engineer's recommendation, but not otherwise. The Chief Counsel advised that the Commission is in its rightful position in taking action in conformity with the Engineer's recommendation. The Commission thereupon again approved the recommendation and ordered that a typewritten copy of the same be transmitted to the Bureau of Public Roads, and a like copy to the U. S. Corps of Engineers. The conference was concluded by Chairman Banfield, who stated that the Highway Commission will sign the letter formally notifying the District Engineer, U. S. Corps of Engineers, that the Niagara-Detroit Section of the North Santiam will be opened to public travel by the Bureau of Public Roads on a certain date, when the conditions recommended by the State Highway Engineer have been satisfied. The Commission left it up to the Engineer, Mr. Andrews and Col. Elliget to set a definite date for the opening.

The Engineer later in the session reported that after discussing the matter he and Col. Elliget and Mr. Andrews had agreed that the highway would be opened to public travel by the Public Roads Administration on or before Sunday, August 14, subject to the conditions contained in his recommendation. The Commission thereupon signed the following letter dated August 3, 1949, directed to the District Engineer, Corps of Engineers, Department of the Army, confirming the arrangement:

August 3, 1949

District Engineer, Corps of Engineers
Department of the Army
628 Pittock Block
Portland 5, Oregon

Dear Sir:

This is to certify that the Niagara-Detroit Section of the North Santiam Highway (ORE222) will be opened to public travel by the Bureau of Public Roads on or before August 14, which public opening is concurred in by the State Highway Commission.

Concurrence of the Oregon State Highway Commission is based upon the presence of a dust-palliative oil surface over the entire section of road between Niagara and Detroit prior to the opening of the road and the understanding that it will be maintained in a smooth condition at all times by constant blading.

The road when completed (graded, surfaced and paved) will, by official act of the Oregon State Highway Commission, be made a state highway

This letter is not an acceptance of the road at this time or an offer to assume its maintenance, but is merely notice or advice that the road will be opened for public travel on the date above mentioned.

Very truly yours,

OREGON STATE HIGHWAY COMMISSION

/s/ T. H. Banfield
T. H. Banfield, Chairman

/s/ Ben R. Chandler
Ben R. Chandler, Commissioner

/s/ Chas. H. Reynolds
Chas. H. Reynolds, Commissioner

August 2, 1949

A delegation representing the Helix Chamber of Commerce consisting of the following persons appeared before the Commission and requested construction of a new highway starting at VanSycle, north of Helix, and extending thence northerly in Umatilla County to the Washington State line: Hon. Sprague Carter, State Representative, Pendleton; Harry Eaton, Chairman of Road Committee, Helix; S. E. Brogoitti, Member of Road Committee, Helix; and County Judge J. H. Sturgis, Pendleton.

Mr. Carter headed the group. He explained that they are requesting consideration of the development of a road that will extend from Helix to the Washington State line and connect with the Wallula Cut-off. Mr. Brogoitti pointed out that construction of the proposed route north of VanSycle would provide a water-grade route not exceeding 2½%, for the hauling of wheat to Wallula. He said that the present road south of VanSycle is oiled but there is no road whatsoever north of VanSycle. He filed with the Commission a number of letters endorsing their request. Chairman Banfield advised that according to the Engineer, it would cost about $432,000 to build this road, and even if built it would not shorten the distance from McNary Dam to Helix or Athena, so it would simply mean a duplication of highways, which the Commission does not have the funds to finance. He further stated that the Commission will discuss the project with the Engineer but entirely without any encouragement that it will be approved, because of the many obligations that have priority status. Mr. Carter and Mr. Brogoitti both stated that they did not anticipate immediate construction of the road but simply want the Commission to bear it in mind for future consideration.

The Commission discussed with the Engineer bids received at the morning session, and at 3:00 p.m. Chairman Banfield publicly announced awards of contracts as follows, the action of the Commission with respect to each project being by unanimous vote:

"Forest Boundary-Unity Junction Section of the John Day Highway in Baker County. 6.45 miles of grading, surfacing and oiling. E. C. Swaggart, Eugene, submitted the low bid for this job in the amount of $182,677. C. E. Leseberg, Nyssa, submitted the second low bid at $199,880.50. Seven higher bids were received. The Commission has awarded this contract to the low bidder, E. C. Swaggart.

"Gold Beach City Street Project in Curry County. 0.31 mile of grading, surfacing and oiling. Baker Paving Company, Coos Bay, submitted the low bid for this job in the amount of $23,375.30. R. & M. Construction Company, Central point, submitted the second low bid at $25,764.50. One higher bid was received. The Commission has referred all bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Klamath Falls (First Avenue-Esplanade Street) Roadside Improvement Project on the Klamath Falls-Malin Highway in Klamath County. C. S. Whitcomb Company, Portland, submitted the low bid for the work at $33,509. Western Golf Course Supply Company, Portland, submitted the next low and only other bid in the amount of $34,798.80. The contract has been awarded to the low bidder, C. S. Whitcomb Company.

"Klamath Falls, Klamath County, Traffic Signals at intersection of Esplanade and Main Streets. City Electric Company, Salem, submitted the low bid for this project in the amount of $3,180. Mill Electric Company, Salem, submitted the second low bid at $4,310. Two higher bids were received. The contract has been awarded to the low bidder, City Electric Company.

"Tillamook Street-Broadway Bridge Section of the Pacific Highway West in Portland, Multnomah County. Grading, surfacing and paving 0.464 mile highway roadbed and construction of three reinforced concrete structures. C. J. Montag and Son, Portland, submitted the low bid for this project in the amount of $865,911.50 L. H. Hoffman, Portland, submitted the second low bid at $885,818.85 Five higher bids were received. The Commission has referred all bids to the Engineer with the authority to award the contract to the low bidder when certain conditions have been met.

"Construction of a masonry block building for maintenance purposes in Dallas, Polk County. Erwin E. Batterman, Salem, submitted the low bid for this job in the amount of $11,779. T. J. Patzer, Salem, submitted the second low bid at $12,167. Four higher bids were received. The Commission has awarded the contract to the low bidder, Erwin E. Batterman."

The Chief Counsel brought up for discussion the matter of acquiring land from Mr. F. J. Noble to widen the right of way of the Mt. Hood Highway in Hood River County. He advised that recent investigations reveal that the present right of way is only forty feet wide, whereas a minimum width of sixty feet should be provided. Mr. Nobel, he said, has indicated a willingness to sell a strip ten feet wide on each side of the highway along his frontage for the sum of $400, but he also wants payment for the timber standing thereon, which has been appraised at $281, making a total payment of approximately $681.00. He requested authority to negotiate purchase of the property on such basis. The Commission approved the request unanimously.

Pursuant to previous instructions from the Commission the Engineer reported on the proposed agreement with the City of Salem covering construction of a new bridge across the Willamette River, the improvement of city streets approaching said structure, the designation of one-way street controls; parking restrictions and regulations; and particularly, details as to cost, etc., with respect to the individual items making up the overall project. He advised that because of certain revisions that have been made in the original plan, consisting of widening a portion of Fairgrounds Road and a portion of Portland Road in the northern part of Salem, the estimated total cost of the project has been increased by an amount of $50,000, the total now being $2,380,000 He presented for the Commission's consideration a proposed agreement with the City of Salem covering the subject in detail, and recommended approval of the same. The Chief Counsel concurred in the recommendation.

In the discussion of this matter Chairman Banfield expressed his readiness to approve the agreement if it meets with the satisfaction of the City Council. He further stated that the Commission does not intend to

press the city to act in the matter, and it may take six months' time within which to do so if it wants to, but the Highway Commission will not spend any money in the city of Salem in connection with the proposed plan until the city has taken official action on the agreement. Commissioners Chandler and Reynolds indicated their concurrence in the Chairman's statements. The Secretary was instructed to notify the Mayor of the City of Salem of the action taken as follows:

"The Commission had under consideration some aspects of the State-Salem highway-street-bridge project, and in answer to a question which had been asked by some citizens of Salem with respect to the time of execution of the said agreement, which agreement has been prepared and is now before the City Council for study, the Commission reasserted its former position to the effect that the Commission has never fixed a time limit and has not and will not attempt to in any way influence the City's decision or its execution of the proposed agreement. The Council may have sufficient time to reach a decision which, in the opinion of the Council, will be in the interests of the people of Salem."

The Commission discussed a proposed agreement with the Sauvies Island Drainage District authorizing state construction of a bridge on property owned by the District or under its control. The Engineer advised that the agreement protects the Drainage District against suits and claims resulting from the construction of the bridge up to but not beyond the time when it is completed. He also said that the contractor who is building the bridge has provided a bond to protect the state's interests, and recommended that the agreement be approved. The Commission unanimously accepted the Engineer's recommendation and later in the day signed the agreement.

The Commission considered an agreement with Mary M. and Walter E Kness providing for construction of a pipeline on their property adjacent to the Pacific Highway West in Washington County. The Engineer advised that the agreement provides that the state shall have a permanent easement for the construction and use of a drainpipe on the Kness property to prevent further erosion of the land and to provide a better drainage facility for the state. He recommended that the agreement be approved. The Commission unanimously accepted the Engineer's recommendation and later in the day signed the agreement.

The Engineer requested authority for F. B. Crandall, Traffic Engineer, to attend the annual meeting of the Institute of Traffic Engineers in Washington, D. C., September 25-28 at an estimated expense to the state of $340.00. The Commission unanimously approved the request.

The Commission confirmed telephonic authority previously given for John W. Cattrall, Acting County and City Relations Engineer, to attend a meeting conducted by the Bureau of Public Roads in San Francisco on July 20 and 21, for special study of matters pertaining to county administration.

The matter of designating personnel to represent the State Highway Department at the annual meeting of the American Association of State Highway Officials in San Antonio, Texas, October 10-14, had the attention of the Commission. The Commission unanimously authorized each member of the Commis-

sion, the State Highway Engineer and one Assistant, and the Chief Counsel and one assistant to attend this meeting at state expense, subject to approval by Governor McKay.

The Commission discussed a date for its next regular meeting and decided to hold such meeting on Monday and Tuesday, September 19 and 20, in the Imperial Hotel, Portland. The Commission also set Friday, August 19, for a special meeting to discuss with the architects details with respect to the plans for the proposed State Highway Department Office Building in Salem.

The Commission approved and signed a quitclaim deed conveying to the Southern Pacific Company reversionary interest in the abandoned railroad right of way lying adjacent to the North Santiam Highway in Marion County. The Chief Counsel explained that the deed is necessary in order to clear the title for the benefit of the Railroad Company.

The Commission approved the sale, for $25.00, of a neon sign acquired in connection with the purchase of the Poquette-Aschenbrenner property as right of way for the Dodson-Bonneville Section of the Columbia River Highway.

There was presented for the Commission's consideration a letter from the city of Astoria agreeing to pay one-half the cost of conducting a traffic survey in Astoria if the Highway Commission will allow the city to pay a portion of its share in labor. The Engineer recalled that the Commission at its previous meeting approved the traffic survey which is estimated to cost $2,000, on the condition that the city of Astoria would pay one-half the expense. The City Council, he said, has accepted the offer but requests that it be permitted to pay its share partially with labor furnished. He recommended approval of the request. The Commission unanimously approved the recommendation on the condition that the labor furnished is what is needed, and ordered that the matter be covered by written agreement between the city and the state.

The Commission considered a request from the Cave Junction Planning Commission for the widening of the pavement on the Redwood Highway through the city of Cave Junction. The Engineer estimated the cost of such improvement at $70,000. He questioned the justification of the expenditure because the traffic volume is not very large and because there are other cities in the state where widening work is more urgent. The Commission denied the request.

The Engineer reported on the cost of construction and right of way for improvement of the Santiam Highway through the city of Sweet Home, particularly from its junction with the Halsey-Sweet Home Secondary Highway to a point about 3,525 feet easterly thereof at the end of the section previously widened just south of 18th Street. He estimated the total cost of improvement at $186,000, of which $69,000 represents right of way costs and $117,000 cost of construction. He said that it is a meritorious project and recommended its approval, the cost to be paid from funds set up in the 1950-51 Major Betterment account. In the discussion following, it was brought out that the city has not yet fulfilled its obligation originally

agreed upon, with respect to furnishing right of way. In view thereof the Commission decided to postpone the project until the city has met the requirements, and then proceed with the improvement. The Engineer was instructed to inform the City Council of the action taken.

The Commission discussed briefly with the Engineer and the Chief Counsel the installation of a traffic divider in Highway 99E, a short distance north from the city of Milwaukie. The Chief Counsel advised that under the law the Commission would have authority to install the divider as a safety measure. The Engineer recommended approval of the installation, which he estimated would cost about $20,000, in order to stop left turns on this important four-lane thoroughfare. He was instructed to report the matter in detail at the next meeting.

The Chief Counsel reported that agreement has been reached with Wasco County and its Consulting Engineers with respect to all matters concerning the bridge that the county proposes to construct across the Columbia River near The Dalles, in view of which the Commission can take definite action on the matter at this time if it so desires. He presented a form of resolution for adoption by the Commission and explained that it has been prepared in conformity with the Commission's ideas as previously expressed. Following discussion the Commission approved and unanimously adopted the said resolution, a copy of which, marked Exhibit "H", is attached hereto and by this reference is made a part of this record with like effect as though extended in full herein.

Commissioner Chandler reported that the Coos County Court is very anxious for a bridge across the Lower Coquille River at Bullards and is formulating plans to finance its half of the total cost, estimated at $300,000, by the sale of bonds, if the state will pay the balance. The Commission held this matter over for discussion at its next meeting.

The Engineer reported that the Civil Service Commission and the State Budget Director have approved a new classification for the Chief Accountant, Mr. Malcolm Hawke. It is 'Highway Comptroller', with salary range from $460.00 per month to a maximum of $580 per month; and they have set Mr. Hawke's salary in such classification at $560 per month. He recommended approval of such reclassification and salary increase effective as of July 1, 1949. The Commission approved the recommendation unanimously.

The Commission signed agreements, etc., as follows:

Agreement with Ralph Watson covering his appointment as Public Relations Consultant. (Approved by Commission June 28, 1949)

Resolution approving new permit forms covering operation of trucks on state highways.

Agreement with United States of America terminating permit for use of portion of Helmick State Park, Polk County.

Deed conveying unto R. L. Bourke property situate along Oregon Coast Highway in vicinity of Nehalem Bay, Tillamook County.

Agreement with Union Pacific Railroad Company covering landscaping of its property abutting Troutdale-Dodson Section of the Columbia River Highway, Multnomah County.

Agreement with City of Eugene covering installation of traffic signals at certain street intersections in Eugene, Lane County.

Agreement with U. S. Forest Service covering construction, maintenance, and use of timber-access road across Neptune State Park, Lane County.

Agreement with City of Bend covering installation and maintenance of radio receiving equipment at city reservoir on Overturf Butte.

Permit agreement with Louise S. Bisaillon covering use of small strip of state land abutting her property near Oswego on the Oswego Highway, Clackamas County.

Deed conveying unto Louise S. Bisaillon small parcel of highway right of way on Oswego Highway near Oswego, Clackamas County.

Application form covering acquisition from U. S. Department of the Interior small parcel of Indian land needed for relocation of Big Eddy-Dune Section of the Columbia River Highway near Celilo Canal, Wasco County.

Agreement with City of Gold Beach covering revised "Option for Cooperative Construction Project" in that city

Agreement with U. P. R. R. Co., O. W. R. & N. Co., City of Baker, and Sumpter Valley R. R. Co. covering construction of Dewey Avenue Undercrossing on Baker-Unity Highway, Baker.

Agreement with U. P. R. R. Co., Western Union Telegraph Co., and O. W. R. & N. Co. covering encroachment on Front Avenue Project, between Tillamook Street and Broadway Bridge, Portland.

Agreement with Clyde B. Miller covering grazing of sheep in Cape Sebastian State Park, Curry County, for one-year period ending June 13, 1950. (Approved by the Commission on June 27, 1949)

Agreement with Mary M. Kness granting permission to the state to construct and maintain a pipeline across her property abutting the Pacific Highway West and the Tualatin River, Washington County.

Cooperative Agreement with the Bureau of Public Roads covering improvement of the Timberline Lodge Road, Clackamas County (Approved by the Commission for the 1950 Forest Highway Program on April 12, 1949)

Agreement with Robert Fromm covering grazing of sheep in Humbug Mt. State Park for one year ending June 13, 1950. (Approved by the Commission on June 27, 1949)

Timber sale agreement with Franck Brothers Logging Company covering removal of salvage timber adjacent to the Wilson River Highay, Area No. 9. (Approved by the Commission on June 27, 1949)

Agreement with Sauvies Island Drainage District authorizing construction of a bridge by the state on property owned by the District

Quitclaim Deed conveying unto Southern Pacific Company reversionary interest of state in abandoned railroad right of way lying immediately south of North Santiam Highway.

Timber sale agreement with Earl E. Evans re cutting and removal of salvage timber in Clatsop County.

Agreement with Belle Turner re grazing of sheep in state park, Curry County.

Agreement with Walter Berndt Construction Company re Contract No. 3115.

Project Agreement - Sundial Section, Columbia River Highway.

Project Agreement - Sundial Undercrossing Structure, Columbia River Highway.

Project Agreement - Troutdale-Dodson Section, Columbia River Highway.

Project Agreement - Troutdale-Dodson Section, Columbia River Highway.

There being no further business to come before the Commission at this time, the meeting adjourned at 4:30 p.m.

Minutes of August 1 and 2, 1949

RESOLUTION

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon as set forth and defined in the Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Alsea Highway is a highway under the jurisdiction and control of the State, and in addition, a part of the federal highway system; and

WHEREAS, for the purpose of providing a highway with a better alignment and which will more adequately serve the traveling public, the Highway Commission, in cooperation with the United States, relocated the Scott Creek Section of the said highway, and for such purpose in connection therewith the real property hereinafter described is necessary;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there is needed and required for right of way for use in connection with the construction and maintenance of the Scott Creek Section of the Alsea Highway parcels of property bearing the Commission's record file numbers as set forth below and described as follows, to-wit:

R 14568
Parcel No. 1:

A parcel of land lying in Lots 3 and 4 of Section 36, Township 13 South, Range 10 West, W. M., Lincoln County, Oregon; the said parcel being all that portion of said Lots 3 and 4 of Section 36 included in a strip of land of variable width, lying on each side of the center line of the Alsea Highway as said highway has been relocated over and across or adjacent to the said property; the location of the said strip of land being determined by the said center line from Station 623+86 to Station 647+19 which portion of center line is described as follows:

Beginning at a point which is Engineer's Station 623+86 opposite and 50 feet distant from which point the northerly line of said strip of land intersects the west boundary of said Lot 4, Section 36, said point being south 1398 feet and east 2654 feet from the northwest corner of Section 36; thence South 66° 38' East a distance of 472.56 feet; thence on a spiral curve left (the long chord of which bears South 71° 08' East) a distance of 300 feet; thence on a 636.62 foot radius curve left (the long chord of which bears North 84° 50' East, 330.25 feet) a distance of 334.07 feet; thence on a spiral curve left (the long chord of which bears North 60°48' East) a distance of 300 feet; thence North 56° 18' East a distance of 211.26 feet; thence on a spiral curve right (the long chord

(Cont.)

of which bears North 57° 13' East) a distance of 200 feet; thence on a 2083.48 foot radius curve right (the long chord of which bears North 66° 08' East, 513.85 feet) a distance of 515.11 feet to Station 647+19, opposite and 60 feet distant from which station the southerly line of said strip of land intersects the north boundary of said Lot 3, Section 36.

The widths (in feet) of the strip of land above referred to are as follows:

Station	to Station	Total Width	Width on Northerly side of Center Line	Width on Southerly Side of Center Line
623+86	628+00	90	50	40
628+00	631+00	80	40	40
631+00	632+00	90	40	50
632+00	637+00	120	70	50
637+00	642+00	90	50	40
642+00	647+19	110	50	60

The parcel of land to which this description applies contains 5.28 acres, of which 3.0 acres lie within the existing right of way, title to which hereby is acknowledged to be in the public, and 2.28 acres lie outside of the existing right of way.

R 14569
Parcel No. 2:

A parcel of land lying in the Northeast quarter ($NE\frac{1}{4}$) of the Northeast quarter ($NE\frac{1}{4}$) of Section 36, Township 13 South, Range 10 West, W.M., Lincoln County, Oregon; the said parcel being all that portion of said Northeast quarter ($NE\frac{1}{4}$) of the Northeast quarter ($NE\frac{1}{4}$) of Section 36 lying south of a fence, which fence is located approximately along the south line of the present Alsea Highway, and included in a strip of land 50 feet wide on the northerly side and 60 feet wide on the southerly side of the center line of the Alsea Highway as said highway has been relocated over and across or adjacent to the said Northeast quarter ($NE\frac{1}{4}$) of the Northeast quarter ($NE\frac{1}{4}$) of Section 36; the location of the said strip of land being determined by the said center line from Station 644+55 to Station 651+34 which portion of center line is described as follows:

Beginning at a point which is Engineer's Station 644+55, opposite and 50 feet distant from which point the northerly line of said strip of land intersects the south boundary of said North half ($N\frac{1}{2}$) of the Northeast quarter ($NE\frac{1}{4}$) of Section 36, said point being 378 feet north and 643 feet west of the meander corner between Section 36, Township 13 South, Range 10 West and Section 31, Township 13 South, Range 9 West, W. M.; thence on a 2083.48 foot radius curve right (the long chord of which bears North 73° 45' East, 549.92 feet) a distance of 551.52 feet, thence on a spiral curve right (the long chord of which bears North 82° 43' East) a distance of 127.48 feet to Station 651+34, opposite and 50 feet distant

(Cont.)

EXHIBIT "B-1" (Cont.)

from which Station the northerly line of said strip of land intersects the east line of said Section 36.

The parcel of land to which this description applies contains 0.36 acre.

2. That the highway facility for which the aforesaid property is required and is being taken has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to said property.

4. That upon the trial of any suit or action instituted to acquire said real property, or any interest therein, the Chief Counsel, or in his absence the Assistant Counsel, is authorized to make such stipulation, agreement, or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the first day of August, 1949.

EXHIBIT "B-2"

Minutes of August 1 and 2, 1949

RESOLUTION

WHEREAS, by virtue of the laws of the State of Oregon, as set forth and defined in Oregon Compiled Laws Annotated and amendments thereof or additions thereto, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property or any right or interest therein deemed by the Highway Commission necessary for highway purposes; and

WHEREAS, the Oregon Legislature enacted Chapter 226, Oregon Laws, 1947, known as the Throughway Law, and by the enactment of said law the legislature authorized and empowered the Highway Commission to lay out, locate, relocate, adopt, establish, construct, designate and maintain highways to be known as throughways, and to acquire, in the name of the State of Oregon, by agreement, donation or by exercise of the power of eminent domain fee title to or any interest in any real property which, in the opinion or judgment of the Highway Commission, is necessary or deemed necessary for the construction of any throughway or the establishment of any section of an existing state road or highway as a throughway; and

WHEREAS, the Highway Commission has approved and adopted a survey of a route and has designated said route as a state highway to be known as the Sullivan Gulch Highway, and has ordered and declared that the said highway shall be constructed under the provisions and within the meaning and for the accomplishment of the purposes declared and provided in the said Throughway Law; and

WHEREAS, for the purpose of establishing, constructing and maintaining the said highway as a throughway, to the end that human lives may be saved, property damage minimized, transportation of motor vehicles promoted, and highway travel in general safeguarded, the real property hereinafter described is necessary;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that there is needed and required, and is being appropriated for right of way of the Sullivan Gulch Highway, for the purpose of establishing, constructing and maintaining a throughway, the following described property, to-wit:

All of Lot 12, Block 47, Laurelhurst Addition
to the City of Portland, Multnomah County, Oregon.

(Cont.)

EXHIBIT "B-2" (Cont.)

2. That the highway facility for which the aforesaid property is required and is being taken, has been planned, designed, located, and will be constructed in a manner which, in the opinion of this Commission, will be most compatible with the greatest public good and the least private injury or damage.

3. That the Chief Counsel for the Commission is directed to attempt to agree with the owners and/or other persons in interest of said property, as to the compensation to be paid for the taking, including the damages, if any, and in the event that no satisfactory agreement can be reached, then he is directed and authorized to commence and prosecute to a final determination such suit or action as may be necessary to acquire title to the said property.

4. That upon the trial of any suit or action instituted to acquire the said property, or any interest therein, the Chief Counsel, or, in his absence the Assistant Counsel, is authorized to make stipulation, agreement or admission as in his judgment may be for the best interests of the State, the State Highway Commission, or the property owners.

5. That this resolution be entered in full in the minutes and records of the Commission as of the first day of August, 1949.

EXHIBIT "C"

Minutes of August 1 and 2, 1949

R E S O L U T I O N

WHEREAS, the Highway Commission, on the 27th day of July, 1939, adopted a resolution by which the Commission sought to prohibit or control the use of highway right of way for the parking of cars for commercial purposes, a portion of which said resolution reads as follows:

> "Since the use of any portion of a highway right of way for parking cars or other commercial purpose interferes with the proper maintenance of the road, obstructs sight distance, and interposes traffic hazards, the State Highway Commission of Oregon has instructed its Engineer to advise all persons who contemplate operating any business abutting upon any highway, that the parking of cars on the right of way, for service or for the transaction of business in connection with such commercial activity, shall be and is prohibited.",

and

WHEREAS, it appears that the provisions of said resolution have been applied to the shore of the ocean, and persons parking cars thereon in connection with the sale of ice cream cones, soft drinks and other light foods have been arrested on a charge that such work constituted a violation of the Commission's order, and

WHEREAS, it was not the purpose of the Commission by the establishment of said rule and regulation to make the same applicable to the shore of the ocean notwithstanding the fact that the shore of the ocean is by law declared to be a public highway, and

WHEREAS, it is deemed advisable by the Commission at this time to amend said rule or regulation so as to confine its application and operation to public highways as distinguished from the shore of the ocean,

NOW, THEREFORE, be it and it hereby is resolved by the Commission, all members being present and voting affirmatively, that the rule and regulation established by the Commission with respect to the use of highway rights of way for commercial purposes be and same hereby is amended so as to read as follows:

> "Since the use of any portion of a highway right of way for parking cars or other commercial purpose interferes with the proper maintenance of the road, obstructs sight distance, and

(Cont.)

EXHIBIT "C" (Cont.)

interposes traffic hazards, the State Highway Commission of Oregon has instructed its Engineer to advise all persons who contemplate operating any business abutting upon any highway, that the parking of cars on the right of way, for service or for the transaction of business in connection with such commercial activity, shall be and is prohibited; provided, however, that such rule or regulation shall not apply to or be operative with respect to the shore of the ocean."

Be It Further Resolved, that this resolution be entered in the minutes and records of the Commission as of the first day of August, 1949, and a true copy thereof delivered by the Secretary of the Commission to the Superintendent of the State Police and to the Sheriff of each of the counties bordering on the Pacific Ocean.

EXHIBIT "D"

Minutes of August 1 and 2, 1949

R E S O L U T I O N

WHEREAS, by the enactment of Chapter 149, Oregon Laws 1949, it is provided as follows:

"Beginning with the year 1949 and annually thereafter there shall be and hereby is appropriated out of the state highway fund such sums of money as will equal 10 percent of all moneys credited to the state highway fund by the state treasurer between January 1 and December 31 of each year and which have accrued from funds transferred to the state highway fund by the state treasurer under the provisions of section 115-135, O. C. L. A.; section 15, chapter 413, Oregon Laws 1945, as amended by section 4, chapter 114, Oregon Laws 1947; and section 29, chapter 467, Oregon Laws 1947, and from fines and penalties collected for violations of the motor vehicle and transportation laws. Such appropriation shall be distributed among the several cities as provided in this act."

AND WHEREAS, by said law it is further provided that:

"Such appropriation shall be allocated to the cities as follows: The sum of two hundred fifty thousand dollars ($250,000) shall be withdrawn from such appropriation each year and set up in a separate account to be administered by the state highway commission. Such account shall be spent each year by such commission upon streets not a part of the state highway system within cities which are receiving excessive wear through sudden increases in population in the area or heavy and unusual industrial traffic. Such commission shall determine the distribution of such expenditures after considering applications made to it therefor from the cities. The balance remaining in such appropriation after the withdrawal of said two hundred fifty thousand dollars ($250,000) shall be distributed to all of the cities. Each city shall receive such share of the balance as its population bears to the total population of the cities."

AND WHEREAS, by section 3 of said act it is provided that:

"Funds accrued and payable to cities under this act shall be remitted semiannually by the secretary of state to the financial officer of each city. The funds appropriated by this act shall be apportioned on a semiannual basis immediately following June 30 and December 31 of each year by the state highway commission who shall certify such apportionment to the secretary of state. Upon receipt of such certificate the secretary of state shall issue his warrants therefor payable to the cities in the amounts set out "

AND WHEREAS, the moneys which have been credited to the state highway fund by the State Treasurer covering the period of January 1 to June 30, inclusive, of the year 1949, which funds have accrued from sources designated in

(Cont.)

EXHIBIT "D" (Cont.)

said legislative act, amount to $13,305,343.26 and are derived from funds accruing from the following sources:

Section 115-135, O. C. L. A. (motor vehicle license fees)	$ 2,744,586.86
Section 15, Chapter 413, Oregon Laws 1945, as amended by Section 4, Chapter 114, Oregon Laws 1947 (gasoline tax)	8,292,457.56
Section 29, Chapter 467, Oregon Laws 1947 (Motor carrier fees)	2,154,998.00
From fines and penalties collected for violations of the motor vehicle and transportation laws	113,300.84
	$13,305,343.26

AND WHEREAS, the ten percent of the $13,305,343.26, which is available for distribution among the cities amounts to $1,330,534.33; and

WHEREAS, after withdrawing the sum of $125,000 (one-half of $250,000) as provided in said act, which sum is to be administered by the State Highway Commission within the meaning of section 2 of said chapter 149, Oregon Laws 1949, there remains a balance of $1,205,534.33, which balance is, in response to the command of said statute, to be distributed among the cities of the state, each city being entitled to receive such share of said balance as its population bears to the total population of the cities; and

WHEREAS, by applying the factors of allocation or distribution provided for in said Chapter 149, Oregon Laws 1949, the State Highway Commission has determined upon an apportionment of said balance among the cities of the State as shown in the tabulation given below;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting, as follows:

1. That the Commission does hereby find and declare that the funds made available for distribution among the cities of the State pursuant to said law should be and are allocated and apportioned to the cities named below in the amounts set opposite the names of the respective cities:

I. Cities of Populations 1,000 or More

City	Population	Amount	City	Population	Amount

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, as amended, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1948 for street purposes as provided in said law, the several sums of amounts set opposite the names of the respective cities or towns:

Chiloquin $3,168.58

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED AS FOLLOWS:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the first day of August, 1949.

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of Highway: Pacific Highway Highway Number: 1 Route Number: US99

Location of Termini			Established Speed
M.P. 279.62 (vicinity C.& O.C. RR grade Xing)	to	M.P. 280.12 (vicinity Parkdale Drive, Grants Pass)	45 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

EXHIBIT "G"

Minutes of August 1 and 2, 1949

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following

Name of Highway: Pacific Highway West Highway Number: 1W Route Number: US99W

Location of Termini		Established Speed
M. P. 83.02 (Walnut Drive, Corvallis)	to M.P. 84.70 (north city limits, Corvallis)	45 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

EXHIBIT "H"

Minutes of August 1 and 2, 1949

R E S O L U T I O N

WHEREAS, for some time there has been demand for the construction, operation, and maintenance of a toll bridge across the Columbia River at a site at or near The Dalles; and

WHEREAS, the Oregon legislature, while in session in its 1949 assembly enacted Chapter 209, Oregon Laws 1949, by which the State of Washington, the State of Oregon, and Wasco County in the State of Oregon, are authorized jointly or separately to construct and operate such bridge; and

WHEREAS, for the purpose of determining the practicability, the feasibility, and the advisability or undertaking the construction of a bridge at said site, the State of Washington, the State of Oregon, and Wasco County entered into a joint agreement on the third day of February, 1948, in connection with which and as a part of said agreement each of said parties contributed the sum of $8,000, the total of which, namely $24,000, was made available for the purpose of exploring and investigating the most desirable location, the estimated cost and the anticipated revenues incident to said proposed project, and

WHEREAS, it was recognized in said agreement that "the very nature of the work involved in the study and development of the facts which are the purpose and scope of this agreement if the best results are to be obtained is such that one of the contracting parties should be designated as the supervising agency to serve in a representative capacity"; and

WHEREAS, it was therefore provided in said agreement that Wasco County should serve as the supervisor and as such represent all of the parties in making the study and investigation contemplated, which appointment and authority Wasco County accepted; and

WHEREAS, it was further provided that Wasco County should be and said County was vested with authority to employ such technicians and other trained and skilled help as in the judgment of the County under conditions specified in said agreement might seem to be for the best interests of the States and the County; and

WHEREAS, pursuant to said authority and the terms of said agreement the County employed the firm of Coverdale and Colpitts, Consulting Engineers of the State of New York, to make the necessary study with respect to probable and anticipated toll revenues and said County likewise employed the firm of Seage and Tudor, Consulting Engineers of the State of California, to make a study and exploration with respect to the best location or site, the type or design of bridge, and other engineering matters incident thereto; and

WHEREAS, the said firm of Coverdale and Colpitts has made its report and filed the same with the County Court of Wasco County, a copy of which has been delivered to the State Highway Commission, and the said firm of Seage and Tudor has made and filed its report with the County Court of Wasco County, a copy of which has been delivered to the State Highway Commission; and

(Cont.)

EXHIBIT "H" (Cont.)

WHEREAS, in a report made and filed by Coverdale and Colpitts it is established and shown that the estimated number of vehicles which would have used said bridge during the year 1948 had said bridge been in operation, and the present The Dalles Ferry been discontinued, is 413,353, which at a toll charge of sixty cents per vehicle would have produced a gross revenue amounting to $248,012.00. Said report further shows a gradual increase in toll revenues which at the end of thirteen years of operation will produce an annual gross revenue of $431,074.00; and

WHEREAS, in and by the reports filed by Coverdale and Colpitts and by Seage and Tudor the following facts and data are established: that the estimated cost of the project at Covington Point, including the structure itself, engineering and inspection costs, legal, administrative, insurance, and financing costs, interest during construction and for six months after completion, and repayment of advances made by the States of Oregon and Washington, Wasco County, and The Dalles Chamber of Commerce, is $2,261,000.00; that the preliminary costs including engineering, financing, surveys and borings, legal, administrative and miscellaneous costs are estimated to be $100,000.00; and that it is advisable to purchase the existing ferry at The Dalles at a cost of $300,000.00, which estimated costs total the sum of $2,661,000.00; and

WHEREAS, said reports further show and establish: that the estimated annual maintenance cost is $9,300.00; the annual estimated operation cost is $40,000.00 and the annual assessment and tax charge by Klickitat County, Washington, at present rates would be $23,500.00; that revenue from tolls on the bridge are estimated as a varying sum increasing from $301,460.00 in 1952 to $527,264.00 in 1973, and the total estimated revenue for the first thirteen years of operation or from January, 1952, to January, 1965, is $4,775,048.00; that the annual amount necessary to meet the interest and principal retirement in thirteen years at 4 per cent interest is $266,366.00 which, with maintenance and operation costs and probable Klickitat County tax, totals $339,166.00 per year, and for thirteen years totals $4,409,158.00; and

WHEREAS, it appears from said reports and facts and data presented therein that the project can be amortized from anticipated revenues in thirteen years or less; and

WHEREAS, pursuant to the provisions of said tri-party agreement the said reports have been analysed by R. H. Baldock as the Commission's Chief Engineer, and by J. M. Devers as its Chief Counsel, who have filed with this Commission their report and recommendation with respect to said proposed project; and

WHEREAS, it is now deemed appropriate that this Commission recognize the work, study, and information furnished by Wasco County pursuant to its obligation imposed on and accepted by the County by the provisions of said tri-party agreement.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively as follows:

(Cont.)

EXHIBIT "H" (Cont.)

1. That the Commission hereby accepts the work done and the reports made by Wasco County as a complete and satisfactory performance of the obligation imposed on and accepted by the County in its supervisory capacity as the representative of all three parties to said tri-party agreement.

2. That based upon the report and recommendations of the Commission's Chief Engineer and its Chief Counsel this Commission hereby approves of the location and site of said bridge as set forth in the report of Seage and Tudor, which proposed site is identified in the report of said Seage and Tudor as the Covington Point site.

3. That insofar as the State of Oregon, by and through its Highway Commission, is authorized to do, consent hereby is given that Wasco County assume the sponsorship of the construction of said bridge, provided that full responsibility for design, type of construction, method of finance, and the operation and maintenance of said structure is accepted and assumed by said county, and provided further that said bridge, if built, is built, financed, operated and maintained all within the meaning, purpose, conditions, and requirements of Chapter 209, Oregon Laws 1949. Provided further that before a bridge is constructed across the Columbia River the plans, design, and specifications shall be submitted to the State Highway Engineer for his approval.

4. That it hereby is expressly understood that the State of Oregon shall in no wise and to no extent be involved in or responsible for any of the finances or funds required for or in connection with the construction, operation and maintenance of said bridge except that in the event taxes are imposed by Klickitat County, Washington, on the portion of said structure within the boundaries of the State of Washington, then and in such event the State of Oregon, acting by and through its Highway Commission, hereby obligates itself to contribute annually toward the financing of said bridge such amount of money as will equal the annual assessment and tax imposed by said Klickitat County on the portion of said bridge within the State of Washington. Provided, however, that Oregon's obligation to so contribute shall be effective only in the event that the portion of said bridge within the boundaries of the State of Washington is assessed and taxes collected thereon, and provided further that Oregon's obligation to contribute as herein stated shall absolutely terminate upon the repeal of the law authorizing the imposition of taxes by said county on said bridge.

5. That in the event the State of Oregon contributes to the financing of said bridge as herein provided the State shall, whenever toll revenues accruing by reason of the use and operation of said bridge are adequate to meet the bonded indebtedness, maintenance costs, operation costs, and other legitimate costs incident to the construction and operation of said bridge, and there be a surplus, be reimbursed out of said surplus to the extent of its contribution or contributions.

6. That this resolution be extended in full in the minutes and records of the Commission as of the first day of August, 1949, and a true copy thereof delivered to the County Court of Wasco County; Seage and Tudor, Consulting Engineers of the State of California; Coverdale and Colpitts, Consulting Engineers of the State of New York and to the Director of Highways of the State of Washington.

Portland, Oregon
August 19, 1949

The State Highway Commission met in special session at 10:00 a.m. in the Imperial Room of the Imperial Hotel to discuss with the architects, Whitehouse, Church, Newberry & Roehr, final plans and specifications for the proposed State Highway Department office building in Salem. Present were:

T. H. Banfield, Chairman
Ben R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
G. S. Paxson, Bridge Engineer
Forrest Cooper, Right of Way Engineer
H. B. Glaisyer, Secretary

Present representing the architects were Walter E. Church, Earl P. Newberry, and Frank Roehr.

Chairman Banfield opened the discussion by explaining for the benefit of Commissioners Chandler and Reynolds a number of changes which he had asked the architects to incorporate in the plans and specifications, subsequent to the last discussion of the subject by the Commission as a whole. Commissioners Chandler and Reynolds indicated their approval of the changes.

Mr. Church reported in behalf of the architects, advising that the structure as planned will conform to and harmonize with other buildings in the Capitol group, including the marble finish. As to the finish, he said that specifications provide for alternate bids on Vermont and Georgia marble. He also said that the metal work will be of bronze, and that the interior finish will be very similar to the State Office Building now under construction. The main lobby will be floored with marble and the walls will be frescoed. He explained further numerous additional details with respect to the specifications, which he said are complete with the exception of the type of glass to be used in the windows. He requested instructions whether to provide for clear crystal glass or to provide Solex, a heat-absorbing plate glass of greenish tint, such as is to be used in the new State Office Building. Chairman Banfield expressed his preference for clear crystal glass, as did also Commissioners Chandler and Reynolds, and the architects were instructed accordingly.

There followed a general discussion during which the Commission declared its desire to advertise for bids for construction of the building on the basis that the plans are complete and that there will be a minimum of extras. Mr. Church advised that the plans have been prepared on that basis, but there probably will be some extras and changes as the work progresses. The Commission also discussed the proposed cafeteria in the basement of the building and decided unanimously that provision should be made for it but purchase and installation of the equipment deferred until later.

Mr. Church presented to the Commission a full set of the plans for the structure. The State Highway Engineer advised that the plans are complete, and recommended approval of the same, and that the Commission authorize advertising the project for bids to be received at its meeting on September 20. Motion was made by Commissioner Chandler that the plans and specifications as prepared by the architects and recommended by the Engineer be approved, and that the Engineer be authorized to advertise the project for bids to be received on September 20, the Commission's next regular meeting date. The motion was duly seconded by Commissioner Reynolds. Chairman Banfield declared the motion carried by the unanimous vote of the Commission.

Commissioner Reynolds brought up for discussion the matter of development of state parks. It was the considered opinion of the Commission that the Travel and Information Department should be consulted in connection with developments of this nature and its recommendation secured before plans are approved, and it was so ordered.

Commissioner Reynolds also brought into discussion the proposed improvement of a boat channel in Wallowa Lake in connection with the park development at that place. He said that he had inspected the premises personally and in his estimation not as much work has to be done as was contemplated when the Commission authorized an expenditure of $10,000 for the purpose. He suggested doing the work with state forces rather than by contract. The Engineer explained the state law which requires the contracting of work costing $5,000 or more. As a result of this discussion it was decided that the Engineer would personally inspect the premises in company with Commissioner Reynolds in the next week or ten days.

The Right of Way Engineer presented a number of options for the Commission's consideration and requested authority to close them at the amounts stated therein. After careful consideration of each iter listed, the Commission approved the request and thereupon by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

Chairman Banfield presented a letter from Harvey Blythe, Executive Secretary, Oregon US99 Highway Association, inviting the members of the Highway Commission to be present at a meeting of the Association's Board of Directors and representatives of County Courts and Chambers of Commerce located along US99 Highway, to discuss ways and means of improving the conditions of U. S. Highway 99. The letter was read aloud by the Secretary, as was Chairman Banfield's acknowledgment in which he requests the date and time set for the meeting. Because of the indefiniteness of the date of the meeting the Commissioners were not in position to state whether or not they could attend this function. The matter was referred to the Engineer to secure additional information.

The Right of Way Engineer reported the status of acquisition of property along the Dodson-Bonneville Section of the new Columbia River Highway. He particularly pointed out that the settlement of greatest concern is that with Mr. Eric Enquist, who is demanding far more for his property,

which includes twenty-eight buildings, than its worth as determined by three separate appraisals by competent appraisers. He suggested condemnation proceedings if necessary to acquire this property. The Engineer advised that he is ready to advertise this project for bids to be received at the September meeting of the Commission if the right-of-way matter is clarified. The Chief Counsel questioned the advisability of contracting the work in September. It was his thought that the project should not be advertised for bids until the right-of-way matters have been settled, because it might prove embarrassing to the Commission and might result in paying more for right of way than it is worth. Following discussion of this matter, the Commission decided unanimously to advertise the project for bids to be received at its September meeting, with the understanding that the awarding of the contract will be held pending satisfactory conclusion of right-of-way matters, particularly the acquisition of the Enquist property.

The Right of Way Engineer reported results of taking bids in Salem on August 5 and August 15, 1949, for the sale of residence buildings in Salem, the buildings being located on property acquired as a site for the proposed State Highway Department office building, as follows:

HIGH BIDS RECEIVED

Item No.	Item	High Bidder	High Bid	Engr.'s Est.
		On August 5, 1949		
1.	Building No. 14201 352 N. Summer St.	No Bids Received	$ - - -	$ - - -
2A.	Building No. 14202 370 N. Summer St.	Harry Dorman, Salem	2,010	2,300
2B.	Floor covering at 370 N. Summer St.	E. T. Pierce, Salem	140	200
3.	Building No. 14199 325 N. Capitol St.	T. T. Anderson, Silverton	510	450
4.	Building No. 14198 375 N. Capitol St.	Madson Wrecking Co., Salem	452	500
		On August 15, 1949		
1.	Building No. 14197 355 N. Capitol St.	Madson Wrecking Co., Salem	$ 465	$ 700
2.	Building No. 14197-A 966 Center St.	Madson Wrecking Co., Salem	452	550
3.	Building No. 14204 960 Center St.	Madson Wrecking Co., Salem	260	350
4.	Building No. 14203 384 N. Summer St.	Joseph F. Miller, Salem	1,850	1,250
5.	Building No. 14588 330 N. Summer St.	Madson Wrecking Co., Salem	426	450

He recommended acceptance of the high bid in each instance. The Engineer and Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously and thereupon signed a bill of sale covering each transaction.

August 19, 1949

The Right of Way Engineer requested confirmation by the Commission of sale to the firm of Sackett and Grahm of 40,000 board feet of cold-decked logs on state-owned property adjacent to the John Day-Burns Highway near the city of Burns. He said that the logs are of no value to the state and that Sackett and Grahm, who have been logging in that vicinity, have offered to pay the sum of $8.00 per thousand for logs on the state property, a total of $320.00. The Commission unanimously approved the sale of the logs at such rate.

The Commission discussed a request from Mr. Charles Forrest for permission to remove sand from the ocean beach a short distance northerly from the Cape Arago Lighthouse, Coos County. The Engineer advised that this is an isolated stretch of beach, although it is not inaccessible to the general public, and the applicant, who owns the adjacent property, wants to construct a road down to the beach and remove sand for commercial purposes. He pointed out that the State Land Board has certain jurisdiction over the area from which the sand would be removed and would require payment of a fee for materials taken between mean high and mean low tides. He also pointed out that there is a dearth of good sand and gravel in this vicinity and suggested, in view of the fact that Mr. Forrest owns the adjacent property, that he be permitted to remove the sand under arrangements with the State Land Board. As a result of the discussion the Commission decided unanimously to relinquish jurisdiction in the matter and to turn it over to the State Land Board. The Engineer was instructed to notify the State Land Board of the action taken and to advise the Board that the Commission will offer no objection to the removal of sand from this particular beach area.

The Engineer brought up for discussion the matter of acquiring options for right of way needed for a proposed relocation of the Pacific Highway through the town of Canyonville, Douglas County. He exhibited a map showing the adopted alignment and pointed out that it passes through property owned by the Methodist Episcopal Church of this town. It appears that the Church has been given the sum of $3,000 to apply on the building of a new church, and that this money has to be spent within a certain limited time, so the church directors are particularly anxious that the state conclude the acquisition of right of way across the present church property. The Engineer requested authority for the Right of Way Department to negotiate options not only for this particular tract but also for the balance of the right of way through Canyonville which will be needed in the not distant future. The Commission approved the request and thereupon authorized the securing of such options, subject to the condition, however, that the Commission is making no commitments whatsoever for the construction of the highway through Canyonville.

The Chief Counsel reported a compromise settlement of the condemnation case against Lovell and Dean, concerning acquisition of right of way for the improvement of the Pacific Highway in Douglas County. He advised that this is a long-standing case, and is one of several in the same vicinity, and if the Commission approves it, it will have considerable influence in arriving at settlements with other owners. He explained that the right of way required from Lovell and Dean consists of 5.3 acres, and that the appraised value of the land is $2,243, which sum the owners refused to accept, alleging that the highway acts as a dike, and is the direct cause of destruction of several acres of their land by erosion. He further stated that they demanded payment for the damage and also demanded construction of riprap in Cow Creek to prevent

further destruction of their property, which work is estimated to cost about $2,500. The owners, he said, have indicated a willingness to accept $5,800 for their property, consisting of 5.3 acres needed as right of way and 11.46 acres of additional land that is subject to erosion but is valuable as material sites, totaling 16.76 acres. He recommended acceptance of this settlement, which would not only eliminate any need for the riprap work, but would also take care of the present damage claim and avoid future claims for damage to Lovell and Dean's land. The Commission approved the recommendation unanimously.

In the discussion of this matter, the question arose as to how far the Chief Counsel should go without first consulting the members of the Commission in reaching settlements of controversies invclving the acquisition of real property which is under condemnation. The Commission expressed full confidence in the judgment of its Chief Counsel, Mr. J. M. Devers, and declared its willingness to approve all such settlements effected by him, if accompanied by his unqualified recommendation.

The Chief Counsel requested confirmation of the authority previously given him to renew the insurance policy which the Commission carries in connection with its agreement with the Union Pacific Railroad Company covering snow removal operations on the Upper Columbia River Highway. The Commission approved the renewal of the policy on a five-year basis at a total premium cost of $818.

The Commission discussed and approved the sale to the Weyerhaeuser Timber Company of a 2.2 acre tract of state-owned tideland at North Bend, comprising the old ferry landing at this place. The consideration involved is $1,000 and the property is to be conveyed without restriction. (The deed was signed later in the session.)

The Engineer reported on the request from the North Bend Chamber of Commerce to construct a headquarters building on property abutting the right of way of the Oregon Coast Highway at the south end of the Coos Bay (McCullough) Bridge, and to landscape the highway right of way between the building and the existing concrete sidewalk. It now develop[illegible] he said, that the Chamber of Commerce proposes to use the area in front [illegible] the building for a driveway and to erect an overhead sign, which would extend entirely across the sidewalk. He pointed out that this is in conflict with the original request and the authority previously granted by the Commission; moreover, in his estimation, a driveway in front of the building is unnecessary since there is ample parking area on both sides and in the rear of the building. He recommended that the driveway in front of the building be denied, but that authority be given the Chamber of Commerce to construct such driveway leading to the parking area at the rear of the building and to construct sidewalks providing access to the building. As a result of discussion, the Commission approved construction of driveways leading to the parking area in the rear of the building, the construction of sidewalks providing access to the building, and the landscaping of the right of way. The construction of a driveway in front of the building and the maintenance of an overhead sign extending across the sidewalk were denied. The Commission ordered the matter covered by a revocable permit.

The Engineer brought up for discussion the matter of constructing a center divider strip along US99E between Ochoco Street in Portland and the junction with the South River Road in the City of Milwaukie. He recommended approval of such a project, which he estimated would cost about $25,000, so as to prohibit cross traffic, except at certain street intersections, as a safety measure. In the discussion of this matter, it was brought out that it is either a case of spending $25,000 for the divider strip or about $200,000 for service roads paralleling the highway. The Commission unanimously approved the divider strip.

The Commission had under discussion the matter of cooperating with the U. S. Army Engineers in the construction of the proposed highway around Meridian Dam, Lane County. The Engineer advised that the Army Engineers are now constructing a railroad and a highway around this dam, and have requested a final agreement with the state relative to the sharing of costs for the construction of the highway. The present highway, he said, was not constructed to modern standards and studies reveal that the cost to rebuild it to such standards is approximately $965,000. The cost to construct a new highway around the dam is estimated at $4,400,000, which includes a roadbed 40 feet in width, about 8 feet, or 20% wider than the roadbed of the existing highway. He advised that the Federal Government is asking the state to pay the cost of this additional width, which on the basis of $4,400,000 total cost, would make the state's share about $880,000. In addition, it is proposed to construct a pavement 22 feet wide which will cost about $18,000 more than the 20 foot pavement existing on the present road, and there will be additional cost for drainage structures estimated at $20,000, and additional maintenance expense estimated at $12,000, making a grand total cost to the state of $930,000. The procedure for the payment of this amount, as outlined by the Army Engineers, he said, would be for the state to surface the new highway with gravel topping, crushed rock and bituminous macadam pavement at an estimated cost of $354,000. The remaining work, estimated to cost $576,000, would be performed under the supervision of the U. S. Army Engineers, the state to repay the government for the state's share in annual installments beginning January 1, 1950, final payment to be made in about 1954. He presented a form of agreement prepared on the basis of his report, and recommended its approval. The Chief Counsel concurred in the recommendation. Following discussion, the Commission approved the recommendation unanimously. (The agreement was signed later in the session.)

The Engineer requested authority for an expenditure of about $25,000 for construction of a non-skid wearing surface on US99E between Oregon City and New Era, where a number of accidents recently have occurred because of the slippery condition of the pavement. The Commission approved the request unanimously.

The Engineer reported a plan for the restoration of the approaches to the Vanport underpass on Denver Avenue, (US99W) Portland, which were washed out during the flood of 1948. He advised that some 8,700 cubic yards of embankment are required, and that Mr. Tom Sweeney, sewer contractor for the City of Portland, advises that he has excess material available, and indicates that he will use this material to build up the embankment for a flat price of $4,950. To restore the approaches in the usual manner, he said, would

necessitate the borrowing of materials from an original source at an expenditure of about $10,875. He recommended approval of an arrangement with Mr. Sweeney, which would effect a saving of approximately $5,925 to the state. The Commission approved the recommendation unanimously. (An agreement with Mr. Sweeney covering the transaction was executed by the Commission later in the session.)

The Engineer requested instructions regarding the installation of sight posts or guard fence along the new section of the Upper Columbia River Highway between Troutdale and Dodson. He gave as his thought that either sight posts or guard fence should be constructed along this new roadway as a protection to the traveling public. He estimated the cost of sight posts at about $8,000 and standard guard fence at about $110,000. The members of the Commission expressed a decided preference for guard fence, notwithstanding the higher cost, and accordingly authorized the Engineer to advertise for bids for such a project.

The Engineer also requested authority to construct 6,000 lineal feet of standard guard fence along certain sections of the Green Springs Highway in Jackson County, between M.P. 11.4 and the summit of Green Springs Mountain, M.P. 15.7, where conditions are conducive to traffic accidents, at an estimated total cost of $15,000. He recalled that such guard fence was previously recommended by the Jackson County Grand Jury because of the frequency of accidents along this section, and gave as his opinion that it is required as a safety measure. The Commission approved the request unanimously.

The Engineer reported that a potential traffic hazard exists at the intersection of the Mt. Hood Highway and the Wapinitia Highway where they converge east of Government Camp. These two highways, he said, intersect on a flat angle and traffic approaches this intersection at high speed. He recommended that in order to minimize the hazard, stop signs be installed on the Mt. Hood Highway so as to require traffic on that highway to stop before entering the Wapinitia Highway, the latter mentioned highway being the more important. The Commission approved the recommendation.

The Engineer reported that pursuant to authority previously granted him by the Commission, he has awarded contracts, as follows, for work for which the Commission received bids at its meeting on August 1 and 2, 1949, the conditions of the awards having been satisfied:

1. Construction of the Summit-Tolovana Park Section of the Oregon Coast Highway, Clatsop County; bids received August 1, contract awarded August 10, to Leonard and Slate, Oregon Ltd., the low bidder, based on the use of tar;

2. Construction of the Provolt-Jacksonville Section of the Medford-Provolt Secondary Highway in Jackson County; bids received August 1, contract awarded on August 3, to M. C. Lininger and Sons, low bidder;

3. Improvement of four city streets in the City of Gold Beach, Curry County; bids received August 2, contract awarded August 18, to Baker Paving Company, the low bidder.

The Commission by unanimous vote confirmed the award of these contracts as reported.

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

1. E. H. Itschner Co., Contract No. 2984 for surfacing and oiling the Washington State Line-Flora Junction Section of the Enterprise-Lewiston Highway, Wallowa County, requested an extension of time of one year from July 15, 1949, to July 15, 1950, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulties encountered in operating their quarry, and to the trouble they had in securing experienced labor for this isolated project. The Engineer advised that the contractor has been dilatory in the prosecution of the work, and has not maintained an efficient organization, nor sufficient equipment on the job. He further stated that the delay in completing the project will materially increase the cost of engineering and will also necessitate additional expense upon the part of the state to maintain the highway during the winter months. He recommended that the extension of time requested be granted, subject to the following provisions:

a. That no oiling work shall be done between September 30, 1949, and May 1, 1950.

b. That all engineering expense incurred in connection with this project after July 15, 1949, be assessed against the contractor.

c. That the contractor be required to reimburse the state for the cost of maintaining the surface on this section from September 30, 1949, until the oil mat surfacing is completed next year.

The Commission approved the recommendation unanimously.

2. Archie R. Averill, Contract No. 3127 for construction of the Westland Irrigation Canal Bridge on the Lexington-Echo Secondary Highway in Umatilla County, requested an extension of time of 31 days from July 31 to August 31, 1949, within which to complete this job. He attributed his failure to complete the project within the specified time limit to the concentration of his efforts on the construction of buildings at Albany, Bend and Lapine, all being state highway projects. The Engineer advised that the contract for the Westland Irrigation Canal Bridge provided for completion of the project on July 31, 1949, and that all work in connection therewith, other than the finishing of concrete surface and cleaning up of the site, was completed by that time, and the structure is now in use. He recommended in view thereof that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

The Commission, in discussing requests for extensions of time as listed above, considered but did not necessarily adopt the recommendations of the Engineer and the reasons given by the contractors for failure to complete their projects within the specified time limits.

The Engineer reported that Contracts Nos. 2944, 3112, 3128, 3137, 3142, 3154, 3160, 3161, 3163, 3167, 3169, 3184 for state highway construction have been completed according to the requirements of the contracts and modifications thereof, and that said jobs are now ready for acceptance. After due consideration of the Engineer's report with respect to the contracts under discussion, the Commission approved and accepted the said contracts as reported, and by unanimous vote adopted the attached resolution with regard thereto, marked EXHIBIT "B", which resolution by this reference is made a part hereof with like effect as though extended in full herein

The Engineer reported that in order to avoid congestion at the divergence of the one-way street plan on the Santiam Highway through Lenanon, the City Council has passed an ordinance prohibiting the parking of cars on the west side of Main Street between Wheeler and Carolina Streets, pursuant to recommendation of the Traffic Engineer In order to make this ordinance properly effective, he said, the State Highway Commission should concur, and he so recommended. The Commission approved the recommendation and by unanimous vote adopted the attached resolution with regard thereto, marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The matter of posting a reduced load limit on the Santiam River Bridge, on the roadway that leads into Cascadia State Park, had the attention of the Commission. The Engineer advised that the lower chord of this structure has failed and it is now being used under temporary repairs. He recommended that the bridge be posted for ten tons maximum load until such time as replacement of the structure is authorized. The Commission approved the recommendation, and the attached resolution relative thereto, marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

The Engineer presented for the Commission's consideration a list of additional projects eligible for the 1950-51 Primary and Secondary Federal Aid Programs The Commission deferred action on this matter until its next meeting.

A letter was presented from Mr. Fred E. Kiddle, Chairman, Roads and Highway Committee, LaGrande Chamber of Commerce, concerning a proposed extension of the Starkey Secondary Highway from its present terminus at Starkey, in Union County, to a connection with the Pendleton-John Day Highway at Ukiah, in Umatilla County. The letter was read aloud by the Engineer, who also read aloud his reply to the same. The Commission deferred discussion of the matter until its next meeting.

The Commission also discussed a second letter from Mr. Kiddle, requesting an extension of a proposed project for the improvement of the Federal Aid Secondary Highway between Imbler and Summerville. Mr. Kiddle advises that the members of his committee are of the opinion that this improvement should be

extended about 2.4 miles to a connection with Hunter Lane Highway, north from Island City. The Commission authorized the Engineer to make a survey of this project.

The Engineer reported that the new bridge across Marys River on US99W, Corvallis, will be open for travel within the near future, and when it is opened, the one-way traffic plan for Corvallis will be put into effect, whereby southbound traffic will be routed on Fourth Street and northbound traffic will be routed on Third Street. In order to eliminate a potential traffic hazard at the junction of Third Street and Fourth Street, south of Marys River Bridge, he suggested the designation of a "No Parking At Any Time" zone on the west side of Fourth Street, southerly from the new bridge over Marys River to the intersection of Fisher Road, and the designation of a like "No Parking" zone on the east side of Third Street from the old bridge over Marys River to Fisher Road Junction. He said that both sections are outside the city limits of Corvallis, hence the Highway Commission has sole jurisdiction. The Commission unanimously approved the recommendation by the adoption of the attached resolution with respect thereto, marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed a second report from the Engineer on the designation of "No Parking" areas on Third Street and Fourth Street within the city limits of the City of Corvallis. The Engineer advised that the city, in order to implement the movement of traffic on these two one-way streets, has passed an ordinance restricting parking on the west side of Fourth Street from VanBuren Street to Jackson Street, on the east side of Fourth Street from Jefferson Street south to the park driveway, on the west side of Third Street from Harrison Street to VanBuren Street, and from "C" Street southerly to the city park driveway, near Marys River Bridge. He advised that in order to make the ordinance properly effective it is necessary that the Highway Commission concur. He recommended the adoption of an appropriate resolution covering the subject, insofar as it pertains to the restrictions on Third Street and Fourth Street, which are state highway routes. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution with regard thereto, marked EXHIBIT "F", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed a letter from the Chief Counsel, urgently requesting that Mr. Forrest Cooper, Right of Way Engineer, and Mr. Clifton W. Enfield, Assistant Counsel, be authorized to attend at state expense the annual meeting of the American Association of State Highway Officials in San Antonio, Texas, during October 10 to 14, 1949. He advised that he needs the assistance of both of these men to properly cover the legal and real property subjects that are to be discussed at this meeting. The State Highway Engineer requested authority for Mr. G. S. Paxson, Bridge Engineer, and Mr. W. W. Stiffler, Second Assistant State Highway Engineer, to attend this meeting of the Association, at state expense, to assist him in covering engineering matters that are to be presented. The Commission unanimously approved both requests.

The Commission signed agreements, et cetera, as follows:

Bargain and sale deed conveying unto Weyerhaeuser Timber Company property in North Bend known as the old ferry landing.

Contract with U. S. Army Engineers covering construction of the proposed highway around Meridian Dam, Lane County.

Lease and sale of road materials from Emma M., George and Thomas M. Velvin covering property in Grant County needed in connection with construction of the Dad's Creek-Dixie Summit Section of the John Day Highway, in Grant County.

Eight bills of sale covering sale of residence buildings on site of the proposed Highway Department Office Building, Salem.

Contract No. 3204 with Western Golf Course Supply Co. for the Front Avenue (Ash Street-Alder Street) Section of the Pacific Highway West, Portland, Multnomah County.

Contract No. 3211 with M. C. Lininger & Sons for the Provolt-Jacksonville Section of the Medford-Provolt Secondary Highway in Jackson County.

Contract No. 3207 with E. C. Swaggart for the Forest Boundary-Unity Junction Section of the John Day Highway in Baker County.

The meeting adjourned at 12:00 o'clock noon.

T. H. Banfield
Chairman

State Highway Engineer

Commissioner

EXHIBITS "A" THROUGH "F"

Minutes of August 19, 1949

EXHIBIT "A"

Minutes of August 19, 1949

RESOLUTION

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or basis of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

CANYONVILLE-JOHNS SECTION, PACIFIC HIGHWAY

15100- Carden, W. L. and Hatta E. Carden, and
U. S. Balentine and Helen Balentine (Reeder)
Right of Way
Option expires February 2, 1950

Mining claim rights on 1.64 acres Waiver of access, except road approach at approx. Engr.Sta.195+00, northerly side	$ 25.00	$
Amount to be paid owner		25.00
Amount chargeable to Right of Way		25.00
STATE to provide road approach, northerly side, highway, at approx. Engr.Sta.195+00 (Est.)	200.00	
Amount chargeable to Construction		200.00
GRAND TOTAL (Estimated)		225.00

EXHIBIT "A" (Cont.)

LUDER CREEK-SCOTTSBURG SECTION, UMPQUA HIGHWAY

12835- Anderson, A. V. and Bertha M. Anderson (Bill's Trout Farm)
Right of Way (Reeder)
Option expires February 8, 1950

0.31 acre at $50.00	$ 15.50	$
Allowance - store and house	1,890.00	
2-unit cabin	648.00	
rest rooms, showers	168.00	
shed	50.00	
lunch room fixtures	28.50	
Kohler electric plant	200.00	
Amount to be paid owner		3,000.00
Amount chargeable to Right of Way		3,000.00

Grantor to have moorage right and footpath to same- Also, to retain floating dock and fishing boats; and permitted to extend present water pipe across proposed right of way; to retain water system and pipeline lying on and outside southerly side of proposed right of way.

CANYONVILLE-JOHNS SECTION, PACIFIC HIGHWAY

Minutes of August 19, 1949

R E S O L U T I O N

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2944, with Denton Construction Company for grading and bituminous macadam surfacing on the Gardiner Section of the Oregon Coast Highway in Douglas County; completed June 30, 1949.

Contract No. 3112, with M. C. Lininger & Sons for furnishing crushed rock in stockpiles on the Ashland-State Line Section of the Pacific Highway in Jackson County; completed July 9, 1949.

Contract No. 3128, with Newport Construction Company and Russell Olson for reoiling on the Stanfield-Pendleton-Adams Section of the Boardman-Stanfield, Old Oregon Trail and Oregon-Washington Highways in Umatilla County; completed August 1, 1949.

Contract No. 3137, with the D-H Paving Company for reoiling on the Eddyville-Kline Mountain Section of the Corvallis-Newport Highway in Lincoln County; completed July 28, 1949.

Contract No. 3142, with the D-H Paving Company for oil mat surfacing on the Bellevue-Dayton-West Salem Section of the Salem-Dayton, Bellevue-Hopewell and Lafayette Highways in Polk and Yamhill Counties; completed July 1, 1949.

Contract No. 3154, with Acme Construction Company for grading and oil mat surfacing on the Harrisburg (Second Street) City Street Section in Linn County; completed August 11, 1949.

Contract No. 3160, with Baker & Wilson Paving Company for oil mat surfacing on the Waldport (Mill and Grant Streets) City Street Section in Lincoln County; completed July 25, 1949.

Contract No. 3163, with J. C. Compton Company for reoiling on the Idaho State Line-Blue Mountain Pass Section of the I.O.N. and Jordon Valley Highways in Malheur County; completed August 2, 1949.

(Cont.)

EXHIBIT "B" (Cont.)

Contract No. 3167, with Harr & Horton for recoiling on the Hillsboro-Tigard-Wilsonville Section of four secondary highways in Washington County; completed August 9, 1949.

Contract No. 3169, with O. C. Yocom Company for grading and oil mat surfacing on the Willamina (South First Street) City Street Section in Yamhill County; completed July 30, 1949.

Contract No. 3184, with R. O. Dail for seal coat on the Murray Road-Multnomah County Line Section of the Sunset Highway in Washington County; completed July 30, 1949.

Contract No. 3161, with Mill Electric Company for constructing traffic signals in the City of Albany; completed August 12, 1949.

NOW, THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

Minutes of August 19, 1949

RESOLUTION

WHEREAS, Main Street in the City of Lebanon is a street heretofore selected and designated by the Highway Commission as a street over which to route state highway traffic using the Santiam State Highway within the corporate limits of Lebanon, and

WHEREAS, it has been demonstrated that the parking of vehicles on the westerly side of said street from a point 20 feet south of the south line of Carolina Street to the north line of Wheeler Street in said City constitutes and is a hazard to traffic and interferes with the safe and easy flow or movement of vehicles over said streets, and

WHEREAS, it appears that the Common Council of the City of Lebanon on the 5th day of July, 1949, adopted Ordinance No. 731, by which the parking of vehicles on the westerly side of said Main Street between said termini is prohibited, and

WHEREAS, it is the judgment of the Commission that the State, through its State Highway Commission, should cooperate with the City of Lebanon in the accomplishment of the purpose of said Ordinance No. 731,

NOW, THEREFORE, be it and it hereby is resolved by this Commission, all members being present and affirmatively voting as follows: That the Commission does hereby ratify and approve Ordinance No. 731 acopted by the Common Council of the City of Lebanon on the 5th day of July, 1949, and hereby offers the cooperation of the Highway Commission and the Highway Department to the end that the full benefit of said resolution may be accomplished and the convenience and safety of the traveling public thereby advanced.

That this resolution be entered in the minutes and records of the Commission as of August 19, 1949.

EXHIBIT "D"

Minutes of August 19, 1949

ORDER REDUCING MAXIMUM LOAD LIMIT

ON THE SANTIAM RIVER BRIDGE AT CASCADIA

WHEREAS, the Santiam Highway, otherwise known as State Highway No. 16 and U. S. Highway Route No. 20, has been designated and declared to be, and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon, as a state highway; and

WHEREAS, the road which extends from said Santiam Highway to Cascadia State Park has been designated and declared to be an access road to the Park, and likewise has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon; and

WHEREAS, on the said access highway there is located a certain bridge structure over the Santiam River, being Bridge No. 1356, which bridge, in the judgment of the State Highway Commission, is incapable of safely carrying the traffic to which it is being subjected, and in order to protect said bridge structure against damage and injury, and in order to safeguard traffic over said bridge structure, it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said bridge structure and of the traffic which uses the said bridge structure that the maximum weight now permitted and authorized by law be reduced; and

WHEREAS, the State Highway Engineer has caused an investigation to be made and has determined and found from such investigation and has recommended to the State Highway Commission, that the maximum gross load that can be safely permitted upon any single span of said structure at any time is ten (10) tons; and

WHEREAS, based upon the investigation and determination and recommendation of the State Highway Engineer, it is the judgment of this Commission that the maximum gross load which shall be permitted upon any single span of said structure at any time shall be reduced and fixed as in this order provided;

NOW THEREFORE, the premises being in part as above stated, and the State Highway Commission having as a result of due investigation found that the bridge structure above referred to is incapable of safely sustaining or supporting a total gross load in excess of ten (10) tons;

(Cont.)

EXHIBIT "D" (Cont.)

IT IS HEREBY ORDERED that the total gross weight of combined load and vehicle which at any one time shall be permitted upon any single or individual span of the said bridge structure shall not exceed ten (10) tons. In computing the total weight of any single vehicle, the total gross weight of any trailer or trailers attached to said vehicle shall be considered as a component part of the total gross load and shall not be considered as a separate vehicle.

IT IS FURTHER ORDERED that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 115-394 O.C.L.A. shall be in full force and effect from the 19th day of August, 1949, until rescinded, modified or revoked by order of the State Highway Commission.

AND IT IS FURTHER ORDERED that a notice be posted in a conspicuous manner and place at each end of the above-named bridge structure so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions of the traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED that a certified copy of this order be furnished to the County Clerk of Linn County, in which said bridge structure is located, and that a certified copy of said order be furnished the Superintendent of the Department of State Police for his information.

Dated this 19th day of August, 1949.

EXHIBIT "E"

Minutes of August 19, 1949

R E S O L U T I O N

WHEREAS, the Pacific Highway West is a major state highway and is likewise a federal highway, which highway throughout its entire length carries a large volume of traffic; and

WHEREAS, the City of Corvallis, by and through its city officials, with the cooperation of the State Highway Commission, plans to immediately put into effect and operation a one-way traffic plan within the City of Corvallis, and, as a part of the said one-way traffic plan, the northbound traffic route of Pacific Highway West will be routed over a portion of 3rd Street and the southbound traffic route of Pacific Highway West will be routed over a portion of 4th Street, within the City of Corvallis, and northbound and southbound traffic upon Pacific Highway West beyond the south limits of the City of Corvallis will travel respectively upon extensions of 3rd Street and 4th Street from the said city limits southerly to the intersection of said extensions of 3rd Street and 4th Street; and

WHEREAS, the State Highway Engineer has caused an investigation and study to be made and has determined from said investigation and study that the parking of vehicles along Pacific Highway West in the vicinity of and south of the intersection of said extensions of 3rd Street and 4th Street and north of said intersection upon said extensions of 3rd Street and 4th Street impairs the use of the traveled portion of Pacific Highway West and creates a hazard to traffic upon the said highway and to the owners and occupants of said parked vehicles, and has recommended to the State Highway Commission that parking of all vehicles be prohibited along and on the east side of the Pacific Highway West, including the extension of 3rd Street, from Highway Engineer's Station 887+65 northerly to Station 893+90, and on the west side of Pacific Highway West, including the extension of 4th Street, from Highway Engineer's Station 887+33 northerly to Station 892+19; and

WHEREAS, based upon the said investigation and study and the said recommendations of the State Highway Engineer, in the opinion of the Commission public welfare and public safety require that all vehicles be prohibited from parking within the areas hereinafter set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, by all members of the Commission voting unanimously, as follows:

1. The Commission does hereby find and declare, based upon the said investigation and study made by members of its staff and the recommendations of the State Highway Engineer, that the parking of motor vehicles on and along the east side of Pacific Highway West, including the extension of 3rd Street, from Highway Engineer's Station 887+65 (intersection of Pacific Highway West and Fisher Road) northerly to Station 893+90 (south end of the

(Cont.)

EXHIBIT "E" (Cont.)

Marys River Bridge on the extension of 3rd Street), and on and along the west side of Pacific Highway West, including the extension of 4th Street, from Highway Engineer's Station 887+33 (opposite intersection of Pacific Highway West and Fisher Road) northerly to Engineer's Station 892+19 (south end of the Marys River Bridge on the extension of 4th Street), south of the City of Corvallis in Benton County, Oregon, creates a hazard to traffic upon the said highway and to the owners and occupants of said parked vehicles.

2. That the parking of all motor vehicles on and along the right of way of said highway within said termini be and the same hereby is prohibited.

3. That the State Highway Engineer be and he hereby is instructed to erect at the said termini, and at such points between said termini as in the judgment of the Engineer are necessary to accomplish the purpose of this resolution and the action of the Commission as herein declared, "No Parking At And Time" signs.

4. That a copy of this resolution be sent to the Mayor of the City of Corvallis, and that a like copy be mailed to the Superintendent of State Police.

5. That this resolution be entered in the minutes and records of the Commission as of the 19th day of August, 1949.

EXHIBIT "F"

Minutes of August 19, 1949

RESOLUTION

WHEREAS, Third Street and Fourth Street in the City of Corvallis are streets heretofore selected and designated by the Highway Commission as streets over which to route state highway traffic using the Pacific Highway West (US99W) within the corporate limits of Corvallis, and

WHEREAS, it has been demonstrated that the parking of vehicles at the following locations on said streets, to wit:

1. On the westerly side of Third Street from Harrison Street to VanBuren Street, and from "C" Street southerly to the City Park driveway, which extends westerly from Third Street near the north end of Marys River Bridge;

2. On the easterly side of Fourth Street from Jefferson Street southerly to the City Park driveway which extends westerly from Third Street, near the north end of Marys River Bridge;

3. On the westerly side of Fourth Street from VanBuren Street to Jackson Street.

constitutes and is a hazard to traffic and interferes with the safe and easy flow or movement of vehicles over said streets, and

WHEREAS, it appears that the Common Council of the City of Corvallis on the 5th day of July, 1949, adopted ordinance No. 1755, by which the parking of vehicles on certain streets, including sections of Third Street and Fourth Street described above, is prohibited, and

WHEREAS, it is the judgment of the Commission that the State, through its State Highway Commission, should cooperate with the City of Corvallis in the accomplishment of the purpose of said ordinance No. 1755, insofar as it pertains to Third Street and Fourth Street,

NOW, THEREFORE, be it and it hereby is resolved by this Commission, all members being present and affirmatively voting as follows: That the Commission does hereby ratify and approve ordinance No. 1755 adopted by the Common Council of the City of Corvallis on the 5th day of July, 1949, as to Third Street and Fourth Street, and hereby offers the cooperation of the Highway Commission and the Highway Department to the end that the full benefit of said resolution, as it pertains to said Third Street and Fourth Street, may be accomplished and the convenience and safety of the traveling public thereby advanced.

That this resolution be entered in the minutes and records of the Commission as of August 19, 1949.

Portland, Oregon
September 19, 1949

The State Highway Commission met in regular session at 9:00 a.m. Daylight Saving Time, in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben. R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Asst. Counsel
Forrest Cooper, Right of Way Engineer
M. H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction were opened and read in conformity with previously published notice, following which Chairman Banfield announced that awards of contracts would be made at 3:00 p.m. in the same room.

The Commission unanimously approved the minutes of the meeting held August 1 and 2, 1949.

The Parks Superintendent, Mr. S. H. Boardman, was present and reported the following parks matters:

1. Request of the Washington County Court for the expansion and improvement of Bald Peak State Park, adjacent to the Hillsboro-Silverton Secondary Highway on Chehalem Mountain: The Parks Superintendent advised that this park has an elevation of 1,600 feet and commands a wonderful view of the Tualatin Valley, and in his estimation is the most scenic spot in this valley. He gave as his opinion that the enlargement and development of the park, as requested by the County Court, is fully warranted. He requested authority to investigate the development possibilities and to find out how much the property owners want for their land. The Commission approved the request and ordered that the report on the subject include the approximate acreage that will be needed to complete the park and the cost to acquire it; and plans for its development, and the cost thereof.

2. Request of the DeRoia Lumber Company for permission to operate temporarily a small saw mill on wayside property adjacent to the Sunset Highway: The Parks Superintendent advised that he has no particular objection to such use of the state's property, but there is other land adjacent thereto belonging to the Forest Service, which will serve the purpose equally as well. The Commission denied the request.

3. Termination of the Silver Falls concession by Ralph Nohlgren, present operator: The Parks Superintendent advised that Mr. Nohlgren is relinquishing his concession on October 2nd. He recommended, in view thereof, that the restaurant building be closed up for the winter and that the concession be advertised for sale next spring. The Commission approved the recommendation.

4. Construction of an electric power line into Collier State Park: The Parks Superintendent advised that this park presently is not supplied with electric power facilities, but that the California-Oregon Power Company will extend its lines into the park for the sum of $6,000. The owner of property immediately adjacent to the park, he said, has stated a willingness to assume fifty percent of this expense, which would leave a balance of $3,000 to be paid by the state. He recommended against the expenditure, and suggested investigation into the possibility of developing the state's own power in Spring Creek, which runs through the park. The Commission decided unanimously not to provide electric power for the park at this time.

5, 6, 7. Acquisition of additional acreages for the proposed ocean-front park in Curry County: Mr. Forrest Cooper, Right of Way Engineer, reported on this subject. He advised that additional options have been secured, as follows:

1. Delmer Colegrove, et al; 275 acres at $200 per acre . . . . . $ 55,000

2. Paul & Rachel DeBlock; 64.74 acres at $200 per acre plus allowance 14,348

3. Claude L. & Aubrey S. Reeves; 61 acres at $82 per acre 5,000

In the discussion of this matter, the Parks Superintendent advised that he is negotiating with the Pacific Borax Company for about 450 acres of ocean frontage, south of the Colegrove tract. It was his thought that the negotiations should be extended to include additional properties between this tract and the state park at Harris Beach so there would be no intervening gap between these two state park areas. The Right of Way Engineer advised that the options presently secured are of six months' duration. In view thereof the Commission deferred a decision with respect to them and authorized further negotiations with respect to acquisition of the remaining tracts between the Colegrove Property and Harris Beach. When completed, the results of the negotiations for all of the areas in this proposed park are to be reported on at one time. The Commission ordered that these purchases be presented to the Commission as acquisition of right of way rather than as parks, but cautioned that sufficient property be acquired for the purpose intended, and that no agreement be made with any of the property owners that cannot be carried out by any future highway commission.

8. Acquisition of Hazel Rogers' property at Short Sand Beach State Park: The Parks Superintendent advised that this property consists of a 112-acre tract that is definitely needed to fill out this park. He further stated that the property can be purchased at the rate of $50 per acre, total $5,600, and he assured the Commission that this is the last piece of property that will have to be acquired at this location. The Commission unanimously approved the purchase of the property at the price mentioned but admonished the Parks Superintendent not to ask the Commission to buy any more land for this park.

9. Proposed park development for the next four years: The Parks Superintendent submitted a written report showing the proposed budget for the State Parks Department for the year 1950, and the proposed program of capital outlay and operations of parks during the years 1951, 1952 and 1953, summarized as follows:

16132

STATE PARKS DEPARTMENT

PROPOSED BUDGET - 1950

CAPITAL OUTLAYS

Survey for parks	$ 15,788.00	
Purchase of Real Property	100,000.00	
Construction and Betterment of Buildings	154,825.00	
Purchase of Equipment - Field	6,200.00	
Purchase of Equipment - Office	1,200.00	
Road Construction and Betterment	58,150.00	
Carry over charge - Buildings under Contract but not completed in 1949:		
Champoeg Museum	120,000.00	
Caretaker's House at Wallowa	5,000.00	
Caretaker's House at Armitage	5,000.00	
		$ 466,163.00

OPERATION

Administration and General Supervision	$ 79,322.00	
Park Operation	316,310.40	
Maintenance of roads and parking areas	21,470.00	
		$ 417,102.40
Total Budget:		$ 883,265.40

PROPOSED PROGRAM - 1951, 1952, 1953

CAPITAL OUTLAYS

	1951	1952	1953
Survey for parks	16,000	16,000	16,000
Purchase of real property	75,000	75,000	75,000
Construction and Betterment	344,650	357,150	140,500
Purchase of Equipment - Field	6,000	6,000	6,000
Purchase of Equipment - Office	1,000	1,000	1,000
Road Construction and Betterment	100,500	65,000	48,000
Total Capital outlay	$ 543,150	$ 520,150	$ 286,500
OPERATION			
Administration and General Supervision	81,000	83,000	85,000
Park operation	320,000	325,000	330,000
Maintenance of roads and parking areas	23,000	25,000	27,000
Total operation cost	$ 424,000	$ 433,000	$ 442,000
Total costs:	$ 967,150	$ 953,150	$ 728,500

He explained that this report gives an over-all picture for the state parks setup and that it includes provision for overnight camping in certain parks. He further stated that he discussed this matter with the State Highway Engineer and the Director of the Travel Information Department, pursuant to the Commission's instructions, and secured their approval of the setup. The Commission deferred action on this matter for study.

In this connection, the Parks Superintendent submitted details of his plan for providing overnight camping in Silver Falls State Park and in Wallowa Lake State Park. Action on these matters was also deferred by the Commission, pending additional information as to how this feature is being handled in modern parks in other states, the cost involved, et cetera. The Parks Superintendent was instructed to secure such information, as previously authorized, it being the feeling of the Commission that it should have full information before embarking on a new undertaking with which it is not familiar.

10. Diversion of water from Jackson Creek in Cape Lookout State Park: The Parks Superintendent reported that people who are interested in the propagation of oysters in Netarts Bay are performing certain construction in Jackson Creek to divert the water from this stream, which flows through the park, so that the creek will be dry during the winter months, and that these people are securing some financial assistance from Tillamook County. He gave as his feeling that such diversion of the water will not adversely affect the park because the water will be allowed to follow its natural course during the summertime when the park is visited by recreationalists. In the discussion of this matter the question arose whether or not the Highway Department will forfeit its rights to the waters of this stream if objections are not offered against such diversion of the water. The Chief Counsel advised that the water right would be lost if the Commission consented to the diversion. The Commission decided definitely not to give its approval to the diversion and instructed the Parks Superintendent to do what is necessary to protect the Highway Department's rights.

The Engineer reported considerable traffic congestion on the new Upper Columbia River Highway during weekends because of the tremendous interest of people in this new thoroughfare. During the last two weekends, he said, large numbers of people visited this district, and the parking of their automobiles on highway shoulders caused serious traffic congestion. He gave as his feeling that it is necessary for something to be done to correct the situation, and suggested that the Parks Superintendent be authorized to investigate the possibilities of providing a place for the parking of cars entirely off the highway. The Commission concurred in this belief that the parking of cars along the shoulders of the highway should be prohibited and accordingly referred the matter back to the Engineer and Parks Superintendent to investigate the possibilities of providing off-highway parking areas.

The Right of Way Engineer, Mr. Forrest Cooper, presented for the Commission's consideration a list of options that have been obtained in connection with the acquisition of real property for right of way and other purposes. The Commission considered very carefully each item in the list,

and as a result thereof, approved the amounts of the respective options and authorized the Right of Way Engineer to close the transactions on the basis thereof. The attached resolution relative thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof, was thereupon adopted by the Commission by unanimous vote.

In the discussion of real property matters, the Right of Way Engineer reported on the claim of School District No. 51, Coos County, for damages to school property, arising out of construction of the Delmar-China Camp Section of the Oregon Coast Highway. He advised that subsequent to the filing of this claim, this district was consolidated with another, and the school building has been razed, eliminating that part of the claim which required the rebuilding of wooden steps and reconstruction of the porch on the building. There remains, however, a claim in the amount of $60.00 for the destruction of playground equipment, which is the obligation of the state's contractor. The Commission approved the report.

The meeting recessed for luncheon at 12:00 noon, and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

Commissioner Chandler reported laxity on the part of the City of Gold Beach in the matter of enforcing the parallel parking requirement in this town, pursuant to agreement between the city and the Commission. Chairman Banfield reported a similar condition in the town of Ocean Lake. The Engineer was instructed to investigate both places and impress upon the City Councils that the Highway Commission expects them to enforce the requirements as outlined in the agreements.

The Chief Accountant, Mr. Malcolm H. Hawke, reported on his examination of the records of the City of Portland with respect to the Front Avenue Project, covering the period January 1, 1940, to August 8, 1949. He explained details thereof, and among other things pointed out that as of August 8, 1949, the accrued portion of funds reveals a total credit balance of $112,777.64, of which the state's share is $29,108.96, and the city's share is $83,668.68, after excess properties not required for right of way or other highway purposes have been sold. Mr. L. G. Apperson, Deputy City Engineer, Portland, and Miss Helen Althous, Deputy City Attorney, Portland, were present concerning this matter. Mr. Apperson advised that the Portland City Council is in agreement with the draft of Mr. Hawke's report. The Commission deferred action on the report pending study.

In this connection, the State Highway Engineer pointed out that this report reveals that right of way remaining to be purchased for this project consists of only one tract at the east end of the Broadway Bridge, which tract is needed to provide for a better turn onto the bridge, and incidentally to serve as an area for a detour road that must be provided when the end of the Broadway Bridge is reconstructed. The appraised value of this property, he said, is $6,700, of which amount the city is asking the state to pay a pro-rata share, on the same basis that the other properties were purchased. He exhibited a map showing the location of the property, and recommended approval of the participation of the state in the purchase of this parcel. Mr. Apperson confirmed the Engineer's statement and asked the Commission to approve the purchase of the property on such cooperative basis. The Commission unanimously approved the purchase of the tract on the basis of the recommendation.

that of Allstate Construction Company, on Building No. 13601, for the sum of $150, which bid is $50 in excess of the appraised value of the building. He recommended acceptance of this offer. The Engineer and Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Right of Way Engineer also reported an offer received from the Allstate Construction Company subsequent to the opening of bids in Salem on September 2nd, for the purchase of five additional houses at Warrendale, all five having been included in the previous list. This Company, he said, has offered to pay $500 for buildings identified as Nos. 13597, 13598, 13599, and 13600 and 13602. He pointed out that the appraised value of these buildings totals $175 and he recommended acceptance of the offer. He also recommended that the remaining two buildings described as buildings Nos. 13317A and 13317B, which are appraised at $25 and $50 respectively, be turned over to the state's contractor for his use and disposal during construction of the highway. The Engineer and Chief Counsel concurred in both recommendations. The Commission approved the recommendations unanimously.

The Right of Way Engineer also reported that a residence building at 1401 Walnut Street, Eugene, was also advertised for bids to be received on September 2nd, but no bids were submitted.

The Right of Way Engineer reported the results of taking bids in Salem on September 12 for the purchase of two residence buildings at Delmar and one parcel of land with buildings at Coaledo, all being located on the Delmar-China Camp Section of the Oregon Coast Highway between Coos Bay and Coquille, as follows:

Building No. 14097-A

1.	Arnold H. Miller, Coos Bay	$ 304.00
2.	Walter W. Tymich, Coos Bay	167.50
3.	Joe Glickman, Coos Bay	125.00

Building No. 14099-A

1.	George R. Chard, Coos Bay	250.00
2.	Walter W. Tymich, Coos Bay	210.00
3.	Joe Glickman, Coos Bay	75.00

Land with Buildings, No. 14226

1.	Walter W. Tymich, Coos Bay	1,515.00
2.	Joe Glickman, Coos Bay	600.00
3.	Walter C. Zeigler, Coos Bay	575.00
4.	O. E. Zeigler, Coos Bay	475.00

He recommended rejection of all bids for the purchase of Building No. 14097A, and acceptance of the high offer for each of the other two properties The Engineer and Chief Counsel concurred. The Commission approved the recommendation unanimously.

The Chief Counsel reported the status of acquisition of right of way for the Dodson-Bonneville Section of the new Upper Columbia River Highway. He advised that all right of way has been cleared with the exception of that required from the following owners: Hazel Potter Meyer, Eric Enquist, Noyes Tyrell, Walter E. McElroy, the Union Pacific Railroad, and the Federal Government. He stated that the Meyer property is in litigation instituted by Mr. Meyer, and that this case can be tried without any inconvenience or hazard to the state after the contract for the construction of the highway has been awarded. As to the Enquist property, he advised that he has reached a settlement with Mr. Enquist on the basis of paying him $40,000 for his property and that Mr. Enquist assumes the responsibility of removing the buildings from the right of way. He presented an agreement with Mr. Enquist covering this transaction, and recommended its approval. The Commission unanimously approved the settlement, and signed the agreement later in the session. Concerning the Tyrell property, the Chief Counsel advised that he has reached a satisfactory settlement with Mr. Tyrell on the basis of paying him $6,300. Mr. Tyrell, however, has some renters on the property who are not satisfied, so it will be necessary to acquire this property by condemnation. The Commission unanimously approved such procedure. With respect to the McElroy property, the Chief Counsel said that it has not been possible to reach a satisfactory settlement with Mr. McElroy by negotiation, so condemnation action has been started to acquire it. No definite word has been received from the Union Pacific Railroad or the Federal Government with regard to the acquisition of the property needed from them, but this is not serious and need not delay the awarding of a contract for the construction of the highway if a satisfactory bid is received. In summarizing his report, the Chief Counsel stated that if the Highway Commission should receive a satisfactory bid on the following day for the construction of the Dodson-Bonneville Section he will clear the project insofar as the right of way is concerned. The Commission approved the report.

A letter was presented from Mr. Chester J. Irelan, Portland, requesting reconsideration of the action taken by the Commission at its previous meeting with respect to his offer to purchase for the sum of $100 a portion of the old access road to Ecola State Park, Clatsop County, particularly the west half of Lot 22, Block 18 of the Subdivision known as Seal Rock Beach. In the discussion of this matter it was pointed out that the old road is no longer used, in fact is overgrown with brush, and that the public is now using the roadway constructed on a dedicated street in front of the lot in question, so there would be no objection to the Commission's deeding to Mr. Irelan the property that he wants if the Commission so desires. The Secretary presented a statement signed by the State Parks Superintendent, the Right of Way Engineer, the State Highway Engineer, the Chief Counsel, and the Assistant State Highway Engineer, recommending sale of the property to Mr. Irelan for $100. As a result of careful consideration, the Commission decided unanimously to accept Mr. Irelan's offer and to deed the property to him.

The Right of Way Engineer reported the results of the taking of bids in Salem on September 2, 1949, for the sale of eight residence buildings on the Dodson-Bonneville Section of the new Columbia River Highway at Warrendale, Multnomah County. He advised that only one bid was received, it being

The State Highway Engineer reported the results of receiving bids in Salem on September 12 for the purchase of fir timber standing on a state-owned quarry site, located adjacent to the Sunset Highway, about three miles east of Elsie, as follows:

1.	F. C. Hathaway, Seaside	$ 246.00
2.	Evans Log Company, Seaside	204.00
3.	G. & A. Logging Company, Seaside	163.00

He recommended acceptance of the offer of the high bidder, F. C. Hathaway, at $246, which is $24 more than the appraised value of the timber. The Chief Counsel concurred. The Commission approved the recommendation unanimously.

The Commission discussed with the Engineer the bids received at the morning session for the construction of highway projects, and at 3:00 p.m. Chairman Banfield announced publicly the Commission's decision with respect thereto, the action of the Commission being by unanimous vote:

"Construction of 4,300 lineal feet of concrete median island and 4,000 square yards of surfacing and paving on the Ochoco Avenue-Milwaukie Section of the Pacific Highway East, in Clackamas County. The Commission received two bids for this work, the low one being that of Cascade Construction Co., Portland, at $16,642.50, and the other being that of Parker Schram Co., Portland, at $21,763. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Cascade Construction Company, when certain conditions have been satisfied.

"Elk Creek Bridge and Sunset Boulevard Grade Separation Project on the Oregon Coast Highway in Clatsop County. Lindstrom Bros., Portland, submitted the low bid for this work at $63,685. Burgess Construction Company, Gearhart, submitted the next low bid at $68,731. There were ten higher bids. The Commission has awarded the contract to the low bidder, Lindstrom Bros., at their bid price.

"0.10 mile of grading and paving on the Oak Street Section of a city street in the Town of Myrtle Creek, Douglas County. The Commission received only one bid for this work, being that of Tauf Charneski, Eugene, at $19,154. The bid has been rejected.

"Construction of a bridge over the Rogue River on a county road in the Town of Rogue River, Jackson County. Lindstrom Bros., Portland, submitted the low bid for this work, in the amount of $130,950. The next low bid was submitted by Tom Lillebo, Reedsport, at $136,815. There were four higher bids. This is a county project, advertised in behalf of the Jackson County Court, in view of which the Commission is referring all of the bids to the County Court either to reject them or to award the contract.

"Installation of traffic signals in the City of Medford, Jackson County. The low bid for this work was submitted by Trowbridge and Flynn Electric Company, Medford, at $4,465. City Electric Company,

Salem, submitted the next low bid at $4,984 One higher bid was received. The contract has been awarded to the low bidder, Trowbridge and Flynn Electric Company, at its bid price.

"Grading, paving and landscaping on the Redwood Junction Section of the Pacific Highway in Josephine County. R. & M. Construction Co., Central Point, submitted the low bid for this work at $16,579. They stated that they would not accept projects totaling more than $125,000 at this letting. Snook Bros., Corvallis, submitted the next low bid at $19,000. There was one higher bid. The contract has been awarded to the low bidder, R. & M. Construction Co. at its bid price.

"Construction of a Highway Department Maintenance Building at Fort Klamath, Klamath County. Enoch I. Maerz, Salem, submitted the low bid for this work at $12,763. He stated that he would accept the award of only one contract at this letting Gilbert Roberts, Hood River, submitted the next low bid at $13,321. There were three higher bids. The Commission has awarded the contract to the low bidder, Enoch I. Maerz, at his bid price.

"Construction of a frame dwelling and garage in Armitage State Park, Lane County The low bid for this work was submitted by L. J. Plank, Woodburn, at $11,390. Enoch I Maerz, Salem, submitted the next low bid at $13,970. He stated that he would accept the award of only one contract at this letting. There was one higher bid. The contract has been awarded to the low bidder, L. J. Plank, at his bid price

"Installation of traffic signals in the City of Cottage Grove, Lane County. City Electric Co., Salem, submitted the low bid for this work, at $2,985.31. The next low bid was that of C. & S. Electric Co., Eugene, at $3,362 There were two higher bids. The contract has been awarded to the low bidder, City Electric Company, at its bid price.

"7.54 miles of pavement resurfacing on the Otis-Sulphur Creek Section of the Salmon River Highway, Lincoln County. Warren Northwest, Inc., Portland, submitted the low bid for this work at $127,320. The bid submitted by Porter W Yett, Portland, was next low at $129,460. There were five higher bids. The contract has been awarded to the low bidder, Warren Northwest, Inc. at its bid price.

"Guardrail and sightpost construction on the Troutdale-Dodson Section of the new Columbia River Highway, Multnomah County. R. & M. Construction Co., Central Point, submitted the low bid for this work at $82,177 They stated that they would not accept projects totaling more than $125,000 at this letting. D & R. Construction Company, Beaverton, submitted the next low bid on this project at $88,915. There were seven higher bids. The contract has been awarded to the R. & M. Construction Company, low bidders, at their bid price

"Construction of a bridge over Moffett Creek on the upper Columbia River Highway, Multnomah County. Frank Watt Construction Co., Portland, submitted the low bid at $77,600. The next low bid was submitted by

Lindstrom Bros., Portland, at $86,875. There were six higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Widening the bridge over McCord Creek on the upper Columbia River Highway, Multnomah County. Lindstrom Bros., Portland, submitted the low bid for this work at $95,365. The next low bid was that of Archie R. Averill, Portland, at $112,150. He stated that he will accept the award of only one project at this letting. There were four higher bids. The bids have been referred to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Grading, surfacing and oiling the Holdman-Helix Section of the Holdman-Helix County Road, Umatilla County. Newport Construction Company and Kern and Kibbe, Portland, submitted the low bid for this work at $170,582.60. The next low bid was that of A. H. Saxton & Son, Corvallis, at $178,217.60. Both of these bidders stated that they would not accept the award of this contract unless also awarded the contract for grading, surfacing and oiling on the Holdman Junction-Campbell Ranch Section of the Athena-Holdman Secondary Highway in Umatilla County. There were fifteen higher bids. The low bid for the construction of the Holdman Junction-Campbell Ranch project was submitted by Newport Construction Company and Kern & Kibbe, Portland, at $68,509.18. The next low bid for this work was submitted by F. R. Hewett Co., Parkwater, Washington, at $75,757. Both of these bidders stated that they would not accept the award of this project unless they also received the award of the contract for the Holdman-Helix Project. There were fifteen higher bids. A study of the bids for both projects reveals that the combination bid of Newport Construction Co. and Kern & Kibbe, Portland, low, at $239,091.78. The next low combination bid was that of A. H. Saxton and Son, Corvallis, at $249,059.68, considering this contractor offered to reduce the amount of his bid by $5,000 if awarded both contracts. The Commission has awarded both contracts to the low combination bidder, Newport Construction Company and Kern & Kibbe."

Mr. W. H. Lynch, Division Engineer, Bureau of Public Roads, was present and discussed with the Commission the matters which follow:

1. Proposed agreement covering the financing of the Forest Highway Project on the Pacific Highway south of Canyonville, Douglas County.

2. Proposed agreement with respect to the maintenance of detours in connection with the Forest Highway Project south of Canyonville.

3. Matter of continuing construction on the Enterprise-Lewiston Highway in Wallowa County.

4. Programming of Federal funds authorized for 1951.

5. Proposed Forest Highway Project on the Beech Creek Section of the Pendleton-John Day Highway, Grant County.

Concerning the first of the above items, Mr. Lynch advised that he plans to advertise the project for bids within the next thirty days, and if a satisfactory bid is received, he would like to be in position to award the contract, which he cannot do unless the state will either pay its cooperative share now or tell him in writing that it will contribute toward the cost and when such contribution will be made. He recalled that the estimated cost of the project is $1,957,484, and that the state's share is estimated at $816,000. The Commission decided unanimously to make the state's share available to the Bureau of Public Roads on or before January 30, 1950. Mr. Lynch indicated his approval thereof, whereupon the Commission instructed the Chief Counsel to prepare an appropriate letter giving Mr. Lynch the information in writing. (The letter referred to was prepared by the Chief Counsel and was approved and executed by the Highway Commission on September 21, 1949. See copy of letter in general files.)

Concerning the maintenance of detours during construction of the Canyonville project, Mr. Lynch gave as his understanding that, if the Federal Government will construct the detour, the state will oil it and maintain it at federal expense. The Commission unanimously approved such arrangement and later in the session signed an agreement with Mr. Lynch covering the matter.

The Commission referred to the Engineer for report at its next meeting the matter of continuing from year to year improvements on the Enterprise-Lewiston Highway under a cooperative arrangement with the Bureau of Public Roads.

Concerning Item No. 4, Mr. Lynch advised that Federal funds for financing construction work proposed for 1951 are now available and he suggested that the individual projects proposed for such program be submitted to the Bureau of Public Roads for approval so as to avoid delay in contracting the work. The Commission approved the suggestion and referred the matter to the Engineer to carry out.

Concerning Item No. 5, Mr. Lynch advised that his department is now preparing plans for the Forest Highway Project on the Beech Creek Section of the Pendleton-John Day Highway, and in connection therewith must know the exact point where the Beech Creek Secondary Highway over which the Pendleton-John Day Highway is now routed north from Mr. Vernon will connect with that highway when constructed on the proposed location north from the town of John Day. The Engineer was instructed to provide Mr. Lynch with such information.

The Engineer reported receipt of complaints from people residing along the old route of the Columbia River Highway between Troutdale and Dodson, that this highway is not properly signed, and that traffic on this route has dropped off from 4,700 vehicles to 780 vehicles on weekdays due to the opening of the new highway. He exhibited a map showing a proposed method of signing which he thought would satisfy all parties, and requested authority to try it out and observe the traffic results. In the discussion of this matter the Engineer advised that the people on the old route want both routes designated as US30. He said that cannot be done because it is contrary to the rules of the American Association of State Highway Officials and the Bureau of Public Roads. The Chief Counsel advised that the name "Columbia River Highway" was given the old route by legislative enactment. He read aloud the law covering the matter

and pointed out that this law authorizes the Commission to change the route of any highway. Such authority, he said, implies that if the route is changed, then the new highway would take the name of the old one and in this case the water-grade highway up the Columbia River would still carry the name "Columbia River Highway." It was the feeling of the Commission that the responsibility for the signing of the highway so that the general public will know which route it is traveling rests with the Engineer. The Engineer was authorized to install the signs in accordance with his plan. The results are to be carefully observed to ascertain whether or not the signs serve the purpose satisfactorily. A decision with respect to naming the two routes was deferred until later.

The Chief Counsel reported a request from the Portland General Electric Company to lease for a period of three years a small parcel of state-owned land adjacent to the Tualatin Valley Highway, at Aloha, Washington County, as a site for a temporary substation. He presented a sketch showing the location of the property and advised that the company has stated a willingness to pay $50 annually for the use of the same. He recommended approval of the request, and that the matter be covered by a revocable lease. The Engineer concurred therein. The Commission approved the recommendation unanimously.

The Commission discussed a proposed agreement with the Southern Pacific Railroad Company covering the installation of a drainage pipeline on railroad property near the city of Tillamook. The Engineer explained that in the reconstruction of the Tillamook-Pleasant Valley Section of the Oregon Coast Highway, considerable borrow materials were required and this material was obtained at the site of a proposed future crossing of the Wilson River Highway with the Southern Pacific Company tracks, just east of Tillamook, and it is now necessary to provide for the drainage of the hole that was left by the excavation of this material. The agreement under discussion, he said, provides for construction of the drainage pipe on railroad company property. He recommended approval of the agreement. The Commission approved the recommendation. (The agreement was signed later in the session.)

The matter of sale to the City of Pendleton of a 7.2 acre tract of state-owned land adjacent to the Pendleton Airport Secondary Highway, had the attention of the Commission. The Engineer presented letters from the County Court of Umatilla County, and from the City of Pendleton outlining a procedure to dispose of this matter. Due to complications involving the legality of the procedure, the Commission again deferred action on the matter and referred it to the Chief Counsel for further study and a definite recommendation. He was cautioned to bear in mind the Commission's desire to dispose of all of the property in one transaction and to be relieved of the responsibility of maintaining the secondary highway.

The Right of Way Engineer reported demands of Messrs. Arthur Livingston, D. E. Willis and William E. Fangerow, owners of properties that were acquired in connection with improvements to the Alsea Highway, for construction of fences along their properties. He explained that when the original deals were made with these owners, fencing was estimated to cost three dollars a rod, and the owners insisted on the fences' being built by the state rather than cash allowance being given them, and they are now again demanding the fence construction, which will cost about $200 more than was

originally anticipated. He recommended approval of the expenditure. The Commission unanimously approved the recommendation, under the conditions outlined in the original negotiations.

The Commission discussed a request from the Douglas Forest Protective Association for right of access to the Pacific Highway at the site of their proposed fire patrol station adjacent to the highway near Glendale Junction. The Engineer advised that the site is on the newly constructed highway between Azalea and Glendale, where access rights to the highway were acquired by the state when right of way was secured. The access feature, he said, was brought to the attention of the association, which now advises that a service road connecting with the county road in the near vicinity would be satisfactory for their purposes. The highway right of way at this point, he said, is sufficiently wide to accommodate both service road and four traffic lanes later on when required. He recommended that a revocable permit be granted the Association to construct and maintain the service road at its own expense on the outer edge of the state's right of way. The Commission approved the recommendation unanimously.

The Chief Counsel reported the status of the McNalley right of way matter involving proposed widening of the Pacific Highway East a short distance south of Salem, and the acquisition of access rights thereto. He stated that pursuant to instructions given him by the Commission at the previous meeting, he contacted Mr. McNalley, who stated his refusal to surrender any of his access rights. He suggested, therefore, in view of the fact that additional width right of way in this location is not absolutely essential at this time, that the matter be dropped. The Commission approved the suggestion and so ordered.

The Commission discussed a written report from the Chief Counsel on the establishment of restroom facilities at Depoe Bay. In his report, the Chief Counsel suggests the construction of such facilities on the ocean side of the highway a short distance north of the bridge, where steps have already been constructed, and that the building be provided with a flat roof that could be used as a viewpoint from which to watch fishing craft leave and enter Depoe Bay. The State Parks Superintendent offered objections to this location and as a result of discussion, the Commission referred the matter to the Engineer for study and a report.

The Chief Counsel presented for the Commission's consideration a form of resolution covering the Commission's action taken at the previous meeting with respect to his authority to settle controversies involving the acquisition of real properties which are under condemnation. The Commission unanimously adopted the resolution attached hereto, marked EXHIBIT "B", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed written reports from the Chief Counsel and the Engineer with respect to the application of Chapter 450, Oregon Laws 1949, which concerns the granting of permits for movements over state highways of vehicles or combinations of vehicles having a length and combined gross weight in excess of statutory limits. It appears that a controversy has developed with respect to the interpretation of the act and its administration, and it is claimed that the administrative construction placed on the act by Highway Department Weighmasters and by the State Police is in conflict with the purpose and meaning of certain parts of the law. The issues that have been raised are these:

1. May the enforcing agency, when attempting to determine the gross weight of a combination of vehicles, construe the words which appear at the head of the table of weights so as to permit the combining of two axles on one of the combination of vehicles with two of the axles on the other vehicle, or does the act permit only a grouping of axles on each separate vehicle?

2. In the event an operator is found to have violated the act because and by reason of an overloaded axle or group of axles, is he thereby denied the five percent tolerance provided in the law?

(For details of the Chief Counsel's opinion with respect to these two issues, see copy of his written report to the Highway Commission dated September 12, 1949, in general files.) The Engineer advised that this law went into effect early in July, 1949, and that prior thereto the permit forms to be issued to truckers under authority of that law were checked in detail by himself as to engineering features and by the Legal Department pursuant to the usual custom and practice; also, that a resolution making specific reference to permit forms was approved by the Commission at its meeting on June 28, 1949, and permits since the law became effective contain provisions as set forth in this resolution. However, since that time the Oregon Motor Transport Association has questioned the interpretation placed upon the law by the regulations. He referred to the opinion of the Chief Counsel regarding the matter and pointed out that as a result of this opinion, there is no legal control of axle loadings in a combination of vehicles, and, unless some control is established, and a top range is placed upon loads on certain groups of axles, stresses may be set up in bridges which would be highly dangerous and other highway facilities may also be overstressed and damaged. This matter, he said, has been given very careful consideration and a new regulation formulated which is based upon permitting a 12½ percent increase for certain critical loadings above the table of weights, for varying axle spacings as mentioned in the law. Such increase, he said, will lower the factor of safety forty percent, but will leave sixty percent of the factor of safety effective. He presented the regulation, which he said has the approval of the Chief Counsel and also has been approved by the Oregon Motor Transport Association, and he recommended its adoption. (For further details see copy of the Engineer's written report to the State Highway Commission, dated September 16, 1949, in general files.) This matter was discussed at considerable length, but action thereon was deferred by the Commission pending an additional report from the Engineer to give the members of the Commission a clearer understanding of the entire matter. The Commission ordered that until this matter has been definitely settled, the enforcement of the regulations shall be in conformity with the opinion of the Chief Counsel.

The Engineer requested authority to circularize all individuals or firms engaged in the logging or lumbering industry, advising them that it may be necessary for the State Highway Commission to order a reduction in the load limits on certain state highways during the winter and early spring months when these highways are in the period of instability due to excessive rainfall or frost action, and cautioning these operators to provide themselves with a stockpile of logs or to take such other measures as may be

necessary to minimize loss of time in their operations by reason thereof. The Commission unanimously approved the request.

The Commission discussed the Engineer's written report dated September 12, 1949, on the West Portland-Hubbard Highway. The Engineer presented a map showing the location of the proposed highway, and explained details thereof orally, including information as to amounts heretofore expended for right of way and construction, and the estimated cost to complete the project. He gave as his considered opinion that it would be very desirable for the Highway Commission to purchase right of way now for this proposed improvement, in view of the fact that the district traversed by the highway is rapidly being built up and right of way costs will increase proportionately. In the discussion, Chairman Banfield inquired how this project compares as to priority with the further improvement of the Pacific Highway south of Eugene, and with the completion of the new highway up the Columbia Gorge. He pointed out that there now exist two trunk highways extending up the Willamette Valley from Portland, and questioned that there is more need for a third highway in the Willamette Valley than there is for one standard highway either south of Eugene or up the Columbia Gorge. The Engineer advised that in his estimation the Commission should complete the improvements already started on the Pacific and Columbia River Highways before expending any great amount of funds for construction of the West Portland-Hubbard Highway. The Commission deferred action in this matter pending conferences on the following day with delegations which are scheduled to appear at that time. (See copy of Engineer's report in general files for details.)

In this connection, the Engineer presented numerous petitions from farmers and other residents of the Wilsonville, Sherwood, Tigard, Tualatin, Lake Grove and Oswego Districts, urging construction of the West Portland-Hubbard Highway, commonly known as the Wilsonville Cutoff, so as to provide adequate highway facilities between Portland and Salem, comparable to facilities now available to other districts in the Portland area. He explained that these petitions were forwarded to him by Governor McKay with a request that they be presented to the Commission at this meeting. The Commission took no action on the petitions. (See ahead for additional paragraphs on this subject.)

The Engineer presented a written report dated September 15, 1949, on the request of the City of Forest Grove for a study of its traffic problems and for recommendation of ways to correct the traffic congestion which now exists in the main part of this town, which congestion the city has been attempting to alleviate by rerouting traffic over non-highway streets. The Engineer advised that the investigations have been made and it has been found that the congestion could be greatly alleviated by the installation of a one-way street system on two of the city's east and west streets. The plan, he said, contemplates designating Pacific Avenue, present route of the Tualatin Valley Highway and temporary Wilsonville Highway, as a one-way street for westbound traffic, and designating First Avenue South as a one-way street for eastbound traffic. In addition thereto, he said it would be necessary to improve a street by-passing the business district for through north and south traffic, and the investigation indicated that "B" Street, which is two blocks

west of Main Street, would best serve this purpose, although it would have to be widened and resurfaced and some additional right of way acquired. He estimated the overall cost of the project at $73,500 for construction and $6,500 for right of way, and advised that the City of Forest Grove will pay the cost of acquiring the right of way. The Commission deferred action on this matter pending appearance of a delegation the following day. (See ahead for additional paragraph on this subject.)

The Engineer brought up for discussion a claim of the owners of certain property along the Milwaukie-Estacada Secondary Highway just east of the city limits of Milwaukie. He advised that this claim arises out of the opening of a culvert underneath the highway at a point designated as Highway Engineer Station 58+50, the property owners contending that water drains through this culvert and damages land which they have subdivided into residential building sites, and so they insist that a modified type of storm sewer be installed, which is estimated to cost about $2,800. He gave as his opinion that the state is not responsible for existing conditions and is in no way obligated to correct the drainage difficulties, it being the obligation of the sponsors of the land development. In support of his statement, he advised that this particular highway was designated a state secondary highway in 1947. The county records show that it was made a county road in about the year 1870 and had been maintained by the county as such until the state took it over. The county records also disclose that the road is now practically in the same location as it was in 1890, that the culvert under discussion was installed prior to 1910 and that no change has been made in the system of drainage since then. There may be an increase in the volume of runoff, he said, by reason if improvement of side roads and the cutting up of farms into smaller tracts, but such increase certainly has not resulted from any activity of the State Highway Department. He recommended that the claim of the property owners be denied. The Chief Counsel concurred therein. The Commission deferred a decision in the matter until the following day when Mr. Otto J. Kraemer, Portland, attorney for the property owners, was scheduled to be present concerning the matter.

The meeting adjourned at 5:00 p.m. to reconvene the following morning in the same room.

Portland, Oregon
September 20, 1949

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel. The following persons were present and participating:

T. H. Banfield, Chairman
Ben. R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Ass't. State Highway Engineer
W. W. Stiffler, 2nd Ass't. State Highway Engineer

(Cont.)

J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
Forrest Cooper, Right of Way Engineer
M. H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids as follow for highway construction were opened and read aloud by the Secretary in conformity with previously published notice, following which Chairman Banfield announced that awards of contracts would be made at 4:30 p.m. in the same room.

County Judge Nelson B. Higgs, Harney County, and Mr J. L. McCullough, Chairman, Road Committee, Burns Chamber of Commerce, were present and urged the completion of the remaining gaps in the Princeton-Follyfarm Section of the Rome-Princeton Secondary Highway. It was pointed out to these gentlemen that the Commission received at today's letting a satisfactory bid in the amount of $221,109 for the construction of the South Unit of this section, and that is as far as the Commission can go at the present time, although the project will be kept in mind.

Mr. William Tugman, Eugene, was present regarding the following matters:

1. Request that the State deed to the City of Eugene a small tract of state-owned land at Judkins Point which was acquired by the State in 1940 in connection with a right of way transaction.

2. Request that the State Highway Commission consult with the Bonneville Power Administration with respect to the control of a small triangular tract of land situate between the present and proposed locations of the Willamette Highway at Goshen.

Regarding the proposed city park at Judkins Point, Mr. Tugman advised that the State owns a small area above the highway at the point where Skyline Boulevard and Birch Lane intersect; that this tract is valuable as a lookout point and the city would like to develop it as such because of the very fine view it affords of the whole valley area. The matter was referred by the Commission to the Engineer and Chief Counsel for recommendation.

Concerning the tract of land at Goshen, Mr. Tugman advised that the Bonneville Power Administration has acquired some 50 acres of land at this location, which it intends to develop as a large power distribution terminal to serve the entire southwestern part of the state. Most of this property, he said, lies to the north and west of the junction of the Pacific Highway and the Willamette Highway in Goshen, and definitely surrounds the site of the proposed highway overpass of the Southern Pacific Railroad, and the proposed cloverleaf junction between the Willamette and Pacific Highways. The Bonneville Administration, he said, has purchased right of way for its power lines approaching the terminal, but there are some small parcels adjacent to the new highway location which it did not buy, and if these are left in private ownership and right of access to the highway is not acquired, it will act adversely to the state's interests and will, in his estimation, create a very undesirable condition. He suggested that the Commission authorize someone to negotiate with the officials of the Bonneville Power Administration to ascertain whether or not something can be done to protect the interests of all parties concerned. The Commission expressed appreciation for the information, and referred the matter to the Engineer and Chief Counsel for investigation and report.

Mr. Harvey Blythe, Executive Secretary, US99 Association, was present and invited the members of the Commission and its staff to attend a regional meeting of the Association, which is to be held in Grants Pass on September 27. Each member of the Commission expressed regret that he would not be able to attend the meeting. The State Highway Engineer was delegated to represent the Commission at this function, but Mr. Blythe was informed that the Engineer will not be in position to state definitely what the Commission is going to do with respect to additional improvements to the Pacific Highway. Chairman Banfield stated that the Commission recognizes the need for a lot of work on this highway and it has some improvements in mind but has not as yet arrived at a point of decision. Mr. Blythe gave as his understanding that the Commission has a reserve in the amount of $4,500,000 of highway funds for highway construction, and suggested that $2,000,000 of such amount be allocated for improvements on the Pacific Highway between Portland and the California State Line, and the balance allocated to other highways on the interstate system. The Commission gave Mr. Blythe no encouragement, but informed him that his request would be kept in mind in the programming of future funds.

The meeting recessed at 12:00 noon and reconvened at 1:45 p.m. with the same persons present and participating.

Mr. Otto J. Kraemer, Attorney, Portland, Mr. S. H. Guild, his client, and Mr. David Fain, Attorney, composed a group which appeared before the Commission regarding a drainage problem along the Milwaukie-Estacada Secondary Highway near the east city limits of the town of Milwaukie. Mr. Kraemer stated that he represents Mr. Vernon Ford and Mr. Guild, whose properties are affected, and that Mr. Fain represents Mr. Carter Stanley, owner of adjoining property. He advised that Messrs. Ford and Guild own fifteen acres of land at the point under discussion, which land they have platted into lots and blocks. Part of the property has been sold, but they have been unable to sell more because of the damage caused by the improvement of the highway by the State in 1947. He explained that the state regraded the highway and opened up a culvert which allows water to flow onto his clients' land, and as a result, four or five acres are absolutely worthless insofar as sales are concerned. He alleged that the state is absolutely responsible for the condition and urged the Commission to remedy it by constructing a drainage ditch on the line between their property and that of Mr. Stanley, from the highway to Kellogg Creek, which, he said, the Engineers have estimated will cost about $2,800. Mr. Fain endorsed the statements of Mr. Kraemer and added that until the highway was improved by the State no innundation of the property had occurred. He suggested that proof might be obtained by blocking the flow of water through the culvert. He, also, urged favorable consideration of their request. Following discussion, the Commission referred the matter back to the Engineer and Chief Counsel for further investigation and report.

The Hon. Max Landon, State Representative, Sweet Home, appeared before the Commission with Jesse M. Parker, City Manager of Sweet Home, regarding the proposed improvement of the Santiam Highway in this town. They were informed that the Highway Commission is eager to proceed with the improvement but cannot do so until the city has furnished the necessary right of way, according to previous understanding and agreement, there being three or four property owners holding up the improvement. Chairman Banfield advised that it is the feeling of the Commission that the citizens of Sweet Home should join with the Highway Commission in obtaining this right of way at a reduced cost, it being now too high, and if the property cannot be acquired at reasonable cost, then the city should join with the state in condemning it. According to present estimates, he said, the cost of the land will be about $18,000. The problem was referred to the Engineer and Chief Counsel to discuss details with city officials.

The Hon. Frank H. Hilton, State Senator, and Mr. H. R. Kibler, both of Portland, were present and urged the construction of the remaining sections of the Wilsonville Cutoff (West Portland-Hubbard Highway) including the bridge over the Willamette River at Wilsonville. Senator Hilton advised that they represent the Tualatin Civic League which is composed of people from Wilsonville and all other communities served by this road. He urgently requested construction of the project from the standpoint of saving in mileage and time to motorists, prevention of accidents by reason of the highway's being designated a throughway, and elimination of inconveniences and delay incidental to the ferry operation at Wilsonville. He presented a number of petitions signed by 266 resident property owners of the district served. Mr. Kibler endorsed the remarks of Senator Hilton, stressing the traffic

volume and prevention of accidents. He compared this highway with Sandy Boulevard in Portland. In a brief discussion of the matter, Chairman Banfield advised that the Commission appreciates the desire for the construction of this highway, but it is a costly undertaking. Moreover, as to right of way, the records do not disclose that any Highway Commission ever authorized the purchase of the land that is needed for right of way purposes; nevertheless, the Commission will give consideration to this project in its further deliberations.

Mr. Van Rietmann, Condon, headed a delegation consisting of the following, which appeared before the Commission in the interests of the Wasco-Heppner Secondary Highway (ORE206), particularly the section between Condon and Wasco: State Senator Stuart Hardie, Gilliam County Judge James Burns, Ranchers Virgil Larson, George Caseburg, Duvard Caseburg, H. L. Burris, all of Condon; State Representative Giles French, of Moro; and Ranchers Ernest Shaull and Art VanGuider of Wasco. Mr. Rietmann presented a small sketch map showing roughly the location of the present highway and its condition between its terminals. He urged the improvement of the road from the standpoint of saving in distance between Condon and the junction with US30 at Miller, advising that improvement of this route will realize a saving of 17 miles compared with the present route by Arlington. He gave statistics of the tonnage of produce that is transported over the present road annually, and advised that it is the only traffic outlet for ranchers living more than ten miles west of Condon. He also mentioned that the only hospital facilities available for people in this district are in John Day and The Dalles, and that this road will provide a quick route for people of this district to secure accommodations at the hospital in The Dalles. He suggested that this road could be used as an alternate for US30 during periods when the latter highway is closed by reason of high water in the Columbia River.

Senator Hardie stressed the need for improvement of this highway before the next harvest season. Representative French also endorsed the project, emphasizing the importance of completing the unfinished sections in order to realize savings in the transporting of wheat. He declared the project entirely feasible from the economic standpoint. He, too, stated that the road is important to provide better access to hospitals. He further stated that they do not expect the Commission to do all of the work in one year, but they would like to have it programmed for continuous construction so as to expedite completion within a reasonable length of time. Mr. Caseberg also spoke for the project, advising that the road in its present condition is very nearly impassable, that it needs surfacing, and that they expected some oiling on it this year. The delegation was advised that the Commission has this project in mind, and has provided in its construction program for some work, which it is planned to contract next year; that the oiling cannot be done during the winter season. Mr. Burris complained of the condition of the Cottonwood Grade Section. He stated that the gravel surfacing has not been constructed properly and that surface water runs down the center of the road for a distance of about two miles. He requested better maintenance, and construction of ditches adequate to convey the water to culverts that have been provided. The Engineer was instructed to look into the matter.

A delegation from Forest Grove, headed by Mr. James R. Shich, City Attorney, was present and requested assistance from the state in the solution of a traffic problem in their city. Others in the group were: M. O. Gardner, City Manager; Merchants Elmer Hamilton, Leon McQuary, Dale Underwood and Bruce Dougherty; and G. Bendix. Mr. Shich briefly outlined a possible solution of their problem which involves the improvement of "B" Street southerly from Third Avenue North to a junction with the Tualatin Valley Highway near the south city limits, and the adoption of a one-way street grid system whereby Pacific Avenue, present route of the Tualatin Valley Highway, would be designated a one-way street for westbound traffic, and First Avenue South would be designated a one-way street for eastbound traffic. He advised that this solution is the result of investigations made by state highway engineers, and that the City Council will approve the entire plan, if necessary, in order to secure the improvement, notwithstanding that not the entire community is in favor of it. The City, Mr. Shich said, will furnish necessary right of way (estimated to cost about $6,500) for the "B" Street extension to the Tualatin Valley Highway. (For further details on the plan see the Engineer's report on the same subject as rendered previously at this meeting.) The delegation was informed that the Commission will be in session for another day and probably will discuss the matter again.

The County Court of Tillamook County, represented by County Judge Harland M. Woods, and County Commissioners A. D. Thompson and Wes Schuemerich, appeared before the Commission regarding the following projects:

1. Exchange of the Cloverdale Loop County Road, which extends from the Oregon Coast Highway near Hemlock, via Sand Lake and Pacific City, to a connection with the Oregon Coast Highway near Cloverdale, for the Little Nestucca State Secondary Highway.

2. Construction of a road extending from Netarts Secondary Highway into Cape Lookout State Park.

3. Construction of the proposed new entrance of the Wilson River Highway into the City of Tillamook.

Judge Woods asked the Commission to place the Cloverdale Loop County Road on the State Secondary Highway System. He advised that with the exception of a section one-half mile in length, the road is oiled throughout. Chairman Banfield advised that this road is not familiar to the Commission; moreover, the Commission is not very desirous of taking over any more county roads on the secondary highway system. However, the Commission will have an engineering investigation made and then will take action. The Engineer was thereupon instructed to make such investigation. Concerning his request for the construction of a road into Cape Lookout State Park, Judge Woods advised that a road two miles in length would have to be constructed. He declared that this road would serve one of the best p·ks in the state park system, and that the county would cooperate in the co··ruction of the same, because they feel that the expense is justified. The Commission referred the matter to the Engineer and Parks Superintendent for a report.

Judge Woods asked for the early construction of the proposed Wilson River Highway approach into Tillamook. He was informed that the Commission has this project in mind and that a survey is being made, it being now about 95% completed. Commissioner Schuemerich urged the improvement of the Little Nestucca Secondary Highway. He stated that the present road is in very poor condition, and that the people of his county are very desirous of having it improved. He suggested that if the Commission is not in position to make this improvement the road be turned back to the county, because the county would rather have it back than allow it to continue in its present condition. If necessary, he said, the county will complete the oiling on the Sand Lake road and exchange that road for the Little Nestucca Secondary. The Commission deferred a decision in the matter until its next meeting. The Engineer was instructed to make necessary investigations and report his findings to the Commission at that time.

A delegation from the City of Milwaukie, consisting of the following persons, was present regarding the construction of a service road adjoining US99E between Milwaukie and Portland, and the construction of a concrete divider strip on this highway, for which work the Commission received bids at this meeting: City Attorney E. E. Kirkpatrick, Mayor Fred Sperr, City Councilman Ed Norbeck, City Manager Jack Taber, and J. F. Weigant of the Chamber of Commerce. Mr. Kirkpatrick headed the group. He urged the construction of the service road and advised that if the Commission will construct it, the owners of abutting property will forfeit their access rights to the main highway. He protested the divider strip and stated that in any event the city should have been consulted regarding it before the Commission definitely decided to build it. Chairman Banfield advised that a divider strip is the state's responsibility and that it was ordered by the Commission only after it was deemed necessary. Concerning the proposed service road, Chairman Banfield advised that the Engineer has recommended that the state spend approximately $13,500 for surfacing and paving such road, if the city will construct the grade, the present northerly terminus of the road being at the roadway entrance to the housing project, and the southerly terminus being at the northerly boundary line of the property owned by the Scott Estate. The Commission, however, is reluctant to approve such a project because of the obligation that it would carry to extend the project into the City of Milwaukie. Mr. Kirkpatrick replied that to go just that far would be anything but satisfactory. He requested assurance that the service road would be constructed the entire distance between Milwaukie and Portland. He said that they are not asking construction of all of it now, but they will be satisfied with the section between the entrance to the housing project and Harvester Avenue, the balance to be constructed later. He restated that the owners of abutting property will surrender their access rights to the highway if granted this service road. Mr. Sperr spoke in opposition to the construction of the concrete divider strip. Chairman Banfield concluded the discussion by stating that the Commission would discuss both problems at its meeting on the following day and at that time decide the action to be taken on both matters. (See additional paragraph ahead.)

A large delegation from Salem and vicinity, representing the Salem City Council, Salem Chamber of Commerce, Salem City Planning Commission, West Salem City Council, Marion County Court and representatives of the West Salem and the Mill City Chambers of Commerce, appeared before the Commission

regarding highway matters as they directly concern Salem and vicinity. This delegation was headed by Mr. G. F. Chambers, Chairman of the Highway Committee of the Salem Chamber of Commerce, and included the following:

Robert L. Elfstrom, Mayor of the City of Salem
E. L. Rogers, County Commissioner, Marion County
Roy Harland, President, Salem Chamber of Commerce
J. L. Franzen, City Manager, Salem
Clay Cochran, Manager, Salem Chamber of Commerce
Robert Veness, Manager, Mill City Chamber of Commerce
Walter Musgrave, Mayor of the City of West Salem
Earl Burk, Councilman, West Salem
Roy Rice, County Commissioner, Marion County
W. W. Chadwick, State Representative, Salem
Linn C. Smith, Asst. Vice Pres., Ladd & Bush Bank, Salem
Guy Hickok, Mgr. Salem Branch First Nat'l Bank of Portland
Carroll Meeks, Manager, Willamette Valley Bank, Salem
Clyde Everett, Mgr. Oregon Flax Textiles, Inc., Salem
Robert Jones, Asst. Publisher, CAPITAL JOURNAL
James Olson, Staff Writer, CAPITAL JOURNAL
Lester F. Cour, Valley Editor, THE OREGON STATESMAN, Salem
J. C. Kimmel, Mill City Chamber of Commerce President
Charles Wolverton, Publisher, MILL CITY ENTERPRISE
Charles C. Kelly, Postmaster, Mill City
R. Lowell Stiffler, Merchant, Mill City
D. L. Beebe, Mill City
Lee S. Ross, Merchant, Mill City
Martin J. Hansen, Mill City
Russel Bonesteele, Merchant, Salem

Mr. Chambers introduced Mayor Elfstrom, who spoke briefly on the proposed Salem traffic plan. Mr. Elfstrom stated that the City Council, by a majority vote, has approved the plan by the passage of an ordinance and a resolution. He presented a copy of each and stated the wish that the Commission would put the plan into effect as soon as possible. He also stated that the City Council has executed and delivered to the Commission's Chief Counsel the proposed agreement covering the setup. Mayor Elfstrom further advised that the State Capitol Planning Commission at a meeting held recently had under discussion the Salem traffic plan as it affects the capitol building group, and at that meeting made certain recommendations which are contained in a letter that the city has received from the Chairman of that Commission, Mr. Robert W. Sawyer, dated September 13. He presented the letter and pointed out the suggestion therein that advantages would be gained by the designation of Winter Street rather than Summer Street as a one-way street for southbound highway traffic.

County Commissioner Rogers urged construction of the Mehama-Mill City Section of the North Santiam Highway on proposed alignment on the north side of the river. Chairman Banfield advised that the Commission is familiar with this project and now has it under consideration, but the question of finances is involved.

Mr. Harland presented a list of highway needs in the Salem area, arranged in order of preference, as follows:

1. Salem Traffic Plan -- Would appreciate consideration of Highway Commission to begin work on the Salem Traffic Plan at the earliest date possible.

2. North Santiam Highway (especially between Mill City and Mehama) -- Believe this should be given consideration because of the extremely heavy traffic to be carried on this road. The two bridges over the river, connecting Linn and Marion counties, were not constructed for heavy traffic, and would not hold up under the amount of traffic which will be necessitated by the work at Detroit Dam.

3. Widening of Highway 99E -- from North of Salem beginning about Lana Avenue to the Hayesville School. In our opinion there is a great need to make this a 4-lane highway.

4. Salem By-Pass Highway -- Believe the need for this is extreme, and that it should be built at the earliest possible time.

5. Wilsonville Cut-off -- We urge the completion of the Wilsonville cut-off including the bridge across the Willamette River. This route saves four miles from any point south to Portland, via the Wilsonville road.

He spoke in considerable detail in support of each individual project. Mr. Harland mentioned also the recommendation of the Capitol Planning Commission relative to the routing of traffic in the Capitol center area, involving the closing of streets running in an easterly and westerly direction between Court Street and Union Street. He gave as their belief that this is a matter of long-range programming, and that it is not necessary to consider these streets at the present time nor in the near future.

Chairman Banfield advised that the Commission is interested in this program, but must take action concerning the several projects in sequence as needed and none of them can possibly be completed early enough to satisfy everyone. The Commission, he said, must consider these projects along with others from a statewide standpoint, and from the financial angle. Concerning the Mehama-Mill City Project, Chairman Banfield gave as his feeling that the Federal Government has a lot of responsibility there because the building of the Detroit Dam is largely responsible for the volume and kind of traffic that is using the present road. The Federal Government, he said, should take care of this traffic on the same basis that it is building the dam. Chairman Banfield also mentioned the proposed Wilsonville Cutoff, advising that a two-lane facility is estimated to cost $3,200,000 and a four-lane highway involves upwards of $5,000,000. The Highway Commission, he said, is handicapped by lack of funds and is going as far as it can in considering approval of the Salem Traffic Plan, which it understands is the delegation's number one project. He inquired of the Commission's Chief Counsel whether or not the agreement as executed by the Salem City Council is satisfactory from the legal standpoint.

The Chief Counsel replied in the affirmative and recommended approval of the same. He then inquired of the Engineer whether or not the agreement is satisfactory from an engineering standpoint. The Engineer also recommended approval of the arrangement. Motion was thereupon made by Commissioner Chandler that the agreement as recommended by the Chief Counsel and the Engineer be approved and signed by the Commission. The motion was seconded by Commissioner Reynolds. Chairman Banfield declared the motion carried by the unanimous vote of the Commission. (The agreement was signed by the Commission later in the session.)

A delegation from Mt. Angel, representing the City Council and a committee of businessmen appeared before the Commission in the interests of the Hillsboro-Silverton Secondary Highway, particularly the Woodburn-Silverton Section thereof. This group was headed by the Hon. Jacob Berchtold, Mayor of the City of Mt. Angel, and included Flax Plant Manager Fred J. Schwab, Creamery Manager Frank Hettwer, Marion Oil Company Manager Pete Gores, Farmers' Union Manager Bernard Kirsh, and Chairman Carl Muchen of the Street Committee. The group was accompanied by County Commissioners Roy Rice and E. R. Rogers of Marion County. Mayor Berchtold advised that this highway carries a large volume of traffic, including trucks and buses, and that the present pavement, which is only 16 feet wide, is entirely too narrow to accommodate these movements in safety. In the wintertime especially, he said, the conditions are conducive to traffic accidents. He urged the Commission to reconstruct the highway on a wider pavement basis. Mayor Berchtold also asked the Commission to fulfill a promise which he alleged was given the city in 1940, to improve this highway through the City of Mt. Angel. The Commission ordered the records checked to see what, if anything, was promised at that time.

Mr. Schwab urged the widening of the present pavement between Woodburn and Silverton, two feet on each side, and the cutting down of the crown of the road, which he said is now entirely too high, and makes a dangerous condition for traffic. Mr. Hettwer endorsed the remarks of the other speakers. He urged the improvement from the standpoint of the Mt. Angel Creamery, which operates 25 trucks daily over the road, and whose drivers continually complain of the dangerous condition. Others speaking in behalf of the improvement were Messrs. Gores, Kirsh and Muchen, and County Commissioners Rice and Rogers.

Chairman Banfield advised that the funds available to the Commission are limited and must be distributed throughout the state on an equitable basis, and the question arises whether or not sufficient funds can be found to provide an improvement such as has been requested. The matter of widening the present pavement will, however, be investigated. The Engineer was thereupon instructed to make such investigation.

Mr. Joe D. Thomison, Prineville, Secretary of the Central Oregon Chamber of Commerce, headed a group which appeared before the Commission concerning the dedication of the Warm Springs Highway. Others in the group were:

W. B. Morse, Prineville, Joint State Representative
Judge A. R. Bowman, Prineville
J. S. Greenwood, Werre, President of Mt. Hood Pow-Wow-ers
Oliver Earl, Madras, President of Chamber of Commerce
W. A. Baer, Bend, Chamber of Commerce

Mr. Thomison gave as his understanding that the Commission expects to open this highway for public use some time in November, notwithstanding that it will not be completed until next summer. The Central Oregon Chamber of Commerce, he said, is very appreciative of this highway and is desirous that it be dedicated with appropriate ceremonies. He asked the Commission to set a definite date for the opening and to participate in the function The Engineer advised that present indications are that the construction of the bridge over Mill Creek, and the Forest Road Section will be far enough advanced so that the road can be opened for public use Tuesday, November 15. After discussion, the Commission left it with the Engineer and Mr. Thomison and his group to set a definite date for the opening The members of the Commission expressed their intentions of being present during the ceremony, if possible. (The Engineer reported later that as a result of further conference with the group, Sunday, November 13, 1949, has been definitely set as the date for opening and dedicating the highway.)

A delegation consisting of members of the Roads and Highways Committee of the Portland Chamber of Commerce, and members of the Sherwood Commercial Club, the Tualatin Civic Club, and the Wilsonville Civic Club, came before the Commission in the interests of the West Portland-Hubbard Highway (Wilsonville Cutoff.) This group was headed by Mr. Arthur R. Kirkham of the Portland Chamber of Commerce, and also representing the Portland Chamber of Commerce were Messrs. J. M. Stewart, Frank G. Mackamen, Stan Anderson and D. L. Colherote. The Sherwood Commercial Club was represented by Mr. Harry Huddleston and the Tualatin Civic Club by Messrs. Clyde Adams, Al Price, H. A Walrod, Omer Moore and Frank T. Koehler, and Dr. H. E. Christensen; and by Mrs. I. Chapman and Mrs. E. M. Maxwell, both of Portland. Appearing for the Wilsonville Civic Club were Messrs. A. H. Berger, J. J. McGovern, H. F. Slough, Dale Gerington, Fred Wiedemann, C. C. Boozier and C. H. Strange, and Louise M. Walsh. Also present was State Representative Lloyd R. Crosby of Milwaukie. Mr. Kirkham stressed the population increase in the State of Oregon during the last few years, particularly in Western Oregon, where he said statistics reveal a 68% increase in population since 1940. Along with the increase in population, he said, there has been a tremendous increase in the volume of traffic, so that facilities for handling this traffic are now being taxed to the bursting point. He urged every consideration by the Commission to accelerate its plans for the construction of this new highway so as to relieve the serious pressure on US99E and US99W.

Mr. Kirkham quoted a remark by Oregon's Governor that there is no reason to think that there will be any change in the present rate of increase in Oregon's population. He declared that the need for this new highway is very plain and that it will have to be given consideration soon. Otherwise, traffic cannot be handled. He gave as his opinion that a mistake was made several years ago in appropriating funds to commence the construction of this highway if the Commission did not intend to complete it, and that it would be a mistake now to forget the road, the right of way for which, he said, can never be purchased any more cheaply than at the present time. Representative Crosby stressed the importance of acquisition of right of way now. He, also, urged the early construction of the road.

Chairman Banfield advised that the members of the Highway Commission recognize the need for additional transportation facilities, but there is no one throughout the state who feels that he should give up his particular pet

project in behalf of a traffic improvement such as this. The Wilsonville Cutoff Route, he said, has never received authorization by any Highway Commission as an entirety, although past commissions have approved certain portions of it and right of way has been acquired for such portions and pavement constructed. The Commission does not have immediately available, he said, the amount the project is estimated to cost to complete -- in excess of $3,000,000 on a two-lane basis, at least $5,000,000 on a four-lane basis. About the only thing that the Highway Commission could possibly do now, he said, is to authorize the acquisition of right of way so that when funds are available for construction purposes, the work can proceed without delay. He concluded the conference by stating that the Commission will discuss the matter with its Engineer and Chief Counsel.

The Commission discussed with the Engineer the bids received during the morning session for highway construction, and at 4:30 p.m., Chairman Banfield publicly announced the Commission's decision with respect to each project, as follows, the decisions being reached by the unanimous vote of the Commission:

"Grading, surfacing and oiling the Table Rock Creek Section of the Baker-Homestead Highway in Baker County. The low bid for this work was submitted by J. C. Papin, Baker, at $111,581. Mr. Papin qualified his bid by stating that he would not accept the award of more than one project at this letting. The second low bid was that of Groesbeck & Hickson, Eugene, at $120,150. There were four higher bids. The Commission has awarded the contract to the low bidder, J. C. Papin, at his bid price.

"Installation of automatic traffic signals at three highway-street intersections on the Pacific Highway East, near Milwaukie, Clackamas County. City Electric, Inc., Salem, submitted the low bid for this work at $10,194. The next low bid was that of A. R. Johson Electrical Contracting, Portland, at $10,228. There were two higher bids. The contract has been awarded to the low bidder, City Electric, Inc., at its bid price.

"Grading and paving the Warrenton (19th Street-Hayes Street) Section of the Warrenton Secondary Highway in Clatsop County. The Commission received two bids for this work, the low one being that of Byers Bros., Astoria, at $38,932, based on the use of asphalt. They submitted no bid based on the use of tar. The other bid was that of Grimstad & Vanderveldt, Astoria, at $39,081 based on the use of asphalt. They also submitted no bid based on the use of tar. The Commission has referred these bids to the Engineer with authority to award the contract to the low bidder, Byers Bros., when certain conditions have been satisfied.

"Installation of automatic traffic signals at one highway-street intersection in Roseburg, Douglas County. Trowbridge and Flynn Electric Co., Medford, submitted the low bid for this work at $3,900. The next low bid was that of City Electric Co., Inc., Salem, at $4,244. Mill Electric Co., Salem, submitted the only other bid at $4,530. The contract has been awarded to the low bidder, Trowbridge and Flynn Electric Co., at its bid price.

"Grading and paving the Marks Ranch-Lone Rock Bridge Section of the North Umpqua County Road, Douglas County. Del R. Beebe Construction Co., Eugene, submitted the low bid for this work at $305,277.20. M. L. & C. R. O'Neil, Creswell, was the next low bidder at $306,654. There were eight higher bids. The Commission has awarded the contract to the low bidder, Del R. Beebe Construction Company.

"Siskiyou Slide Correction on the Pacific Highway, Jackson County. The low bid for this work was submitted by Oscar E. Joelson, Eugene, at $27,915. The next low bid was submitted by Del R. Beebe Construction Co., Eugene, at $30,240. There were five higher bids. The contract has been awarded to the low bidder, Oscar E. Joelson, at his bid price.

"Surfacing the Cougar Creek-Preacher Creek Section of the Alsea-Deadwood Secondary Highway in Lane County. Homer G. Johnson, Portland, submitted the only bid for this work at $55,200. The Commission has rejected this bid as being too high.

"Construction of an office building on state highway property in the City of Eugene, Lane County. J. S. Crepeau, Cottage Grove, submitted the low bid for this work at $22,077.80. The next low bid was submitted by L. J. Plank, Woodburn, at $23,130. There were two higher bids. The Commission has referred these bids to the Engineer with authority to award the contract to the low bidder, J. S. Crepeau, when certain conditions have been satisfied.

"Grading, surfacing and oiling the South Unit of the Princeton-Follyfarm Section of the Rome-Princeton Secondary Highway in Malheur and Harney Counties. M. L. & C. R. O'Neil, Creswell, submitted the low bid for this work at $221,109. J. C. Papin submitted the next low bid at $222,585. Mr. Papin stated that he would accept the award of only one contract at this letting. There were eleven higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, M. L. & C. R. O'Neil when certain conditions have been satisfied.

"Construction of a highway maintenance building on state highway property at Stayton, Marion County. Alan A. Siewert, Salem, submitted the low bid for this work at $9,359.50. L. J. Plank, Woodburn, submitted the next low bid at $11,045. There were seven higher bids. The contract has been awarded to the low bidder, Alan A. Siewert, at his bid price.

"Grading, surfacing and bituminous macadam, and construction of a concrete grade separation structure, box culverts, etc. on the Dodson-Bonneville Section of the Columbia River Highway in Multnomah County. Peter Kiewit Sons Co., Longview, Washington, submitted the low bid for this work at $998,673.20, based on the use of asphalt. They submitted no bid based on the use of tar. R. A. Heintz Construction Co., Portland, submitted the next low bid at $1,048,168.90 based on the use of asphalt. They, also, submitted no bid based on the use of tar. There were eight higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Peter Kiewit Sons Co. when certain conditions have been satisfied.

"Construction of a reinforced concrete viaduct over Tanner Creek on the relocated Columbia River Highway, Multnomah County. The low bid for this work was submitted by C. J. Eldon, Portland, at $185,689. Carl M. Halvorson, Portland, submitted the next low bid at $196,430. There were four higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, C. J. Eldon, when certain conditions have been satisfied.

"Wallowa Lake State Park Boat Channel and Clearing Project, Wallowa County. D. W. Voreis, Gladstone, submitted the low bid for this work at $7,770. E. C.Hall Co., Portland, submitted the next low bid at $9,160. There were five higher bids. The contract has been awarded to the low bidder, D. W. Voreis, at his bid price.

"Construction of a frame dwelling at Wallowa State Park, Wallowa County. Kelly Construction Co., The Dalles, submitted the low bid for this work at $14,628. They qualified their bid by stating that they would not accept the award of this contract unless also awarded the contract for the Wallowa Lake State Park Boat Channel and Clearing Project. The next low bid was submitted by Gilbert Roberts, Hood River, at $16,471. Bechtel Bros., Elgin, submitted the only other bid at $17,889.61. The amount stated by each contractor includes construction of a fireplace. The Commission has deferred this award but probably will announce its decision tomorrow. (Contract later awarded to Kelly Construction Company which withdrew its qualifying restriction.)

"Construction of the State Highway Department Office Building in Salem, Marion County. The low bid for this work was submitted by Ralph & Horwitz, Portland, at a basic bid of $1,934,264. The next low bid was submitted by W. C. Smith, Inc., Portland, at $1,939,355. There were seven higher bids. The Commission has taken these bids under advisement and will announce its decision later. (Following discussion of this matter with the building architects on the following day, the Commission unanimously rejected all of the bids and ordered the project re-advertised for bids to be received at 4:00 p.m. on Monday, November 7, 1949.) "

Following the announcements of the contract awards by Chairman Banfield, the Commission discussed the bids received for the construction of the dwelling in Wallowa State Park. As a result thereof, the Commission decided unanimously to award the contract to the low bidder, Kelly Construction Company, if the company will withdraw its qualification and will accept the award of the contract at the amount of its bid, as submitted. The Engineer was instructed to get in touch with Mr. Kelly at once, if possible, and ascertain his feelings with regard thereto. (Mr. Kelly appeared before the Commission the following day and presented a letter stating his willingness to withdraw the qualifying statement contained in his bid, and to accept the award of the contract for the building at the amount of his bid as submitted. The Commission thereupon awarded the contract to the Kelly Construction Company at its bid price of $14,628, including the fireplace.)

The Commission conferred with Walter E. Church, Earl P. Newberry and Frank Roehr, architects for the State Highway Department Office Building in Salem, pursuant to a previous arrangement, on matters concerning the bids received for the construction of this building. Chairman Banfield advised that the members of the Commission had discussed the several bids received for the work and it is their feeling that acceptance of the low bid would mean paying too much money for the facility; that the Commission wants a reduction of about $200,000 in the total bid price. He asked the architects to confer with the three low bidders and ascertain what, if anything, they can do to cut down the cost without weakening the structure in any way, and without detracting from its appearance. He requested such information, together with the recommendation of the architects, for action by the Commission at 4:00 p.m. on the following day. (See ahead for additional paragraph.)

The meeting adjourned at 5:00 p.m. to reconvene on the following morning at 8:30 a.m. in the Streamline Room of the Imperial Hotel.

Portland, Oregon
September 21, 1949

The meeting of the State Highway Commission reconvened at 8:30 p.m. in the Streamline Room of the Imperial Hotel, with the same persons present and participating.

In accordance with the Commission's instructions the Chief Counsel presented for the Commission's approval a letter directed to the Bureau of Public Roads, with respect to the payment of the State's share of the cost of constructing the Forest Highway portion of the Canyonville-Johns Section of the Pacific Highway, which notification, in writing, was requested by W. H. Lynch, Division Engineer of the Bureau of Public Roads, on the previous day. The Commission approved the letter as prepared, and thereupon signed the same.

The Engineer reported on a proposed exchange of highways in Klamath County. He recalled that the county court some time ago asked the Commission to take over the Crescent Lake County Road because it is isolated from other county operations and is expensive to maintain, and offered in exchange therefor to take over future obligations with respect to the Midland Secondary Highway. Since that time, he said, the county court has had a change of feeling and now proposes to take over the old section of The Dalles-California Highway between Algoma and Barkley Springs when the new highway has been constructed between these points, which means that the county would be taking over 3.9 miles of state highway in exchange for the state's taking over 2.4 miles on the Crescent Lake Road. In the discussion of this matter, the question arose as to the annual expense to maintain the Crescent Lake Road. The Engineer estimated the cost at $1500 a mile per year. The Commission voted unanimously to defer the matter indefinitely.

The Engineer and the Chief Counsel reported as follows on matters heretofore referred to them by the Commission during the period February 2, 1948, to June 22, 1949, and remaining in an unfinished status:

1. Acquisition of additional right of way for sidewalk and footpath construction along the West Slope-Beaverton Section of the Tualatin Valley Highway: The Engineer reported this matter completed.

2. Request of citizens of Ocean Lake that the Highway Commission pass an order prohibiting bonfires on the ocean beach and also prohibiting trespassing on ocean banks of private property: The Chief Counsel advised that this matter is being studied in his office.

3. Adoption of a policy of charging utility companies for the privilege of attaching their facilities to the Interstate Bridge between Portland and Vancouver: The Chief Counsel advised that he is preparing a form of agreement covering this matter.

4. Controversy over removal of smelt sand from the ocean beach at Yachats: The Commission ordered deletion of this matter from the list of unfinished business.

5. Engineering study of a proposed bypass route for the McKenzie Highway through the town of Springfield: The Engineer advised that this study is underway and will be completed within the next 30 to 60 days.

6. Extension of Federal Aid Secondary Highway 245, it being a county road in Douglas County, to include a part of the former route of the Pacific Highway: The Engineer advised that this matter has been disposed of.

7. Exchange of property with the City of Coos Bay in connection with the future improvement of the Oregon Coast Highway in that city: The Engineer advised that this matter is not complete as yet, but it is being worked on.

8. Request of the State of Washington that the State of Oregon assist in maintenance of the Oregon approach to the Longview Bridge across the Columbia River: The Commission ordered this matter removed from the list of unfinished business.

9. Exchange of the Adams-Thorn Hollow County Road for the Helix-Holdman County Road in the Federal Aid Secondary System, Umatilla County: The Engineer reported this matter concluded.

10. Widening of Taylor Avenue (Oregon Coast Highway) from Bay Street to Hamburg Street, and improvement of Leif Erickson Drive (Columbia River Highway) from 36th Street to 52nd Street, Astoria: The Commission ordered this item dropped from the list of unfinished business.

11. Widening of the Oregon Coast Highway between Gamble Street and Hemlock Street in the City of Wheeler: The Engineer advised that the

work was completed in July, 1949, as a minor betterment project, and that the cost was approximately $6,000.

12. Granting of permission to the City of Coos Bay and the Coos Bay Chamber of Commerce to construct a floating dock along the harbor line south of Central Avenue in North Bend: The Engineer recalled that the Commission personally inspected the premises and determined that there would be no objection to the dock. The Commission ordered the matter deleted from the unfinished business.

13. Request of Coquille Chapter, American Legion, for improvement of the intersection of Willard Street and Front Street in Coquille: The Engineer advised that he has been unable to make a full report on this matter, since the American Legion, which owns a building that requires remodeling, has not as yet completed definite plans for the work. When such information is available, he will report further.

14. Designation of a botanical garden on US99 near Portland: The Commission ordered this item dropped from the list of unfinished business.

15. Purchase of a blanket fire insurance policy covering buildings acquired in connection with right of way acquisitions: The Chief Counsel advised that such a policy has been purchased covering buildings located in Sullivan Gulch only. He was instructed to investigate the matter of securing such a policy on a state-wide basis and in connection therewith to consult with Commissioner Reynolds.

16. Adoption of a policy with respect to the erection of marquees and advertising signs over and across state highway rights of way: The Commission referred this matter to the Chief Counsel to dispose of individual cases as they arise, in conformity with legal requirements.

17. Designation of a county road in Umatilla County as Freewater State Secondary Highway No. 39, as requested by the Umatilla County Court: The Engineer advised that this road was formerly the old route of the Oregon-Washington State Highway, and its designation as a state secondary highway has already been accomplished.

18. Acquisition of Juniper Waysides along state highways in Central Oregon: The State Parks Superintendent advised that agreements have been reached with respect to such waysides, so the matter may be removed from the list of unfinished business.

19. Acquisition of the area adjacent to Cove State Park on a lease basis of $10 annually: At the suggestion of the Parks Superintendent, this matter was ordered deleted from the list of unfinished business.

20. The matter of deeding to the Condon Rod and Gun Club certain state-owned property situate in Block 69, Lancaster Addition to the City of Condon: The Chief Counsel advised that this matter is still pending. The Commission ordered the item taken from the list of unfinished business, and that it be considered new business when the Chief Counsel renders his report on the subject.

21. Action prohibiting the extension of Ocean Boulevard in the town of Manhattan, to the ocean beach: The Engineer recalled that action on this matter was deferred pending receipt of a recommendation from the Tillamook County Court, but the court has not yet submitted such a recommendation. The Commission ordered the matter deleted from the list of unfinished business.

22. Question of action to be taken against Peacock Milling Company, Milton, Oregon, for flooding state highway and private properties in Milton: The Engineer advised that the Peacock Milling Company has a water right which it has held for many years in connection with the operation of its flour mill, and he knows of no action that can be taken against the milling company to compel it to cease operations that are in accordance with the terms of its water right. He pointed out that the Oregon-Washington Highway has been relocated so the milling company's operations do not in any way affect it. He recommended that the matter be dropped from the unfinished business agenda. The Commission approved the recommendation.

23. Acquisition of properties bordering the Deschutes River or the Warm Springs Highway near the Warm Springs Agency: The Parks Superintendent advised that it is important that the Commission acquire this tract because of its value as a picnic area. The Right of Way Engineer advised that the owner has refused to sell the property, which consists of 2.4 acres, for less than $4,000. He recommended condemnation, and that an offer of $1500 per acre be made for the same. The Parks Superintendent concurred therein. The Commission approved the recommendation and so ordered.

24. Installation of signs at highway entrances to cities and towns calling attention to the Oregon law which gives pedestrians right of way at street intersections: The Commission ordered this item deleted from the list of unfinished business.

25. Improvement of the Oregon Coast Highway at the north city limits of Coquille, and construction of a pedestrian walk: The Engineer said that this matter was disposed of by the Commission at its meeting on April 12, 1949.

26. Improvements in the Salem District: The Commission disposed of this item at its meeting on the previous day.

27. Proposed Champoeg Memorial Building: The Engineer advised that plans for this structure will be completed so that the project may be advertised for bids at the next meeting of the Commission. He also advised that it is presently estimated that the building will cost $160,000. The Commission expressed the feeling that the project is worth while but is too costly to finance with funds that have been provided for highway construction. For this reason, and because of the historic character of the park, its purpose, and the nature and extent of the proposed improvement, the Commission considered that the matter of construction of the building should be presented to the legislature for its consideration. The Chief Counsel was instructed to prepare necessary papers for that purpose. Notwithstanding this decision, the Engineer was authorized to complete the plans for the structure.

28. Question whether or not the Highway Commission has incurred any obligation to Jalmar Mattson by refusal to close an option for right of way needed for the Youngs Bay Bridge-Lewis and Clark River Section of the Oregon Coast Highway across Mr. Mattson's property: The Chief Counsel reported that this matter has been settled to the entire satisfaction of Mr. Mattson, so the item may be removed from the list of unfinished business.

29. Question of extending weed control operations on state highway rights of way: The Engineer advised that pursuant to the Commission's instructions the counties are now being canvassed to ascertain whether or not they will contribute county funds to assist in financing such work, and that his report on the subject will be rendered as soon as the canvassing is completed, probably some time this Winter.

30. Construction of a cloverleaf interchange to provide a connection between Cornelius Pass County Road and the Sunset Highway in Washington County: The Engineer said that this item is included in the tentative program for the unallocated $4,500,000 of Second Post War Funds which the Commission contemplates discussing at this meeting.

31. Proposed Celilo Indian Village underpass: The Engineer reported that pursuant to instructions from the Commission, the Indian Service Representatives were interviewed concerning this matter, and it was tentatively agreed that an underpass would be constructed beneath the railroad and the highway, the Highway Commission and the Railroad Company each to pay its proportionate share of the cost. Later, however, the Railroad Company advised that it would not assume any of the expense, so the matter is undecided. He estimated the total cost of the underpass at $16,000. The Commission ordered this item taken from the list of unfinished business.

32. Proposed revision of operation of a traffic signal at the intersection of Virginia and Broadway Streets in North Bend: The Engineer said that this matter is on the agenda for consideration of the Commission at the present meeting.

33. Proposed agreement with the City of North Bend for the installation of traffic signals at the intersection of Washington and Sherman Streets in North Bend: The Engineer advised that this matter also is on the agenda for discussion at this meeting.

34. Request for widening of the Pacific Highway north of Roseburg: The Engineer advised that this matter, too, is on the agenda for discussion by the Commission at this meeting when the programming of the unallocated $4,500,000 of Second Post War Funds is discussed.

35. Appointment of a Parks Supervisor for the Bend-Central Oregon District: The Commission deferred action on this matter until the 1949 budget is discussed.

36. Request for furnishing of restroom facilities at Depoe Bay: The Chief Counsel recalled that this matter was disposed of by the Commission on the previous day.

37. Question of providing relief for traffic congestion on the Mt. Hood Highway at Government Camp: The Engineer advised that due to a possible complete change of parking problems at Government Camp by reason of construction of the proposed ski lift between Government Camp and Timberline Lodge, he has deferred rendering a report on this traffic problem. The Commission ordered it deleted from the list of unfinished business.

38. Investigation to determine if the driveway entrance to a service station on the Salmon River Highway near Fort Hill Bridge complies with the Commission's agreement with the property owner from whom right of way was acquired: The Engineer reported that investigation reveals that the entranceways do comply with the agreement. Chairman Banfield stated that his personal observations are that the public is not using the entranceways as the Commission intended. In view thereof, the Commission ordered further investigation and a joint report by the Engineer and Chief Counsel. In this connection, the Engineer reported the improper use of a farm crossing on the Pacific Highway near Roseburg. It appears that the farmer is using this farm crossing as an access to the highway, which is contrary to the purpose and intent of the crossing. The Chief Counsel was instructed to look into the matter. He was also instructed to prepare, in corroboration with the Engineer, a recommendation for use by the Commission in the adoption of a standard policy as to the granting and use of farm crossings and limited accesses to highways throughout the state.

39. Question of shoulder parking of automobiles along the Pacific Highway East, between Oregon City and New Era: The Chief Counsel's report on this subject is not ready to present at this time.

40. The question of shoulder parking on the Pacific Highway West at the Auction Market south of Corvallis: The Chief Counsel advised that he is not ready to report on this subject.

41. Acquisition of land owned by the State Forestry Department to enlarge Short Sand Beach State Park: The Chief Counsel advised that this matter has been disposed of.

42. Question of payment of taxes on properties acquired in Sullivan Gulch, Portland: The Chief Counsel gave news of an agreement that he has reached with the County Assessor of Multnomah County so that hereafter the state will not have to pay taxes on the property that it acquires at this location.

43. Claim of School District 51 in Coos County, arising out of construction of the Delmar-China Camp Section of the Oregon Coast Highway: This matter was disposed of by the Commission at this meeting during the discussion of real property options. Chairman Banfield reported, however, that he has received numerous complaints from people residing along sections of highway that are under contract, that contractors are not very particular about protecting private property from damage. It was his

thought that something should be done so as to avoid criticism in this regard. The Engineer was instructed to bring this matter to the attention of the resident engineers in charge of construction and to impress upon them the importance of requiring contractors strictly to live up to that feature of the specifications, as well as to others.

44. Proposed Service Road along US99E between Milwaukie and Portland: This matter was previously discussed by the Commission at this meeting but no definite action was taken. The Engineer recommended the award of the contract for the construction of the concrete divider strip along this section of highway, bids for which were received on the previous day, and that the state cooperate with the City of Milwaukie in the construction of the service road to the extent of surfacing and paving the roadway if the City will furnish right of way and construct the grade, such arrangement to cover the section which extends southerly from the intersection of the paved road leading into the housing area to the northerly line of the Scott Estate property. He also recommended that Harvester Avenue, which has already been built by the City to provide access to the highway about midway along this section, be left open for public use until such time as the service road is constructed, and that a temporary opening be left in the divider strip permitting lefthand turns into Harvester Avenue pending construction of the service road. The Commission unanimously approved the recommendation with respect to the service road on the condition that no commitment whatsoever be made with respect to continuing the service road into the City of Milwaukie. The Engineer and the Chief Counsel were authorized to discuss the matter with the officials of the City of Milwaukie on that basis. The award of the contract for the construction of the divider strip was deferred pending such conference.

45. Approval of the report concerning a proposed toll bridge across the Columbia River at The Dalles: The Engineer recalled that the Commission disposed of this matter at its meeting on August 1 and 2, 1949, by the adoption of a resolution with respect thereto.

46. Right of way settlement with Hazel and Elmer Meyer on the Columbia River Highway at Bonneville: This matter was disposed of by the Commission previously at this meeting when the Chief Counsel reported that this case is in litigation initiated by the Meyers.

47. Regulation or prohibition of the use of ocean beaches for merchandising by transient merchants: The Commission ordered this item deleted from the list of unfinished business.

48. Allocation of the remaining balance of $4,500,000 of Second Post War Funds: The Commission deferred the programming of these funds until other matters have been disposed of at this meeting. (See ahead for details.)

49. Redecking of the Steel Bridge over the Willamette River in Portland: The Engineer recalled that the Commission at a previous meeting instructed the Chief Counsel and himself to ascertain the attitude of the railroad companies involved toward paying a portion of the expense of this work. The matter was presented to the railroad companies, he said, but

their answer has not as yet been received. He pointed out that the Commission's agreement with the railroad company for the use of the upper deck of this bridge for highway purposes provides for payment of an annual rental of $50,000. He gave as his feeling that such a large payment should entitle the state to receive assistance from the railroad companies in making these repairs, in view of the fact that no repairs have been made during the past nine years. He suggested that the Commission authorize the redecking work to proceed, the state to advance the funds necessary to finance it, and that a deduction be made from the amounts due the companies as rental, to pay what the Commission feels is the just share of the railroad companies. The Commission referred the matter to the Engineer and Chief Counsel to work out a solution.

Burns

50. Request that the improvement of the Lawen-Crane Section of the Johns-Crane Highway, Harney County, be replaced in the current construction program: The Engineer advised that this is one of the projects for consideration by the Commission in the adoption of the program for the unallocated Second Post War Program.

51. Request for oiling a short section of the Elkton-Sutherlin Secondary Highway near Sutherlin, Douglas County: The Engineer advised that since this request was filed, a dust palliative has been applied to alleviate the dust nuisance. He pointed out that there is a possibility that the entrance of this highway into Sutherlin will be changed in the not distant future, and in view thereof, he recommended that any permanent improvement on the present road be deferred indefinitely. He estimated the cost to maintain the present road in a dustless condition at about $600 per mile. He was authorized and instructed by the Commission to continue such type of maintenance.

52. Question of designating a portion of the Powell Butte Secondary Highway in Deschutes County, a Federal Aid Secondary Highway: The Engineer advised that this matter has been taken up with the Bureau of Public Roads but no decision has been reached as yet, although he expects to be able to report on the subject at the Commission's next meeting.

53. Construction of a new state maintenance headquarters at Government Camp: The Engineer recalled that he was previously instructed to ascertain the possibility of using the facilities of the U. S. Forest Service at this location. He said that he conferred with the Forest Service officials, who advised that due to the many forest roads and trails that they maintain in this vicinity, they will require full usage of all the facilities that they have. He said that the matter of the state's constructing its own facilities in accordance with the plan that he reported at the meeting in June will be one of the things for the Commission to decide when it adopts its 1950 budget.

54. Request of the City of Portland to store small park equipment beneath the viaducts on Harbor Drive in Portland: The Engineer advised that this matter is in process, but is not far enough advanced for a report. The Chief Counsel gave as his opinion that the area beneath the bridges should be kept open for use, if such use does not conflict

with any of the state's operations under the structures. The Engineer and Chief Counsel wereinstructed to work up an arrangement for the restricted use of such areas by the City of Portland.

55. Request for installation of a traffic signal at the intersection of N. E. 82nd Avenue and Prescott Street in Portland: The Engineer advised that this is one of the items appearing on the agenda for discussion by the Commission at this meeting. (See ahead for approval)

56. Acquisition of remaining right of way needed for the Front Avenue Project in Portland, and report by the Chief Accountant of an audit of the books of the City of Portland concerning this project: This matter was previously reported at this meeting. (See back for minute entry.)

Mr. James H. Kelly, representing the Kelly Construction Company, who submitted the low bid on the previous day for the construction of the caretaker's residence in Wallowa Lake State Park, appeared before the Commission at this time, by request, regarding the award of this contract. He was informed that his offer to construct the building is satisfactory, but the Commission is precluded from awarding the contract to him because of the qualification contained in his bid to the effect that he would accept the award of this contract only in the event that he was also awarded the contract for the construction of the boat channel and clearing project in this park, bids for which were received by the Commission at the same letting. Mr. Kelly stated his willingness to withdraw his qualifying statement and to accept the award of the contract to construct the building at the price mentioned in his proposal, $14,628, subject to a deduction of $970 if the Commission decides not to build the fireplace. He presented a letter to confirm, in writing, his oral statement. The Commission voted unanimously to accept Mr. Kelly's offer as amended, and thereupon awarded the contract to him in the amount mentioned in his proposal, including the fireplace.

The Engineer brought up for discussion the claim of C. J. Eldon, contractor, arising out of his contract with the state for the construction of the Coffey Creek Bridge on the Tiller-Trail Secondary Highway, Douglas County, State Highway Contract No. 2788. He pointed out that the contract was awarded on March 12, 1946, and the completion date specified therein was October 31, 1946. The work was not completed within the specified time limit, and the time limit was extended by the Commission several times at Mr. Eldon's request. Due to Mr. Eldon's delay in finishing this job, he said, the state incurred extra expense for engineering supervision, and in granting the extensions of time the Commission made it a condition that Mr. Eldon should reimburse the state for this expense. In addition thereto, it was necessary for the state to do certain repair work on the existing bridge because of Mr. Eldon's neglect, and the Commission in granting the extension of time made it a condition that the state should also be reimbursed for this expense. The bridge was not completed, he said, until November 24, 1947, and Mr. Eldon flatly refuses to accept his final payment minus the deduction; moreover, he has presented a counter claim in the amount of $1,560 for lumber salvaged

from the old bridge, which he alleges was part consideration for the building of the new bridge but which the state, without his knowledge or consent, appropriated for its own use. The Engineer recommended, in order to close the case, that the state enter into a compromise settlement, whereby the Commission releases Mr. Eldon from payment of the cost of repairing the old structure but requires him to reimburse the state for the extra engineering expense, and to withdraw his claim for the salvaged lumber. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

The Engineer requested confirmation of the oral authority heretofore given him to spend about $3,730 for the installation of additional drainage facilities on the Santiam Highway at the intersection of 18th Street in Sweet Home. The Commission unanimously approved such expenditure.

The Commission also, by unanimous vote, confirmed the loan of $12,201.51 to Jefferson County under the provisions of Chapter 359, Oregon Laws 1949, to assist the county in financing repairs to county roads that were damaged as the result of unusually bad weather conditions during the past winter.

A letter was presented from the Cascade Highway Association, Inc., Lawrence E. Spraker, Secretary, endorsing the Wilsonville Ferry Route as the route of a shortcut highway to Portland from the south. The Commission ordered the communication filed.

The Commission discussed a letter from the Cloverdale Civic Club requesting the widening of US101 full width between curbs through the town of Cloverdale. The Engineer advised that investigation discloses that the expense of such an improvement is not justified by the volume of traffic which uses the highway in this town. He recommended that the improvement be deferred until such time as the Commission authorizes the improvement of a major section of highway in this vicinity. The Commission approved the recommendation.

The Engineer reported the necessity to increase the project authorization for grading the Clear Creek-Forest Boundary Section of the Warm Springs Highway, Contract No. 2955, in the amount of $37,200. He advised that this section lies in a heavy pine forest and that the clearing of the right of way was performed prior to the war. Subsequent to that time, he said, many of the trees have become disease infested and died, creating a hazard that it was necessary to remove, at a cost of $10,800. The balance of the overrun, he said, was occasioned by excessive shrinkage in embankments constructed of borrow materials, this shrinkage making it necessary to furnish 30,000 cubic yards of extra materials at a cost of $26,400, making a total overrun of $37,200. He requested approval for increasing the project authorization in such amount. The Commission approved the request unanimously.

The Engineer also requested an increase of $7,727.47 in the project authorization for providing a one-way street system for the Santiam Highway in the town of Lebanon. He explained that the original project authorization included an item of $3,000 for the installation of flashing signals at the crossing of the Southern Pacific tracks, which installation was ordered by the Public Utilities Commission. The railroad company, he said, was not able to obtain proper signal materials at the time the contract was underway, so the

work was not completed until in 1949, and it proved to be more costly than was anticipated, resulting in an overrun of the project authorization, which, together with some other overruns, totaled the amount for which he is now asking. The Commission approved the request unanimously.

The Engineer requested authority for an expenditure of $18,000 to redeck the Sandy River Bridge on the old route of the Columbia River Highway at Troutdale. He advised that the 1949 Bridge Maintenance Budget includes an item of $14,000 for this purpose, but temporary reinforcements were made so that redecking could be deferred until after the new highway route was opened for public use. He recommended that the $14,000 now be transferred to the special maintenance budget, and that there be transferred to such budget from reserves an additional $4,000, making the total of $18,000 which the job is now estimated to cost; and that the work be done by contract. The Commission approved the recommendation.

A letter was presented from the county court of Josephine County setting forth its understanding of the things to be done by the state and of things to be done by the county in the event that an allocation of $100,000 of Federal Aid Secondary Highway Funds is approved by the Commission for reconstruction of ten bridges on the Holland Loop County Road. The county court's understanding is that the Highway Commission will allocate a sufficient amount to reconstruct the ten bridges to a permanent type construction, and will also allocate an additional amount to conduct a survey of the entire road. Also, that the county will be expected to acquire all necessary right of way in accordance with the survey, to make such changes in the grade as are necessary with the view to preparing the road for future surfacing and oiling, and to place enough gravel so the county can maintain the road as a gravel road for the time being. The Engineer recommended approval of an allocation of $100,000 for this purpose when the Commission programs its available funds at this meeting. The Commission considered that the county court's understanding of the matter is in conformity with previous discussions, whereupon it approved the recommendation unanimously.

A letter was presented from the county court of Lane County, inquiring as to the possibilities of securing an allocation of Federal Aid Secondary Highway funds for the improvement of Lane County's Market Road No. 36, between Jasper and Lowell, next year. The Engineer pointed out that the Commission has already allocated $103,000 Federal funds for the improvement of the Elmira-Noti Section of the Richardson-Eugene Secondary Highway in this County. The Commission unanimously denied the county court's request, the feeling of the Commission being that if it has any additional funds available for allocation to Lane County, one of its first obligations would be the replacement of the substandard bridge which crosses the Coast Fork of the Willamette River at Jasper on the Springfield-Creswell State Secondary Highway.

A petition was presented from residents and freeholders of Coos County requesting the removal of a culvert which is presently installed across the Oregon Coast Highway about 150 feet west of the west approach to the Coquille River Bridge at Coquille. They allege that during highwater this culvert permits water from the Coquille River to flow onto the marsh land on the south side of the highway, with damaging effect. The Engineer advised

that the culvert referred to is a 72-inch iron-pipe culvert, and that it is the only opening across the highway for a distance of two miles westerly from the bridge. He further stated that the culvert was installed during the reconstruction of the highway in 1939, replacing a 4' x 6' wooden box culvert which had been in place ever since the road was first built. Its original purpose, he said, was to provide a means of equalizing the water flow during high water status. He recommended that the request of the petitioners be denied because the removal of the pipe might involve the Commission in litigation, since investigation discloses that approximately an equal number of property owners are opposed to its removal. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

A letter was presented from a committee representing "Agate Beach Addition No. 1", Agate Beach, Oregon, requesting the following:

1. Widening of the newly constructed approaches of Shell and Fossil Roads to the Oregon Coast Highway.

2. Construction of guardrails so that these intersections can be seen at night.

3. Lowering of the grade line of the new approaches from Shell and Fossil Roads so that both roads will be on the same level in front of property owned by a Mr. Frary.

4. Widening of the entrance to Fossil Road.

5. Placing of signs on the new highway designating Shell Road and Fossil Road.

The Engineer advised that the connections to both Shell and Fossil Roads have been constructed in accordance with plans approved by the state and the Bureau of Public Roads, and are very satisfactory; moreover, they are equal to, if not better than the connections which previously existed. He further stated that such guardrails as are considered necessary for the proper protection of traffic will be constructed in the near future, by state forces, and that signs that are deemed necessary to direct traffic properly will also be placed. He recommended that the request be denied insofar as it pertains to improving the connections, and that the petitioners be informed accordingly. The Commission approved the recommendation.

The Commission discussed a number of requests for the resurfacing and oiling of State Secondary Highway No. 22 between Eddyville and Nashville, and for a survey with the view of improving the county road which extends from Nashville to Nortons. The petitioners also request ditch and brush clearing along this highway so as to eliminate what they allege is a traffic hazard. The Engineer advised that the estimated cost to improve the Eddyville-Nashville Section is $200,000 and that to construct the Nashville-Nortons Section is $480,000. This highway, he said, carries an average daily traffic of 180 vehicles, and is purely a local road, and owing to the high cost of reconstructing it he could not recommend improvements at this time.

He suggested that the project be kept in mind for future consideration when other more important secondary highways have been improved. As to the ditch and brush clearing, he advised that such work has been provided for in the budget and will be performed by highway maintenance crews this Fall. The Commission unanimously approved the report and ordered that the petitioners be informed accordingly.

A letter was presented from the County Court of Marion County urging the construction of the Mehama-Mill City Section of the North Santiam Highway on proposed new alignment on the north side of the North Santiam River. The Commission deferred action on this matter until later in the session when the matter of programming the balance of available funds is discussed.

There was brought to the attention of the Commission numerous cards from members of the St. Johns Businessmen's Association and others requesting a survey to show the feasible location, costs and other details of a proposed tunnel extending from the west end of the St. Johns Bridge, Portland, to a connection with the Sunset Highway. The Commission ordered the communications filed.

The Engineer brought up for discussion a request from the City of Lebanon for the performance of additional work in connection with the contract recently awarded by the Commission for the improvement of certain city streets as a 1949 Special State Tax Street Fund Project. He advised that the estimated cost for the additional work is $4,965, which the city has agreed to pay with its own funds. He recommended approval of the request and that the amount of the project authorization be increased in a like amount. The Commission approved the recommendation unanimously.

The Engineer reported a communication from the Secretary of State's Office asking that an investigation be made to determine the need for a footpath on the Cape Arago Secondary Highway in the vicinity of Empire, where a fatal accident occurred, in which one pedestrian was killed and four others were injured. He advised that the investigation has been made and the results indicate that a footpath is needed for a distance of about 0.76 mile, extending from the south city limits of Empire to Kellogg Boulevard. A sixteen-hour vehicular and pedestrian count, he said, indicates an average vehicular traffic of 2,584, and an average pedestrian traffic of 117, and the records disclose 25 accidents between January 1, 1946, and May 31, 1949, resulting in one fatality and twelve persons injured. He recommended construction of the footpath, which he estimated will cost about $3,000. The Commission approved the recommendation, and thereupon by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "P", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A letter was presented from Mr. F. T. Fowler, Traffic Engineer of the City of Portland, requesting approval of the installation of traffic signals at four intersections on Powell Boulevard (Mt. Hood Highway), particularly at S. E. 17th Avenue, S. E. 21st Avenue, S. E. 26th Avenue and S. E. 39th Avenue. The Engineer advised that the City Traffic Engineer has an overall plan calling for a total of 13 installations on Powell Boulevard which are estimated to cost about $45,000, and that the city expects the state to pay

fifty percent of this expense, or $22,500. He said there is a definite need for progressive signalization on Powell Boulevard, and he recommended approval of the plan, and that there be included in the 1950 budget an amount of $22,500 to cover the state's share, the entire matter to be covered by an appropriate agreement between the state and the city. The Commission deferred action on this matter until its next meeting. The Engineer was instructed to present to the Commission at that time a map showing the location of each of the proposed signals.

The Engineer reported a request from the City of North Bend for the installation of traffic signals at the intersection of Sherman and Virginia Avenues in North Bend, Sherman Avenue being the route of the Oregon Coast Highway, and Virginia Avenue being the route of the Cape Arago State Secondary Highway. He recommended approval of the request on the condition that the City of North Bend will pay fifty percent of the installation cost, will maintain the signals, and will furnish electrical energy to operate them at no cost to the state. The Commission approved the recommendation.

In this connection, the Engineer reported that this matter ties in with a previous request for the installation of signals at the intersection of Virginia Avenue and Broadway, and at Washington Avenue and Sherman Avenue, which request was discussed by the Commission at its meeting on February 28 and March 1, 1949. He recalled that at that time, the Commission instructed him to consult the City with reference to sharing in the expense of this signal and in the expense of converting the existing signal at the intersection of Virginia Avenue and Broadway from a four-way stop to a standard stop-and-go signal. The City has been consulted, he said, and considers that the existing four-way stop signal at Virginia Avenue and Broadway is satisfactory, so it does not feel like participating in the cost of converting it to the other type. The City also considers that the signals are not warranted at this time at the intersection of Washington and Sherman Avenues, which view is shared by the Traffic Engineer. He recommended, therefore, that no further action be taken at this time relative to this installation. The Commission approved the recommendation.

The Commission discussed a petition and a number of communications from residents of Eugene and vicinity, requesting that protective measures be taken to eliminate a dangerous condition that allegedly exists on US99 at its intersection with Roosevelt Boulevard, just north of the overhead crossing near the Eugene north city limits. The Engineer advised that the intersection referred to is a point where the highway crosses Elmira Road and Roosevelt Boulevard, and that the records show 37 accidents occurred at this point from January 1, 1946 to April 30, 1949, resulting in the death of one person and injuries to nine others. A sixteen-hour vehicular and pedestrian count, taken on June 17th, reveals that during the period 6:00 a.m. to 10:00 p.m., 17,398 vehicles entered the intersection, and 232 pedestrians crossed the highway; and the average hourly volume of vehicles entering the intersection during the maximum eight-hour period was 1309, a considerably higher number than the required signal warrant of 750. He recommended as a solution of this problem the construction of channelizing islands and the installation of traffic signals and luminaire units, at an estimated total cost of $6,500, which, he said, will have to be paid entirely with state funds because the

intersection is outside the city limits. He exhibited a sketch map showing the situation at this intersection and the proposed improvements, and recommended approval of the project. The Commission approved the recommendation unanimously.

The Engineer reported on a request from the Parkrose Chamber of Commerce for the installation of a traffic signal at the intersection of 82nd Avenue (Cascade Secondary Highway) and Prescott Street, Portland. He advised that an investigation by the Traffic Engineer indicates that a traffic signal is needed at this point, there being an average daily traffic of approximately 9,559 vehicles at this intersection, of which 25.9 percent enter from Prescott Street, and in addition there is an average of 180 pedestrians who cross 82nd Avenue daily at this point. He also said that the records reveal that fourteen accidents occurred here during 1948, a large percentage of which could have been prevented by signals. He recommended the installation of the signals, which he said would cost about $3,000, and advised that the city of Portland will pay fifty percent of the expense. As a matter of further information, the Engineer said that this signal is in addition to the overall signal control on 82nd Avenue which will result in a total of fourteen signals, and he gave as his belief that all of them can be installed for the $50,000 which the Commission heretofore approved on the basis that the City will pay one half of the cost. The Commission approved the recommendation unanimously.

A request from the City Council of Scappoose for the installation of a flashing beacon at the intersection of Columbia Avenue and US30 in Scappoose had the attention of the Commission. The Engineer advised that this matter has been investigated by the Traffic Engineer, who reports that there is little need for signal installation at this point. He recommended that the request be denied. The Commission approved the recommendation.

The Commission considered and denied a request from Mr. A. J. O'Northam, General Yardmaster of the Southern Pacific Company, in behalf of company employees, for the installation of a traffic signal at the intersection of S. E. Harold Street with S. E. McLaughlin Boulevard (US99E) in Portland. The action was taken upon recommendation of the Engineer, who stated that the conditions at this point were investigated by the Traffic Engineer, who reports that only a small volume of traffic enters McLaughlin Boulevard from side streets at this point and in whose estimation signalization would only tend to increase rear-end collisions which make up most of the accidents that occur at this intersection.

The Commission discussed and upon recommendation of the Engineer approved a request from the John Day Chamber of Commerce for the installation of a traffic signal at the intersection of the John Day Highway and the John Day-Burns Highway in the City of John Day. The signal to be installed is to be of the flashing beacon type, which is estimated to cost $300.

The Secretary presented a letter from Mr. J. W. McCoy, Ashland, concerning the designation of a through truck route bypassing the business district of Ashland. The Commission discussed the communication and ordered it filed for future consideration.

The Engineer requested confirmation of telephonic authority heretofore given him by the Commission to spend about $30,000 for maintenance rock to be

used for the most part on the Alsea-Deadwood Secondary Highway in Lane County. The Commission unanimously approved the expenditure.

The Commission discussed matters pertaining to the proposed overpass of the railroad track on South Sixth Street in Klamath Falls. The Engineer recalled that Mr. Tom Watters, Klamath Falls, appeared before the Commission at its previous meeting in reference to this matter and particularly urged acquisition of rights of way at an early date, due to discontinuance of operations of the Ewauna Box Company, and the Big Lakes Lumber Company, whose properties are involved, and the Commission at that time referred the matter to him for investigation and report. He stated that he has had estimates prepared both for right of way and construction, based on both a two-lane facility and a four-lane structure, and it has been determined that a two-lane structure can be built for $592,000, of which amount $151,000 represents cost of right of way, whereas a four-lane structure is estimated to cost $847,000, of which $157,000 represents cost of right of way. Because of the difference in cost, he suggested the construction of a two-lane facility for use by southbound traffic only, and the designation of the existing structure for northbound traffic only. He pointed out that there is no other way to route the highway and suggested, inasmuch as a better facility must be provided, that the right of way department be authorized to negotiate options for right of way as may be required. Following discussion, the Commission unanimously approved the suggestion with the strict understanding, however, that options are to be secured simply for the benefit of the Commission in formulating its future action, and that if the Commission later on authorizes the purchase of the right of way it will be with absolutely no commitment whatsoever as to when the project will be constructed. The Engineer was instructed to convey such information to Mr. Watters.

The Commission discussed a proposed agreement with Wheeler County providing for the maintenance of Kinzua County Road, from its intersection with the John Day Highway to the town of Kinzua, a distance of about seven miles. According to the agreement, the road is to be maintained by state forces at the expense of the county. The estimated cost of the first year's maintenance is $2,800, which is to be paid by the county on the following basis: $1,000 cash in advance of any work's being done, the balance in installments as billed by the State Highway Department. The Commission approved and signed the agreement.

The Engineer brought up for consideration a request for a traffic-dividing median strip along Barbur Boulevard (US99W) for a distance of about 1000 feet westerly from its intersection with Terwilliger Boulevard, to a point where it intersects with Hickey Street, which terminal is also the point where Barbur Boulevard intersects the old Oregon Electric Railway right of way. The Engineer advised that Multnomah County has converted the old railway roadbed into a highway for one-way traffic inbound to Portland, and that outbound traffic will follow Barbur Boulevard to a point a short distance west of Capitol Hill Road where it will leave the highway and connect with the old railway grade northerly thereof. The county, he said, will pay the entire cost of constructing this new road, which will materially help traffic conditions in the Garden Home vicinity, but, in order to alleviate potential hazards, a traffic-dividing strip should be constructed along Barbur Boulevard

to a point about 200 feet west of the point where inbound traffic from the new county road will join the highway. This median strip, he said, will not only prevent outbound traffic from turning into the inbound one-way roadway, but it will also serve to eliminate left turn movements at other unauthorized points. He recommended immediate construction of the median strip, which he estimated will cost about $5,700, and certain widening work at the intersection to allow inbound traffic to merge with the main highway traffic with the least amount of inconvenience and hazard. He estimated the cost of the widening work at $5,000, making a total of $10,700 for the two items. He exhibited a map showing the layout. In the discussion of this matter, it developed that the project will be constructed within the city limits of Portland, in view of which it was the feeling of the Commission that the City of Portland should participate in the expense. The Commission unanimously approved the project on the basis that fifty percent of the costs will be paid by the City of Portland. The Engineer was instructed to take up the matter with the proper city officials.

Commissioner Chandler reported a dangerous intersection near the top of the hill on Canyon Road (Sunset Highway). The Engineer was instructed to investigate the conditions at that place, and also to investigate a drainage problem nearby, as reported by Chairman Banfield.

The Engineer reported that the cities of Moro and Weston have satisfied the legal requirements with respect to the expenditure of State Tax Street Funds which they received in 1948, and that the plans for the projects proposed to be financed with such funds have been examined and found satisfactory. He recommended approval of the plans. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the attached resolution relative thereto, marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that the following cities and towns have satisfied the legal requirements with respect to the expenditure of 1948 State Tax Street Funds which they received in 1949, and that the plans for the projects proposed to be financed with such funds have been examined and found satisfactory:

Culver	Halfway	Richland
Drain	Hammond	Siletz
Haines		Weston

He recommended approval of the plans. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the attached resolution with reference thereto, marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that the towns of Canyonville, Harrisburg, Dundee, Maupin, Garibaldi and Umatilla have satisfied the legal requirements for the expenditure of 1949 State Tax Street Funds accrued to them during the first six months of this year, and that the plans for the projects proposed to be financed with such funds have been examined and found satisfactory. He

recommended approval of the plans by the Commission. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported that the survey for the relocation of the Old Oregon Trail between LaGrande and North Powder is completed. He exhibited a map showing the proposed location and explained details, particularly calling attention to the fact that the relocation is entirely separate from the existing highway with the exception of approximately one and one-half miles immediately south of LaGrande. He also mentioned that the new route is 5.5 miles shorter than the existing route between these points. He asked the Commission to approve and adopt the location. In the discussion of the matter it was recalled that the Commission has set up in its Second Post War Construction Program the sum of $1,038,000 for grading and topping the southerly fifteen-mile section on this new route, of which amount $900,000 is the estimated cost of construction and $138,000 the estimated cost of right of way. Commissioner Reynolds mentioned the controversial nature of this location, and stated his willingness to approve it if the Engineer is absolutely certain that no mistake has been made in the selection of the route that might arouse warranted criticism from the people of the town of Union. The Engineer said he has analyzed the complaints thoroughly and is certain that the design has been prepared to eliminate the objections that have been offered. With this assurance, the Commission by unanimous vote approved the survey as reported, by the adoption of the attached resolution relative thereto, marked EXHIBIT "F", which resolution by this reference is made a part hereof.

In connection with this matter, Commissioner Reynolds requested, if the actual cost of the section now proposed for construction is less than the amount appropriated therefor, and savings accrue, that these savings be applied toward financing construction of a bridge over the Union Pacific Railroad tracks and the North Powder River in North Powder. The Commission indicated its approval of the request.

The Commission had under discussion requests, as follow, for extensions of time within which to complete certain highway contracts:

1. Lindstrom Bros., Inc., Contract No. 3089, for construction of a bridge over "D" River on the Oregon Coast Highway at Delake, Lincoln County, requested an extension of time of thirty days, from August 31, 1949 to September 30, 1949, within which to complete this job. They stated that the bridgewas completed andwould be open to traffic on or before August 31, and that the additional time is required to effect the removal of a temporary bridge, and to clean up the site. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are correct. He also stated that the delay caused no inconvenience to the public and no extra expense for the state. He recommended that the extension of time be granted without penalty. The Commission approved the recommendation unanimously.

2. J. F. Johnston, Contract No. 3073 for construction of Flynn Bridge over Mary's River on the Alsea Highway, Benton County, requested an extension of time of 92 days, from July 31, 1949 to October 31, 1949, within which to complete this job. He alleged that bad weather which prevented release of his equipment being used on a job at Hillsboro, and the fact that he did not want to route heavy traffic over a detour during bad weather conditions this Spring, prevented completion of this contract within the specified time limit. The Engineer advised that this contract was awarded on November 4, 1948, but the contractor was engaged on a job for Washington County so did not start work on the state's project until March 29, 1949, notwithstanding that he could have worked to good advantage several months earlier. He also said that weather conditions were excellent; that the contractor made very poor progress on the job and has no legitimate reason for overrunning the time limit. He recommended, in view of the circumstances, that the extension of time requested be granted but that the contractor be assessed all engineering costs subsequent to July 31, 1949, the date specified in the contract for completion. The Commission approved the recommendation unanimously.

3. Cressler Construction Company, Contract No. 3053 for the construction of the Tillamook (10th Street) Project on a city street in the City of Tillamook, requested an extension of time of twenty days from July 31, 1949, to August 20, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to inability to procure concrete for curb and catch basin construction when needed, due to breakdown of ready-mix trucks, and to other construction in Tillamook. The Engineer advised that the project was completed on August 12, so it is unnecessary to extend the time limit beyond that date. He recommended therefore that the extension of time from July 31 to August 12 be granted without penalty. The Commission approved the recommendation.

4. Barney B. Helser, Contract No. 3147, rock production on the Oregon City-Molalla-Estacada Section of the Cascade and Woodburn-Estacada Secondary Highways, requested an extension of time of thirty days from August 31, 1949, to September 30, 1949, within which to complete this job. He attributed his failure to complete the project within the specified time limit to unforeseen difficulties incurred in setting up his crushing plant, which prevented commencement of the work as soon as planned. The Engineer advised that due to high water conditions the contractor had difficulty in setting up his crushing plant in the early spring and accordingly was unable to start work as soon as contemplated. He further stated that the public has not been inconvenienced by non-completion of the contract. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

5. Newport Construction Co. & Russell Olson, Contract No. 3144, re-oiling the Washington State Line-Sunnyside Section of the Sunnyside-Umapine Secondary Highway in Umatilla County, requested an extension of time of 46 days from July 31, 1949, to September 15, 1949, within which to complete this job. They attributed their failure to complete the

project within the specified time limit to the fact that they were engaged in other state work which was considered more necessary. The Engineer advised that this contractor had considerable oiling work under way for the state and was unable to reach this project until August 10, 1949; that the project was completed within five days after that time and there was no inconvenience either to the state or to the traveling public. As a matter of fact, he said, the contract was completed on August 15, so it is unnecessary to grant an extension of time beyond that date. He recommended that an extension of time from July 31 to August 15, 1949, be granted without penalty. The Commission approved the recommendation.

6. Jed Wilson, Contract No. 3130, for rock production on the Necanicum Section of the Oregon Coast, Sunset, and Necanicum Highways, requested an extension of time of thirty days from July 31, 1949, to August 31, 1949, within which to complete this job. He gave no particular reason for overrunning the time limit. The Engineer advised that the state has not been inconvenienced by failure of the contractor to complete the project within the specified time and that it is his recommendation that the extension be granted without penalty. The Commission approved the recommendation.

7. O. C. Yocom Company, Contract No. 3129 for grading and paving the Amity Section of the Pacific Highway West, and Bellevue-Hopewell Highway, Yamhill County, requested an extension of time of fifteen days from July 31, 1949, to August 15, 1949, within which to complete this job. They stated that all work in connection with the project, with the exception of construction of the asphaltic concrete surfacing, was completed by July 10th, and that the asphaltic concrete work was delayed in order to secure materials from the McMinnville plant of the J. C. Compton Company, thus eliminating a long haul of materials from Portland. The Engineer advised that the statements of the contractor are correct. He further said that neither the state nor the traveling public has been inconvenienced by the delay, and he recommended that the extension of time be granted as requested without penalty. The Commission approved the recommendation.

8. T. W. Thomas, Contract No. 2955, for grading the Clear Creek-Forest Boundary Section of the Warm Springs Highway, Wasco County, requested an additional extension of time of sixty days, from June 30, 1949, to August 31, 1949, within which to complete this job. He attributed his failure to complete the project within the previously extended time limit to adverse weather conditions and to excessive moisture in the ground which necessitated the operation of his equipment at a low rate of efficiency. The Engineer advised that Mr. Thomas made every effort to complete this job within the specified time, but was delayed considerably because of extremely wet weather and because of additional work which was requested by the U. S. Forest Service. He recommended, in view of the circumstances, that the additional extension of time requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

9. Rath & Morris, Contract No. 3135, for construction of a highway office building in Eugene, Lane County, requested an extension of time of 31 days from August 31, 1949, to October 1, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to a three weeks' delay in securing the fabrication of steel sash, and a four weeks' delay caused by a strike of sheet metal workers in Eugene. The Engineer advised that the contractors pushed this work in every way possible, but were held up for the reasons given. He recommended, in view of the circumstances, that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

10. Hillstrom Shipbuilding Company, Contract No. 3117 for construction of pier fender repairs on the McCullough Bridge, Eastside Bridge, and Enegren Ferry Slips on the Oregon Coast Highway and Coos River Secondary Highway in Coos County, requested an extension of time of 31 days from July 31, 1949 to August 31, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulties encountered in securing long peeled piling, and to extra work ordered by the Engineer. The Engineer advised that during the progress of the work, additional damage occurred to the fender piling at the McCullough Bridge, necessitating extra work by the contractor. He recommended, in view of the circumstances, that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

11. Western Golf Course Supply Company, Contract No. 3126, for construction of an irrigating system and seeding on the Front Avenue (Alder Street-Bancroft Street) Section of the Pacific Highway West in Portland, requested an extension of time of fifteen days from August 31, 1949, to September 15, 1949, within which to complete this job. They stated that all work called for in the contract has been completed and that the fifteen days' extra time is required merely to allow time for certain maintenance work and to permit the grass to grow on some of the last area seeded before the job is presented to the Highway Commission for acceptance. The Engineer advised that all of the work called for in the contract was completed prior to the specified completion date, except the final maintenance and the final cutting of grass as required by the specifications. He recommended that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

12. Leonard & Slate, Oregon Ltd., Contract No. 3006, for grading and bituminous macadam surfacing on the Ranier-Goble Section of the Columbia River Highway, Columbia County, requested an extension of time of 335 days from August 31, 1949 to July 31, 1950, within which to complete this job. They gave the following reasons for failure to complete the project within the specified time limit:

a. Highwater in the Spring of 1948, which prevented operations on a large part of the project.
b. Wet condition of borrow area during the spring months.
c. Settlement of fills necessitating undue delay in bringing them up to proper grade.

d. Overrun in quantities of fill materials.
e. Necessity to postpone oiling work until 1950 because surfacing could not be placed on the new grade sufficiently early to perform that work in 1949.

The Engineer advised that extremely high water in the Spring of 1948 sufficiently delayed the contractor's operations that he will not be able to complete his oiling work until the Spring of 1950. He recommended, in view thereof, that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

13. D. F. McKenzie, Contract No. 3180, for oil mat surfacing on the Jamieson-Vale Section of the John Day Highway, Malheur County, requested an extension of time of thirty days from September 15, 1949 to October 15, 1949, within which to complete this job. He attributed his failure to complete this project within the specified time limit to the fact that he was engaged on other contract work for the State Highway Commission which he wanted to finish first. The Engineer advised that this contractor had another State Highway contract in southern Oregon, and delays on that job slowed up the delivery of oiling equipment to the Jamieson-Vale project. The State, he said, has not incurred any additional engineering expense by reason thereof, neither has the traveling public been unduly handicapped by the failure of the contractor to complete the project within the specified time. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

14. Porter W. Yett, Contract No. 2892, for grading and paving the Barnes Road-Multnomah County Line Section of the Sunset Highway, requested an additional extension of time of 288 days from September 30, 1948, to July 15, 1949, within which to complete this job. He gave the following reasons for failure to complete the project within the previously extended time limit:

a. Unfavorable weather conditions for paving.
b. Additional work not provided for in the original plans.
c. Delay caused by failure of the public utility companies to reconstruct properly their facilities in advance of road work.

The Engineer advised that the reasons given by the contractor for failure to complete the project within the limits of the previously extended period are substantially correct. This job, he said, was completed on July 8, 1949, in view of which he recommended that the extension of time be granted up to July 8th without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission unanimously approved the recommendation.

15. Porter W. Yett, Contract No. 2853, paving and construction of structures on the North Plains-Barnes Road Section of the Sunset Highway, Washington County, requested an additional extension of time of 197 days

from September 15, 1948 to April 15, 1949, within which to complete this job. He attributed his failure to complete the project within the previously extended time limit to unfavorable condition of the subgrade brought about by adverse weather which necessitated drainage and subgrade correction before paving operations could be completed. The Engineer advised that the reasons given by the contractor for overrun of the previously extended time limit are correct. This job, he said, was completed on March 29, 1949, so it is not necessary to extend the time limit beyond that date. He recommended the granting of an extension of time to March 29, 1949, without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

16. J. N. and J. J. Conley, Contract No. 3032, grading and bituminous macadam surfacing on the Agate Beach-Newport Section of the Oregon Coast Highway, Lincoln County, requested an extension of time of thirty days from July 31, 1949 to August 30, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to inclement weather conditions. The Engineer advised that extremely adverse weather conditions definitely delayed oiling operations in the forepart of the oiling season, however, the oiling was completed by August 10, and the balance of the work remaining to be done simply consists of cleaning up the premises. He recommended, in view thereof, that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

17. Babler Bros., Contract No. 3093, for grading, surfacing and oiling the Rosedale Section of The Dalles-California Highway, requested an extension of time of sixty days from August 30, 1949, to October 31, 1949, within which to complete this job. They stated that all work in connection with this project is completed and that the only thing remaining to be done is to burn up rubbish and debris, which operation cannot be carried on until weather conditions are satisfactory. The Engineer advised that all things required of the contractor were completed within the specified time with the exception of the burning of the debris, which work, because of Forest Service regulations, could not be carried on until wet weather set in. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

18. Warren Northwest, Inc., Contract No. 3125, for oil mat surfacing the Corvallis-Albany Section of the Corvallis-East Side Secondary Highway in Linn County, requested an additional extension of time of 19 days from July 31, 1949, to August 19, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to orders from the Engineer to give priority to the Sweet Home-Brownsville Project, Contract No. 3146. The Engineer advised that the contractor was required to do additional work under Contract No. 3146, between Sweet Home and Brownsville, before commencing the oiling operations on the Corvallis-East Side Secondary Highway Project. The public, he said, has not been inconvenienced by the delay, neither has the state incurred

any additional expense for engineering supervision. He recommended that the requested extension of time be granted without penalty. The Commission approved the recommendation unanimously.

19. Warren Northwest, Inc., Contract No. 3052, for grading and paving the West Slope-Beaverton Section of the Tualatin Valley Highway in Washington County, requested an extension of time of 30 days from August 31 to September 30, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to conflicting operations by various public utilities. The Engineer advised that due to the lateness in awarding this contract, it was necessary to defer certain operations until the Spring of 1949, and that the contractor also suffered considerable delay because of the failure of various utilities to complete the moving of their facilities. He recommended, in view thereof, that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

The Commission in discussing requests for extensions of time as listed above, considered but did not necessarily adopt the recommendations of the Engineer and/or the reasons given by the contractors for failure to complete their projects within the specified time limits.

The Engineer reported that contracts Nos. 2853, 2892, 2959, 2987, 3032, 3033, 3051, 3053, 3056, 3063, 3066, 3098, 3101, 3103, 3116, 3117, 3125, 3127, 3129, 3130, 3131, 3138, 3141, 3144, 3146, 3152, 3155, 3156, 3162, 3166, 3175, 3191, 3194, and 3205, for construction of state highway projects, have been completed according to the requirements of the contract, or modifications thereof, and that said projects are now ready for acceptance. After due consideration, the Commission accepted said contracts by the adoption of the attached resolution relative thereto marked EXHIBIT "G", which resolution by this reference is made a part hereof.

The Engineer brought up for discussion the matter of constructing a new ferry terminal at 17th Street in Astoria, to replace the present one at 14th Street which is being operated under a lease, for which an amount of $175,000 has been set up in the 1949 budget. He exhibited plans of the proposed improvement and advised that the present estimated cost to provide this facility is $173,826. The Commission indicated a reluctance to approve this project, and accordingly deferred its decision until later.

A request was presented from County Judge John H. Sheldrake, Hood River County, that the report on the Hood River-White Salmon Interstate Bridge across the Columbia River at Hood River, which was made by the State Highway Department several years ago, be brought up to date. The Engineer advised that the report referred to is one rendered in 1941-1942, which covered a study of the various bridge crossings of the Columbia River between the States of Oregon and Washington, including the existing bridge at Hood

River. To make the traffic studies and to compile all of the data as requested by Judge Sheldrake, he said, would cost between $5,000 and $6,000, moreover, the work could not be done expeditiously because there is a shortage of competent engineers; in any event, it is not essential to the Highway Department. The Commission denied the request.

The Commission discussed a letter from Mr. Collier H. Buffington, Chairman of the Curry County Weed Control Committee, urging that all essential precautions be taken to prevent any spread of gorse or other noxious weeds through the use of seed-infested gravel, in the construction and maintenance of highways. The Engineer advised that it has been the practice of this department for a long time, in the use of gravel from streams in infested areas, to screen out all fine materials, and to crush only the coarse materials, and that experience reveals that this method has effectively removed the seeds, in as much as they have never propagated along the highway shoulders or in stockpiles when the materials have been prepared in that manner. He gave as his belief that the method now being employed is in full compliance with the law covering this feature. The Engineer also stated that the Bureau of Public Roads is employing the same methods in connection with its contract on the Oregon Coast Highway south of Port Orford. The Commission approved the report and ordered that the information be conveyed to Mr. Buffington.

The Commission discussed and upon recommendation of the Engineer and State Parks Superintendent, approved the application of the Pilot Rock Lumber Company to construct, maintain and operate a logging road not to exceed ten feet in width, over a specific location through Camas Creek Wayside strip along the Pendleton-John Day Highway between Ukiah and Dale, in Umatilla County. An agreement with the Pilot Rock Lumber Company covering the details was signed by the Commission later in the session.

The Engineer requested approval of the purchase of miscellaneous office and field equipment, totalling $6,666. The Commission approved the request by unanimous vote. (For details, see copy of the Engineer's written report to the State Highway Commission dated September 13, 1949, in general files.)

The Engineer reported that he has consulted with the members of the delegation that appeared before the Commission on the previous day with respect to setting a date for opening and dedicating the Warm Springs Highway, and that Sunday, November 13, 1949, was the unanimous choice of the group. The Commission confirmed such date.

The Commission had under discussion the formal request of the Sportsmen Pilots of Oregon, for the designation of an aircraft landing strip along the sand spit located between Netarts Bay and the Pacific Ocean, approximately three miles south of the village of Netarts. The Secretary also presented a letter from the Oregon State Board of Aeronautics endorsing the request. The Chief Counsel advised that the application and approval of the Board of Aeronautics is substantially in conformity with the legal requirements. The Commission unanimously approved the granting of a temporary permit for the use of the beach for the purpose intended, such privilege being granted as a temporary proposition so as to give the general public an opportunity to

voice its approval or disapproval before the area is designated as a landing strip on a permanent basis. The Chief Counsel was instructed to prepare a form of temporary permit.

The Engineer reported receipt of a letter from the City Manager of the City of Milwaukie, objecting strenuously to the barricading of Harvester Drive where it connects with McLaughlin Boulevard (US99E) between Milwaukie and Portland. He stated that the city constructed this approach road to the highway without first obtaining written permission from the State Highway Commission, as required by Chapter 308, Oregon Laws, 1949, and he had it barricaded after consulting with Chairman Banfield. Now the city of Milwaukie has threatened to take action against the State Highway Commission unless the barricade is removed, in fact, the city has taken the matter into its own hands and removed a portion of the barricade so as to permit access to the highway. He requested instructions. The Commission deferred action for the time being.

The Commission discussed a request from Mr. James L. Watson, Portland, for permission to operate a popcorn truck on state-owned property at Reed's landing, adjacent to the new Columbia River Highway. The Commission denied the request as a matter of policy.

The Commission also discussed a letter from Mr. Clifford A. Stocker, Director, State Commission for the Blind, inquiring as to the possibilities of establishing in business at the proposed new ferry terminal at 17th Street in Astoria Mr. William Dyke, a client of his commission, whose sight has been partially restored. Mr. Stocker advises that the Division of Vocational Rehabilitation Service for the blind attempts to effect the best program for its various clients and it is their belief that Mr. Dyke, whose home is in Svenson, could make a living for himself very handily at this new ferry location. The Commission deferred action on the matter because no provision has been made as yet for the new ferry facilities.

The Engineer reported that the repair work on the bridges over the Snake River at Payette and Weiser, which was necessary in order to allow loads weighing eleven tons to pass over them, has been completed, with the exception of the installation of the traffic signals, so loads of such weight now may be allowed to use these structures if the Commission desires. He recommended the adoption of a formal order to permit eleven ton loads to pass over these structures pursuant to previous arrangements made with the State of Idaho. The Commission approved the recommendation, and thereupon by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "H", which resolution by this reference is made a part hereof.

The Engineer reported completion of certain highway projects, as follows, rendering valueless for state highway purposes sections of the old highway routes:

1. Campbell Ranch-Gerking School Section of Athena-Holdman Secondary Highway No. 334 in Umatilla County.
2. Gunnell Road-Robertson Bridge Section of Rogue River Loop Secondary Highway No. 260, in Josephine County.
3. Gardner Section of the Oregon Coast Highway, No. 9, in Douglas County.

He exhibited maps showing the sections affected and recommended appropriate action by the Commission disposing of the old right of way. After careful consideration, the Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolutions relative thereto, marked EXHIBITS "I", "J", "K", which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Commission discussed and denied a petition from residents of Mulino and vicinity, Clackamas County, for the designation of a 25 mile per hour speed limit on the Cascade Secondary Highway through the community of Mulino, since it appears from the report of the Engineer on this subject that such reduced speed is not warranted.

The Commission discussed a petition from residents of Vida and vicinity, Lane County, for the establishment of a restricted speed zone on the McKenzie Highway from the Eugene power dam easterly to a point one half mile east of Keller's store. The Engineer advised that this section is 3.1 miles in length, and with the exception of one sharp curve near the state fish hatchery, the highway alignment is fair and the pavement is 20 feet wide. He also said that the accident record is very favorable. He recommended that the request for a reduced speed zone be denied, but that signs bearing the wording "Slow-Congested Zone" be posted on the highway at the approaches to the fish hatchery where the sharp curve exists. The Commission approved the recommendation and so ordered.

The Engineer reported on a plan prepared by the Traffic Engineer of the City of Portland to correct a bad traffic condition which has developed on S. E. Brooklyn Street, between S. E. Milwaukie Avenue and the intersection of S. E. Powell Boulevard, which is between S. E. 9th and S. E. 10th Avenues. The plan, he said, is to channelize S. E. Powell Boulevard between S.E. 10th Avenue and Milwaukie Avenue so as to control traffic more effectively and to eliminate a dangerous condition. He advised that the plan has been thoroughly investigated by the State Traffic Engineer, who recommends approval of the same. He stated his concurrence in the recommendation and advised that the city will pay all of the costs. The Commission unanimously approved the recommendation.

The Commission discussed a written report from the Engineer, dated September 13, 1949, on the naming of the ferry boat which J. F. LaRouche is operating across the Willamette River at Wilsonville, under contract with the Highway Commission. It appears from the report that a controversy has arisen as to the naming of this ferry, which the Highway Commission is requested to decide. The Commission expressed a reluctance to enter into the controversy, and accordingly left it with the "Boone" heirs and Mr. Lewis A. McArthur of the Oregon Historical Society to iron out the differences.

A letter was presented from "D"-River Chapter of the Disabled American Veterans, Nelscott, Oregon, requesting the installation of a sign at each end of the bridge recently completed over the "D" River at Delake, containing the inscription, "D River, Shortest in the World." The Commission denied the request, there being no certainty that this is the shortest river in the world, and it being the wish of the Commission for signs that it places to bear absolutely correct information.

The Chief Counsel presented for the Commission's consideration a form of resolution prepared in collaboration with the Engineer as instructed previously by the Commission, which has for its purpose the designation of additional highways and sections of highways as "THROUGH" highways, pursuant to the provisions of Section 115-351 O.C.L.A., as amended by Chapter 428, Oregon Laws, 1941. It was explained that this resolution covers all highways in the state that have not heretofore been designated "THROUGH" highways by similar action of the Commission, this being the fourth of such resolutions. The Commission unanimously approved the resolution, as prepared, which resolution is attached hereto, marked EXHIBIT "L" and by this reference made a part hereof. The Chief Counsel was instructed to combine into one instrument all four of the resolutions covering throughway designations, for approval and adoption by the Commission in order to avoid confusion that might develop later on when reference is made to them.

A petition was presented from Westdale Mothers Club, Beaverton, Oregon, urging the designation of a 35 mile per hour speed limit along the Hillsdale-Beaverton Highway, between Beaverton and the community of Glencullen. The Engineer recalled that at its meeting in August, 1948, the Commission designated a 40 mile per hour speed zone on this highway from M.P. 2.00 to M.P. 2.55, the latter point being at S. W. 50th Avenue, Portland, and that the present request is for the designation of a 35 mile per hour speed limit from this point into Beaverton. An investigation by the Traffic Engineer, he said, reveals that there is no justification for lowering the speed limit throughout this entire section, but he recommends the extension of the present 40 mile per hour speed zone from S. W. 50th Avenue to M.P. 4.15, at West Slope Road. He said that he concurs in the recommendation. The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto, marked EXHIBIT "M", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed, and upon recommendation of the Engineer and Chief Counsel, approved and signed a form of permit authorizing the U. S. Army Engineers to perform certain construction work on the right of way of the Columbia River Highway at Mill Creek Tunnel entrance, in The Dalles.

The Engineer reported that the present contract with Andrew Stanbuck for providing ferry service at the Enegren crossing of the Coos River, Coos County, expires January 6, 1950. He requested authority to re-advertise this service for bids to be received at the next regular meeting of the Commission, the service rendered to be of the same type that is now provided at this location, viz; twenty hours daily for a period of two years. The Commission approved the request by unanimous vote.

The Commission confirmed oral authority heretofore given for Mr. Manley F. Robison, Director of the Travel Information Department, to attend at state expense a meeting of the Pacific Northwest Travel Association in Missoula, Montana, September 18, 19 and 20, 1949.

The Commission also authorized Mr. Robison to attend at state expense the annual meeting of the National Association of Travel Officials which is scheduled to be held in Denver, Colorado, during October 24 to 27, 1949.

The Engineer requested authority for Mr. Gene Huntley, Personnel Officer, to attend at state expense a meeting of the National Civil Service Conference on Public Personnel Administration, which is to be held in San Francisco during October 23 to 27, 1949. He estimated the expense involved at $50. The Commission approved the request.

The Engineer also requested authority for Mr. N. M. Finkbiner, Engineer of Materials, to attend at state expense a meeting of the American Association of Testing Materials in San Francisco, during the period October 14 to 20, 1949. He estimated Mr. Finkbiner's expenses would not exceed $75. The Commission approved the request.

The Engineer reported that the State Speed Control Board at a meeting held in Salem on September 14, approved the designation of speed zones on certain sections of state highways in urban areas and in three instances recommended the extension of such zones beyond the city limits as follows:

1. On US20, from the west city limits of Hines, at Mile Point 128.85, westerly a distance of 1.25 miles to Mile Point 127.60 - a speed zone of 40 miles per hour.

2. On US99, from the south city limits of Gladstone, at Mile Point 11.08, to the north city limits of Oregon City, at Mile Point 11.65, a distance of 0.57 mile - a speed zone of 40 miles per hour.

3. On US101, from the south city limits of North Bend, at Mile Point 254.24, to the north city limits of Coos Bay, at Mile Point 254.49, a distance of 0.25 mile - a speed zone of 45 miles per hour.

In order to make these three zones effective, he said, it is necessary that the State Highway Commission approve the recommendations. The Commission unanimously approved the designation of such reduced speed zones by the adoption of the attached resolution relative thereto, marked EXHIBIT "Q", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Chief Counsel reported a telephone conversation with the architects for the proposed State Highway Department Office Building, to the effect that the three low bidders who were requested to submit modified offers are fearful that some of the higher bidders who were not asked to furnish such information might hinder the work by injunction. The low bidder, particularly, he said, is fearful of litigation. He suggested in view thereof that the Commission reject all of the bids and re-advertise the project. Following discussion, the Commission unanimously approved the recommendation. It was also decided to ask the architects to make certain changes in the plans so as to create a saving of at least $200,000 to the state. (This matter was discussed further with the architects during the afternoon session.)

The Commission had under discussion a date for its next regular meeting, and decided to hold such meeting in Portland on Monday and Tuesday, November 7 and 8, 1949. The Secretary was instructed to make the usual arrangements for the use of the Green Room in the Imperial Hotel.

The meeting adjourned for luncheon at 12:00 noon and reconvened at 1:30 p.m. with the same persons present and participating.

The Engineer brought to the Commission's attention petitions signed by numerous residents along the River Road (Junction City-Eugene Secondary Highway) for the designation of a 30 mile per hour speed zone on this highway between the Eugene city limits and the community of Santa Clara. He said that this petition was sent to Governor McKay, who referred it to him with a request that it be brought to the Commission's attention. He said that this request is a duplicate of one that he reported on at the previous meeting and the Commission referred back to him for additional information. Investigation made since the last meeting, he said, verified his previous recommendation that the 40 mile per hour speed limit now existing north of the city limits of Eugene be retained except along the section between M.P. 9.65 and M.P. 9.97, through the Santa Clara district, where the speed limit should be reduced to 30 miles per hour. He recommended approval of such change. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "N", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A letter was presented from Mr. Fred E.Kiddle, Chairman of the Roads and Highways Committee of the LaGrande Chamber of Commerce, in which the Commission is requested to give consideration to the matter of extending Starkey Secondary Highway from its present terminus at Starkey in Union County, westerly to a connection with the Pendleton-John Day Highway near Ukiah in Umatilla County. The Commission deferred action on this matter until its next meeting.

The Commission discussed briefly its three-party agreement with Lane County and the City of Eugene with respect to highway improvements in Eugene. The Engineer advised that it was necessary to increase the amount of the state's contribution over that provided in the agreement. He was instructed by the Commission to render a complete status report on the subject for consideration by the Commission at its next meeting.

The Commission had under discussion the selection of projects for funds remaining unallocated in its Second Post War Construction Program, amounting to $4,483,000. The Engineer recalled that when the Commission selected its partial program on May 18, 1949, the sum now under discussion was ordered held as a reserve, subject to allocation and distribution at a later date, with the understanding that of this amount, $3,306,000 would be available for Federal Aid Projects and $1,177,000 would be available for state construction projects or state major betterment projects. He presented a list of projects eligible for the funds under discussion, from which the Commission selected projects which are estimated to cost the sum of $2,115,000 for the Federal Aid Secondary Highway Program, and also selected projects that are estimated to cost $779,000 for its state major betterment program. Balances remaining unallocated were ordered by the Commission held as reserves, subject to allocation to specific projects at a later date. (For a complete list of approved projects, see EXHIBIT "O" attached hereto.) In the discussion of this program, the Commission unanimously approved the following alterations in the partial program of projects thatwere adopted at its meeting on May 18, 1949, as follows:

The Commission cancelled the allocation of $210,000 originally set up for a project on the Old Oregon Trail between Ontario and Nyssa in Malheur County, and redistributed the funds, $70,000 for widening and construction of asphaltic concrete wearing surface on a 3½ mile section of the Old Oregon Trail between Ontario and Cairo; $50,000 for increasing the prior allotment of $180,000 for the improvement of the Pumping Plant Hill-Ontario Section of the Old Oregon Trail, Malheur County, which makes this a $230,000 project; $90,000 to increase the prior allotment of $575,000 for the improvement of the Willow Creek-Boardman Section of the Columbia River Highway in Morrow County, making this a $665,000 project.

All of the above mentioned program matters were given very careful, detailed attention by the Commission, which unanimously approved them by the adoption of the attached resolution relative thereto, marked EXHIBIT "O", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

In the discussion of the above program matter, consideration was also given by the Commission to the following:

1. Grading, and construction of a bridge on the proposed route of the North Santiam Highway between Mehama and Mill City: It was the feeling of the Commission that the Federal Government should contribute funds for this project, because activities in connection with the construction of the Detroit Dam are largely responsible for existing traffic conditions.

2. Construction of one mile of grade and 4.5 miles surfacing and oiling on the West Cottonwood Canyon Section of the Wasco-Heppner Secondary Highway: The Engineer estimated the cost of this work at about $80,000. The Commission deferred approval of the project pending a report from the Engineer on the probable cost to complete the entire section, it being the feeling of the Commission that the work contemplated should be extended, in preference to the grading and surfacing of the Wocus Marsh-Langley Woods Junction Section of the Klamath Lake Secondary Highway, which work is estimated to cost $250,000. The Commission ordered funds for both projects held in reserve pending the rendition of the report and action by the Commission.

3. Grading and paving a 1.5 mile section of the Pacific Highway north of the city limits of Roseburg: The Engineer estimated the cost of this improvement at $264,450, including right of way. The Commission questioned that such improvement would prove satisfactory, in view of the development that is taking place north of Roseburg, and accordingly instructed the Engineer to report the cost to extend the proposed improvement so that it will not be necessary to go back later on and do additional work.

4. Surfacing and oiling the Chiloquin-Sprague River Section of the Sprague River County Road, Klamath County, 15 miles in length: The

Commission approved an allocation of $150,000 for this work, in conformity with previous understanding and written agreement with the U. S. Indian Service. In doing so, the Commission made it clear that this is absolutely the last contribution of state highway funds that it intends to allocate to this road.

Pursuant to previous instructions, the Engineer presented for the Commission's consideration a list of survey projects which are required in connection with an additional construction program, costing from $20,000,000 to $25,000,000. He estimated the cost of necessary surveys at $384,000 and requested authority to proceed with making the surveys. The Commission deferred action on this matter pending a report from the Engineer on other survey matters.

The Engineer also presented a list, as follows, of surveys heretofore approved for projects that are not in any current program:

ESTIMATED CONSTRUCTION COST $25,409,000

Highway and Section	Estimated Construction Cost Incl. R/W	Cost to Complete Survey	% of Survey Completed
Columbia River:			
Cascade Locks-The Dalles	$ 10,942,000	$ 25,000	75
Arlington-Willow Creek	950,000	5,000	20
West Portland-Hubbard:			
Boones Ferry-Marion Co. Line	3,260,000	4,500	80
Wilson River:			
North Plains-Glenwood	1,322,000	5,000	85
Oregon Coast:			
Coos Bay-Delmar	1,560,000	3,000	90
Siletz Bay-Spencer Creek	1,800,000	6,500	80
Wedderburn-Gold Beach	110,000	1,500	80
Pacific:			
Judkins Point-Goshen	1,140,000	1,000	95
The Dalles-California:			
Crooked River-Terrebonne	285,000	1,500	90
Klamath Falls-West Side Bypass	850,000	15,000	20
Klamath Falls-Malin:			
Esplanade-South 6th Street	700,000	2,500	90
Old Oregon Trail:			
LaGrande-Ladd Creek	1,350,000	15,000	80

(Cont.)

[illegible] Previously Approved (Cont.)

[illegible] and Section	Estimated Construction Cost Incl. R/W	Cost to Complete Survey	% of Survey Completed
[illegible] John Day			
Mt. Vernon-John Day	$ 670,000	$ 12,000	0
Wallowa Lake			
Joseph-Wallowa Lake	125,000	4,000	20
[illegible] Lake			
Wocus Marsh-Denny Creek	345,000	11,000	5
	$ 25,409,000	$ 112,500	

He requested authority to complete these surveys, which he estimated would cost about $112,500. After careful consideration, the Commission authorized completion of the following surveys, but ordered work discontinued on the remainder.

Highway and Section	Remarks
Cascade Locks-The Dalles Section, Columbia River Highway	
Arlington-Willow Creek Section, Columbia River Highway	Priority project, rush survey
Boones Ferry-Marion County Line Section, West Portland-Hubbard Highway	The Chief Counsel was authorized to negotiate options for right of way along this section.
Coos Bay-Delmar Section, Oregon Coast Highway	Rush Survey
Judkins Point-Goshen Section, Pacific Highway	No particular hurry
Crooked River-Terrebonne Section, The Dalles-California Highway	No particular hurry
Esplanade-South 6th Street Section, Klamath Falls-Malin Highway	
LaGrande-Ladd Creek Section, Old Oregon Trail Highway	Priority project, rush survey
Mt. Vernon-John Day Section John Day Highway	No particular rush
Joseph-Wallowa Lake Section, Wallowa Lake Highway	Priority project, rush survey
Wocus Marsh-Denny Creek Section, Klamath Lake Highway	No particular rush

In the discussion of the above mentioned survey projects, the question arose why some construction projects which have been approved by the Commission for contracting have not yet been advertised for bids, whereas certain jobs that were later authorized are now underway. It was the feeling of the Commission that when it authorizes a project the contracting of the same should be expedited. The Engineer was instructed to submit a report on this feature and to include therein the status of surveys, right of way acquisitions, and construction with respect to all projects contained in the current highway program. In connection with the acquisition of right of way for the Sullivan Gulch Project in Portland, the Chief Counsel was instructed to concentrate on the acquisition of properties in the units that are to be constructed first, so far as that is possible.

Messrs. Walter E. Church, Earl P. Newberry and Frank Roehr, architects for the proposed State Highway Department Office Building in Salem, were present and discussed with the Commission matters pertaining to the bids received on the previous day for the construction of this building and to proposed future action. Chairman Banfield advised that the Commission is not satisfied with the bids received and does not care to become involved in any litigation, which it has been told might result if a compromise arrangement were made with one of the three low bidders, as was contemplated in the discussion of this matter on the previous day, so the Commission by unanimous action has rejected all of the bids and has decided to re-advertise the project for new bids to be received at its next meeting. He pointed out that the low bid received for construction of the building was that of Ralph & Horwitz, Portland, at $1,934,264, whereas the original estimate of cost was $1,600,000, and he inquired what can be done in the way of alteration, elimination, et cetera, without injuring the structure in any way, or detracting from its appearance, to realize a saving of at least $200,000. There followed a general discussion of the matter, resulting in the elimination of a number of items, including ventilating system, marble coping, kitchen equipment, plaster and ceiling work in the basement, all of which the architects estimated would reduce the cost of the building about $225,000. The changes were approved by the Commission by unanimous vote. It was also decided that alternate bids on several of the items, including the furnishing of the fifth floor of the building, should be requested, and that it would be satisfactory for contractors to use the original plans for the structure as a basis in preparing their bids, such plans to be supplemented by new sheets showing the changes with detailed explanation of what is wanted. Chairman Banfield stated that the Commission expects that the information given the contractors will be full and complete in every way so as to avoid any misunderstandings. The architects were requested to furnish each member of the Commission and the State Highway Engineer with a complete set of plans and specifications as revised. By mutual agreement, it was unanimously decided to advertise the project for bids to be received at 4:00 p.m. on November 7, 1949, in the Green Room of the Imperial Hotel.

The Commission discussed, approved and signed agreements, et cetera, as follows:

Cooperative agreement with the City of Astoria covering traffic survey to be conducted in that city. (Authorized August 2, 1949)

Cooperative agreement with the City of Myrtle Creek covering the 1949 city allotment project.

Agreement with Umatilla County covering construction of the Holdman-Helix Section of the Holdman-Helix County Road.

Maintenance agreement with Douglas County covering the Marks Ranch-Lone Rock Bridge Section of the North Umpqua County Road.

Agreement with the City of Cottage Grove covering the installation of traffic lights in that city. (Authorized by Commission June 28, 1949)

Agreement with City of Portland re resurfacing Union Avenue. (Authorized by Commission on August 1, 1949)

Bargain and Sale deed conveying to Suter and Starnes certain property in Grants Pass in exchange for property owned by them. (Requirements satisfied) (Authorized by Commission on August 1, 1949)

Agreement with City of Warrenton re improvement of Warrenton Secondary Highway within city limits. (Authorized by Commission on June 27, 1949)

Quit Claim Deed conveying land in Clatsop County to Chester J. Irelan.

Agreement with Southern Pacific Company covering construction of drainage pipe line on railroad property near Tillamook.

Agreement with Eric Enquist covering settlement for right of way on Dodson-Bonneville Section.

Agreement with Bureau of Public Roads with respect to maintenance of detours during construction of South Unit Canyonville-Johns Section.

Agreement with Wheeler County covering maintenance of Kinzua County Road by state forces at expense of county.

Agreement with Pilot Rock Lumber Company covering construction of a logging road across Battle Mt. State Park.

Permit authorizing U. S. Army Engineers to perform certain construction work on highway right of way at Mill Creek Tunnel in The Dalles.

Agreement with City of Salem covering Salem Traffic Plan.

The meeting adjourned at 4:30 p.m. daylight saving time.

T. H. Banfield
Chairman

State Highway Engineer

Commissioner

EXHIBITS "A" THROUGH "Q"

Minutes of September 19, 20 and 21, 1949

EXHIBIT "A"

Minutes of September 19 and 20, 1949

RESOLUTION

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

SULLIVAN GULCH SECTION, SULLIVAN GULCH HIGHWAY - UNIT #2

14711- Toulon, Marie
Right of Way
Option expires February 27, 1950 (Hippert)

16,553 sq.ft. at 45¢ sq.ft.	$ 7,448.85	
Allowance- fruit trees	90.00	
Amount to be paid owner		$ 7,538.85
STATE to assume payment delinquent taxes (Est.)		108.00
Total chargeable to Right of Way		7,646.85

14888- Lang Bros.
Right of Way
Option expires February 17, 1950 (Hippert)

6,534 sq.ft. at $0.435+ sq.ft.	2,845.00	
Allowance- loss 180'6" concrete pipe	180.00	
moving approx. 50M ft. lumber	375.00	
damages, loss lumber storage space	1,600.00	
Amount to be paid owner		5,000.00
Amount chargeable to Right of Way		5,000.00

EXHIBIT "A" (Cont.)

SULLIVAN GULCH SECTION, SULLIVAN GULCH HIGHWAY -- UNIT #2 (Cont.)

14710- Haftorson, Roy G., Lewis J. and Elbert Haftorson (Hippert)
Right of Way
Option expires January 28, 1950

14,810 sq.ft. at 50¢ sq. ft.	$ 7,405.00	
Allowance- concrete building	13,784.00	
concrete slabs, 370 sq.yd. at $4.00 sq.yd.	1,480.00	
open storage bin	55.00	
moving and re-establishing machinery, equipment, etc.	800.00	
moving & reinstalling gas storage tank and pump	390.00	
general damages	750.00	
Amount to be paid owner		$ 24,664.00
Amount chargeable to Right of Way		24,664.00

SULLIVAN GULCH SECTION, SULLIVAN GULCH HIGHWAY -- UNIT #3

14715- Sealy, Eileen Rae (Mayhew)
Right of Way
Option expires October 10, 1949

5,984 sq.ft. at 67¢ plus sq.ft.	4,041.74	
Allowance- for buildings	41,203.26	
architect fees, new building	1,980.00	
moving, dismantling, re-installing heating & cooking equip't	3,570.00	
cartage, stock, incidental exps.	1,375.00	
advertising change-over, left-over matter, changing dies & plates	1,355.00	
removing & re-installing large walk-in freezer, lower floor	450.00	
removing & re-installing elec. equipment	375.00	
special sewer hook-up	2,500.00	
loss billing forms, plates, cartons & other office forms	1,150.00	
Amount to be paid owner		58,000.00
Amount chargeable to Right of Way		58,000.00

Minutes of September 19, 20, and 21, 1949

R E S O L U T I O N

WHEREAS, the acquisition of real properties needed for rights of way and for other public uses can not always be accomplished by agreement between the Highway Commission and the property owners but must in some instances be acquired by and through condemnation proceedings; and

WHEREAS, often there are on real properties acquired by the State, through its Highway Commission, buildings, structures, and personal property which must be sold, removed, or otherwise disposed of, the removal or disposition of which is brought about as a result of a call for competitive bids in all cases where the appraised value of the property is of an amount to warrant the cost incident to publication of the proper and appropriate notices; and

WHEREAS, the acquisition of property in cities and small communities is now of such magnitude that the instances and occasions calling for the disposal of buildings, structures, and other properties have increased to such extent as to warrant the adoption of a procedure which will make unnecessary the submission to the Commission for approval all necessary sales and property disposals; and

WHEREAS, it is the opinion of the Commission the adoption of the practice, procedure and policy herein set forth will economize time and will promote and preserve public interest;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED AND ORDERED BY THE COMMISSION, all members being present and affirmatively voting, that the following rules, practices and regulations herein set forth shall, until modified or rescinded, be deemed in full force and effect with respect to certain matters and functions coming within the jurisdiction of the Legal Department:

1. All recommendations and requirements for authority to institute condemnation proceedings with respect to the acquisition of real properties shall be submitted by the Commission's Chief Counsel to the Highway Commission for approval before the institution of such proceeding.

2. With respect to each property recommended for condemnation there shall be submitted the appraised value and there shall be expressly stated the amount of money which the Chief Counsel recommends be paid or offered to the owner or owners prior to the filing of the complaint.

3. After condemnation proceedings have been instituted the Chief Counsel shall have and hereby is given full authority to settle said controversy by stipulation and judgment or by warranty deed, and in and by said settlement Counsel may and is hereby authorized to pay such sum as in his opinion is just and fair.

(Cont.)

EXHIBIT "B" (Cont.)

4. The Chief Counsel shall monthly prepare and file with the Highway Commission a written report in which there shall be set forth in such detail as will give to the Highway Commission a comprehensive knowledge of all pertinent facts involved in the several settlements made by Counsel during said period within the authority herein granted.

5. With respect to the disposition of buildings, structures, and other improvements, including all personal property acquired in connection with the acquisition of real properties, except buildings on properties acquired for the Sullivan Gulch route, Counsel may dispose of the same in the following manner.

(a) All buildings, structures and other improvements, including all items of personal property, shall be inventoried and appraised as to market value and a correct copy of such inventory and appraisal filed in the office of the Highway Commission at Salem, Oregon.

(b) If the appraised value of any single piece of property or a collection of personal property items equals or exceeds $100.00, then the same can be sold only as a result of a call for competitive bids and sales shall be made to the highest responsible bidder, provided that if no bids are received or if the high bid is not deemed satisfactory then such article or articles may be disposed of at private sale.

(c) All such transactions shall be promoted and carried on under the supervision and control of Chief Counsel and he shall be held responsible for a strict conformance of proceedings in accord with the provisions of this resolution.

(d) There shall be prepared by Chief Counsel or under his supervision a monthly report in which there shall be set forth a description of each article or property sold, its appraised value, the price for which sold, and the disposition made of funds obtained thereby.

(e) The transfer of title to all personal property, buildings, structures, or improvements sold or disposed of pursuant to the provisions and authority of this resolution may be evidenced by a bill of sale, which bill of sale may be executed for the Highway Commission by the Chief Counsel.

6. This resolution may be amended or may be entirely rescinded by the Commission when such action is deemed in public interest.

7. This resolution shall be entered in the minutes and records of the Commission as of the 19th day of September, 1949.

EXHIBIT "C"

Minutes of September 19, 20 and 21, 1949

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, as amended, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1948 for street purposes as provided in said law, the several sums of amounts set opposite the names of the respective cities or towns:

Moro	$ 1,321.31
Weston	2,129.49

AND WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 21st day of September, 1949.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 21st day of September, 1949.

EXHIBIT "E"

Minutes of September 19, 20 and 21, 1949

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 425, Oregon Laws 1947, as amended by Chapter 149, Oregon Laws 1949, there have been by the Oregon State Highway Commission apportioned from revenues accruing during the first six-month period of 1949 to the cities and/or towns hereinafter named for disbursement for street purposes as provided in said law, the amounts set opposite the names of the respective cities or towns:

Canyonville	$ 1,670.54
Dundee	443.64
Garibaldi	1,908.28
Harrisburg	1,825.50
Maupin	566.75
Umatilla	1,577.14

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 21st day of September, 1949.

EXHIBIT "F"

Minutes of September 19, 20, and 21, 1949

RESOLUTION

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the following section of a state highway, to wit:

LA GRANDE-NORTH POWDER SECTION of the
OLD OREGON TRAIL, in Union County

and in connection therewith to prepare maps showing the route and location of said section of highway and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps, and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That the survey of the above-mentioned section of state highway, together with the maps which for identification purposes bear the map file Nos. 6B-35-9, 10, 11, 12, 13 and 14, field notes and other engineering data submitted by the Engineer, hereby is approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. It is further ordered that the said route and the survey of the same hereby are adopted as the route and location of the LA GRANDE-NORTH POWDER SECTION of the OLD OREGON TRAIL HIGHWAY.

3. That when said section of said highway is permanently constructed, the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

4. That this resolution be entered in the minutes and records of the Commission as of the 21st day of September, 1949.

EXHIBIT "G"

Minutes of September 19, 20 and 21, 1949

R E S O L U T I O N

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2892, with Porter W. Yett for grading, paving and structures on the Barnes Road-Multnomah County Line Section of the Sunset Highway in Washington County, completed July 8, 1949.

Contract No. 2959, with General Construction Co., for constructing the Sandy River Bridge in Multnomah County, completed Aug. 31, 1949.

Contract No. 2987, with Rogers Construction Company for grading, bituminous macadam surfacing and paving on the Klamath Falls (1st Avenue-Esplanade Street) Section of the Klamath Falls-Malin Highway in Klamath County, completed June 16, 1949.

Contract No. 3032, with J. N. & M. J. Conley for grading and bituminous macadam surfacing on the Agate Beach-Newport Section of the Oregon Coast Highway in Lincoln County, completed August 20, 1949.

Contract No. 3033, with Del R. Beebe Construction Co. for grading and paving on the Eugene (High St.-Walnut St.) Section of the Pacific Highway in Lane County, completed August 19, 1949.

Contract No. 3051, with Lindstrom Brothers, Inc., for structure, grading and paving on the Corvallis (South Entrance) Section of the Pacific Highway West in Benton County, completed August 31, 1949.

Contract No. 3053, with Cressler Construction Co. for grading and paving on the 10th Street Section in the City of Tillamook, completed August 12, 1949.

Contract No. 3056, with Del R. Beebe Construction Company for constructing the Manning Slough Bridge on the Oregon Coast Highway in Coos County, completed August 31, 1949.

Contract No. 3063, with Snook Brothers for grading and paving on the Gold Beach Section of the Oregon Coast Highway in Curry County, completed August 19, 1949.

(Cont.)

EXHIBIT "G" (Cont.)

Contract No. 3066 with D. F.McKenzie for oiling on the Fremont Junction-Drakes Creek Section of the Warner Secondary Highway in Lake County, completed September 3, 1949.

Contract No. 3098, with F. L. Somers for furnishing crushed materials in stockpiles on the Crescent-Diamond Lake Junction Section of The Dalles-California and Willamette Highways in Klamath County, completed Aug. 11, 1949.

Contract No. 3101, with P. B. Doherty & Son for furnishing crushed material in stockpiles on the Pine Creek-Beech Creek Section of the Pendleton-John Day Highway in Grant County, completed July 31, 1949.

Contract No. 3103, with Leonard & Slate, Oregon Ltd., for grading and oil mat surfacing on the Biggs-Wasco Section of the Sherman Highway in Sherman County, completed August 17, 1949.

Contract No 3116, with Tri-State Painting Company for painting the Youngs Bay and Lewis and Clark River Bridges in Clatsop County, completed August 19, 1949.

Contract No. 3117, with Hillstrom Shipbuilding Co. for repairs on the McCullough Bridge in Coos County, completed August 23, 1949.

Contract No. 3125, with Warren Northwest, Inc. for oil mat surfacing on the Corvallis Albany Section of the Corvallis-East Side Highway in Linn County, completed August 19, 1949.

Contract No. 3127, with Archie R. Averill for constructing the Irrigation Ditch Bridge at Mile Post 14.08 on the Hermiston Highway in Umatilla County, completed August 22, 1949.

Contract No. 3129, with O. C Yocom Co. for grading and paving on the Amity Section of the Pacific Highway West and Bellevue-Hopewell Secondary Highway in Yamhill County, completed August 12, 1949.

Contract No. 3130, with Jed Wilson for furnishing crushed materials in stockpiles on the Necanicum Section of the Oregon Coast, Sunset and Necanicum Highways in Clatsop and Tillamook Counties, completed Aug. 23,1949.

Contract No. 3131, with D F McKenzie for oil mat surfacing on the Powell Butte-Prineville Section of the Ochoco Highway in Crook County, completed August 2, 1949.

Contract No. 3138, with Hall & Wols for painting the Yachats and Kernville Bridges in Lincoln County, completed August 17, 1949.

Contract No. 3141, with W. R. Grasle Company for installing road traffic signals on the S W Barbur Blvd. and S. W. Canyon Road in Multnomah County completed September 1? 1949

(Cont.)

EXHIBIT "G" (Cont.)

Contract No. 3144, with Newport Construction Co. and Russell Olson for reoiling on the Washington State Line-Sunnyside Section of the Sunnyside-Umapine Highway in Umatilla County, completed Aug. 15, 1949.

Contract No. 3146, with Warren Northwest, Inc. for reoiling on the Nashville-Blodgett and Brownsville-Sweet Home Sections of the Eddyville-Blodgett and Halsey-Sweet Home Highways in Benton, Lincoln and Linn Counties, completed August 16, 1949.

Contract No. 3152, with Newport Construction Co. and Russell Olson for reoiling Service Creek-Goose Rock Section of the John Day Highway in Grant and Wheeler Counties, completed August 8, 1949.

Contract No. 3155, with Parker-Schram Company for pavement resurfacing on the Sandy Boulevard (44th Ave. to 74th Ave.) Section of the Columbia River Highway in Multnomah County, completed August 19, 1949.

Contract No. 3156, with Cascade Construction Co. for pavement resurfacing on the S. W. 4th Avenue (Jefferson St.-Ash St.) Section of the Pacific Highway West in Multnomah County, completed August 31, 1949.

Contract No. 3162, with Werner & Jeske, Inc. for constructing the bridge in Sweet Home on the Sweet Home City Streets, completed Aug. 29, 1949.

Contract No. 3166, with Harr & Horton for reoiling on the Columbia County Line-Forest Grove Section of the Nehalem Highway in Washington County, completed August 31, 1949.

Contract No. 3175, with Babler Bros., for oil mat surfacing on "A" Street in the City of Redmond, completed August 31, 1949.

Contract No. 3191, with Oregon Asphalt Paving Company for constructing a seal coat on the Parkrose-Larch Mt. Road Section of the Columbia River Highway in Multnomah County, completed August 15, 1949.

Contract No. 3194, with T. J. Patzer for constructing a parking area on the Office Building-Supreme Court Building Section in Marion County, completed August 30, 1949.

Contract No. 3205, with United Contracting Co. for paving Levens Street Section of the Dallas City Streets in Polk County, completed September 7, 1949.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

EXHIBIT "H"

Minutes of September 19, 20 and 21, 1949

RESOLUTION REVISING REDUCED LOAD LIMITS ON THE

PAYETTE AND WEISER BRIDGES

WHEREAS, the Highway Commission made, adopted, and entered in its minutes and records as of May 2, 1949, a resolution by which a vehicle or combination of vehicles having a gross weight of vehicle and load or combination of vehicles and loads in excess of six tons was denied the right to enter or leave the State of Oregon over the Payette Bridge, or in excess of seven tons over the Weiser Bridge, which bridges span the Snake River, which river is an interstate stream; and

WHEREAS, said action was taken by the Oregon State Highway Commission in response to a request made by the duly authorized authorities of the State of Idaho and was taken for the protection and safety of members of the public having occasion to use either of said bridges; and

WHEREAS, since the adoption of said resolution each of said bridges has been repaired, re-enforced, and otherwise reconditioned to such extent that in the opinion of the proper authorities of the State of Idaho and in the opinion of the Oregon State Highway Engineer each of said bridges can now with due regard to safety to the general public, sustain, accommodate, and carry a vehicle and load or a combination of vehicles and loads which is not in excess of eleven tons; and

WHEREAS, for the purpose of cooperating with the authorities of the State of Idaho it is deemed to be in the interest of the public that said resolution which was adopted May 2, 1949, be amended as herein set forth.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THIS COMMISSION, all members being present and voting affirmatively as follows:

1. That Section 1 of said resolution which was adopted May 2, 1949, be and the same hereby is amended so as to read as follows: That no vehicle or combination of vehicles shall be permitted to enter or leave the State of Oregon over the Payette Bridge having a gross weight of vehicle and load, or combination of vehicles and loads, in excess of eleven tons.

2. That Section 2 of said resolution be amended to read as follows: That no vehicle or combination of vehicles shall be permitted to leave or enter the State of Oregon over the Weiser Bridge having a gross weight of vehicle and load, or combination of vehicles and loads, in excess of eleven tons.

3. That while the provisions of this resolution are in effect with respect to the limit of gross load hereby fixed for said respective bridges traffic shall be confined to one-way traffic. The State Highway

(Cont.)

EXHIBIT "H" (Cont.)

Engineer is hereby instructed to erect and maintain the necessary signs to make effective this rule and regulation.

4. That except as herein amended the said resolution of May 2, 1949, shall remain in full force and effect until rescinded or modified by this Commission.

5. That this resolution be entered in the minutes and records of the Commission as of the 21st day of September. 1949, and the Commission's Secretary hereby is instructed to deliver a true copy thereof to the following officials or persons: Superintendent of Oregon State Police, Secretary of Bureau of Highways of the State of Idaho, Secretary of the State of Oregon, Sheriff of Malheur County, and W. H. Lynch, Division Engineer, Bureau of Public Roads.

EXHIBIT "I"

Minutes of September 19, 20 and 21, 1949

RESOLUTION

WHEREAS, the Highway Commission found it necessary and desirable to relocate, and therefore did relocate, the section of the Athena-Holdman Secondary Highway No. 334 known as the Campbell Ranch-Gerking School Section in Umatilla County, the westerly terminus of which is at highway engineer's station 473+30 of the reconstructed line and the easterly terminus of which is at highway engineer's station 75+00 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, were eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes; and

WHEREAS, Umatilla County and the Highway Commission entered into an agreement under date of December 30, 1947, relating to the use, disposition and jurisdiction of the abandoned sections; and

WHEREAS, the contract for the construction of the relocated section of the Athena-Holdman Secondary Highway No. 334 was completed on July 19, 1949, and highway traffic is now being routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portions of the old right of way of said section of said highway, which by reason of said relocation are no longer within the boundaries of the new right of way, which for the purpose of this resolution are identified as Units "A" and "B" and are shown colored in red on map attached hereto and marked "Exhibit A", and are more particularly described as follows: *

Unit "A" Beginning opposite Sate Highway Engineer's Station 45+70 of the relocated Athena-Holdman Secondary Highway No. 334 in the Southeast quarter of the Southeast quarter of Section 16, Township 4 North, Range 34 East, W.M.; thence Easterly and Southerly via the former route of the Athena-Holdman Secondary Highway No. 334 to a point opposite State Highway Engineer's Station 59+00 in the Northwest quarter of the Northwest quarter of Section 22, Township 4 North, Range 34 East, W.M.

Unit "B" Beginning at State Highway Engineer's Station 58+80 of the relocated Athena-Holdman Secondary Highway No. 334 in the Northeast quarter of the Northeast quarter of Section 21, Township 4 North, Range 34 East, W.M.; thence Southerly and Easterly via the former route of the Athena-Holdman Secondary Highway to State Highway Engineer's Station 72+30 in the Southwest quarter of the Northwest quarter of Section 22, Township 4 North, Range 34 East, W. M.

shall hereafter, pursuant to said state-county agreement, be maintained by the County as county roads for the benefit and service of persons living thereon and

(Cont.)

EXHIBIT "I" (Cont.)

communities served thereby and for stock driveways. The Commission, for such purpose, hereby surrenders all jurisdiction thereover, and consents that jurisdiction over said roads may be assumed and exercised by the County Court of Umatilla County, and said roads shall thereafter be maintained by the County for public use. *

2. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement and maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. *

3. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Umatilla County a duly certified copy thereof, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in red on the map referred to above and marked "Exhibit A", and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes. *

FOOTNOTE: *

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 209, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "J"

Minutes of September 19, 20, and 21, 1949

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Rogue River Loop Secondary Highway No. 260 known as the Gunnell Road-Robertson Bridge Section in Josephine County, the westerly terminus of which is at Highway Engineer's Station 619+99 of the reconstructed line and the easterly terminus of which is at Highway Engineer's Station 485+63 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes; and

WHEREAS, Josephine County and the Highway Commission have entered into an agreement under date of October 8, 1947, relating to the use and jurisdiction of the abandoned sections; and

WHEREAS, the contract for the construction of this relocated section of the Rogue River Loop Secondary Highway No. 260 was completed on July 9, 1949, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portion of the old right of way, which by reason of the relocation of said highway is no longer within the boundaries of the new right of way, which for the purpose of this resolution is identified as Unit "D" and is shown colored in red on map attached hereto and marked "Exhibit A", and is more particularly described as follows:

Unit "D" Beginning opposite State Highway Engineer's Station 575+00 of the relocated Rogue River Loop Secondary Highway No. 260 in the Southwest quarter ($SW\frac{1}{4}$) of the South-

(Cont:)

EXHIBIT "J" (Cont.)

Unit "D" (Cont.)

east quarter (SE¼) of Section 25, Township 35 South, Range 7 West, W. M.; thence northerly and easterly via the former route of the Rogue River Loop Secondary Highway No. 260 to a point opposite State Highway Engineer's Station 598+10 in the Southwest quarter (SW¼) of the Southwest quarter (SW¼) of Section 25, Township 35 South, Range 7 West, W. M.

shall be hereafter maintained by the County as a county road for the benefit and service of persons living thereon and communities served thereby, for such purpose the Commission hereby surrenders all jurisdiction thereover, and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Josephine County, and said road, pursuant to said agreement between the State and the County, shall thereafter be maintained by the County for public use.

2. The sections of the old route of the Rogue River Loop Secondary Highway No. 260 which, for the purpose of this resolution, are identified as Units "A", "B", "C", and "E" and shown colored in brown on map attached hereto and marked "Exhibit A", and are more particularly described as follows: *

Unit "A" Beginning at State Highway Engineer's Station 487+50 of the relocated Rogue River Loop Secondary Highway in the Southwest quarter (SW¼) of the northwest quarter (NW¼) of Section 6, Township 36 South, Range 6 West, W. M.; thence northwesterly via the former route of the Rogue River Loop Secondary Highway to State Highway Engineer's Station 509+50 of the relocated Rogue River Loop Secondary Highway in the Northwest quarter (NW¼) of the Northeast quarter (NE¼) of Section 1, Township 36 South, Range 7 West, W. M.

Unit "B" Beginning at State Highway Engineer's Station 517+50 of the relocated Rogue River Loop Secondary Highway in the Northwest quarter (NW¼) of the Northeast quarter (NE¼) of Section 1, Township 36 South, Range 7 West, W. M.; thence northwesterly via the former route of the Rogue River Loop Secondary Highway to State Highway Engineer's Station 521+05 of the relocated Rogue River Loop Secondary Highway in the Northeast quarter (NE¼) of the Northwest quarter (NW¼) of Section 1, Township 36 South, Range 7 West, W. M.

Unit "C" Beginning at State Highway Engineer's Station 541+70 of the relocated Rogue River Loop Secondary Highway

(Cont.)

EXHIBIT "J" (Cont.)

Unit "C" (Cont.)

in the Northwest quarter (NW¼) of the Southeast quarter (SE¼) of Section 36, Township 35 South, Range 7 West, W. M.; thence northerly via the former route of the Rogue River Loop Secondary Highway to State Highway Engineer's Station 547+20 of the relocated Rogue River Loop Secondary Highway in the Northwest quarter (NW¼) of the Southeast quarter (SE¼) of Section 36, Township 35 South, Range 7 West, W. M.

Unit "E" Beginning opposite State Highway Engineer's Station 596+60 of the relocated Rogue River Loop Secondary Highway in the Northeast quarter (NE¼) of the Southwest quarter (SW¼) of Section 25, Township 35 South, Range 7 West, W. M.; thence westerly via the former route of the Rogue River Loop Secondary Highway to State Highway Engineer's Station 616+90 of the relocated Rogue River Loop Secondary Highway in the Northeast quarter (NE¼) of the Southeast quarter (SE¼) of Section 26, Township 35 South, Range 7 West, W. M.

shall be abandoned as a part or parts of said state highway and highway right of way, and hereafter shall be under the jurisdiction and control of the County, and may be vacated and thereby permitted to revert to the owners of the abutting property, or kept by the County for such public use as the County may determine. *

3. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. *

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the

(Cont.)

EXHIBIT "J" (Cont.)

County Court of Josephine County a duly certified copy thereof, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in red and brown on the map attached hereto and marked "Exhibit A". *

FOOTNOTE: *

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 210, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "K"

Minutes of September 19, 20, and 21, 1949

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate a section of the Oregon Coast Highway No. 9 in Douglas County; and

WHEREAS, by reason of the relocation of said section of said highway, a portion or unit of the right of way of the highway as originally located is eliminated and will no longer be needed for highway purposes for the service of people living thereon or communities served thereby; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the unit or section of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the relocated section of the Oregon Coast Highway No. 9 known as the Gardiner Section, which begins at Highway Engineer's Station 625+00 on the new route, and ends at Highway Engineer's Station 663+30 of the new route, was completed and made available for travel on June 30, 1949, and therefore the section of the old route herein defined and described as Unit "A" shall no longer be part of the route of the Oregon Coast Highway, but shall be eliminated therefrom.

2. The section of the old route of said highway, which is identified as Unit "A", and more particularly described as follows:

Unit "A" Beginning at State Highway Engineer's Station 649+40 of the relocated Oregon Coast Highway in the Northeast quarter ($NE\frac{1}{4}$) of the Southeast quarter ($SE\frac{1}{4}$) of Section 22, Township 21 South, Range 12 West, W. M.; thence northeasterly via the former route of the Oregon Coast Highway to State Highway Engineer's Station 655+20 of the relocated Oregon Coast Highway in the Northwest quarter ($NW\frac{1}{4}$) of the Southeast quarter ($SE\frac{1}{4}$) of Section 22, Township 21 South, Range 12 West, W. M.

shall be abandoned as part of said highway and highway right of way, and hereafter jurisdiction and control over said abandoned right of way may be exercised by the County and may be vacated or kept by the County for such public use as the County may determine.

3. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway, and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the

(Cont.)

EXHIBIT "K" (Cont.)

Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. *

4. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

5. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Douglas County a duly certified copy thereof, and said County Court is hereby respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned section of the said old right of way shown colored in brown on the map referred to above and marked "Exhibit A." *

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 211, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "L"

Minutes of September 19, 20, and 21, 1949

R E S O L U T I O N

WHEREAS, Section 115-351, O.C.L.A., as amended by Chapter 428, Oregon Laws 1941, authorizes and empowers the Highway Commission with respect to highways under its control to "designate main traveled or through highways by placing at the entrances thereto from intersecting highways signs or markers notifying drivers of vehicles to stop before entering or crossing such designated highways," and

WHEREAS, by appropriate resolution made, adopted, and entered in its minutes as of the twenty-seventh day of April, 1943, this Commission named and designated certain state highways as main or through highways, and thereafter this Commission made and adopted amendatory resolutions, by which amendatory resolutions this Commission provided for and designated additional state highways or sections of state highways as through highways, and

WHEREAS, since the adoption of such original resolution and the adoption of said amendatory resolutions it has been brought to the attention of the Commission, and the Commission now finds, that in addition to the highways or sections of highways named, defined, and designated in said original and said amendatory resolutions other and additional state highways or sections of state highways should be named, defined, and designated as through highways pursuant to said law,

NOW, THEREFORE, based upon facts submitted to and considered by this Commission, and based upon the recommendation of the Commission's Chief Highway Engineer, this Commission does hereby find, declare, resolve, and order as follows:

1. That the highways or sections of highways hereinafter named and defined, which highways or sections of highways are by law under the jurisdiction and control of the Highway Commission, shall be and the same hereby are, within the meaning and purpose of Section 115-351, O.C.L.A., as amended by Chapter 428, Oregon Laws 1941, designated and declared to be main or through highways. Said highways and sections of highways are:

Road No. 6 - Weiser Spur of Old Oregon Trail - US30N

(Between MP 402.462 on Road No. 6, Old Oregon Trail, US30, at Weiser Junction, and MP 404.452, at Idaho State Line.)

Road No. 6 - Payette Spur of Old Oregon Trail - ORE90

(Between MP 410.437 on Road No. 6, Old Oregon Trail, US30, and MP 412.107, at Idaho State Line.)

Road No. 6 - Ontario Spur of Old Oregon Trail - US30

(Between MP 417.764 at Old Oregon Trail, US30 and US28, in Ontario, and MP 419.133 at Idaho State Line.)

(Cont.)

EXHIBIT "L" (Cont.)

Road No. 11 - Enterprise-Lewiston Highway - ORE3

(Between MP 00.00, Washington State Line, and MP 44.040 at Road No. 10, Wallowa Lake Highway, ORE82, in Enterprise.)

Road No. 12 - Baker-Homestead Highway - ORE86

(Between MP 00.00 at Road No. 6, Old Oregon Trail, US30, in Baker, and MP 81.06, at Idaho State Line.)

Exception: Traffic from the east (Robinette) shall stop upon entering the junction of Road No. 55, Halfway Highway, ORE86, with Road No. 12, Baker-Homestead Highway, ORE86.

Road No. 13 - Baker-Unity Highway - ORE7

(Between MP 00.00 at Road No. 5, John Day Highway, US28, near Unity, and MP 46.41 at Road No. 6, the Old Oregon Trail, US30, in Baker.)

Road No. 14 - Crooked River Highway - ORE27

(Between MP 00.00 at Road No. 41, Ochoco Highway, US28, in Prineville, and MP 42.48 at Road No. 7, Central Oregon Highway, US20.)

Road No. 23 - Dairy-Bonanza Highway - ORE70

(Between MP 00.00 at Road No. 20, Klamath Falls-Lakeview Highway, ORE66, and MP 6.97 at (Central Street) Bonanza, end of highway.)

Road No. 26 - Mt. Hood Loop Highway - ORE35

(Superseding action of April 27, 1943, traffic from the east on the Mt. Hood Loop Highway (ORE35) shall stop at its junction with Road No. 44, Wapinitia Highway, ORE50.)

Road No. 27 - Alsea Highway - ORE34

(Between MP 00.00 at Road No. 9, Oregon Coast Highway, US101, in Waldport, and MP 59.11 at Road No. 33, Corvallis-Newport Highway, US20.)

Road No. 28 - Pendleton-John Day Highway - US395

(Between MP 23.71 at Road No. 52, Heppner Highway, ORE74, at Nye Junction, and MP 115.52, Road No. 401, Beech Creek Highway, US395.)

Road No. 47 - Sunset Highway - ORE2

(Between MP 47.51 at Manning and MP 70.91 at Road No. 29, Tualatin Valley Highway, ORE6.)

Exception: At MP 70.91, the intersection of Road No. 29, Tualatin Valley Highway, ORE6, being a traffic interchange, the free flow of traffic on both highways is permitted.

(Cont.)

EXHIBIT "L" (Cont.)

Road No. 48 - John Day-Burns Highway - US395

(Between MP 00.00 at Road No. 5, John Day Highway, US28, in John Day, and MP 68.11 at Road No. 7, Central Oregon Highway, US20.)

Road No. 49 - Lakeview-Burns Highway - US395

(Between MP 00.00 at Road No. 7, Central Oregon Highway, US20, and MP 90.1 at Road No. 19, Fremont Highway, ORE31, at Valley Falls.)

Road No. 51 - West Portland-Hubbard Highway

(Between MP 00.00 at Road No. 1W, Pacific Highway West, US99W, and MP 17.156 at Road No. 1E, Pacific Highway East, US99E.)

Exceptions: That traffic moving from Road No. 51, West Portland-Hubbard Highway, northerly onto Road No. 1W, Pacific Highway West, US99W, may do so without stopping.

Traffic on Road No. 51, West Portland-Hubbard Highway, shall stop for Highway Planning Survey Road No. 1270 in Washington County, until such time as Road No. 51, West Portland-Hubbard Highway, is completed to through traffic.

Traffic entering Road No. 51, West Portland-Hubbard Highway, eastbound on Highway Planning Survey Road No. 533 in Marion County, shall do so without stopping until such time as Road No. 51, West Portland-Hubbard Highway, is completed to through traffic.

Road No. 53 - Warm Springs Highway - ORE50
(This will take effect at such time as this road is opened to through traffic in its entirety.)

(Between MP 00.00 at Road No. 44, Wapinitia Highway, ORE50 and 52, and MP 46.43 at Road No. 4, The Dalles-California Highway, US97, in Madras.)

Exception: Traffic on Road No. 44, Wapinitia Highway, ORE50 and 52, shall stop for Road No. 53, Warm Springs Highway, ORE50, except that traffic moving from east to west (Maupin-Government Camp) and that traffic moving from north to south (Government Camp-Warm Springs).

Road No. 55 - Halfway Highway - ORE86

(Between MP 00.00 at Road No. 12, Baker-Homestead Highway, ORE86, and MP 11.15 at Road No. 414, Pine Creek Highway, and Road No. 413, Halfway-Cornucopia Highway, in Halfway.)

Exception: Traffic on Road No. 55, Halfway Highway, ORE86, shall not stop as it enters Road No. 12, Baker-Homestead Highway, ORE86.

(Cont.)

EXHIBIT "L" (Cont.)

Road No. 103 - Fishhawk Falls Highway (Traveled Route)

(Between MP 00.00 at Road No. 102, Nehalem Highway, ORE201, in Jewell, and MP 9.00 at Road No. 47, the Wolf Creek Highway, ORE2, near Elsie.)

Road No. 104 - Fort Stevens Highway

(Between MP 00.00 at Fort Stevens and MP 4.53, Road No. 9, Oregon Coast Highway, US101, south of Warrenton, at Skipanon Junction.)

Road No. 105 - Warrenton Highway

(Between MP 00.00 at Road No. 104, Fort Stevens Highway, in Warrenton, and MP 1.62 at Road No. 9, Oregon Coast Highway, US101, in Warrenton.)

Road No. 110 - Mist-Clatskanie Highway - ORE47

(Between MP 00.00 at Road No. 2, Columbia River Highway, US30, west of Clatskanie, and MP 11.90 at Road No. 102, Nehalem Highway, ORE201, at Mist.)

Road No. 122 - Vancouver Avenue

(Between MP 00.00 at North Columbia Boulevard in the City of Portland, and MP 0.50 at Road No. 1E, Pacific Highway East, US99E, Northeast Union Avenue extended.)

Road No. 124 - Sun Dial Highway

(Between MP 00.00 at Road No. 2, Columbia River Highway, US30, near Troutdale, and MP 1.25, at end of road.)

Road No. 125 - Crown Point Highway

(Between MP 00.00 at Road No. 2, Columbia River Highway, US30, in Troutdale, and MP 23.98 at Road No. 2, Columbia River Highway, US30, in Dodson.)

Road No. 130 - Little Nestucca Highway

(Between MP 00.00 at Road No. 9, Oregon Coast Highway, US101, near Oretown, and MP 9.4 at Road No. 32, Three Rivers Highway, ORE14, in Dolph.)

Road No. 131 - Netarts Highway

(Between MP 00.00 at Road No. 9, Oregon Coast Highway, US101, in Tillamook, and MP 9.15 at end of highway, in Oceanside.)

Road No. 140 - Hillsboro-Silverton Highway - ORE219 and 242

(Between MP 00.00 at Road No. 29, Tualatin Valley Highway, ORE6, in Hillsboro, and MP 39.64, Road No. 1E, Pacific Highway East, US99E, in Woodburn.)

EXHIBIT "L" (Cont.)

Road No. 140 - Hillsboro-Silverton Highway - ORE219 and 242 (Cont.)

Exceptions: Traffic on Road No. 140, Hillsboro-Silverton Highway, ORE219, shall stop for Road No. 1W, Pacific Highway West, US99W, in Newberg.

Southbound traffic on Road No. 140, Hillsboro-Silverton Highway, ORE219, shall stop at its intersection with Road No. 143, Scholls Highway, ORE210.

Road No. 141 - Beaverton-Aurora Highway - ORE217

(Between MP 4.92, Road No. 1W, Pacific Highway West, US99W, near Tigard, and MP 20.81 at Road No. 1E, Pacific Highway East, US99E, in Aurora.)

Exception: Traffic southbound on Road No. 141, Beaverton-Aurora Highway, ORE217, shall stop before entering its intersection with First Street in Tualatin.

Road No. 143, Scholls Highway - ORE210

(Between MP 00.00 at Road No. 140, Hillsboro-Silverton Highway, ORE219, and MP 12.40 at Road No. 40, Beaverton-Hillsdale Highway, ORE10.)

Exception: Traffic on Road No. 143, Scholls Highway, ORE210, shall stop as it intersects Road No. 141, Beaverton-Aurora Highway, ORE217.

Road No. 151 - Yamhill-Newberg Highway - ORE240

(Between MP 00.00 at Road No. 29, Tualatin Valley Highway, ORE47, in Yamhill, and MP 11.65, Road No. 1W, Pacific Highway West, US99W, in Newberg.)

Road No. 152 - Three Mile Lane Highway - ORE233

(Between MP 00.00 at Road No. 1W, Pacific Highway West, US99W, in McMinnville, and MP 8.40, Road No. 1W, Pacific Highway West, US99W, at Dayton Junction.)

Exceptions: Traffic northbound on Road No. 152, Three Mile Lane Highway, shall stop at its junction with Road No. 155, Amity-Dayton Highway, ORE233.

Traffic northbound on Road No. 152, Three Mile Lane Highway (Irvine Street in McMinnville), shall stop before entering its intersection with Third Street in McMinnville.

Traffic moving from Dayton to Portland on Road No. 152, Three Mile Lane Highway, ORE233, shall not stop as it enters Road No. 1W, Pacific Highway West, US99W, north of Dayton.

Road No. 153 - Bellevue-Hopewell Highway

(Between MP 00.00 at Road No. 39, Salmon River Highway, ORE18, in Bellevue, and MP 14.95 at Road No. 150, Salem-Dayton Highway, ORE221, in Hopewell.)

(Cont.)

EXHIBIT "L" (Cont.)

Road No. 153 - Bellevue-Hopewell Highway (Cont.)

Exception: Traffic on Road No. 153, Bellevue-Hopewell Highway, shall stop for Road No. 1W, Pacific Highway West, US99W, in Amity.

Traffic eastbound from Amity on Road No. 153, Bellevue-Hopewell Highway, shall stop before entering the intersection of the junction of Road No. 154, Lafayette Highway.

Road No. 154 - Lafayette Highway

(Between MP 00.00 at Road No. 152, Three Mile Lane Highway, ORE233, and MP 5.75 at Road No. 153, Bellevue-Hopewell Highway.)

Exception: Traffic southbound on Road No. 154, Lafayette Highway, shall not stop at its intersection with Road No. 153, Bellevue-Hopewell Highway.

Road No. 155 - Amity-Dayton Highway - ORE233

(Between MP 00.00 at Road No. 1W, Pacific Highway West, US99W, near Amity, and MP 7.03 at Road No. 152, Three Mile Lane Highway, ORE233.)

Exception: Traffic on Road No. 155, Amity-Dayton Highway, ORE233, shall not stop as it intersects Road No. 152, Three Mile Lane Highway, ORE233.

Road No. 156 - McMinnville Highway

(Between MP 00.00 at Road No. 1W, Pacific Highway West, US99W, near St. Joseph Junction, and MP 1.80 at Road No. 152, Three Mile Lane Highway, spur connection at Third Street in McMinnville.)

Road No. 163 - Silver Creek Falls Highway - ORE214

Exception: All traffic entering the intersection of Road No. 163, Silver Creek Falls Highway, ORE214, and Road No. 162, North Santiam Highway, ORE222, from the east (from Shaw) shall stop.

Road No. 164 - Jefferson Highway

(Between MP 00.00 at Road No. 1E, Pacific Highway East, US99E, at North Jefferson Junction, and MP 8.23 at Road No. 1E, Pacific Highway East, US99E, at South Jefferson Junction.)

Road No. 172 - Eagle Creek-Sandy Highway - ORE211

(Between MP 00.00 at Road No. 171, Clackamas Highway, and MP 5.96, Road No. 26, Mt. Hood Highway, ORE50, in Sandy.)

Exception: All traffic on Road No. 172, Eagle Creek-Sandy Highway, ORE211, shall stop at Main Street in Sandy.

(Cont.)

EXHIBIT "L" Cont.)

Road No. 180 - Eddyville-Blodgett Highway

(Between MP 00.00 at Road No. 33, Corvallis-Newport Highway, US20, west of Eddyville, and MP 19.29 at Road No. 33, Corvallis-Newport Highway, US20, in Blodgett.)

Road No. 181 - Siletz Highway - ORE229

(Between MP 00.00 at Road No. 9, Oregon Coast Highway, US101, at Kernville, and MP 31.73 at Road No. 33, Corvallis-Newport Highway, US20, near Toledo.)

Road No. 182 - Otter Rock Highway

(Between MP 00.00 at Road No. 9, Oregon Coast Highway, US101, at Otter Rock, and MP 0.45 at end of road in Otter Rock State Park.)

Road No. 194 - Monmouth Highway

(Between MP 00.00 at Road No. 191, Kings Valley Highway, ORE223, near Little Luckiamute River, and MP 7.20 at Road No. 1W, Pacific Highway West, US99W, in Monmouth.)

Road No. 200 - Territorial Highway

(Between MP 00.00 at Road No. 1W, Pacific Highway West, US99W, in Monroe, and MP 47.45 at Road No. 1, Pacific Highway, US99, near Anlauf.)

Exceptions: All traffic entering Road No. 34, Siuslaw Highway, ORE36, shall stop at both points of intersection, namely, MP 8.66 and 10.12 on Road No. 200, Territorial Highway.

Southbound traffic on Road No. 200, Territorial Highway, shall stop at its intersection with Road No. 220, Richardson-Eugene Highway, in Elmira.

Road No. 201 - Alsea-Deadwood Highway - North Section

(Between MP 00.00 at Road No. 27, Alsea Highway, ORE34, in Alsea, and MP 7.30, at end of road.)

Road No. 201 - Alsea-Deadwood Highway - South Section

(Between MP 00.00 at Road No. 34, Siuslaw Highway, ORE36, and MP 19.96, at end of road, near Paris.)

Road No. 202 - Tampico-Lewisville Highway

(Between MP 00.00 at Road No. 1W, Pacific Highway West, US99W, and MP 5.46, at end of road at Benton-Polk County Line.)

Road No. 212 - Halsey-Sweet Home Highway - ORE228

(Between MP 00.00 at Road No. 1E, Pacific Highway East, US99E, in Halsey, and MP 21.51 at Road No. 16, Santiam Highway, US20, in Sweet Home.)

Road No. 214 - Albany Airport Highway

(Between MP 00.00 at Road No. 1E, Pacific Highway East, US99E, and MP 1.07 at Road No. 16, Santiam Highway, US20.)

(Cont.)

EXHIBIT "L" (Cont.)

Road No. 221 - Fox Hollow Highway

(Between MP 00.00 at Road No. 1, Pacific Highway, US99, in Eugene, and MP 15.50 at Road No. 1, Pacific Highway, US99, near Walker.)

Road No. 222 - Springfield-Creswell Highway

(Between MP 00.00 at Road No. 15, McKenzie Highway, US28, east of Springfield, and MP 18.89 at Road No. 1, Pacific Highway, US99, at Creswell.)

Exception: All traffic entering Road No. 18, Willamette Highway, ORE58, shall stop at both points of intersection, namely, MP 8.30 and 11.38 on Road No. 222, Springfield-Creswell Highway.

Road No. 230 - Tiller-Trail Highway - ORE227

(Between MP 00.00 at Road No. 1, Pacific Highway, US99, in Canyonville, and MP 49.59 at Road No. 22, Crater Lake Highway, ORE62, in Trail.)

Road No. 231 - Elkton-Sutherlin Highway - ORE225

(Between MP 00.00 at Road No. 45, Umpqua Highway, ORE38, near Elkton, and MP 28.30 at Road No. 1, Pacific Highway, US99, south of Sutherlin. This action also includes the north connection between the Elkton-Sutherlin Highway, ORE225, and the Pacific Highway, US99.)

Exception: Traffic westbound on the north connection shall stop before entering Road No. 231, Elkton-Sutherlin Highway, ORE225.

Road No. 232 - Crater Lake-North Highway - ORE230 and 209

(Between MP 0.90 at beginning of road near Diamond Lake and MP 5.25, north boundary of Crater Lake National Park.)

Exception: Southbound traffic from Diamond Lake on Road No. 232, Crater Lake-North Highway, ORE209, shall stop at MP 0.36 at Road No. 233, West Diamond Lake Highway, ORE230, and northbound traffic from Crater Lake on Road No. 232, Crater Lake-North Highway, ORE209, shall stop at MP 3.81 as it intersects Road No. 425, East Diamond Lake Highway, ORE230.

Road No. 233 - West Diamond Lake Highway - ORE230

(Between MP 00.00 at Road No. 22, Crater Lake Highway, ORE62, and MP 23.89 at Road No. 232, Crater Lake-North Highway, ORE209.)

Exception: Eastbound traffic (Union Creek-Crater Lake) on Road No. 233, West Diamond Lake Highway, ORE230, shall not stop at MP 23.89 when it intersects Road No. 232, Crater Lake-North Highway, ORE209.

Road No. 241 - Coos River Highway

(Between MP 00.00 at Road No. 9, Oregon Coast Highway, US101, south of Coos Bay, and MP 18.86, northwest of Allegany, at end of road.)

(Cont.)

EXHIBIT "L" (Cont.)

Road No. 242 - Powers Highway

(Between MP 00.00 at Road No. 35, Coos Bay-Roseburg Highway, ORE42, and MP 18.62 at end of highway in Powers.)

Road No. 243 - Empire-Coos Bay Highway

(Between MP 00.00 at Road No. 240, Cape Arago Highway, and MP 3.55 at Road No. 9, Oregon Coast Highway, US101, in Coos Bay.)

Road No. 250 - Cape Blanco Highway

(Between MP 00.00 at Road No. 9, Oregon Coast Highway, US101, south of Sixes, and MP 5.54 at end of road at Cape Blanco Lighthouse grounds.)

Road No. 251 - Port Orford Highway

(Between MP 00.00 at Road No. 9, Oregon Coast Highway, US101, in Port Orford, and MP 0.79 at end of road at fence line of U. S. Coast Guard property.)

Road No. 260 - Rogue River Loop Highway

(Between MP 00.00 at Road No. 1, Pacific Highway, US99, in Grants Pass, and MP 22.93 at Road No. 25, Redwood Highway, US199, at Wilderville.)

Road No. 261 - Williams Highway - ORE238

(Between MP 00.00 at Road No. 25, Redwood Highway, US199, south of Grants Pass, and MP 23.13 at end of road, south of Williams.)

Exception: Southbound traffic on Road No. 261, Williams Highway, ORE238, shall stop at its intersection with Road No. 272, Medford-Provolt Highway, ORE238, in Provolt.

Road No. 270 - Little Butte Highway

(Between MP 00.00 at Road No. 22, Crater Lake Highway, ORE62, near Eagle Point, and MP 30.33 at end of road, Jackson-Klamath County Line.)

Road No. 271 - Sams Valley Highway - ORE234

(Between MP 00.00 at Road No. 1, Pacific Highway, US99, in Gold Hill, and MP 17.25 at Road No. 22, Crater Lake Highway, ORE62.)

Road No. 272 - Medford-Provolt Highway - ORE238

(Between MP 00.00 at Road No. 261, Williams Highway, ORE238, in Provolt, and MP 25.42 at Road No. 1, Pacific Highway, US99, in Medford.)

Exception: Traffic on Road No. 272, Medford-Provolt Highway, ORE238, shall stop as it intersects Road No. 261, Williams Highway, ORE238.

Road No. 273 - Siskiyou Highway

(Between MP 00.00 at Road No. 21, Green Springs Highway, ORE66, and MP 7.61 at Road No. 1, Pacific Highway, US99, at Siskiyou.)

(Cont.)

EXHIBIT "L" (Cont.)

Road No. 282 - Odell Highway

(Between MP 00.00 at Road No. 281, Hood River Highway, and MP 3.51 at Road No. 26, Mt. Hood Loop Highway, ORE35.)

Road No. 290 - Sherars Bridge - ORE216

(Between MP 00.00 at Road No. 4, The Dalles-California Highway, ORE23, north of Tygh Valley, and MP 28.63 at Road No. 42, Sherman Highway, US97, in Grass Valley.)

Road No. 291 - Shaniko-Fossil Highway - ORE218

(Between MP 00.00 at Road No. 42, Sherman Highway, US97, in Shaniko, and MP 43.65 at Road No. 5, John Day Highway, ORE19, in Fossil.)

Road No. 300 - Wasco-Heppner Highway - ORE206 and 207

(Between MP 00.00 at Road No. 42, Sherman Highway, US97, in Wasco, and MP 90.81 at Road No. 52, Heppner Highway, ORE74, in Heppner.)

Exception: Traffic on Road No. 300, Wasco-Heppner Highway, ORE206, shall stop for Road No. 5, John Day Highway, ORE19, in Condon.

Road No. 301 - Fulton Canyon-Wasco Highway

(Between MP 00.00 at Road No. 2, Columbia River Highway, US30, near Sherman, and MP 1.28 at end of highway.)

Road No. 320 - Lexington-Echo Highway - ORE207

(Between MP 00.00 at Road No. 52, Heppner Highway, ORE74, in Lexington, and MP 39.53 at Road No. 6, Old Oregon Trail, US30, east of Echo.)

Exceptions: Traffic on Road No. 320, Lexington-Echo Highway, from Echo, shall stop at MP 27.28 at junction of Road No. 333, Hermiston Highway, ORE207.

Traffic on Road No. 320, Lexington-Echo Highway, shall stop for Road No. 337, Stanfield-Pendleton Highway, in Echo.

Road No. 321 - Heppner-Spray Highway - ORE207

(Between MP 00.00 at Road No. 300, Wasco-Heppner Highway, ORE206 and 207, and MP 41.20 at Road No. 5, John Day Highway, ORE19, east of Spray)

Road No. 330 - Weston-Elgin Highway - ORE204

(Between MP 00.00 at Road No. 8, Oregon-Washington Highway, ORE11, in Weston, and MP 41.39 at Road No. 10, Wallowa Lake Highway, ORE82, in Elgin.)

Road No. 333 - Hermiston Highway - ORE207

(Between MP 00.00 at Road No. 2, Columbia River Highway, US730, west of Cold Springs, and MP 17.92, at Road No. 320, Lexington-Echo Highway, ORE207.)

(Cont.)

EXHIBIT "L" (Cont.)

Road No. 333 - Hermiston Highway - ORE207 (Cont.)

Exception: Traffic on Road No. 333, Hermiston Highway, ORE207, shall stop for Road No. 6, Old Oregon Trail, in Hermiston, and Road No. 54, Boardman-Stanfield Highway, US30, but shall not stop for Road No. 320, Lexington-Echo Highway, ORE207.

Road No. 334 - Athena-Holdman Highway

(Between MP 00.00 at Road No. 36, Pendleton-Cold Springs Highway, US395, and MP 17.60 at Road No. 8, Oregon-Washington Highway, ORE11, in Athena.)

Road No. 335 - Havana-Helix Highway

(Between MP 00.00 at the beginning of road in Helix, and MP 8.96 at intersection of county road to Adams.)

Exceptions: Traffic on Road No. 335, Havana-Helix Highway, southbound, shall stop at its junction with Road No. 334, Athena-Holdman Highway, at MP 2.50.

Traffic on Road No. 335, Havana-Helix Highway, northbound, shall stop at its junction with Road No. 334, Athena-Holdman Highway, at MP 3.66.

Road No. 336 - Pendleton Airport Highway

(Between MP 00.00 at beginning of road and MP 1.80 at end of road at Pendleton Airport boundary.)

Exception: Traffic on Road No. 336, Pendleton Airport Highway, shall stop for Road No. 6, Old Oregon Trail, US30.

Road No. 338 - Ordnance Depot Highway

(Between MP 00.00 at Road No. 54, Boardman-Stanfield Highway, US30, in Ordnance, and MP 0.41 at end of road in Umatilla Ordnance Depot.)

Road No. 339 - Freewater Highway

(Between MP 00.00 at Washington-Oregon State Line and MP 5.26 at Road No. 8, Oregon-Washington Highway, ORE11, in Milton.)

Road No. 340 - Medical Springs Highway - ORE203

(Between MP 00.00 at Road No. 6, Old Oregon Trail, US30, in Union, and MP 42.67 at Road No. 12, Baker-Homestead Highway, ORE86, north of Baker.)

Road No. 341 - Starkey Highway

(Between MP 00.00 at Road No. 6, Old Oregon Trail, US30, and MP 17.00 at end of highway in Starkey.)

Road No. 342 - Cove Highway

(Between MP 00.00 at Road No. 10, Wallowa Lake Highway, ORE82, and MP 22.16, Road No. 6, Old Oregon Trail, US30, in Union.)

Road No. 350 - Little Sheep Creek Highway

(Between MP 00.00 at Road No. 10, Wallowa Lake Highway, ORE82, in Joseph, and MP 30.42 at end of road in Imnaha.)

(Cont.)

EXHIBIT "L" (Cont.)

Road No. 351 - Joseph-Wallowa Lake Highway - ORE82

(Between MP 00.00 at Road No. 10, Wallowa Lake Highway, ORE82, in Joseph, and MP 6.32 at end of road, near Wallowa Lodge.)

Exception: Traffic on Road No. 351, Joseph-Wallowa Lake Highway, ORE82, need not stop at its intersection with Road No. 10, Wallowa Lake Highway, ORE82, in Joseph, these being a continuation one of the other.

Road No. 360 - Madras-Prineville Highway - ORE27

(Between MP 00.00 at Road No. 4, The Dalles-California Highway, US97, and MP 26.81 at Road No. 41, Ochoco Highway, US28, in Prineville.)

Road No. 361 - Culver Highway

(Between MP 00.00 at Road No. 4, The Dalles-California Highway, US97, and MP 11.64 at Road No. 4, The Dalles-California Highway, US97.)

Road No. 370 - O'Neil Highway

(Between MP 00.00 at Road No. 4, The Dalles-California Highway, US97, and MP 17.81 at Road No. 41, Ochoco Highway, US28.)

Road No. 371 - Powell Butte Highway

(Between MP 00.00 at Road No. 41, Ochoco Highway, US28, near Powell Butte, and MP 17.92 at Road No. 7, Central Oregon Highway, US20.)

Road No. 372 - Century Drive Highway

(Between MP 00.00 at Road No. 4, The Dalles-California Highway, US97, in Bend, and MP 11.65 at end of road.)

Road No. 373 - Cline Falls Highway

(Between MP 00.00 at Road No. 15, McKenzie Highway, US28, west of Deschutes River bridge, and MP 10.06 at Road No. 17, McKenzie-Bend Highway, US20, at Tumalo.)

Road No. 374 - Tumalo-Deschutes Highway

(Between MP 00.00 at Road No. 373, Cline Falls Highway, north of Tumalo, and MP 3.85 at Road No. 4, The Dalles-California Highway, US97, west of Deschutes.)

Exception: Traffic on Road No. 374, Tumalo-Deschutes Highway, shall stop upon entering Road No. 375, Redmond-Bend Highway.

Road No. 380 - Paulina Highway

(Between MP 00.00 at Road No. 41, Ochoco Highway, US28, east of Prineville, and MP 56.16 at end of road at Paulina Post Office.)

Road No. 390 - Service Creek-Mitchell Highway - ORE207

(Between MP 00.00 at Road No. 5, John Day Highway, ORE19, at Service Creek, and MP 24.85 at Road No. 41, Ochoco Highway, US28, in Mitchell.)

Road No. 401 - Beech Creek Highway - US395

(Between MP 00.00 at Road No. 5, John Day Highway, US28, and MP 5.35 at Road No. 28, Pendleton-John Day Highway, US395.)

(Cont.)

EXHIBIT "L" (Cont.)

Road No. 401 - Beech Creek Highway - US395 (Cont.)

Exception: Traffic on Road No. 401, Beech Creek Highway, US395, shall not stop at its intersection with Road No. 28, Pendleton-John Day Highway, US395.

Road No. 402 - Kimberly-Long Creek Highway

(Between MP 00.00 at Road No. 5, John Day Highway, ORE19, at Kimberly, and MP 35.85 at Road No. 28, Pendleton-John Day Highway, US395, at Long Creek.)

Road No. 410 - Sumpter Valley Highway - ORE220

(Between MP 00.00 at Road No. 13, Baker-Unity Highway, ORE7, at Salisbury, and MP 22.81 at Whitman National Forest Boundary, west of Sumpter.)

Road No. 411 - Haines-Anthony Highway

(Between MP 00.00 at Road No. 6, Old Oregon Trail, US30, in Haines, and MP 12.60 at end of road at Whitman National Forest boundary.)

Road No. 413 - Halfway-Cornucopia Highway

(Between MP 00.00 at Road No. 55, Halfway Highway, ORE86, in Halfway, and MP 11.52 at end of road in Cornucopia.)

Exception: Traffic on Road No. 413, Halfway-Cornucopia Highway, need not stop at its intersection with Road No. 55, Halfway Highway, ORE86, in Halfway, these being a continuation one of the other.

Road No. 414 - Pine Creek Highway

(Between MP 00.00 at Road No. 55, Halfway Highway, ORE86, in Halfway, and MP 3.72 at end of road.)

Road No. 420 - Midland Highway

(Between MP 00.00 at Road No. 20, Klamath Falls-Lakeview Highway, ORE66, east of Klamath Falls, and MP 5.79 at Road No. 4, The Dalles-California Highway, US97, near Midland.)

Road No. 421 - Klamath Lake Highway

(Between MP 00.00 at Road No. 22, Crater Lake Highway, ORE62, at Fort Klamath, and MP 50.21 at Road No. 4, The Dalles-California Highway, in Klamath Falls.)

Road No. 422 - Chiloquin Highway

(Between MP 00.00 at Road No. 427, Klamath Agency-Modoc Point Highway, near Klamath Agency, and MP 9.58 at Road No. 427, Klamath Agency - Modoc Point Highway.)

Exception: Traffic on Road No. 422, Chiloquin Highway, shall stop before entering its junction with Road No. 4, The Dalles-California Highway, US97, at MP 0.16 and 7.35 on Road No. 422, Chiloquin Highway.

EXHIBIT "L" (Cont.)

Road No. 423 - Lower Klamath Highway

(Between MP 00.00 at Road No. 4, The Dalles-California Highway, US97, south of Midland, and MP 7.55 at Road No. 50, Klamath Falls-Malin Highway, ORE39, near Stukel.)

Road No. 424 - Sand Creek Highway - ORE232

(Between MP 00.00 at Crater Lake National Park boundary, and MP 4.23 at Road No. 428, Sun Mt. Highway, ORE232.)

Road No. 425 - East Diamond Lake Highway - ORE230

(Between MP 00.00 at Road No. 232, Crater Lake-North Highway, ORE209, and MP 14.72 at Road No. 4, The Dalles-California Highway, US97.)

Road No. 428 - Sun Mt. Highway - ORE232

(Between MP 00.00 at Road No. 4, The Dalles-California Highway, US97, and MP 26.98 at Road No. 22, Crater Lake Highway, ORE62, at Fort Klamath.)

Road No. 431 - Warner Highway

(Between MP 00.00 at Road No. 19, Fremont Highway, US395, north of Lakeview, and MP 46.21 at end of highway at Plush.)

Road No. 440 - Frenchglen Highway - ORE205

(Between MP 00.00 at Road No. 24, Burns-Crane Highway, ORE78, east of Burns, and MP 62.00 at Frenchglen Post Office.)

Road No. 441 - Diamond Valley Highway

(Between MP 00.00 at Road No. 24, Burns-Crane Highway, ORE78, in Crane, and MP 36.18 at end of highway in Diamond.)

Exception: Traffic northbound on Road No. 441, Diamond Valley Highway, shall stop before entering Road No. 442, Rome-Princeton Highway, at MP 11.15.

Road No. 442 - Rome-Princeton Highway

(Between MP 00.00 at Road No. 441, Diamond Valley Highway, near Princeton, and MP 61.71 at Road No. 456, I.O.N. Highway, US95.)

Exception: Traffic on Road No. 442, Rome-Princeton Highway, shall not stop at its intersection with Road No. 441, Diamond Valley Highway.

Road No. 450 - Nyssa-Adrian Highway - ORE201

(Between MP 00.00 at Road No. 6, Old Oregon Trail, US20, in Nyssa, and MP 22.90 at end of road at Oregon-Idaho State Line. This action supersedes the resolution passed April 27, 1943.)

Exception: Northbound traffic on Road No. 450, Nyssa-Adrian Highway, ORE201, shall stop before entering the intersection of Road No. 452, Adrian-Parma Highway, at MP 12.75.

EXHIBIT "L" (Cont.)

Road No. 451 - Vale-West Highway

(Between MP 00.00 at Road No. 7, Central Orego Highway, US20, and MP 10.72 at Road No. 7, Central Oregon Highway, US20, in Vale.)

Road No. 452 - Adrian-Parma Highway

(Between MP 00.00 near Adrian, at Road No. 450, Nyssa-Adrian Highway, ORE201, and MP 2.77 at end of road at Oregon-Idaho State Line.)

Exception: Traffic on Road No. 452, Adrian-Parma Highway, shall not stop at its intersection with Road No. 450, Nyssa-Adrian Highway, ORE201.

Road No. 453 - Adrian-Arena Valley Highway

(Between MP 00.00 at Road No. 454, Adrian-Caldwell Highway, and MP 3.19 at end of road at Oregon-Idaho State Line.)

Exception: Traffic westbound on Road No. 453, Adrian-Arena Valley Highway, shall stop at its intersection with Road No. 454, Adrian-Caldwell Highway.

Road No. 454 - Adrian-Caldwell Highway

(Between MP 00.00 at Road No. 452, Adrian-Parma Highway, and MP 4.40 at end of road at Oregon-Idaho State Line.)

Exception: Traffic eastbound on Road No. 454, Adrian-Caldwell Highway, shall stop at its intersection with Road No. 453, Adrian-Arena Valley Highway.

Road No. 456 - I. O. N. Highway - US95

(Between MP 00.00 at Idaho State Line and MP 117.87 at Nevada State Line.)

Road No. 458 - Jordan Valley Highway - US95

(Between MP 00.00 at Road No. 456, I.O.N. Highway, US95, and MP 10.43 at Road No. 456, I.O.N. Highway, US95.)

Exception: Traffic on Road No. 458, Jordan Valley Highway, US95, shall not stop as it intersects Road No. 456, I.O.N. Highway, US95.

2. That there is attached hereto and by this reference made a part hereof a map or print marked "Exhibit A", on which map or print there is shown colored in red all of the highways or sections of highways enumerated, named, and defined in this resolution as main or through-traveled highways. *

3. That the State Highway Engineer be and he hereby is instructed to place or cause to be placed and thereafter maintained along the above enumerated highways or sections of highways at all points where streets or roads intersect or enter said highways or sections of highways, except at such points as are specifically noted in the foregoing list of designated highways, signs or markers notifying drivers of vehicles to stop before entering or crossing said highways.

(Cont.)

EXHIBIT "L" (Cont.)

4. That said Engineer be and he hereby is instructed to place such signs and markers as nearly as practicable at the place or places where said cross or intersecting roads or streets meet a prolongation of the nearest property line abutting upon such through highways, and such signs or markers so placed or installed shall indicate or designate to all drivers of motor vehicles entering said highways from any of said cross or intersecting roads or streets the place where the stop shall be made.

5. Said signs or markers shall conform in shape, design, size and other physical characteristics to the specifications and standards heretofore approved for such signs and markers and which have heretofore been adopted and are again here ratified.

6. That the highways named, defined, and designated above, together with the highways or sections of highways named and designated in said original resolution and said amendatory resolutions, shall constitute and hereby are declared to be main traveled or through highways.

7. That this resolution shall be entered in the minutes and records of the Commission as of the 21st day of September 1949, and the Secretary hereby is instructed to deliver to the Superintendent of State Police, to the sheriff of each county in which any of said roads or sections of said roads are located, and to the Bureau of Public Roads duly certified copies of this resolution.

FOOTNOTE: *

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 13 under the heading "Through Highways" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "M"

Minutes of September 19, 20, and 21, 1949

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completed described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Beaverton-Hillsdale Highway Highway No. 40 Route No. Ore-10

Location of Termini	Estab. Speed
M.P. 2.55 (S. W. 50th Ave.) to M.P. 4.15 (West Slope Road)	40 miles per hour

---

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

EXHIBIT "N"

Minutes of September 19, 20 and 21, 1949

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A. as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Junction City-Eugene Secondary Highway Highway No. 223

Route No. - - -

Location of Termini			Established Speed
M.P. 9.65 (Azalea Drive)	to M.P.	9.97 (Edgewood Road, Santa Clara)	30 miles per hour

---

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled. This order vacates and annuls the previous order made by this Commission on May 15, 1947, insofar as it pertains to the section of highway described herein.

EXHIBIT "O"

Minutes of September 19, 20, and 21, 1949

RESOLUTION

WHEREAS, the records with respect to funds available for highway construction disclose and establish that there was and is available for such purposes including acquisition of rights of way during the period 1950-1951, the sum of $23,500,000, and

WHEREAS, the Commission, meeting in regular session on the 18th day of May, 1949, provided for and made the following general allocations:

1. For specific projects in the several divisions into which the State has been divided, the sum of $16,267,000.

2. For the acquisition of rights of way for the Sullivan Gulch route, the sum of $2,750,000, and

WHEREAS, the balance or remainder of said $23,500,000, to-wit: the sum of $4,483,000 was by order of the Commission set aside as a reserve fund to be held subject to allocation and distribution by the Commission as and when such distribution and allocation seemed to be in the best interests of the State, and

WHEREAS, it was then and is now the purpose and decision of the Commission to set aside from said reserve fund the sum of $3,306,000 for Federal aid projects, and the sum of $1,177,000 for State projects, and

WHEREAS, the Commission now meeting in regular session on this the 21st day of September, 1949, has, after due and careful consideration, found and declared that allocations and distributions of said reserve fund should be made and that said allocations and distributions should be as herein pro[illegible],

NOW, THEREFORE, be it and it hereby is by this Commission ordered and resolved as follows:

1. The sum of $2,115,000 of said unallocated revenues hereby is distributed and allocated to and among the several divisions in the following sums and for the following uses and purposes:

Division	Construction	Rights of Way	Total
2	$ 150,000	$ - - -	$ 150,000
3	1,055,000	- - -	1,055,000
4	150,000	- - -	150,000
5	750,000	10,000	760,000
	$ 2,105,000	$ 10,000	$2,115,000

(Cont.)

EXHIBIT "O" (Cont.)

The particular projects on which the foregoing sums are to be expended are shown in more detail on Exhibit "A" which is hereto attached and by this reference made a part hereof.

2. The sum of $779,000 hereby is set aside, distributed and allocated for use and employment on future betterment projects in the following amounts and for the following purposes:

Division	Construction	Rights of Way	Total
1	$ 132,000	$ 2,000	$ 134,000
2	69,000	1,000	70,000
3	20,000	- - -	20,000
4	265,000	- - -	265,000
5	290,000	- - -	290,000
	$ 776,000	$ 3,000	$ 779,000

The particular projects and the respective amounts which shall control the foregoing allocations are shown in detail on Exhibit "B" attached hereto and by this reference made a part hereof.

3. There hereby is reserved and held for future allocations and distributions the sum of $1,191,000, which, when employed and allocated, shall be for Federal Aid projects, and the sum of $452,500, which, when allocated and employed, shall be for State major betterment projects. Said sums and allocations, when made, shall be made in harmony with and pursuant to the projects and amounts set out in Exhibit "C" attached hereto.

4. The resolution made and entered in the Commission minutes of May 18, 1949, is hereby amended in the following particulars and items:

(a) The allocation of $210,000 for the project designated as the section of the Old Oregon Trail lying between Ontario and Nyssa in Malheur County, hereby is cancelled.

(b) There hereby is allocated to a project on the Old Oregon Trail in Malheur County, known as the Ontario-Cairo Section of said highway, the sum of $70,000, which said project shall consist of the widening and the placing thereon of an asphaltic concrete surfacing covering a distance in length of 3.5 miles.

5. The allocation previously made covering the Pumping Plant Hill-Ontario Section of the Old Oregon Trail, beginning at Mile Post 408 and extending to Ontario in Malheur County, hereby is increased from the sum of $180,000 to $230,000.

(Cont.)

EXHIBIT "O" (Cont.)

6. The allocation and distribution made in said original resolution for the Willow Creek-Boardman Section of the Columbia River Highway in Morrow County, hereby is increased from $575,000 to $665,000, which appropriation and allocation shall include $75,000 to be used for the acquisition of rights of way for said project.

7. Except as amended by this resolution, the said original resolution shall remain in full force and effect.

8. This resolution shall be entered in the minutes and records of the Commission as of September 21, 1949.

Minutes of September 19, 20, and 21, 1949

RESOLUTION

WHEREAS, the Commission has been petitioned by persons living on and along the Cape Arago Secondary Highway to construct a footpath within the right of way limits of said highway in the vicinity of Empire; and

WHEREAS, the Chief Engineer has estimated the cost incident to the construction of said footpath to be $3,000 and has recommended the construction of said footpath; and

WHEREAS, after and as a result of due consideration of all of the circumstances, including the character and volume of vehicular traffic which uses said highway and the number of pedestrians, including school children and adults who find it necessary to travel said highway, the Commission does hereby find and declare that the construction of a footpath within the right of way of the Cape Arago Secondary Highway in the vicinity of Empire is necessary, is in public interest, and will contribute to the safety of pedestrians, the motoring public, and to persons using said highway.

NOW, THEREFORE, be it and it hereby is resolved by the Commission, all members being present and affirmatively voting as follows:

1. That the Engineer shall be, and he hereby is instructed to prepare the necessary plans and specifications for and cause to be constructed with the State's own forces a footpath within the right of way of the Cape Arago Secondary Highway in the vicinity of Empire.

2. Said footpath shall have a width of four feet, shall begin at M.P. 4.54, which is the south city limits of Empire, and end at M.P. 5.30, which is Kellogg Boulevard.

3. The cost of said footpath shall be paid out of 1949 Capital Outlay Reserve Funds.

4. This resolution shall be entered in the minutes and records of the Commission as of September 21, 1949.

EXHIBIT "Q"

Minutes of September 19, 20, and 21, 1949

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following:

1. That section or portion of US Highway Route No. 20, State Highway No. 7, also known as Central Oregon Highway, which section begins at the west city limits of Hines at mile post 128.85, and runs thence westerly a distance of 1.25 miles to mile post 127.60, shall be and hereby is declared to be a speed zone within which the maximum speed at which motor vehicles may operate is forty miles per hour.

2. That section or part of US Route No. 99, State Highway No. 1-E, also known as the Pacific Highway East, which section begins at the south city limits of Gladstone at mile post 11.08, and extends thence southerly to the north city limits of Oregon City at mile post 11.65, covering a distance of 0.57 mile, shall

(Cont.)

be and hereby is declared to be a speed zone within which the maximum speed at which motor vehicles may operate is forty miles per hour.

3. That portion or section of US Route 101, State Highway No. 9, also known as the Oregon Coast Highway, and which section begins at the south city limits of North Bend at mile post 254.24, and extends thence southeasterly to the north city limits of Coos Bay at mile post 254.49, a distance of 0.25 mile, shall be and hereby is declared to be a speed zone within which the maximum speed at which motor vehicles may operate is forty-five miles per hour.

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speeds on said state highways.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

Portland, Oregon
November 7, 1949

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben. R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Ass't. State Highway Engineer
W. W. Stiffler, 2nd Ass't. State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction, were opened and read aloud by the Secretary in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room.

CLATSOP COUNTY

Arch Cape Tunnel Lighting. State Project. Install lighting system in existing Arch Cape Tunnel on Oregon Coast Highway near Canon Beach

Brunell Bros., Coos Bay	$ 1,990.00
Andrew Stambuck, Coos Bay	2,004.00
Harbell Marine Co., Portland	2,200.00
Carl J. Egenhoff & Larnie M. Allen, Portland	2,320.00

The Commission by unanimous vote approved the minutes of the Commission meetings held on August 19, 1949, and on September 19, 20 and 21, 1949.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

1. Lease of a portion of Champoeg State Park to Henry Zorn: The Parks Superintendent recommended that Mr. Zorn be allowed the use of this property in 1950, at the same rental rate and under the same conditions that he has used it for the past several years. The Commission approved the recommendation.

2. Operating procedure at Vista House on the Upper Columbia River Highway (Old Route): The Parks Superintendent reported a request from Mr. Jack Flaucher, concessionaire, that he be allowed to close the Vista House during the months of January, February and March, 1950, because of the small amount of patronage that he anticipates during such period. It was the Commission's considered opinion that the Vista House should not be closed and it was so ordered. However, the Parks Superintendent was instructed to make a day-by-day check on the number of people who stop at this place, and the daily volume of traffic, so that such information will be available to the Commission if and when the matter again comes up for discussion. The Parks Superintendent also advised that Mr. Flaucher requests the privilege of dispensing ice cream, "hot dogs", popcorn, etc., in connection with his concession, which privilege he does not now enjoy. The Commission unanimously approved the sale of such commodities, under the strict condition, however, that Mr. Flaucher will keep the premises clean and in a condition satisfactory to the state.

3. Offer of Pacific Borax Company to deed property in Curry County for ocean waysides purposes: The Parks Superintendent advised that the Pacific Borax Company is willing to donate to the state for park purposes a large acreage of its property which has two miles of ocean frontage, on the condition that the Company retain rights to all the borax that might be located on the property, and have the privilege of mining the same and transporting it to a shipping point, and provided further that the state will take over and assume an unexpired lease, permitting the grazing of sheep on the premises. The Company also reserves the right to remove certain buildings now located on the property and wants to know when the

Highway Commission intends to build the proposed highway through this property. As a result of discussion, the Commission unanimously approved acceptance of the deed with the restrictions mentioned, and authorized the Parks Superintendent to transmit such information to the Company. He was also instructed to inform the Company that the Highway Commission has no idea when the new highway will be constructed.

The Right of Way Engineer, Mr. Forrest Cooper, reported briefly on the acquisition of other properties needed for this proposed park. He was instructed to submit a written report on the subject containing full information.

4. Proposed addition to Bald Peak State Park, Washington County: The Parks Superintendent exhibited a map showing the thirty-acre tract which has been proposed as an addition to this park. He reported that the owner is demanding $19,800 for the property, which, in his estimation, is entirely too high. He requested authority to continue negotiations because he needs additional land to develop the area so the public can use it, the present park being on a steep hillside and not conducive to proper development. The Commission approved the request.

5. Overnight camping in Wallowa Lake, Silver Falls and Sunset Bay State Parks: The Parks Superintendent requested instructions regarding the granting of overnight camping privileges in these three state parks. Action thereon was deferred by the Commission until its next meeting when the 1950 budget is discussed.

6. Acquisition of additional property for park purposes at Tillamook Head, Clatsop County: The Parks Superintendent advised that the federal government owns the remaining property that is needed to fill out the present park, and that he filed an application several years ago to acquire it but the matter was never concluded because of wartime conditions and the fact that the government needed the property in connection with radar station activities. These activities, he said, have now been discontinued and the government is vacating the premises, in view of which he requested authority to renew the application. The Commission approved the request.

7. Proposed textboards at Willamette Stone State Park, just west of Portland, and at Battle Rock State Park, Port Orford, Curry County: The State Highway Engineer reported on this subject. He advised that Willamette Stone State Park contains the original starting point of all land surveys in Oregon, and is located at the intersection of the Willamette Meridian and Base Line, a short distance west of the City of Portland. Access to the park, he said, is provided by a trail leading from Skyline Boulevard and it is proposed to erect the textboard at the point where the trail leaves the Boulevard. He recommended approval of the textboard bearing the following inscription, as prepared by the Memorials Committee of the Oregon Historical Society:

WILLAMETTE STONE

THIS TRAIL LEADS TO THE WILLAMETTE STONE, THE SURVEYORS' MONUMENT AT THE INTERSECTION OF THE WILLAMETTE BASE LINE AND THE WILLAMETTE MERIDIAN. ALL THE LANDS OF OREGON WERE SECTIONIZED FROM THESE GUIDE LINES. THE MARK WAS ESTABLISHED ON JUNE 4, 1851, BY JOHN R. PRESTON, FIRST SURVEYOR GENERAL OF OREGON. THE ESTABLISHMENT OF THIS STONE WAS THE START OF THE SECTIONIZING OF THE PUBLIC DOMAIN ON THE NORTH PACIFIC COAST AND THE MONUMENT IS OF PARTICULAR INTEREST TO ALL SURVEYORS AND ABSTRACTORS. ITS GEOGRAPHIC POSITION IS: 45° 31' 10"831 IN LATITUDE AND 122° 44' 33"551 IN LONGITUDE.

He also recommended erection of a textboard at Battle Rock State Park bearing the following inscription, which, he said, was also prepared by the Memorials Committee of the Oregon Historical Society:

BATTLE ROCK STATE PARK

BATTLE ROCK STATE PARK HAS BEEN DEDICATED TO THOSE EXPLORERS AND PIONEERS WHO PREPARED THE WAY FOR THE SETTLEMENT OF THE SOUTHERN OREGON COAST. CAPTAIN GEORGE VANCOUVER SIGHTED AND DETERMINED THE LATITUDE OF CAPE BLANCO ON APRIL 24, 1792, NAMING IT CAPE ORFORD. THE ROADSTEAD WAS CHARTED IN 1850 BY WILLIAM P. McARTHUR, COMMANDER OF THE U. S. COAST SURVEY VESSEL EWING, WHO CALLED IT EWING HARBOR BUT THE NAME PORT ORFORD HAS PERSISTED. CAPTAIN WILLIAM TICHENOR OF THE SHIP SEAGULL LANDED NINE MEN ON JUNE 9, 1851 FOR THE PURPOSE OF ESTABLISHING A SETTLEMENT. THE NEXT DAY THEY WERE ATTACKED BY INDIANS AND BESIEGED ON THE ISLAND NOW CALLED BATTLE ROCK AFTER REPULSING THE INDIANS IN SEVERAL ASSAULTS THE PARTY ESCAPED TO THE UMPQUA SETTLEMENT. ON JULY 4, 1851 CAPTAIN TICHENOR AGAIN ARRIVED WITH A WELL-ARMED PARTY OF SIXTY-SEVEN MEN AND ESTABLISHED A BLOCKHOUSE AND THE SETTLEMENT OF WHICH HE BECAME A PERMANENT RESIDENT AFTER HIS RETIREMENT FROM THE SEA.

He estimated the cost of each textboard at $200 The Commission unanimously approved the expenditure for the two textboards.

8. Construction of an electric power line to serve Collier State Park: The Parks Superintendent reported an amended offer from Mr. William Lorenz, Chiloquin, to contribute an additional amount toward the cost of constructing a powerline to serve this park and his property, which lies immediately north of the park. The Superintendent recalled Mr. Lorenz' previous offer to contribute $3,000 toward the total estimated expense of $6,000, on the condition that the state would contribute a like sum, which offer the Commission turned down. Mr. Lorenz now advises that Mr. Alfred D. Collier, Klamath Falls, one of the donors of the park, has stated a willingness to contribute $1,000 toward the expense, and Mr. Lorenz will raise his contribution to $3,000, which would leave a balance of $1,200 to be paid by the state. The Parks Superintendent recommended acceptance of this offer The Commission unanimously authorized the expenditure of such sum.

9. Request of Oregon State Aeronautics Commission for a landing strip on wayside property adjacent to the new Columbia River Highway: The Parks Superintendent advised that the site of the proposed landing strip is along the Troutdale-Dodson Section, approximately opposite the town of Talbot, east of Rooster Rock, and that they want a strip 100 feet wide and about 2,000 feet long. He recommended that the request be denied. The Engineer concurred in the recommendation. The Commission ordered that the Aeronautics Commission be informed that the highway development in the Columbia Gorge has not, as yet, been completed, and in view thereof, the Commission is not in a position at this time to say what it can or cannot do with respect to the designation of an aircraft landing strip at this location.

The Commission discussed the matter of deeding to the Port of Portland three parcels of land, originally acquired as right of way for the Columbia Airport access road. The Right of Way Engineer recalled that this matter was previously considered by the Commission at its meeting on August 1 and 2, 1949, but action was deferred until the Port of Portland was ready to construct a proposed extension to its aircraft landing field, which will take in the access road. He advised that the Port is now ready to construct such extension but cannot secure a federal grant to help finance the work until it can show that it owns the land. The State Highway Engineer advised that the property is of no value for state purposes In view of this information the Commission unanimously approved deeding the property to the Port of Portland. (The deed was signed on the following day.)

The Engineer brought up for discussion the matter of purchasing from from the State Game Commission a 160-acre tract of land near Humbug Mountain State Park, Curry County, across which it is proposed to construct a highway at some future time. He recalled that the Game Commission advertised this property for sale and the high bid received for it was $9,580, whereas the value of the property as appraised by the Game Commission is $11,000. He recommended purchase of the property at $11,000 because part of it will be used as right of way for the highway and the balance can be used as an addition to the Park. Purchase of the property at this time, he said, is recommended in order to avoid paying an excessive amount later on should the property come into private ownership. The matter was discussed at some length, and as a result the Commission referred the matter to the Chief Counsel with full power to act for the Commission after consulting with the representative of the State Game Commission, who was scheduled to appear before the Commission the next day concerning the matter. The Chief Counsel was instructed to negotiate the purchase of the property at as low a figure as possible, but in no event to offer a sum in excess of $11,000. (Mr. B. W. Schnieder, Assistant State Game Director, appeared before the Commission on the following day and advised that the Game Commission will sell the property to the Highway Commission for $11,000, but they must have an answer within a reasonable length of time. He was informed that the Commission would decide the matter as soon as possible. The Commission thereupon referred it to the Engineer and Chief Counsel for further handling.)

The Right of Way Engineer presented for the Commission's consideration a list of options for real property acquisitions. After careful consideration of each item in the list, the Commission approved the options and authorized the acquisition of the properties on the basis thereof. The attached resolution relative thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein, was thereupon adopted by the Commission by unanimous vote.

In connection with its consideration of real property matters, the Commission also discussed the following:

1. Purchase of a radio station site on Mt. Scott, Portland, from Frances R. Symons, Right of Way File No. 15667. The Commission decided not to purchase this property because of the conditions imposed by Mrs. Symons in the option agreement, and ordered that a search for another site be instituted.

2. Purchase of right of way and a hauling road easement for the Fishhawk Falls-Ranger Station Section of the Fishhawk Falls Secondary Highway. The Right of Way Engineer presented two separate options, one being from Mr. C. C. Shaw, File No. 9959, for right of way and the hauling road easement, amounting to $250, and the other being an option secured from Irvie Edwin Cardiff, File No. 15787, for right of way only, totaling $775. As a result of considerable discussion of this matter, in which it was pointed out that a survey for this highway has not as yet been conducted, the Commission decided not to approve the settlement as presented, but ordered renegotiations with the owners for the hauling road only.

3. Purchase of right of way from Lenora L. Jack Kennard, for the Quinton-Ramsey Section of the Columbia River Highway, Right of Way File No. 8942. This transaction involves purchase of 9.55 acres of land including a service station with living quarters, garage, two houses, twenty-five shade trees, and a waterpipe system, for the sum of $8,500, and payment of an additional amount of $4,825 to the lessee of the property, and $360 for fencing, making a grand total of $13,685. In the discussion of this matter it was pointed out that the settlement provides for granting the owner commercial access on the south side of the highway at a certain location, if the owner desires such access. The Commission refused to approve this settlement because of the access feature, and referred the matter back to the Chief Counsel to renegotiate on the basis of acquiring all of the owner's access rights.

4. Acquisition of Maintenance Headquarters Site from John W. McConnell, Fossil, Right of Way File No. 15662. This option provides for the purchase of 1.67 acres for $1,500. In the discussion of this matter it developed that the Commission has not yet approved the construction of the building on the site. The Commission disapproved the purchase of the property until it has authorized the construction of the building, and ordered that hereafter no settlement be presented to the Commission for sites of this kind until the Commission has authorized construction of the building. As to the particular site under discussion, the Commission ordered that further investigations be made to ascertain whether or not a suitable location can be found that would be less costly.

The meeting adjourned for luncheon at 12:00 noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Right of Way Engineer reported the results of taking bids in Salem on October 31 for the purchase of some residence buildings at "Adair Village," adjacent to the Pacific Highway West, north of Corvallis, as follows:

Item No.	Item	Bidder	Amount Bid
1.	Building Group "A"	Hilmer E. Carlson, Adair Village	$ 571.00
		John Jayne, Corvallis	251.50
2.	Building "B"	John Jayne, Corvallis	21.50
		Hilmer E. Carlson, Adair Village	11.00

He recommended acceptance of the bid of Mr. Carlson for Item No. 1, Building Group "A", and that of Mr. Jayne for Item No. 2, Building "B", for $571 and $21.50, respectively. The Engineer and Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously, subject to the condition that the purchasers will re-establish the buildings on sites satisfactory to the Highway Department, and that the State Highway Department shall be under no obligation to construct an approach road, or roads, to the buildings in their new locations.

The Right of Way Engineer reported the status of the sale of a building and lot adjacent to the Coaledo Section of the Oregon Coast Highway, Coos County. He advised that bids for the purchase of this building and lot were received by the Commission on September 12, and the Commission accepted Mr. Tymich's offer of $1515, the highest bid received for this property. Mr. Tymich, he said, is unable to pay cash in an amount more than $1,000, which already has been remitted, and is asking six months' time to pay the balance at the rate of $85 per month. He recommended approval of the arrangement. The Engineer and Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously. (A contract of sale was executed by the Commission the following day.)

The Right of Way Engineer requested authority to grant permits for the use of excess state highway property during the calendar year 1950. The Commission approved the request unanimously, subject to the same conditions under which such authority has been granted in the past.

The Commission had under discussion the matter of granting an easement to C. F. and Lula F. Williamson, for access to a service road on the Berger Ranch-Barnes Road Section of the Sunset Highway. The Engineer reported that the state acquired right of way from the Williamsons, and when the negotiations were carried on restriction of access was also acquired. At that time, he said, it was intended to change the location of Barnes Road, which, in the vicinity of the Williamson's property, is on the northerly side and parallel to the Sunset Highway, the plan being to change this road to the southerly side of the Highway along the northerly line of the Williamson's

property. The Williamsons would then have access to Barnes Road. Such change was never effected; however, in lieu thereof, he said, a service road for the Williamson's use was constructed to a connection with what is known as the Butner County Road. Mr. Williamson is now subdividing his remaining property and wants the records to show that he has entry to the highway by use of the service road connection. The Engineer recommended approval of the request. The Commission approved the recommendation. (An easement covering the matter was signed by the Commission the following day.)

The Chief Counsel presented a request from Mr. Taggart, Attorney for the Idaho Power Company, for the vacation of an unnamed street or road situate along the southerly boundary of a stockpile site owned by the Highway Department in Section 28, T 17 S, R 47 E, W M, Malheur County. He advised that the Power Company is enlarging its facilities, and in connection therewith needs this old roadway, which is of no value to the Highway Department because access to the stockpile site is available from the highway. He recommended that the Commission join in the vacation proceedings. The Engineer concurred in the recommendation. The Commission approved the recommendation unanimously. (A form of "Consent to Vacate" was signed by the Commission on the following day.)

The Commission discussed and upon recommendation of the Chief Counsel and the Engineer, approved a settlement effected by the U. S. Army Engineers with Mr. Earl E. Evans for damage to federal and state property at Tillamook Head Radar Station, Clatsop County. By this settlement, Mr. Evans pays $250 as settlement in full for the damage, of which amount the Federal Government has recommended that the State accept as its pro-rata share the sum of $78.70 for the removal of five spruce trees, containing about 19,500 FBM. (A "Release Agreement" covering the matter was signed by the Commission on the following day.)

The Engineer reported on the request presented by Mr. Wm. Tugman, Eugene, at the previous meeting, that the state make available to the City of Eugene for park purposes a small tract of state-owned land adjacent to US99 near Judkins Point, which property the city wishes to landscape and develop as a viewpoint. The Engineer advised that the property in question lies outside the normal right of way width and that it was acquired from the City of Eugene several years ago without cost. He further stated that it does not appear that this property will be of any use to the state for many years to come, in view of which he recommended that it be made available to the City of Eugene on a revocable easement basis, on which basis the city may make use of the property until such time as it is needed for highway purposes. The Chief Counsel joined in the recommendation. The Commission approved the recommendation unanimously.

A letter was presented from Mr Louis E. Starr, Attorney at Law, Portland, in behalf of Holbrook School District No. 38, requesting permission to perform certain landscape work and to clear the channel of a small creek on the right of way of the lower Columbia River Highway, near the intersection of Cornelius Pass County Road, where the school district has just purchased a site for a new schoolhouse. The Engineer exhibited a map showing the location, and advised that the development contemplated by the school district will in no way interfere with the state highway, in fact, landscaping work will improve the appearance of the highway. He recommended that the request be granted on

the condition that the school district will execute a written agreement with the Commission covering the matter. The Commission approved the recommendation and instructed the Chief Counsel to prepare an appropriate form of agreement.

The Commission discussed a request from Mr. Frank Hamlin, Riddle, Oregon, for permission to construct a dam on state-owned property along Canyon Creek, adjacent to the Pacific Highway, about 1½ miles south of Canyonville, Douglas County. The Engineer advised that Mr. Hamlin now maintains a dam in Canyon Creek, which is in a bad state of repair, and wants to rebuild it in a new location about 600 feet upstream on property owned by the state The existing dam, he said, will be partially covered by embankment when the new highway is constructed through this section. He also said that the proposed dam will be on state property, but it will not interfere in any way with the construction or maintenance of the new highway. He exhibited a map showing the location of the new highway, the proposed dam, and the existing highway, and advised that Mr. Hamlin will construct the new dam at his own cost and expense. He gave as his opinion that if Mr. Hamlin repairs the existing dam, the state probably will be obligated to make additional repairs when the new highway is built, because of its being partially covered by the proposed highway embankment. He recommended that Mr Hamlin be given permission to build the dam at his own expense, at the new location. In the discussion of this matter, the question arose of how much would it cost the state to purchase Mr. Hamlin's entire interests so as to eliminate necessity for the dam at either location. The matter was referred back to the Engineer and Chief Counsel to ascertain such information

The Commission considered and upon recommendation of the Engineer, approved the request of the U. S. Army for the cancellation of its lease of state-owned property on Tillamook Head, Clatsop County, which property the Army used for military purposes during the war-time period. (A form of release was signed by the Commission on the following day.)

The Chief Counsel reported the results of appraisals made by three professional appraisers of the 2.7 acre tract of land situate between the Warm Springs Highway and the Deschutes River, near Warm Springs Agency, which the Commission is considering purchasing from the owners. Homer and Audrey Paxton. He advised that one of the appraisers set a value of $5,400; another appraised it at $3,500; and third put a value of $7,500 on the property, whereas the owners have demanded $10,000. He recommended an offer of $7,500, and if the owners will not accept it, that he be authorized to institute condemnation proceedings to acquire it. The Commission considered that $7,500 is too much to pay for the property and authorized the Chief Counsel to offer a maximum of $3,500 for it, and to condemn the property if the owner will not accept such sum. He was instructed to defer the condemnation proceedings until he has consulted further with the owners.

The Chief Counsel reported a compromise settlement of the condemnation case of the State vs. Chester Schmidt, et al, concerning right of way of the Johns-Glendale Junction Section of US99 in Douglas County. He advised that this case was started before the war, and that possession of the right of way was taken before the case was settled, and the highway is now built.

The original offer for the property, he said, was $1,800, which the owner refused, and since then the owner has incurred considerable expense and damages. The proposed settlement, he said, amounts to $2,800, plus $200 attorney's fees, or a total of $3,000. He recommended approval of the payment of such sum. The Commission approved the recommendation.

The Commission discussed with the Engineer the bids received at the morning session, for highway construction, and at 3:00 p.m. Chairman Banfield publicly announced the Commission's decision, as follows, with respect to each project, the action of the Commission being by unanimous vote:

"Construction of a lighting system in Arch Cape Tunnel on the Oregon Coast Highway, near Cannon Beach, Clatsop County; the Commission received five bids for this project, and has awarded the contract to the low bidder, W. R. Grasle Company, Portland, at its bid price of $13,934.

"Bandon-Brush Creek Rock Production Project on the Oregon Coast Highway, Curry County; the Commission received four bids for this project, that of F. H. McEwen, Eugene, being low, at $54,795. The contract has been awarded to Mr. McEwen at his bid price.

"Koepke Slough-Sawyers Ferry Road Rock Production Project on the Umpqua Highway, Douglas County; the contract for this work has been awarded to Umpqua River Navigation Company, Reedsport, at its bid price of $44,100. The Commission received one higher bid for this project.

"Construction of metal guard rail on the Soda Gulch-Keene Creek Section of the Green Springs Highway, Jackson County, the Commission received ten bids for this job, the low one being that of D. & R. Construction Co., Beaverton, at $13,800. The Commission has awarded the contract to this company at its bid price.

"8.9 miles of surfacing on the Cougar Creek-Preacher Creek Section of the Alsea-Deadwood Secondary Highway, Lane County; the Commission has awarded this contract to L. R. Kauffman, Waldport, low bidder, at his bid price of $26,800. There were two higher bids received.

"Construction of a bridge over Little Luckiamute River, and approaches thereto, on the Kings Valley Secondary Highway, Polk County; J. C. Compton Co., McMinnville, submitted the low bid for this work, at $48,750. There were nine higher bids. The Commission has awarded the contract to J. C. Compton Company at its bid price.

"Regrading, surfacing and oiling on the Sherars Bridge Secondary Highway, Sherman County; the low bid for this work was submitted by Edwin C. Gerber, Oregon City, at $171,291.50. There were fifteen higher bids. The Commission has accepted the offer of Edwin C. Gerber, and has awarded the contract to him at his bid price.

"Grading, surfacing and oiling on the Wamic-Tygh Valley Section of the Wamic-County Road and Dufur-Maupin Section of The Dalles-California Highway, Wasco County; the Commission received 15 bids for this work, the

low one being that of Vernie Jarl, Gresham, at $139,327. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Vernie Jarl, at his bid price when certain conditions have been satisfied.

"Furnishing ferry service at the Enegren Ferry Crossing of Coos River, on the Coos River Secondary Highway, Coos County; the low bidder for this project was Brunell Bros., Coos Bay, at $1,990 per month. There were three higher bids. The Commission has awarded the contract to the low bidder, Brunell Bros., at their bid price."

The Right of Way Engineer presented a claim from Mr. A. C. Baumback, housemover, for additional work at Gold Beach, totaling $213.00. He advised that the original deal with Mr. Baumback called for moving the building owned by a Mr. Huntley, to an adjacent lot, in connection with which it would have cost the state $500 for back-filling. In lieu thereof the building was sold and was moved about one quarter of a mile to another location where no fill was required. In order to make this move, it was necessary for Mr. Baumback to transport his housemoving dollies from the town of Sandy to Gold Beach at a cost of $300, of which amount he is asking the state to pay $150. In addition thereto, Mr. Baumback is asking reimbursement in the amount of $28 to satisfy the rental of the building which was closed for a short time during the moving operations, and he is also asking reimbursement in the sum of $35 which represents an advance to Mr. Collier H. Buffington, Gold Beach, in order to secure his release from further obligations. He pointed out that by paying Mr. Baumback the sum of $213 the state would realize a saving of $287 which it would have had to pay for the back-fill work at the Huntley building. He recommended the settlement. The Commission approved the recommendation unanimously.

The Right of Way Engineer also recommended and the Commission unanimously approved the following settlements:

1. Sale of the Harriet M. Lockwood building on the Dodson-Bonneville Section to contractor Peter Kiewit Sons, for $400.

2. Sale of a building formerly owned by William F. Layton, Jr., Coos Bay, for $275.

3. Excess property on the Agate Beach-Newport Section of the Oregon Coast Highway, being a part of the old Spruce Railroad right of way, to Yaquina Radio, Inc., for $250.

4. Sale of linoleum and a stove salvaged from Nemic Auto Court on the Canyonville-Johns Section of the Pacific Highway, to T. E. Bond for $30.

5. Adjustment of claim in connection with purchase of Nemic Auto Court because of shortage of a number of items purchased in connection therewith, $10

6. Sale to Kenneth Naylor for $95, t ilding formerly owned by a Mr. Stevens, on the Canyonville-Johns Section of the Pacific Highway, Douglas County.

7. Pipe salvaged from the property purchased from Mr. L. V. Carnes on the Canyonville-Johns Section of the Pacific Highway, sold to Canyonville Realty Company for $25.

8. Sale of plumbing fixtures salvaged from the building purchased from Mr. Stevens on the Canyonville-Johns Section of the Pacific Highway to L. V. Carnes for $50.

(Bargain and Sale Deed conveying the excess property on the Agate Beach-Newport Section to Yaquina Radio, Inc., was signed by the Commission the following day.)

The Commission discussed a joint report from the Engineer and Chief Counsel covering investigations with respect to the suggestion of Mr. William Tugman, Eugene, that the State Highway Department join with the Bonneville authorities to clear up the status of right of way at the junction of the Willamette Highway and the Pacific Highway, near Goshen, so as to protect the highway against commercial development and to eliminate hazards that would be created if the properties were allowed to come into private ownership. According to the report, investigations were made and a conference was held in Salem with representatives of the Bonneville Power Administration, and the following tentative arrangement was effected, involving the acquisition of five small parcels of land: Bonneville Power Administration to acquire two parcels, designated as numbers 1 and 2 on the map accompanying the report, the state to acquire three parcels, designated as numbers 3, 4, and 5 on the map, with access rights. The Engineer recommended that the arrangement be approved and that the Chief Counsel be authorized to negotiate purchase of the properties on the basis of the written report, in order to curb private use and enterprise on such property, and to avoid hazards that would be created if the properties were acquired and developed privately. The Commission approved the recommendation unanimously.

The Chief Counsel reported a request from Mr. and Mrs. J. H. Balzhiser, Eugene, for permission to make three curb cuts along Franklin Boulevard, route of the Pacific Highway in Eugene, to afford driveway entrances to their property. He advised that this property lies adjacent to a property which the city plans to develop as a recreational area, and the Balzhisers want to use their property for business purposes. He gave as his feeling that it would be a mistake to authorize the driveways because of the hazard that would be created by their use. He further stated that the city has been trying to buy the property from the Balzhisers to enlarge the recreational area, and has offered $50,000 for it, but the Balzhisers are asking $80,000. He recommended that the request be denied. The Commission deferred a decision pending a conference with Mr. and Mrs. Balzhiser, scheduled to appear before the Commission on the following day. (As a result of discussion of the matter with Mr. and Mrs. Balzhiser on the following day, the Commission referred the matter back to the Engineer and Chief Counsel for further information and report. See ahead for additional paragraph.)

The Chief Counsel brought up for discussion the application of the Gardiner Lumber Company for permission to construct a railroad grade crossing of the Oregon Coast Highway in Gardiner, Douglas County. He advised that this matter came before the Public Utilities Commissioner, who granted the request over the objections offered by the State Highway Department, and it is now planned to request a rehearing of the case. In the meantime, he said, the State Highway Engineer has investigated another route which would take the railroad underneath an existing highway structure, but it would cost about $90,000 more than the route involving the grade crossing and the question arises whether or not the extra cost to the state is justified. He gave as his feeling that it would be advisable to proceed with the rehearing in order to ascertain just what authority the Commission has with respect to crossings of this nature, and that, if necessary, an appeal to the Supreme Court be made. Chairman Banfield expressed himself in favor of the rehearing in order to decide the question for future use. Commissioners Chandler and Reynolds expressed themselves similarly, and it was so ordered.

The Commission noted and approved an invoice in the amount of $2,784.89 covering twenty-two days' rental of the Steel Bridge in Portland, (October 10 to October 31, 1949, inclusive, at $3,924.16 per month), since it appeared to the Commission that this is in conformity with the agreement executed by the former Commission with Multnomah County on February 28, 1941.

The Chief Counsel brought up for discussion the matter of clarifying the Commission's resolution adopted November 3, 1948, with respect to its policy in connection with the construction, reconstruction, relocation and operation of highways, pursuant to the provisions of Chapter 4, Oregon Laws 1947, known as the "Throughway Law." Oftentimes, he said, rights of way and control of access are included under the regular highway act, and when that is done, it is necessary, under the present setup, either to prepare a special resolution or to include that item in each resolution supporting a condemnation proceeding. He suggested adoption of an amendatory resolution so that it will not be necessary to take care of such items separately when acquiring rights of way for work which is not being carried on under the "Throughway Law." He presented a form of resolution covering the matter. Following discussion, the Commission approved the suggestion and by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "B," which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported on the request presented by the Parkrose Chamber of Commerce at the previous meeting, for the improvement of Sandy Boulevard (US30) through the Parkrose District, particularly between 99th Avenue and 122nd Avenue. He advised that he conferred with representatives of this district, and ascertained that what they really want is the construction of a full street section, sixty feet wide between curbs, together with sidewalks. The existing pavement between 99th Avenue and 108th Avenue, he said, is already sixty feet wide and curbs are in place, so it will only be necessary to resurface this section, but from 108th Avenue to 122nd Avenues, the existing pavement is only 27 feet wide, and there are no curbs. He estimated the cost at $114,000 to resurface the section between 99th Avenue and 108th Avenue, to widen from that point to 122nd Avenue, and to construct

such curbs as are necessary; and he recommended that the improvement be considered in an early program if the people of the Parkrose District will assume the expense of necessary sidewalks. The Commission approved the recommendation.

The Engineer also reported on additional requests of the Parkrose Chamber of Commerce, as follows:

1. Installation of a traffic signal at the intersection of 102nd and Sandy Boulevard (US30).

2. Adjustment of the traffic light at 99th Avenue and Sandy to permit a freer flow of traffic onto Sandy from Columbia Boulevard.

3. Synchronization of the traffic light at the intersection of Columbia and Sandy so as to permit pedestrian traffic to cross Sandy with safety.

4. Widening of Columbia Boulevard to four lanes of traffic from its intersection with Killingsworth Avenue to its intersection with 99th and Sandy Boulevard.

The Engineer advised that the Traffic Engineer has investigated all these requests and recommends that they be denied. He stated his concurrence in the recommendation. The Commission approved the recommendation unanimously. (For details, see copy of Engineer's report to the Commission, dated November 3, 1949, in general files.)

The Commission discussed briefly the Engineer's written report on the three-party project in Eugene, involving state, county and city funds, and providing for construction of a new bridge over the Willamette River on the Coburg County Road, an overcrossing of the Southern Pacific Railroad, and the construction of a connecting roadway from the Coburg Road to the Pacific Highway in Eugene. It took no action thereon. (For details, see copy of the written report, dated September 28, 1949, directed to the Highway Commission in general files.)

The Commission unanimously confirmed its approval of the Engineer's recommendations with respect to the sale of used equipment and scrap materials stored at Salem and La Grande, bids for which were received in Salem on October 3, 1949. There follows a list of the high bids received for this material, and the Engineer's recommendation with respect to each item, which recommendations were previously approved by the Commission, and confirmed by the above minute entry.

Item No.	Item	High Bidder	High Bid	Engr.'s Estimate
	EQUIPMENT AT LA GRANDE			
1.	Chevrolet dump truck Dept. No. 39-210	E. H. Miller, La Grande	$ 375.00	$ 60.00
2.	Ford dump truck Dept. No. 36-340	E. H. Miller, La Grande	275.00	70.00
3.	Ford dump truck Dept. No. 37-339	Chas. E. Goodwin, La Grande	156.00	75.00
4.	Ford dump truck Dept. No. 37-340	A. J. Bushnell, La Grande	120.00	75.00
5.	Austin Western patrol grader, Dept.No.30-590	Clarence Goffin, Aumsville	85.00	100.00
6.	Austin Western patrol grader, Dept.No.31-596	Douglas Buchanan, La Grande	50.00	90.00
7.	Austin Western patrol grader, Dept.No.31-597	Douglas Buchanan, La Grande	50.00	75.00
8.	Adams pull grader Dept. No. 22-568	Arthur E. Behrens, Summerville	31.00	50.00
9.	Russell pull grader, Dept. No. 24-567	David Horne, Pendleton	125.00	50.00
10.	Oliver pull mower Dept. No. 38-646	A. J. Bushnell, La Grande	.50	5.00
11.	Oliver pull mower, Dept. No. 38-647	A. J. Bushnell, La Grande	.50	7.00
12.	McCormick pull mower Dept. No. 36-639	A. J. Bushnell, La Grande	.50	7.00
13.	McCormick pull mower Dept. No. 34-638	A. J. Bushnell, La Grande	.50	8.00
14.	McCormick pull mower	A. J. Bushnell, La Grande	.50	4.00
15.	Roots spring scraper Dept. No. 33-631	A. J. Bushnell, La Grande	.50	3.00

November 7, 1949

Item No.	Item	High Bidder	High Bid	Engr.'s Estimate
16.	Rotary Snow King plow Dept. No. 27-740	A. J. Bushnell, La Grande	$ 4.00	$ 50.00
17.	Littleford asphalt kettle, Dept.No.40-536	E. H. Miller, La Grande	30.00	15.00
18.	Oxwald acetylene generator	Douglas Buchanan, La Grande	20.00	30.00
19	Weaver brake tester	A. J. Bushnell, La Grande	2.00	5.00
20.	2-wheel trailer	Wesley E. Jones, La Grande	4.00	5.00

SCRAP MATERIALS AT LA GRANDE

			Unit Bid	High Bid	Engr.'s Estimate
21.	Scrap steel	Sam Willinger, Portland	$ 6.00	$180.00	$210.00
22.	Scrap cast iron	Sam Willinger, Portland	15.00	45.00	24.00
23.	Scrap brass	C. Jermulowske, La Grande	.08	16.00	10.00
24.	Scrap radiator cores	C. Jermulowske, La Grande	2.10	86.10	41.00
25.	Scrap batteries	C. Jermulowske, La Grande	1.90	304.00	134.40
26.	Scrap tires	Ford's Tire Service, Pendleton	5.05	101.00	60.00
27.	Scrap tubes	Ford's Tire Service	.002	4.00	30.00

SCRAP MATERIALS AT SALEM

28.	Scrap batteries	Sam Kline, Salem	1.825	638.75	525.00
29.	Scrap tires	No bids	- - -	- - - -	- - -

RECOMMENDATION:

1. It is recommended that Items 1 to 9, inclusive, and Items 17 to 20, inclusive, be awarded to the high bidder, and that Items 10 to 16, inclusive, be rejected as considerably below the Engineer's estimate.

(Cont.)

RECOMMENDATION: (Cont.)

Total of bids recommended . . .	$1,323.00
Total of Engineer's estimates . .	700.00

2. It is recommended that Items 21 to 28, inclusive, scrap materials, be awarded to the high bidder.

Total of bids recommended . . .	$1,374.85
Total of Engineer's estimates . .	1,034.40

The Engineer presented the proposed budget for the Travel Information Department during the calendar year 1950. The Commission deferred a decision in the matter until the following day when members of the Advisory Committee on Travel matters are scheduled to appear and report on the subject. (See ahead for additional paragraph.)

The Engineer brought up for discussion the request of the City of Forest Grove for assistance in correcting a traffic problem that exists in the main part of this town. He recalled that a delegation appeared before the Commission at the previous meeting and presented their request orally, but the Commission deferred action on the matter pending the selection of projects for its next program. He also recalled that the estimated cost to do the necessary things is $79,500, of which $6,500 represents cost of right of way which the city will furnish at its own expense, the balance, $73,000, representing the cost to the state. Following discussion, the Commission again deferred action on the matter until its next construction program is considered.

The Commission discussed briefly the Engineer's written report on the following subjects, but deferred action on them until the meeting with the Legislative Highway Interim Committee in the early part of December, the Engineer being instructed to have available at such meeting, for the benefit of the committee members, certain maps that would give them a clear perspective of the highway situation throughout the entire state:

1. Status report on surveys for projects approved for the 1950-1951 construction program.

2. Status report on projects in the first Post War Program, which have not yet been contracted.

3. Proposed surveys for an additional construction program involving an expenditure of $22,675,000; estimated cost of surveys, $384,000.

The Commission discussed the Engineer's written report, dated November 3, 1949, regarding the application of the provisions of Chapter 450, Oregon Laws 1949, with particular reference to the weight limitations on the intermediate axle groupings of truck and trailer combinations. In his report the Engineer refers to a previous written recommendation, dated September 16, 1949, on the same subject, and to a written opinion of the Chief Counsel, in which he holds that the law is not applicable to the intermediate axle group weight limitation. The Engineer advised that during the past month a comprehensive investigation has been made in which the effect of specific truck weights on specific bridges has been determined, and it is revealed that the condition of overstress is not as serious as was previously believed. The stresses on the critical span length caused by trucks loaded to practical maximum limits, but legal as far as axle and total weight is concerned, he said, are approximately those that would be caused by axle group loading amounting to 12½ percent more than those shown in the tables given in the present law. In view of these findings, and because of the difficulty of enforcement of a regulation for the cancellation of permits when weights are found to exceed by more than 12½ percent those given in the table of weights contained in the law, he stated his desire to withdraw his previous recommendation. He recommended, however, that careful analysis be given to the reports of the weighmaster citing evidence of illegal axle weights and total gross weights, and when these exceed the amounts permitted under the statute, and particularly when the reports indicate a frequency of such violations, that consideration be given to the cancellation of the permits as has been done in the past. The Commission unanimously approved the report.

The Commission discussed the written report and recommendation of the Engineer with respect to State Highway Department employees who either heretofore have reached retirement age, and whose period of employment has been extended, or who will reach the retirement age during the calendar year 1950. In his report the Engineer classified the employees in two groups, Group I being employees who have been retained in service beyond their retirement date, and Group II being employees who will reach retirement age during the year 1950. He recommended an additional extension of one year, through 1950, for the following employees listed under Group I:

Name	Classification	Present Age	Previous Extension By Hwy Comm.	Previous Extension By Ret. Board
Paul Deuber	Civil Engr. I	66	1-1-50	- - -
Carl P. Richards	Civil Engr. II	68	1-1-50	1-1-50
A. B. Dean	Civil Engr. III	65	1-1-50	10-1-50

Name	Classification	Present Age	Previous Extension By Hwy Comm.	Previous Extension By Ret. Board
Lambertus Heuperman	Civil Engr. III	68	1-1-50	1-1-50
Frank G. Hutchinson	" " "	77	1-1-50	1-1-50 (Last Year)
Harry M. Teel	" " "	65	1-1-50	7-1-50
J. F. Waller	" " "	66	1-1-50	6-1-50
Orin A. Chase	Civil Engr. IV	67	1-1-50	1-1-50
Ernest A. Skelley	" " "	69	1-1-50	1-1-50 (Last Year)
F. D. Eason	Civil Engr. V	67	1-1-50	1-1-50 (Last Year)
Hollis W. Libby	" " "	69	1-1-50	1-1-50 (Last Year)
Joseph Weber	Mechanical Engr.	65	1-1-50	4-1-50
S. H. Boardman	Parks Sup't.	75	1-1-50	1-1-50
Wendell P. Laws	Section Foreman	65	1-1-50	3-1-50
Earl M. Nash	Oiling Foreman	66	1-1-50	8-1-50
Wm. J. Minkiewitz	Clerk III	67	1-1-50	1-1-50

As to the remaining employees in this category, of whom there are 21, be recommended that they be retired at the expiration of the present extension of time as granted by the State Retirement Board.

The Engineer recommended that the following employees in Group II be retained in service beyond the effective retirement date, up to January 1, 1951:

Name	Classification	Effective Retirement Date
Geo. W. Alling	Accounting Clerk	9-1-50
Harry G. Benson	Right of Way Agent	12-1-50

(Cont.)

Name	Classification	Effective Retirement Date
A. A. Kirkwood	Civil Engr. III	5-1-50
Harry Scott	" " "	8-1-50
Frank T. Young	Civil Engr. IV	10-1-50
Wm. E. Chandler	Civil Engr. V	7-1-50
H. G. Smith	Civil Engr. VI	11-1-50
Frank Edwards	Section Foreman	8-1-50

As to the remaining employees in this category, of whom there are 19, he recommended that they be retired on their respective effective retirement dates.

The Commission unanimously approved the recommendations, but ordered, however, that hereafter, employees should be retired when they reach their retirement age unless there is some especially good reason why their services should be continued. The Commission also ordered that notification well in advance of their retirement date be given employees who are to be retired so they will have an opportunity to adjust themselves accordingly.

The Engineer reported the results of recent investigations with respect to the establishment of restroom facilities at Depoe Bay. He advised that pursuant to the Commission's instructions, various proposed sites were inspected on the ground by a group consisting of the Chief Counsel, State Parks Superintendent, Assistant Highway Engineer W. C. Williams, and J. A. Weber of the Bridge Department, and at the same time, representative people of the town of Depoe Bay were consulted. As a result of this inspection, he said, it was determined that there is only one logical site on state-owned property that is suitable for this facility, and that is within the Depoe Bay Ocean Wayside, which is being maintained as a state park. However, the State Parks Superintendent objects to the use of the property for this purpose. The Engineer estimated the cost to construct the facility at $11,800, and the annual maintenance and operation cost at $3,050. The Chief Counsel advised that the people of Depoe Bay will pay all costs incident to furnishing water and lights, and that the plan calls for one of the Parks Department employees to act as caretaker The Commission expressed a reluctance to spend so much money for a facility of this nature, because of the precedent that would be established, which undoubtedly would result in the expenditure of considerable more highway money than can be afforded for the purpose. It was the feeling of the Commission that local people should assume a greater share of the responsibility The Commission declared its willingness to do something to relieve the situation at Depoe Bay, but not to the extent that it would establish an undesirable precedent. The matter was discussed at considerable length, but action thereon was deferred pending additional investigation and report by the Chief Counsel, who was instructed to ascertain the availability of existing privately owned facilities that might be developed to provide satisfactory accommodations.

The Chief Counsel brought to the attention of the Commission action that is now being taken by the City of Salem to vacate the alley which extends through the property acquired as the site for the new State Highway Department

Office Building in Salem. The City, he said, is taking necessary steps to vacate this alley, but there are several public utilities whose facilities occupy space in the alley and will have to be moved. The Commission instructed the Chief Counsel to request the public utilities to remove their facilities immediately so as to cause no interference with the operations of the building contractor when his work gets underway.

At 4:00 p.m. bids as follow for the construction of the State Highway Department Office Building in Salem were opened and read aloud by the Secretary in conformity with previously published notice:

	Basic Bid	Less Alternate No. 1
Sound Constr. & Engr. Co., Seattle, Wash.	$ 1,599,931.00	$ 1,571,931.00
L. H. Hoffman, Portland	1,618,000.00	1,592,330.00
Donald M. Drake Co., Portland	1,621,000.00	1,593,100.00
Ralph & Horwitz, Portland	1,626,849.00	1,591,379.00
W. C. Smith, Inc., Portland	1,640,940.00	1,611,072.00
A. R. Nieman Constr. Co. & Austin B. McCoy, Vancouver, Wash.	1,656,450.00	1,634,650.00

Chairman Banfield announced that the Commission wishes to discuss the bids with the architects and its own staff, and will announce its decision at 11:00 a.m. on the following day.

A letter was presented from Mr. Fred E. Kiddle, Chairman, Roads and Highways Committee, La Grande Chamber of Commerce, requesting an economic study of the area that would be served by a proposed extension of the Starkey Secondary Highway from its present terminus at Starkey, Union County, to a connection with the Pendleton-John Day Highway at Ukiah, Umatilla County. The Engineer suggested a reconnaissance study to determine the economic justification of the road on the basis of benefits derived. He estimated that such a survey would cost about $500. The Commission unanimously approved the suggestion and the expenditure.

Messrs. Walter E. Church, Earl P. Newberry and Frank Roehr, architects for the State Highway Department Office Building, Salem, were present and discussed with the Commission bids received for the construction of that building. Mr. Church advised that they will recommend to the Commission the awarding of the contract to the low bidder, Sound Construction and Engineering Company, Seattle, Washington, although there is only one thing that is in doubt, and that is who is to do the subcontract work. Chairman Banfield advised that the Commission expects the architects to assume the responsibility of passing on the subcontractors; that if they are not satisfactory, the Commission should know about it, because it does not wish to award a general contract when the subcontractors are not satisfactory. It is up to the architects, he said, to decide. Mr. Church agreed to have such information available at 10:00 a.m. the following day, which was the time set for further discussion of the bids. The architects were instructed to present at that time a list of the items that were deleted from the plans as a result of the conference during the meeting held in September. (The contract for the construction of the Highway Office Building was later awarded to the Sound Construction and Engineering Company. See additional minute entry ahead.)

A letter was presented from the City of Willamina, requesting either the construction of a new bridge across the Willamina River on the Salmon River Highway at the west end of Main Street in Willamina, or the widening of the present structure for three or four lanes of traffic. The Engineer advised that the existing structure is narrow, being only 17 feet wide, but is in good condition structurally. He estimated the cost of a new two-lane bridge, 26 feet wide, at $60,000, and a four-lane structure at $100,000. He pointed out that the alignment of the Salmon River Highway through Willamina is not good, and when the alignment is revised at some future time, the crossing of the Willamina River will be at a different location. In view thereof, and for the further reason that there are many other structures on the state highway system which are more in need of replacement than is the one at Willamina, he recommended that the city's request be denied. The Commission approved the recommendation.

The Commission considered briefly the Engineer's written report on the request of the City of Portland for installation of traffic signals at certain locations on Powell Blvd. (Mt. Hood Highway). The estimated cost of the installations is $45,000, which is to be paid fifty percent by the city and fifty percent by the state, if the project is approved. The Commission deferred action on this matter for study.

The Commission had under consideration a request from the Bureau of Public Roads that the state maintain during the coming winter the Port Orford South Section of the Oregon Coast Highway, which is now under construction and on which work is to be closed down during the winter season. The Bureau of Public Roads agrees to reimburse the state in full for maintaining this 2.3-mile section up to a maximum of $5,000 The Engineer recommended approval of the request. The Commission approved the recommendation unanimously. (An agreement covering the arrangement was executed by the Commission on the following day.)

The Commission discussed a request from the City of Independence for sidewalk construction along the Monmouth-Independence State Highway, to serve the new high school which is under construction between Monmouth and Independence The Engineer advised that this matter has been investigated by the Traffic Engineer, who reports that the volume of pedestrian traffic along this highway is very small at the present time, and that under present conditions there is no justification for a sidewalk. He estimated the cost of the sidewalk at $5,000, and recommended that the request be denied, but that another traffic analysis be made after the new school is completed and in use, to determine whether or not conditions then will warrant the expense. The Commission approved the recommendation.

A petition was presented from the Oregon Motor Transport Association, Standard Oil Company of California, Union Oil Company of California, and Shell Oil Company, Inc., requesting improvements to the St. Helens Road (Lower Columbia River Highway) at its intersections with Doane Avenue and Balboa Avenue in Portland. The Petition points out that the petitioners in their operations utilize vehicles up to 60 feet overall in length, and that these vehicles are required to enter St Helens Road from their plants at Balboa Avenue and Doane Avenue. The vehicles have to stop before entering the highway, and at such

times the rear 20 feet of their vehicles extends across the tracks of the S. P. & S. Railroad which closely parallel the highway at this location, causing an unsafe and hazardous condition. The petitioners request improvements which will allow their equipment to come to a stop before entering the highway and still be entirely off the railroad tracks. The Engineer advised that investigations reveal that the condition at each intersection can be corrected by widening the existing pavement on St. Helens Road and providing a storage lane for two or three truck and trailer combinations. He estimated the cost of such an improvement at both intersections at $4,000, and recommended approval of the project, provided the City of Portland will pay one half the costs involved. The Commission approved the recommendation.

The Commission unanimously confirmed the telephonic authority previously given the Engineer to advertise the following rock production projects for bids to be received at this meeting:

1. Bandon-Brush Creek Project, Oregon Coast Highway, Curry County; estimated cost $64,000.
2. Koepke Slough-Sawyers Ferry Road Project on Umpqua Highway, Douglas County; estimated cost - $62,000, of which $10,000 is to be paid by Douglas County.
3. Rock production in connection with Wamic-Tygh Valley Federal Aid Project on The Dalles-California Highway, Wasco County; estimated cost - $25,000, of which $5,000 will be paid by Wasco County.
4. Klaskanine Summit-Columbia County Line Project on the Nehalem Secondary Highway, Clatsop County; estimated cost - $30,000.
5. Murphy-Cave Camp Road on the Williams Secondary Highway, Josephine County; estimated cost - $29,000.
6. Whiskey Creek-East Forest Boundary Project on the Klamath Falls-Lakeview Highway, Klamath and Lake Counties; estimated cost - $56,000.

The Engineer reported that the City of Shaniko has fulfilled the legal requirements with respect to the expenditure of State Tax Street Funds that the city received in 1948, and that the plans for the improvements proposed to be financed with such funds have been examined and found satisfactory. He recommended approval of the plans by the Commission The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto marked EXHIBIT "C-1", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that the City of Dufur has fulfilled the legal requirements with respect to the expenditure of State Tax Street Funds that it received in 1949, and that the plans for the improvements proposed to be financed with such funds have been examined and found satisfactory. He recommended approval of the plans. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "C-2", which resolution by this reference is made a part hereof, with like effect as though extended in full herein.

The Engineer reported that the following cities and towns have fulfilled the legal requirements with respect to the expenditure of State Tax Street Funds accruing to them during the first six months of 1949, and that the plans for the several improvements contemplated to be financed with such funds have been examined and found satisfactory:

Amity	Barlow	Eagle Point
Echo	Elkton	Empire
Fairview	Glendale	North Powder
Ocean Lake	Pilot Rock	Powers
Rockaway	Sublimity	Wheeler

He recommended approval of the plans by the Commission. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "C-3", which resolution by this reference is made a part hereof, with like effect as though extended in full herein.

The Engineer brought to the Commission's attention the necessity to increase the project authorization for the West Union-Cornelius Pass Section of the Hillsboro-Cornelius Pass County Road by the amount of $14,479.54, and the necessity to provide additional funds to finance a probable overrun of highway maintenance costs for 1949, amounting to about $963,282. He requested approval of the additional authorizations. The Commission approved the request unanimously

The Commission considered requests for traffic signal installations, as follows:

1. Request of the City of Empire for the installation of signals on Newmark Avenue (Cape Arago Secondary Highway) at its intersection with Commercial St. and with Broadway St., in Empire. The Commission denied the request upon recommendation of the Engineer, who advised that investigations reveal the signals are not warranted.

2. Petition from 135 citizens of North Portland, residing in the vicinity of Gertz Road, requesting the installation of a traffic signal at the intersection of Gertz Road and Union Avenue, route of US99E. The Engineer recommended that the request be denied in view of the grade separation and widening project which the Commission contemplates undertaking on Union Avenue during the 1950 working season. The Commission approved the recommendation.

3. Request of the City of Ashland for state cooperation in the installation of traffic signals at school crossings that are now manned by schoolboy patrols. The Engineer recommended against such cooperation because of its far-reaching effect, and eventual cost to the state. He gave as his feeling that if the state contributed in this instance it would be assuming an obligation which it did not have before, and the precedent established would necessitate similar installations at school crossings in every city in the state. It was the feeling of the Commission that signals which are installed purely to provide safety for school children at school crossings located within city

limits should be at the expense of the city concerned, although the signals should be installed subject to the approval of the State Highway Department. The request was denied.

4. Request of the City of Eugene for the installation of three additional traffic signals on the route of US99 in Eugene, one at Sixth and High Streets, the second at Seventh and High, and the third at Seventh and Olive Street. The Engineer estimated the cost of the signals at $8,000, and recommended approval of the project, on the condition that the City of Eugene will pay fifty percent of the costs involved. The Commission approved the recommendation.

5. Request of the City of Portland for the signalization of 82nd Avenue, route of the Cascade Secondary Highway. The Engineer recalled that the Commission previously approved the installation of thirteen signals on this street, at an estimated cost of $50,000, which was to be paid equally by the city and the state. The city now requests, he said, the installation of five additional signals at school crossings, and has stated its willingness to install them at city expense, if the state will definitely contribute a sum not to exceed $25,000 for the eighteen signals on this street. Moreover, the city has executed a form of agreement to that effect. He recommended approval of the arrangement. The Commission approved the recommendation unanimously. (An agreement with the City of Portland covering the matter was executed on the following day.)

The meeting adjourned at 5:00 p.m. to reconvene on the following morning in the same room.

Portland, Oregon
November 8, 1949

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel, with the following persons present and participating:

T. H. Banfield, Chairman
Ben. R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Ass't. State Highway Engineer
W. W. Stiffler, 2nd Ass't. State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follow, for highway construction projects, were opened and read aloud by the Secretary in conformity with previously published notice, following which Chairman Banfield announced that awards of contracts would be made at 3:00 p.m. in the same room.

CLATSOP COUNTY

Klaskanine Summit-Columbia County Line Rock Production Project on the Nehalem Secondary Highway. State Project. Requires approximately 10,000 cu.yds. crushed rock in stockpile.

Jed Wilson, Seaside	$ 27,200.00
E. C. Hall Co., Portland	27,500.00
A. H. Saxton & Sons, Corvallis	28,000.00
Barney B. Helser, Molalla	28,000.00
Oscar E. Joelson, Eugene	29,000.00

GILLIAM COUNTY

Squally Hook-Quinton Section of the Columbia River Highway. Federal Project No. FI-24(5). 5.88 miles of grading, surfacing and bituminous macadam; also extension of box culvert and widening of concrete bridge; also furnishing 2,000 cu.yds. crushed rock in stockpile. Requires approximately 273,000 cu.yds. excavation, 124 cu.yds. concrete, 17,600 lbs. metal reinforcement; 6,000 lin.ft. metal guard rail; 500 concrete sight posts; 70,200 cu.yds. crushed rock; 11 acres seeding to grass; and 790 tons emulsified, RC-3 and 121-150 asphalt.

A. H. Saxton & Sons, Corvallis	386,701.00
Del R. Beebe Constr. Co., Eugene	395,287.10
Colonial Constr. Co., Spokane, Wash.	416,753.20
McNutt Bros., Eugene	447,903.50
Carl M. Halverson, Portland	479,547.00
Berke Bros., Portland	489,393.00
Rogers Constr. Co., Portland	492,423.00
J. N. & M. J.Conley, Portland	494,676.50

JOSEPHINE COUNTY

Murphy-Cave Camp Road Rock Production Project on the Williams Secondary Highway. State Project. Requires approximately 10,000 cu.yds. crushed gravel in stockpile.

[illegible] C. Lininger and Sons, Medford	23,960.00
[illegible] Molalla	24,950.00
[illegible] A. Struss, Redmond	29,990.00
Snook Bros., Corvallis	33,020.00
Walter Berndt Constr. Co. & Austin B. McCoy, Vancouver, Washington	33,825.00

KLAMATH AND LAKE COUNTIES

Whiskey Creek-East Forest Boundary Section of the Klamath Falls-Lakeview Highway. State Project. Requires approximately 16,030 cu.yds. [illegible] stockpile.

Whiskey Creek-East Forest Boundary Section (Cont.)

F. L. Somers, Klamath Falls	$ 57,270.00
Rogers Constr. Co., Portland	66,400.00

LANE COUNTY

Fisher Road-Oak Hill Section of the Richardson-Eugene Secondary Highway. State Project. 1.26 miles of grading, surfacing and oiling. Requires approximately 43,000 cu.yds. excavation; 60 concrete sight posts; 11,270 cu.yds. rock or gravel materials; and either 110 tons RC-3 and 151-200 asphalt or 132 tons RT-4 and RT-9 tar. This project may be bid in combination with the Oak Hill Overcrossing Structure Project in Lane County.

	Using Asphalt	Using Tar
Inter-City Sand & Gravel Co., Eugene	$ 50,779.50	$ - - -
Loyd Calkins Co., Ocean Lake	54,807.50	- - -

Natt McDougall, Portland	112,040.00
Guy F. Atkinson Co., Portland	120,780.00

* Bidder will not accept this project except in combination with Fisher Road-Oak Hill Project.

The Engineer brought up for discussion the matter of extending Primary Federal Aid Highway No. 14 (Coos Bay-Roseburg Highway) northerly from the City of Coquille about two miles along the Oregon Coast Highway, to a connection with the presently designated Federal Aid Highway No. 2, so that contemplated construction of this two-mile section may be financed as a federal aid project. He explained that Federal Aid Highway No. 2 now follows the Oregon Coast Highway southerly from Coos Bay to a point about two miles north of Coquille, where it branches off toward the right, by-passing the City of Coquille, and rejoins the present highway two or three miles west of Coquille, thus leaving the two-mile section just north of Coquille without federal aid designation, so federal funds cannot be used to finance its improvement. Were Federal Aid Highway No. 14 (Coos Bay-Roseburg Highway) extended northerly two miles to a connection with Federal Aid Highway No. 2, he said, it would then be eligible for federal funds. He recommended approval of this extension. The Commission unanimously approved the recommendation, and authorized the Engineer to request such designation of the Bureau of Public Roads.

The Engineer also brought up for discussion the disposition to be made of the present route of the Old Oregon Trail between LaGrande and North Powder via the town of Union, when the new route via Ladd Canyon is constructed. He recommended that the old route be retained on the highway system as a secondary state highway. The Commission unanimously approved the recommendation.

The Engineer reported a communication from Mr. W. H. Lynch, Division Engineer, Bureau of Public Roads, relative to the construction of the Judkins Point-Goshen Section of the Pacific Highway. He said that the construction of this section was originally contemplated in the program for current highway funds, but the Commission deleted it from that program. Before Mr. Lynch will approve such deletion, he wants a letter stating that the project will be replaced in an early program. The Commission unanimously approved placing this project in an early program, and authorized the Engineer to direct a letter to Mr. Lynch to that effect.

The Engineer reported that pursuant to authority previously given him by the Commission, he has awarded contracts, as follows, the conditions of the awards having been satisfied:

Construction of the Tillamook Street-Broadway Bridge Section of the Pacific Highway West in Portland; bids received August 2, 1949, contract awarded September 29, 1949, to low bidder, C. J. Montag & Son.

Construction of concrete median island on Ochoco Avenue-Milwaukie Section of the Pacific Highway East, Clackamas County; bids received September 19, contract awarded September 30, to Cascade Construction Company, low bidder.

Widening viaduct over McCord Creek on Columbia River Highway, Multnomah County; bids received September 19, contract awarded October 25, to Lindstrom Bros., low bidder.

Construction of Moffett Creek Bridge on Columbia River Highway, Multnomah County; bids received September 19, contract awarded September 29, to low bidder, Frank Watt Construction Company.

Construction of office building in Eugene, Lane County; bids received September 20, contract awarded September 29, to J. S. Crepeau, low bidder.

Construction of Warrenton Section of the Warrenton Secondary Highway, Clatsop County; bids received September 20, contract awarded September 29, to Byers Bros., low bidder.

Grading, surfacing and bituminous macadam construction on the Dodson-Bonneville Section of the Columbia River Highway, Multnomah County; bids received September 20, contract awarded October 24, to Peter Kiewit Sons' Co., low bidder.

Construction of the South Unit, Princeton-Follyfarm Section of the Rome-Princeton Secondary Highway in Malheur and Harney Counties; bids received September 20, contract awarded October 26, to the low bidder, M. L. & C. R. O'Neil.

Construction of Tanner Creek Bridge on the Columbia River Highway, Multnomah County; bids received September 20, contract awarded September 29, to C. J. Eldon, low bidder.

The Commission unanimously confirmed the awards as reported.

The Engineer presented for the Commission's consideration a report on a survey of the Kimberly-Long Creek Secondary Highway between Engineer's Station 1235+00 at Hamilton, and Highway Engineer's Station 1520+00 at a place known as Round Basin, about midway between the Town of Hamilton and the Pendleton-John Day Highway Junction at Long Creek. He exhibited a map of the section, and explained the details. The Commission approved the survey as reported, by the adoption of the attached resolution relative thereto, marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein. The Commission also authorized the Chief Counsel to negotiate options for the right of way as may be required.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

1. R. A. Heintz-Construction, Contract No. 2938, for grading and bituminous macadam surfacing on the Pleasant Hill-Lost Creek Section of the Willamette Highway in Lane County, requested an extension of time of 336 days from November 30, 1948, to November 1, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adve se weather and ground conditions. They also advised that after they had started placing the topping material, the Engineer ordered the work discontinued due to wet subgrade. The Engineer advised that the subgrade was so saturated during the summer of 1948 that it was impossible to lay the topping, that such condition persisted until the middle of June this year, and that the contractor attempted several times to continue the work but had to suspend operations until the subgrade dried out. He recommended that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

2. Arthur Gentemann, Contract No. 3119, Mosier Rock Production Project on the Columbia River and Hood River Secondary Highways in Hood River and Wasco Counties, requested an extension of time of 92 days from September 30 to December 31, 1949, within which to complete this job. He attributed his failure to complete the project within the specified time limit to faulty equipment and to difficulties in training an inexperienced crew. The Engineer advised that the contractor was very slow in producing material on this project, and as a result, considerable delay was caused in the state maintenance program. He recommended that the extension of time requested be granted but that the contractor be charged with the extra expense which the state incurred for engineering supervision from October 1, 1949, to the date the project was completed. The Commission unanimously approved the extension of time as recommended by the Engineer.

3. Groesbeck and Hickson, Contract No. 3074, for grading and surfacing the Enegren Ferry Section of the Coos River Secondary Highway in Coos County, requested an extension of time of sixteen days from August 15 to August 31, 1949, within which to complete this project. They alleged that their failure to complete the project within the specified time limit was due to bad weather conditions during the months of April and May, which delayed clearing, burning and grading operations. The Engineer advised that the reason given by the contractor for failure to complete the project on time is substantially correct. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

4. Carl B. Armpriest, Contract No. 3182, for construction of a new copper roof on the Vista House at Crown Point, on the Columbia River Highway, Multnomah County, requested an extension of time of 31 days from August 31, to October 1, 1949, within which to complete this job. He gave the following reason for overrunning the time limit: the subcontractor

for carpentry was unable to secure delivery of treated lumber for the roof sheathing in time to complete the work on schedule. The Engineer advised that the reason given by the contractor is correct. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

5. Colonial Construction Company, Contract No. 3111, for the Mt. Hood Rock Production Project on the Mt. Hood and Wapinitia Highways in Clackamas, Hood River and Wasco Counties, requested an extension of time of 107 days from July 31, to November 15, 1949, within which to complete this job. They advised that it was impossible to obtain the required rock out of their quarry, so it was necessary to secure materials from another source, which prevented completion of the job within the specified time limit. The Engineer advised that the contractor entered into an agreement with the Bureau of Public Roads for the surfacing of the Warm Springs Highway, and in order not to hold up that project he authorized the contractor to defer the rock production project with the understanding that the work would be completed from the company's setup on the Warm Springs Highway. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

6. Warren Northwest, Inc., Contract No. 3201, for grading and paving the Lebanon (Milton and Williams Streets) Section of city streets in Lebanon, requested an extension of time of 31 days, from September 30 to October 31, 1949, within which to complete this job. The reason given for overrunning the specified time limit was delays incident to sewer construction within the limits of the contract, such work being performed by another contractor for the City of Lebanon. The Engineer advised that the contractor was delayed approximately thirty days in starting the state work because of the sewer installation which they mention. He recommended, in view thereof, that the extension of time, as requested, be granted without penalty. The Commission approved the recommendation.

7. Snook Bros., Contract No. 3176, for grading and paving the Rogue River (Depot and Main Streets) Section of city streets in the town of Rogue River, requested an extension of time of ten days from August 31 to September 10, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to unexpected delay on another contract in which they were engaged in Gold Beach. The Engineer advised that because of difficulties encountered in construction of pavement at Gold Beach, Snook Bros. were unable to move their equipment to Rogue River as soon as anticipated. He further stated that no inconvenience has been caused to the traveling public, nor has the state incurred any extra expense for engineering supervision. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

8. Loyd Calkins & Co., Contract No. 3186, for grading, surfacing and culvert construction on the Mail Creek Section of the Sunset Highway, Clatsop County, requested an extension of time of 90 days from August 15

to November 15, 1949, within which to complete this job. They stated that they were unable to complete the project within the specified time limit because of difficulties in securing delivery of necessary culvert pipe. The Engineer advised that this contract involved the installation of a special sectional plate culvert and the company which was to furnish this material failed to make delivery in time for the project to be completed as scheduled. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

9. Perkins Bros., Contract No. 3185, for grading and paving the Oswego Section of the Oswego Highway, Clackamas County, requested an extension of time of thirty days from September 30 to October 31, 1949, within which to complete this project. They attributed their failure to complete the project within the specified time limit to the construction by the City of Oswego of the storm sewer over the fill area of the newly constructed retaining wall, it being necessary to defer back-filling operations for several days to allow the concrete retaining wall to cure. The Engineer advised that the contractor started to work on this project immediately after being notified of the award, but because of the installation of the storm sewer by the City of Oswego it was necessary to hold up construction of the retaining wall, which had to be built before the remainder of the project could be completed. He recommended, in view of the circumstances, that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

10. O. C. Yocom Co., Contract No. 3158, for oiling on the Maupin-Criterion Section of The Dalles-California Highway in Wasco County, requested an extension of time of thirty days from September 30 to October 30, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to unanticipated breakdowns of their equipment. The Engineer advised that the contractor's statement as to the cause of delay is correct. He further stated that the oiling work on the roadway proper was completed within the specified time, and that the only work remaining to be done was the placing of approximately 2,500 cubic yards of crushed rock in stockpiles. Such work, he said, has caused no delay to the traveling public, nor has the state incurred any extra expense. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

11. The Central Heating Company, Contract No. 3177, for pavement resurfacing on the Veneta-Fisher Road Section of the Richardson-Eugene Secondary Highway in Lane County, requested an extension of time of fifteen days from September 30 to October 15, 1949, within which to complete this job. They alleged that rock was not available in sufficient quantities from the source that they were using to permit completion of the contract within the specified time. The Engineer advised that the contractor was required to purchase rock from a commercial plant to complete the shoulder work on this job, but was unable to secure delivery of

the rock soon enough to complete the project within the specified time limit. The delay, he said, has occasioned no extra expense to the state for engineering supervision, and the traveling public has not been inconvenienced. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

12. Acme Construction Company, Contract No. 3187, for grading and bituminous macadam surfacing on city streets in Drain and Yoncalla, requested an extension of time of fifteen days from September 15 to September 30, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to delays experienced in securing mineral aggregate from a private quarry. The Engineer advised that this contractor was required to secure mineral aggregate from a private quarry, and delivery from that source was not made in sufficient time to permit the contractor to complete the job within the specified time limit. He further stated that the delay has caused no inconvenience to the traveling public, and additional expense for engineering supervision was very little. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

13. Coos Bay Dredging Company, Inc., Contract No. 3171, for grading and surfacing the South Myrtle Point Section of the Coos Bay-Roseburg Highway, Coos County, requested an extension of time of 58 days from July 31 to September 27, 1949, within which to complete this job. They gave no particular reason for overrunning the time limit, except that they were required to do considerably more work than they anticipated in order to obtain the Engineer's approval of the project. The Engineer advised that due to the type of work involved, the contractor was unable to work a large crew; moreover, the contractor was required to do additional work because of a revision in the alignment after the contract was awarded. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

14. Umpqua River Navigation Company, Contract No. 3172, for grading and oil mat surfacing on the Luder Creek-Murphy's Camp Section of the Umpqua Highway, Douglas County, requested an extension of time of 273 days from October 31, 1949, to July 31, 1950, within which to complete this job. They alleged that this contract was not awarded early enough to allow for completion within the specified completion date. The Engineer advised that this contractor had the subcontract for furnishing rock for the Delmar-Coaledo Section of the Oregon Coast Highway, and was requested to expedite that work so that it might be completed before winter rains set in. As a result they were unable to move their equipment to the Umpqua Highway job early enough to complete the oiling work. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

15. Western Golf Course Supply Company, Contract No. 3126, for construction of an irrigation system and seeding on the Front Avenue (Alder Street-Bancroft Street) Section of the Pacific Highway West in Portland, requested an additional extension of tire of five days from September 15

to September 20, 1949, within which to complete this job. They alleged that adverse weather conditions caused delay in the construction of oiled footpaths which were being built under force-account order, so they were unable to complete the job within the previously extended time limit. The Engineer advised that the oiled footpath was ordered as extra work and, as stated by the contractor, construction of the same was delayed by adverse weather conditions. The traveling public, he said, has not been inconvenienced by the delay, in view of which he recommended that the extension of time as requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation.

16. Mill Electric Company, Contract No. 3151 for construction of the lighting system in Elkton Tunnel on the Umpqua Highway, Douglas County, requested an extension of time of 61 days from September 30 to November 30, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to delays by the state in the installation of control equipment, with which it was necessary for them to connect in order to test the operation of their installation. The Engineer advised that under this contract the state supplies the control equipment, but to date the equipment has not been delivered, and with the exception of this one item, the contractor's work was completed within the specified time. He recommended, in view of the circumstances, that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

17. Rath and Morris, Contract No. 3135, for construction of a masonry block office building in Eugene, requested an additional extension of time of 31 days from October 1 to November 1, 1949, within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to non-delivery of locks which were to be furnished by the State Highway Department. The Engineer advised that the state under this contract was to furnish the locks for interior doors, but difficulties had been experienced in securing delivery of this hardware. He further stated that all the work on the project other than the installation of the locks is completed. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

18. Newport Construction Company and Russell Olson, Contract No. 3170, for grading and oil mat surfacing on city streets in the cities of Milton and Freewater, requested an extension of time of twenty days from September 30 to October 20, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to non-completion of two bridges which were being constructed by state forces. The Engineer advised that the bridges referred to by the contractor were built by state highway crews as a separate item from the contract, and the contractor was delayed approximately three weeks in starting his work because of the uncompleted status of the bridges; and the bridges were not completed because of inability to secure necessary materials. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Commission in discussing requests for extensions of time as listed above, considered but did not necessarily adopt the recommendations of the Engineer and/or the reasons given by the contractors for failure to complete their projects within the specified time limit.

The Engineer reported that contracts Nos. 2995, 3017, 3020, 3043, 3074, 3085, 3089, 3097, 3100, 3108, 3118, 3120, 3126, 3135, 3153, 3157, 3158, 3165, 3170, 3171, 3176, 3177, 3182, 3185, 3187, 3199 and 3201, for construction of state highway projects, have been completed according to the requirements of the contracts, or modifications thereof, and that said projects are now ready for acceptance. After due consideration the Commission accepted said contracts by the adoption of the attached resolution relative thereto, marked EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer reported a letter from L. P. Hopkins, Superintendent of the Southern Pacific Company in which Mr. Hopkins inquires whether or not the state will cooperate in the installation of flashing signals at highway-railroad crossings on the basis of the railroad company's paying ten percent of the total cost and the state the balance, in conformity with a "memorandum of understanding" by the Executive Committee of the American Association of State Highway Officials and the Committee on Grade Crossing Elimination of the American Association of Railroads, with particular reference to erection of such a signal at the Mt. Vernon school crossing on the Southern Pacific Company's Cascade Line. The Engineer advised that in the past it has been the practice to use federal funds for grade crossing eliminations, but to use state funds for grade crossing protection. The reason state funds were used for the protection feature was that it eliminated considerable governmental "red tape" involved in the collection of federal funds, the amounts involved being relatively small, and that the federal monies can be better taken up for larger construction projects, such as overhead and undercrossing projects. Also, that it has been the policy of the Highway Commission for years to cooperate on a fifty-fifty basis with the railroads on railway signal construction when required. He recommended continuance of such past policies. The Commission approved the recommendation unanimously.

The Commission discussed and upon recommendation of the Engineer unanimously approved a request from the U. S. Army Engineers for permission to deposit on state property under the south end of the Coos Bay Bridge, materials that it contemplates dredging from Coos Bay in connection with the improvement of a ship channel in Coos Bay. (A form of easement and right of way agreement covering the matter was executed by the Commission later.)

At 10:00 a.m. the Commission conferred with the architects, Messrs. Walter E. Church, Earl P. Newberry and Frank Roehr, regarding the bids received on the previous day for the construction of a proposed State Highway Department Office Building in Salem. The architects enumerated the items that were deleted from the original plans at the request of the Highway Commission during its meeting in September. Chairman Banfield inquired whether or not the architects feel that notwithstanding the items eliminated and changes made, a good substantial building will be provided, one that will be a credit to them as architects, and on which they will be proud to have

their name placed. Mr. Church replied in the affirmative, stating that they are perfectly satisfied with the plans as revised. He pointed out that basically the only big change that was made in the original plan was the elimination of the air conditioning. Chairman Banfield then inquired as to the completion of the fifth floor of the building -- whether or not, in the minds of the architects, this floor should be completed. Mr. Newberry gave as the feeling of the architects that the fifth floor should be completed as planned, which provides for finishing this floor entirely except for partitions. Chairman Banfield then brought into the discussion the question of subcontractors, and he inquired whether or not the architects are satisfied with those who have been selected to do the subcontract work. Mr. Church again replied in the affirmative. He added that the architects will assume full responsibility for the adequacy of the subcontractors, because they are perfectly satisfied with those who have been selected. Commissioner Chandler pointed out that the members of the Highway Commission are relying fully upon the architects to provide a building for the State Highway Department that will be a credit to the state and to the architects themselves, notwithstanding the items that have been eliminated from the original plan. If the architects are perfectly satisfied with the plans as presently arranged, he said, then he, too, is satisfied. Mr. Church again replied in the affirmative and in behalf of the architects, recommended the award of the contract to the low bidder, Sound Construction and Engineering Company, at its bid price of $1,599,931, including the alternate for finishing the fifth floor. Commissioner Chandler thereupon moved the adoption of the recommendation, and the award of the contract to the Sound Construction and Engineering Company, low bidder, at its basic bid price of $1,599,931, which includes the alternate. The motion was duly seconded by Commissioner Reynolds, whereupon Chairman Banfield declared the motion carried by the unanimous vote of the Commission.

At 11:00 a.m. Chairman Banfield publicly announced the action taken by the Commission, awarding this contract to the low bidder, Sound Construction and Engineering Company, at its basic bid price.

Messrs. Walter Meacham and Alfred A. Loeb, Executive Secretary and President, respectively, of the Old Oregon Trail Association, Inc.; and Mesdames Kenneth Tower and A. W. Solheim, both of Portland, representing the Dorion Club of that city, constituted a delegation which appeared before the Commission regarding the following subjects:

1. Erection of an historical marker, similar to those along the Old Oregon Trail, at the old Barlow Home at Barlow.

2. Erection of an historical marker at the intersection of the Gervais Road with the Pacific Highway, relating to Marie Dorion.

3. Erection of an historical marker at the new bridge over the Sandy River at Troutdale and the naming of this bridge "Lewis and Clark Bridge" because of its historical connection with the Lewis and Clark party.

4. Construction of adequate turn-outs at the sites of all historical markers.

5. Erection of signs at a reasonable distance (a quarter of a mile) on both sides of historical markers calling advance attention to them.

6. Inclusion on state highway maps of pioneer trails such as the Old Oregon Trail, Applegate Trail, and Barlow Road.

Mr. Meacham headed the group. He urged additional markers to make the highways more interesting to travellers. He suggested the erection of the marker honoring the Barlows because both Mr. and Mrs. Barlow played a great part in settling early Oregon. He also urged a marker commemorating Marie Dorion, an Indian woman, because of the part she played in early history. He said that Mrs. Dorion is buried in a little cemetery at the old churchyard in the hamlet of St. Louis, about three miles west of the highway. He suggested that the new bridge at Troutdale be named the Lewis and Clark Bridge, because the early expedition headed by Messrs. Lewis and Clark camped at that location, and also that a marker bearing appropriate information be erected at the site. Mr. Meacham also suggested that turn-outs should be provided at each of the markers to allow people to stop and read the inscriptions without endangering other traffic. Mr. Meacham presented wording to be inscribed on monuments to be erected at the Lewis and Clark Bridge, at Barlow, and at the Gervais intersection.

Chairman Banfield expressed the feeling of the Commission that adequate marking of highways and trails is essential in order to keep the traveling public informed on historical matters. The Commission, he said, will give careful consideration to the requests as presented, and will see what can be done toward bringing them into realization.

The Engineer brought up for discussion the matter of exchanging the present route of The Dalles-California Highway between Barclay Springs and Algoma, for the present Crescent City county road in northern Klamath County, when the new highway between Barclay Springs and Algoma has been constructed. The Engineer recalled that this exchange has been requested by the Klamath County Court because the Crescent City road is in an isolated section, and is inconvenient and costly for the county to maintain; also that the matter was considered by the Commission at the previous meeting but action on it was deferred indefinitely at that time. He advised that the matter is being called to the Commission's attention again because the Barclay Springs-Algoma Project will soon be ready to advertise and the matter of maintaining the old section must be determined in advance. He pointed out that the Crescent City road which the county is asking the state to take over is only 2.4 miles in length, whereas the Barclay Springs-Algoma Section is 3.9 miles in length. He also said that the county has already taken over a 4.3 mile section of the old The Dalles-California Highway, making a total of 8.7 miles which the county is assuming, as compared with 2.4 miles that the state will assume, if the Commission approves the exchange. He estimated the annual cost to maintain the 2.4 mile section at between $1,500 and $2,000 and pointed out that it probably will be necessary to resurface the section within the next two or three years. He recommended approval of the exchange. As a result of discussion, the Commission unanimously approved the proposed exchange of roads, at such time as the new highway between Algoma and Barclay Springs is completed and opened to traffic.

Mr. P. W. Schnieder, Assistant State Game Director, appeared before the Commission regarding the sale of 160 acres of State Game Commission land in Curry County, situate adjacent to Humbug Mountain State Park. Mr. Schnieder advised that this property was advertised for sale some time ago and the high bid received therefor was $9,580, whereas the appraised value as set by the Game Commission amounts to $11,000. He further stated that the Game Commission rejected this offer but deferred readvertising the sale because it understood that the State Highway Commission was interested in the property and might want it for park purposes. He indicated that if the property were readvertised for sale the Game Commission would receive a bid in excess of $11,000 for it, notwithstanding which it will accept $11,000 from the State Highway Commission if the Commission wants it at that price and will let the Game Commission know within a reasonable length of time. Following discussion, the Commission advised that it would decide shortly. The matter was referred to the Engineer and the Chief Counsel to negotiate the purchase of the property, with instructions to offer not to exceed $11,000 for it.

The Commission discussed a proposal of the State Board of Forestry with respect to the reforestation and construction of fire-brakes along the Wilson River Highway, within the limits of the "Tillamook Burn." The Engineer advised that the Oregon State Board of Forestry has commenced operations on this project, which includes the falling of snags, the rehabilitation of the area and the planting of coniferous trees, and has stated a willingness to perform such work on property owned by the State Highway Commission, partly within the right of way, and partly within adjacent state parks, without expense to the Highway Department, under the following conditions:

1. The Highway Commission is to furnish flagmen, when necessary, while the work is being conducted on the right of way, and a possible hazard exists to traffic.

2. The State Highway Department is to have equipment available to remove any snags or debris that might fall upon the highway during such operations.

3. The State Highway Department is to waive any rights that it has to merchantable timber that might result from the operations.

The cost to provide the flagging operations and to remove the debris that might fall on the highway, he said, will be nominal and can be handled by regular highway maintenance crews. He recommended acceptance of the offer, inasmuch as the reforestation of the "Tillamook Burn" is a very worthy project, and will add inestimable value to the highway, both from the scenic standpoint and from the elimination of dangerous snags. The Commission approved the recommendation unanimously and ordered that the arrangement be covered by written agreement with the State Board of Forestry.

The Commission unanimously approved the continuation of existing contracts with the National Hospital Association and with the Oregon Physicians Service providing for the furnishing of medical service to Highway Department employees during the calendar year 1950.

The Commission discussed a proposed agreement with Mr. H. J. Greiner. Condon, Oregon, providing for the elimination of a timber stockpass heretofore provided for his use on the John Day Highway at M. P. 46.0. It is a bridge designated as No. 3478 on the state highway system. The Engineer advised that the existing stockpass is in bad state of repair, and will soon have to be replaced. He estimated the cost of such replacement at approximately $2,000, and pointed out that Mr. Greiner is agreeable to eliminating the opening entirely, if paid the sum of $50. In fact, he has already executed an agreement to that effect. He recommended approval of the arrangement with Mr. Greiner in order to eliminate further expense in maintaining a stockpass at at this location. The Commission approved the recommendation unanimously. (The agreement was signed later in the session.)

Consideration was given by the Commission to the establishment of "No Parking" areas along state highways at the following locations:

1. Several sections on the High Street-Walnut Street Section of the Pacific Highway in Eugene where car parking along the curb obscures sight distance: The Engineer advised that the City of Eugene has adopted an ordinance prohibiting the parking of cars along the sections; moreover, investigations by the Traffic Engineer reveal that the "No Parking" areas are essential for the safety of traffic. He recommended adoption of a companion resolution by the Commission, endorsing the action of the City Council. The Commission approved the recommendation by the adoption of the attached resolution relative thereto marked EXHIBIT "F-1", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

2. East Oak Street (Cascade State Secondary Highway) Silverton, between Third Street and Norway Avenue: The Engineer advised that this section of highway is on a rather steep grade leading out of the business section of Silverton, and that about midway up the grade there is a horizontal curve. The pavement along the section, he said, is only 24 feet wide between curbs, which is insufficient area for the parking of vehicles and at the same time allow traffic to move with safety. The City of Silverton, he said, has adopted an ordinance prohibiting the parking of cars on either side of the highway at this location. He recommended adoption of a companion resolution by the Commission endorsing the City's action. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the attached resolution relative thereto, marked EXHIBIT "F-2", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

3. Salem-Dallas Highway, at the location of an auction mart, approximately midway between Rickreall and West Salem: The Engineer advised that the auctions conducted at the auction market attract many people who park their cars on the highway shoulders in the vicinity of this establishment, creating a traffic hazard, particularly during the evening hours of darkness. The pavement along this section, he said, is only 22 feet wide, the shoulders eight, and the average daily traffic is 5,200 vehicles. During the period January 1, 1948, to July 31, 1949, he said, three accidents occurred which very likely could have been

avoided had a "No Parking" restriction been in effect. He recommended the adoption of a resolution by the Commission providing for "No Parking on Highway Shoulders" along this .6-mile section of highway, between M.P. 9.6 and M.P. 10.2. The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto, marked EXHIBIT "F-3", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

Consideration was also given by the Commission to the following requests for the establishment of reduced speed zones along specified sections of state highways:

1. Request of the City of North Bend for a change in location of the city limit and reduced speed limit signs on the Oregon Coast Highway in the northern section of North Bend, so as to include the entire distance to the end of the McCullough Bridge: The Engineer advised that this matter has been investigated by the Traffic Engineer who advises that the change is not warranted, and who recommends that the request be denied. He declared his concurrence in the recommendation. The Commission approved the recommendation unanimously.

2. Request of Camas Valley Grange for the designation of a 25 mile per hour speed zone on the Coos Bay-Roseburg Highway through the Village of Camas Valley: The Engineer advised that this matter has been investigated by the Traffic Engineer who recommends that the request be denied because there is only a limited amount of roadside culture in Camas Valley, and the average daily traffic is only 600 vehicles He stated his concurrence in the recommendation, advising, however, that he has ordered the stenciling of the words "School Crossing" on the pavement at this place, to augment existing signs bearing the wording "Camas Valley" and "School Crossing". The Commission denied the request for the reduced speed zone.

3. Request from the Principal of Shasta School, Klamath Falls, for establishment of a 35 mile per hour speed zone on the Klamath Falls-Lakeview Highway between M.P. 3.37 and M.P. 4.0, immediately east of Klamath Falls:" The Engineer advised that this section adjoins a 35 mile per hour speed zone designated by the Commission on February 3, 1947. He recalled that the matter was before the Commission at its previous meeting, but was referred back to him for further study to determine whether or not a 35 mile per hour limit might be too slow for this section. Recent investigations, he said, reveal the need for the establishment of a lower speed limit, and he recommended approval of the establishment of such a zone by the Commission. As the result of discussion, the Commission unanimously approved a speed limit of 45 miles per hour, extending a distance of 0.63 mile easterly from the end of the presently designated 35 mile per hour zone, by the adoption of the attached resolution relative thereto, marked EXHIBIT "G-1", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

4. Proposed extension of the existing reduced speed zone on the McKenzie Highway east of Springfield, Lane County: The Engineer advised

that the Commission at its meeting December 30, 1946, designated a 35 mile per hour speed zone on this highway, extending from M.P. 2.43 at the east city limits of Springfield, to M.P. 3.47 at the junction of the Springfield-Creswell Secondary Highway, and that requests have been received for the extension of said zone to M.P. 4.20. Investigations made by the Traffic Engineer, he said, reveal that the section in question is now practically a continuous business district, in view of which an extension of the zone is justified. He pointed out that the average daily traffic is 3,500 vehicles, and that the accident rate is quite high, there having been 28 accidents on this section during the past three years. He recommended the establishment of a 45 mile per hour speed zone from the end of the presently designated 35 mile per hour zone at M.P. 3.47, easterly to M.P. 4.93 at the junction with 54th Street. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "G-2", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

5. Establishment of a 20 mile per hour speed zone on the Willamette Highway at the Cost Fork Willamette River Bridge, about two and one-half miles east of Goshen: The Engineer advised that the bridge is an untreated wooden span which has deteriorated to such an extent that there is grave danger of its being demolished by heavy log trucks which cross it at high speed. Reconstruction of this bridge, he said, is in the current construction program, but it cannot be replaced until next year. In the meantime, in the interest of safety it is deemed necessary to limit the speed of vehicles crossing it to 20 miles per hour. He recalled that the Commission previously gave telephonic approval to the establishment of a 20 mile per hour speed zone for a distance of 1,000 feet on each side of the structure, specifically between M.P. 2.37 and M.P. 2.77, and he asked the Commission to confirm the action at this time. The Commission approved the request and thereupon, by unanimous vote, adopted the attached resolution relative thereto, marked EXHIBIT "G-3", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

In the discussion of the above speed zone matters, Chairman Banfield reported a suggestion from Circuit Judge Earl C. Latourette that signs that are erected to point out reduced speed zones should contain information indicating the authority, whether state, county or city, under whose direction the zone has been established. It was Judge Latourette's feeling, he said, that such information would simplify court action in cases of this nature coming before the court, in that it would show whose order has been violated. It was the feeling of the Commission that the suggestion is a good one and should be carried through. Accordingly, the Engineer was instructed hereafter to provide such information on signs that are erected under his direction, and to replace or augment existing signs in conformity therewith.

Mr. and Mrs. J. H. Balzhiser, Eugene, appeared before the Commission and requested permission to cut the concrete curbs at three locations on Franklin Boulevard (US99) in Eugene, so as to allow entrance to their property, which fronts on the highway for a distance of about 300 feet, near the intersection with Walnut Street. Mr. Balzhiser advised that his property is

valuable only for commercial purposes -- that the city now has established a 25-foot setback so buildings cannot be constructed up to the right of way line; moreover, it has established a 25 mile per hour speed zone along this section, so no inconvenience or hazard to the traveling public will result if entrance driveways are permitted such as are now allowed at numerous points nearby. He offered to waive parking privileges along his entire frontage if allowed the curb cuts. He advised that unless he is allowed these entrances he will consider that he is being discriminated against.

The Commission's Chief Counsel advised against the granting of this privilege because it would be contrary to the Commission's established policy. Chairman Banfield stated that the Commission must be consistent in the handling of matters of this kind, and must act in good faith with others from whom access rights have been acquired. He pointed out that the Highway Commission has spent a large amount of money in obtaining a free-way through Eugene, which was for the purpose of eliminating exactly those things that the Commis- is now being asked to approve. The Highway Commission, he said, has not taken any action permitting curb cuts and if any have been allowed it is without the Highway Commission's approval.

Mrs. Balzhiser pointed out that two entrance driveways have already been built near their property, one being only ten feet distant from their property line, and the other 105 feet distant, and that both were constructed when the highway was built.

This matter was discussed at considerable length during which it was brought out that the city has been negotiating with Mr. and Mrs. Balzhiser for the purchase of their land as an addition to the recreational area that the city is developing on abutting property, and that the city is also giving serious consideration to changing the zone in which the Balzhiser property is situate from a commercial zone to a residential zone. As a result of this discussion, the Commission deferred a decision in the matter and referred it back to the Engineer and Chief Counsel for additional information, and to determine what has been done in the past about curb cuts in this vicinity. They were also instructed to investigate the speed control situation, and to ascertain if possible, just what the city has in mind with regard to acquiring the Balzhiser property for recreational purposes. Mr. and Mrs. Balzhiser were informed that they would be given an answer as soon as possible.

A delegation from Reedsport consisting of W. A. Burdick, pharmicist; E. C. Baker, Douglas County Commissioner; J. C. Diehl, realtor, and Tom Lillebo, Mayor, appeared before the Commission in the interests of further improvement of the Umpqua Highway. Mr. Burdick headed the group. He requested early construction of shoulder widening and parking space for automobiles on the "dike" section and along the Reedsport-Deans Creek Section, and similar construction on the Deans Creek-Luder Creek Section later. They were informed that the improvements requested are costly, but the Commission will give them consideration along with other projects in formulating future construction programs.

The Engineer reported that pursuant to the provisions of the Commission's resolution adopted June 28, 1949, approving permit forms, regula-

tions, et cetera, for Group I and Group II highways, he has reclassified from a Group II highway to a Group I highway status the section of the North Santiam Secondary Highway between the Town of Detroit and its junction with the Santiam Highway, based upon test runs conducted and observed by the Director of Permits. He asked the Commission to approve such reclassification. The Commission unanimously approved the request and so ordered.

Consideration was given by the Commission to the applications of Riggle and Clark, loggers, Cascade Locks, Oregon, and of Walter James, logger, Dodson, Oregon, for permission to truck-haul logs, involving overall lengths of fifty feet, over the upper Columbia River Highway from M.P. 35.63, near Dodson, to M.P. 48.47, approximately two miles east of the Town of Cascade Locks, for delivery to a sawmill owned and operated by the Cascade Locks Lumber Company at the latter-mentioned point. The Engineer advised that on May 17, 1949, the Commission authorized the granting of such a permit up to and including September 30, 1949, under certain conditions, and the present application is simply for an extension of the previous permit, which would allow these people to remove logs which they already have cut. Both operators, he said, advise that they will discontinue hauling logs and will make no attempt to haul in the event of a storm which lasts three to four days. He recommended approval of the request, and that permits be granted for the period commencing November 10, and expiring December 15, 1949. The Commission unanimously approved the recommendation, with the strict understanding that the permits shall not be extended, nor shall new permits be granted for log hauling on this section of highway when the present permits expire on December 15, 1949. The Engineer was instructed to advise both logging concerns accordingly.

The Engineer brought up for discussion violations committed by Bradley Bros., Camas Valley, Oregon, in connection with the truck-hauling of logs over state highways from Camas Valley to Sutherlin. He advised that Bradley Bros. operate three International trucks, each of which is wider than the width permitted by statute, one being six inches overwidth, and the other two being eight inches overwidth. He advised that between May 12 and August 26, 1949, the Highway Department weighmasters cited these men to court on eleven different ocoasions; that the matter had been brought to the attention of the State Police Department, which verified the overwidths, and also brought to the attention of the Public Utilities Commissioner, who advises that he cannot cancel or forcibly repossess the P.U.C. plates of Bradley Bros. except on the request of the Oregon State Highway Commission. Bradley Bros., he said, refuse to surrender voluntarily their P.U.C. plates covering the operation of this illegal equipment, in view of which he recommended that the Highway Commission request the Public Utilities Commissioner to cancel the permits of these operators insofar as they apply to operations on state highways. The Chief Counsel gave as his opinion that the Public Utilities Commissioner had no legal authority in the first place to issue permits for such illegal equipment, and that he should cancel the permits without the Highway Commission's request. The Commission unanimously approved the cancellation of the permits of these operators, and instructed the Chief Counsel to direct a letter to the Public Utilities Commissioner requesting such cancellation.

Mr. L. W. Bass, Oswego, was present and reported a bad drainage condition on the Lakewood Bay Section of the Oswego Highway at Oswego. He advised that a Mr. Murphy, who owns a drain that is now in place, has offered to let the Highway Department use it, but it is in need of repair. He urged acceptance of Mr. Murphy's offer rather than construction of a new drain, it being his feeling that the cost to repair the existing drain would be less than to build a new one. He asked for immediate action on the matter. The Commission referred the matter to the Engineer for investigation.

The Engineer reported the record of violations committed by Thomas H. Ireland, log hauler, Myrtle Creek, Oregon, in connection with his operations on US99 between Roseburg and Canyonville during the period 1946 to 1949 inclusive, such violations consisting of transportation of overweight loads, overdimension loads, and refusal to allow his loads to be weighed by state weighmasters. He advised that the record indicates complete disregard of the rules and regulations of his log-hauling permit, as well as of the warnings heretofore given him. He recommended, in view of the record, the cancellation of Mr. Ireland's P.U.C. permit. The Commission approved the recommendation unanimously, and instructed the Secretary to inform the Public Utilities Commissioner accordingly. (For details, see copy of Engineer's written report to the Oregon State Highway Commission, dated September 29, 1949, in general files.)

Commissioner Reynolds brought up for discussion overweight and overheight violations committed by a number of log haulers on the Little Sheep Creek Secondary Highway, Wallowa County. It appears that violations have been going on for some time and arrests have been made, but the offenders are released with only nominal fines, which are not effective as the offenses are repeated, and as a result considerable damage is being done to the improved section of this highway. The Commission referred the matter to the Engineer for investigation and report.

The meeting recessed at 12:00 noon for luncheon, and reconvened at 2:00 p.m. with the same persons present and participating.

Messrs. W. M. Tugman, Vice Chairman, and Arden X. Pangborn, Member of the Advisory Committee on Travel Matters, were present concerning the 1950 Budget for the Travel and Information Department. Also present were Manley Robison, Director of the Travel and Information Department, Salem; and A. E. Cole, Portland, representing MacWilkins Cole and Weber, advertising specialists. Mr. Tugman presented an outline of the Advisory Committee's recommendations for the coming year. He pointed out that the amount requested is the same as last year, viz: $250,000, but they are recommending a change to provide an additional amount for newspaper advertising, and a lesser amount for magazine advertising, for experimental purposes, the change being from $24,000 to $55,000 for newspaper advertising and from $132,000 to $104,000 for magazine advertising. In support of these changes he stated that the committee feels that the bulk of tourist traffic in Oregon comes from adjoining states, in view of which, newspaper advertising will be more flexible and can be used to greater advantage than magazine advertising. The Committee as a whole, he said, approves the budget as now recommended, including the changes.

Mr. Robison advised that tourist travel in Oregon during 1949 has increased 19 percent over that during 1948, and 5 percent over 1947. He estimated expenditures by tourists in Oregon during 1949 at $110,000,000, compared with $92,000,000 in 1948 and $105,000,000 in 1947. He also gave figures on the volume of out-of-state visitors, advising that nearly 2,200,000 people visited Oregon this year in 777,450 motor vehicles. Following discussion, during which the Commission expressed sincere appreciation for the services rendered by the Advisory Committee, the Commission unanimously approved the budget as presented, a summary of which follows:

TOTAL PROPOSED EXPENDITURES

1950

	Proposed 1950	Allocated 1949	Allocated 1948	Allocated 1947
Item A — General				
Printing (Booklets & Maps)	$27,004.00	$28,100.00	$31,383.00	$19,772.00
Photographic Department	9,071.00	9,444.00	9,860.00	13,970.00
Misc. Auxiliary Promotion	7,750.00	7,750.00	7,250.00	7,250.00
General Office	6,208.00	6,208.00	6,010.00	5,110.00
Salaries	25,020.00	23,796.00	20,422.00	18,590.00
	$75,053.00	$75,298.00	$74,925.00	$64,692.00
Item B — Space Advertising				
Magazine	$104,070 50	$132,412.40	$140,132.75	$150,804.85
Newspaper	55,000.00	24,000.00	18,000.00	12,969.00
Production	11,670.00	14,000.00	12,500.00	8,834.15
Contingency	4,206.50	4,289.60	4,442.25	12,700.00
	$174,947.00	$174,702.00	$175,075.00	$185,308.00
	$250,000.00	$250,000.00	$250,000.00	$250,000.00

(For details of the entire budget as adopted, see copy in general files.)

The following persons, representing the John Day Chamber of Commerce appeared before the Commission and requested early construction of the eleven-mile section of the Ochoco Highway, extending westerly from the Town of Mitchell to a connection with the Forest Highway Project that is now under construction by the Bureau of Public Roads: P. M. Shown, Hugh Maldrett, and James Dixon. Also present in the interests of this project were A. R. Bowman and Joe D. Thomison, both representing the Prineville Chamber of Commerce, and A. C. Priddy, Portland, representing Pacific Trailways.

Mr. Shown headed the group. He advised that the people of their district are very anxious to do business in Portland, but because of unsatisfactory road conditions more and more people are going to Boise, Idaho, to do

their trading, particularly because the distance to Boise is only 200 miles, whereas the distance to Portland via a crooked road through Arlington is 305 miles. He urged construction of the eleven mile section at the earliest possible time.

Chairman Banfield pointed out that the Commission has already provided its program for funds available for 1950-51, and in doing so, allocated what it considered was a fair share of the funds to the district in which the proposed highway is situated. The Commission, he said, appreciates the desire for this improvement, but because of lack of funds it does not appear possible to increase the allocation to this district.

Mr. Shown declared that this section of highway is more important to the people of John Day and vicinity than is the improvement of the John Day Highway between the cities of John Day and Mt. Vernon. The John Day-Mt. Vernon Section, he said, is in negotiable condition, but the highway west of Mitchell is worn out, and is almost impassable, a dangerous road to travel. He inquired as to the surfacing and oiling of the new grade over the Ochoco Summit. He was informed by Mr. W. H. Lynch, Division Engineer, Bureau of Public Roads, that this is a forest highway section, but there is no money available at present to finance the work. However, it might be possible to allocate funds to the project when additional funds are provided if mutual agreement can be reached among the State Highway Commission, U. S. Forest Service, and the Bureau of Public Roads, which are all concerned.

Mr. Priddy urged the improvement in behalf of the Pacific Trailways, advising that this concern will operate buses over this highway as soon as the road is put in travelable condition. Chairman Banfield concluded the discussion by stating that the Commission realizes that the section of highway under discussion must be reconstructed but it is a matter of finances which the Commission cannot handle now. The project will be kept in mind for future programming.

The Chief Counsel brought up for discussion the construction of the Oak Hill Undercrossing Project on the Eugene-Richardson Secondary Highway, Lane County, for which bids were received by the Commission at this meeting. He suggested that in the event a satisfactory bid was received for this work the award of the contract be deferred and the bids be referred to the Engineer to make the award later, because of a controversy he has with the Southern Pacific Company regarding railroad cooperation. He explained that the Public Utilities Commissioner handed down an order with respect to this crossing, notwithstanding which the railroad company wants the Highway Commission to enter into an agreement containing provisions that are unreasonable and uncalled for. He gave as his opinion that from the legal standpoint, the order issued by the Public Utilities Commissioner is ample authority for the accomplishment of the grade separation, and that no agreement between the railroad company and the state is necessary. He pointed out the possibility that the railroad company would stop any work under progress by an injunction, which would take the controversy into court; nevertheless, he recommended the suggested procedure in order to get the matter settled. The Commission unanimously approved the procedure outlined by the Chief Counsel and authorized him to take the matter into court if necessary.

The Commission had under consideration the disposition of portions of right of way of the following highway sections which the Engineer advised are no longer of value for highway purposes because of reconstruction of these highway sections on revised alignments:

1. Portion of the Lost Creek-Lowell Section of the Willamette Highway, Lane County.

2. Portion of the Pleasant Hill-Lost Creek Section of the Willamette Highway, Lane County.

3. Portion of the Amity-Hopewell Section of the Bellevue-Hopewell Highway, Yamhill County.

The Engineer recommended adoption of an order abandoning these sections. The Commission approved the recommendation and by unanimous vote adopted the attached resolutions with regard thereto, marked EXHIBITS "H-1", "H-2", and "H-3", which resolutions by this reference are made a part hereof with like effect as though extended in full herein.

The Commission discussed a letter from the Associated Forest Industries of Oregon, requesting copies of the monthly reports of the State Highway Department Weighmasters' operations. The Engineer recommended approval of the request and that other associations of similar nature be furnished the same reports if they request them. The Commission approved the recommendation unanimously.

There was brought to the attention of the Commission a copy of a bulletin issued by the Western Oregon Truck Owners Association, endorsing a policy recently adopted by the Lane County Court, to cancel the permits of operators engaged in truck-hauling of logs on county roads if such operators are apprehended for "laying-out" to escape having their loads weighed by weighmasters. The Commission expressed its appreciation for the bulletin and for the county court's policy. The Secretary was instructed to convey to the Association its thanks for the bulletin and to compliment the county court on its action.

A letter was presented from Sauvies Island Grange No. 840 espressing the feeling that the opening of the Sauvies Island Bridge, when completed, should be attended with appropriate ceremonies, and offering its services in connection therewith. The Engineer advised that present indications are that the bridge will not be completed and opened to traffic for about one year. The Secretary was instructed to pass on this information to the Grange and to state further that it would be notified thirty days or so in advance of the opening of the structure so they will know in time to prepare for the dedication ceremonies.

There was presented to the Commission a letter from the Oregon Roadside Council, Portland, urging the construction of a service road along US99E between Portland and Milwaukie, in order to prevent access to the highway except at designated points. The Engineer recalled that the Commission at its previous meeting indicated its willingness to construct such a service road if

it could secure proper cooperation from the City of Milwaukie. He further stated that the Chief Counsel and he discussed this matter with the authorities in Milwaukie, who took it under advisement, but no report has been received as to their decision. The Commission took the attitude that the next move is up to the City.

A letter from the Oregon Congress of Parents and Teachers, requesting that signs be maintained on highways throughout the state advising motorists of the new law which requires vehicular traffic to stop when approaching school buses that are loading or unloading passengers, had the attention of the Commission. It was the feeling of the Commission that residents of the State of Oregon generally are familiar with the law referred to, so the signs would not be of particular concern to them, but the signs probably would be of value and help to strangers entering the state's borders. In view thereof, the Commission by unanimous vote, authorized the Engineer to erect signs at highway entrances to the state for the benefit of such tourists.

The Engineer requested authority to spend the sum of $585.79 for the purchase of equipment such as desks, chairs, etc. for additional personnel in the Maintenance Engineering Department, particularly at LaGrande, Bend and Salem. The Commission approved the request.

The Engineer also requested authority to receive bids in Salem for the purchase of merchantable timber on the site of the proposed maintenance headquarters on the Crater Lake Highway at Prospect. He advised that plans are being prepared for the construction of a building on this site, so the removal of the timber, amounting to approximately 200 MFBM, is a necessity. He mentioned informal offers ranging from $945 to $1,240 that have already been received for the purchase of the timber. Nevertheless, he gave as his feeling that the timber should be sold as a result of formal competitive bidding. The Commission unanimously approved the taking of bids.

The Commission considered the claim of A. O. Eubanks, Vale, Oregon, for the loss of one steer, which fell into a highway test pit at M.P. 271.7 on the John Day Highway, said claim being in the amount of $106.94. The Engineer advised that when test pits of this nature are opened up, highway employees either fence them or cover them with planks, and such practice was followed in this instance, but later some unknown person removed the protective covering and the steer, valued at $106.94, fell into it and was killed. The evidence, he said, is very much against the state because the test pit was dug by a state highway employe. He recommended in view of the circumstances that the claim be paid. The Chief Counsel concurred therein. The Commission approved the recommendation.

The Engineer requested authority for Mr. Mark H. Astrup, Landscape Engineer, to attend a meeting of the co-ordinators of the Committee on Roadside Development of the American Association of State Highway Officials in Washington, D. C., December 13 to 16, 1949. He estimated the out-of-state expense at approximately $280. The Commission approved the request on the condition that the out-of-state travel is approved by Governor McKay.

The Engineer also requested authority to attend a meeting of the Executive Committee of the American Association of State Highway Officials in

Chicago during November 19 to 22 inclusive, and a general meeting, at the same time, of highway representatives from all the states to discuss and establish policies with respect to proposed federal legislation regarding roads, particularly action to oppose a proposed tertiary system of roads. He estimated that his out-of-state travel expense would not exceed $280. The Commission approved the request unanimously on the condition that Governor McKay will approve the out-of-state expense.

The Engineer was instructed to render a written report to the Commission giving details of the out-of-state travel that has been authorized by the Commission during the year 1949. He was also instructed to report on proposed out-of-state travel during the year 1950, including dates, destinations, purpose, estimated expense, and the names of the employees who it is expected will attent the meetings.

Consideration was given by the Commission to an application received from the Green Mountain Lumber Company for a one-year extension of its permit authorizing the truck-hauling of logs across Van Duzer Forest Corridor along the Salmon River Highway, Lincoln County. The Secretary advised that the State Parks Superintendent recommends approval of the request. The Commission approved the application unanimously.

The matter of renewing the blanket schedule bond furnished by the Ohio Casualty Insurance Company covering all Highway Department employees, which bond expires on December 31, 1949, had the attention of the Commission. As a result of discussion, the Commission referred the matter to Commissioner Reynolds with full power to act.

The Commission had under discussion the setting of a date for its next regular meeting, and decided to hold such meeting in Portland on Monday and Tuesday, December 19 and 20, 1949. The Commission also set Monday and Tuesday, February 6 and 7, 1950, as the date for its next regular meeting following the December meeting. The Secretary was instructed to make the usual arrangements to hold these meetings in the Green Room of the Imperial Hotel. The Engineer was instructed to advertise for bids at these two meetings every approved project that is possible for him to prepare.

The Commission considered and unanimously approved an extension of its agreement with MacWilkins, Cole and Weber, Travel Advertising Agency, covering employment of their services in connection with the Travel Department during the year 1950, which arrangement heretofore was recommended by the Advisory Committee on travel matters. (The agreement was signed later in the session.)

The Commission discussed and upon recommendation of the Engineer and the Chief Counsel, unanimously approved a form of agreement with the U. S. Army Engineers covering the relocation of portions of US730 and US395, as is necessary by reason of the construction of McNary Dam.

The Commission discussed with the Engineer the bids on highway construction projects received at the morning session, and at 3:00 p.m. Chairman Banfield publicly announced the Commission's action with respect to

each of the projects, as follows, the Commission's action being by unanimous vote:

"Klaskanine Summit-Columbia County Line Rock Production Project on the Nehalem Secondary Highway in Clatsop County. Jed Wilson, Seaside, submitted the low bid for this work at $27,200. E. C. Hall Company, Portland, submitted the second low bid at $27,500. There were three higher bids. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Jed Wilson, when certain conditions have been satisfied.

"Squally Hook-Quinton Section of the Columbia River Highway in Gilliam County. A. H. Saxton and Sons, Corvallis, submitted the low bid for this work at $386,701. Del R. Beebe Construction Company, Eugene, submitted the second low bid at $395,287.10. Ten higher bids were received. The Commission has referred all bids to the Engineer with authority to award the contract to the low bidder, A. H. Saxton and Sons, when certain conditions have been satisfied.

"Murphy-Cave Camp Road Rock Production Project on the Williams Secondary Highway in Josephine County. M. C. Lininger and Sons, Medford, submitted the low bid for this job at $23,960. Barney B. Helser, Molalla, submitted the second low bid at $24,950. Three higher bids were received. The Commission has awarded the contract to the low bidder, M. C. Lininger and Sons, at their bid price.

"Whiskey Creek-East Forest Boundary Section of the Klamath Falls-Lakeview Highway in Klamath and Lake Counties. The Commission received two bids on this project, the low bid being submitted by F. L. Somers, Klamath Falls, at $57,270, and the other being submitted by Rogers Construction Company, Portland, at $66,400. Both bids have been rejected as being too high.

"Fisher Road-Oak Hill Section of the Richardson-Eugene Secondary Highway in Lane County. Inter City Sand and Gravel Company, Eugene, submitted the low bid for this project at $50,779.50 using asphalt. No bid was submitted for the use of tar. Loyd Calkins Company, Ocean Lake, submitted the second low bid at $54,807.50 using asphalt. He did not submit a bid for the use of tar. Twelve higher bids were received. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Inter City Sand and Gravel Company, when certain conditions have been satisfied.

"Construction of the Oak Hill Overcrossing over Southern Pacific tracks near Eugene on the Richardson-Eugene Highway in Lane County. Glen Snook, Eugene, submitted the low bid for this work at $71,260. Snook Brothers, Corvallis, submitted the second low bid at $75,580. Sixteen higher bids were received. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Glen Snook, when certain conditions have been satisfied."

The Commission considered and approved the following projects, as recommended by the Engineer, to take up the unallocated balance of $16,910 of 1949 Special State Tax Street Funds:

1. Improvement of Mill Street and a short section of Green Street in the Town of Paisley, Lake County. Estimated cost, $10,000.

2. Improvement of "C" Street in the City of Phoenix, Jackson County. Estimated cost - $12,000.

The Engineer pointed out that the total estimated cost of both projects is $22,000, and advised that the overrun will be charged to the 1950 allocation of funds of this classification. In the discussion of this matter, the question arose whether or not the Special State Tax Street Funds generally are being applied to improvements that are of particular benefit to log haulers, and whether such distribution of the funds is in conformity with the intent of the law. The Chief Counsel advised that according to the statute, $250,000 of the money apportioned to the cities shall be set up in a special account to be administered by the State Highway Commission, and that this money shall be spent each year on streets that are not a part of the state highway system, but which are receiving excessive wear from increases in population or heavy and unusual industrial traffic. It was the feeling of the Commission that, for the most part, the monies are being spent to improve log hauling routes, whereas there are plenty of streets in the smaller cities and towns that are badly in need of improvement which can be provided if some of the money were allocated to them. As a result of discussion, the Engineer was instructed, hereafter, to bring to the Commission's attention as early as possible in the year, a list of the projects that are proposed to be financed with funds of this kind, so that the Commission can study them and make a selection of projects in conformity with what it considers was the intent of the legislature when the law was enacted.

The Commission discussed and approved a form of agreement with Wasco County covering maintenance by Wasco County of the Wamic-Tygh Valley Section of the Wamic County Road when improvement of the same has been completed under state contract as a Federal Aid Secondary Highway Project. (The agreement was signed later in the session.)

The Commission also discussed and approved an agreement with Wasco County providing for stockpiling for county use 2,000 cubic yards of crushed rock in connection with the state's project for the construction of the Wamic-Tygh Valley Project, for which bids were received at this meeting. By this arrangement, the county agrees to reimburse the state for the cost of the rock from the first monies that are due the county from the state after the rock has been produced. (The agreement was signed later in the session.)

A letter was presented from the Kenton Businessmen's Club of North Portland, requesting permission to erect a memorial to the former City of Vanport within the traffic island on the Pacific Highway West, at the intersection of Denver and Interstate Avenues in Portland. The

Commission was of the opinion that the maintenance of a memorial or any other object than directional signs, at this important intersection, would divert the attention of motorists and would very likely be the cause of traffic accidents. In view thereof, the Commission denied the request.

The Commission authorized the Assistant State Highway Engineer, Mr. W. C. Williams, to attend, at state expense, the dedication of a new section of US99 a short distance south of the Oregon border, in the State of California, at an estimated out-of-state expense of $9.00.

The Commission discussed and unanimously approved a proposed agreement with the U. S. Forest Service covering snow removal operations on Timberline Road during the winter season, 1949-1950. According to this agreement, the work is to be done by the state at the expense of the Forest Service. (The agreement was signed later in the session.)

A petition was presented from residents of Scio and vicinity, requesting the oiling of the unoiled section of the Albany-Lyons Secondary Highway between Lyons and Scio. The Engineer recalled that the Commission approved an expenditure of $150,000 in its Second Post War Program for oiling an 8.4 mile section of this highway, between Lyons and Thomas Creek, but no provision has been made for oiling the remaining section, about 2.7 miles in length. He estimated the cost of such remaining work at $140,000. It was the feeling of the Commission that it could not allocate the additional amount at this time, and instructed the Secretary to inform the petitioners accordingly.

The Engineer presented a request from Pacific Greyhound Lines for a continuing permit, authorizing them to tow a disabled bus, 35 feet in length, with another bus of the same length, involving an extreme overall length of 74 feet. He said that the Director of Permits, who observed a test run of such a combination of vehicles, recommends that the request be denied because of the hazards created to other traffic, and that he concurs in the recommendation. The Commission approved the recommendation unanimously.

The Commission discussed a request from the S. J. & S. Logging Company for a reduction in the price to be paid for timber that was sold to them as the result of competitive bidding on June 6, 1949. It was explained that this Company offered $12.75 per MFBM for the timber, whereas the next high bid was that of Mr. G. C. Coe at $7.05 per MFBM; also that the S. J. & S. Company is now requesting a reduction to $7.15 per MFBM, alleging that they are unable to dispose of the timber as originally planned, because of its condition. The Engineer recommended that the request be denied as a matter of policy. The Commission approved the recommendation.

The Engineer presented for the Commission's information and study a proposed budget for the State Highway Department for the year 1950. The Commission indicated that it would discuss the budget at its next regular meeting on December 19 and 20, 1949.

The Commission discussed and upon recommendation of the Engineer approved a corrected list of roads in the Oregon Forest Highway System, as prepared by the Bureau of Public Roads. The following letter, directed to

the Chief of the Forest Service and the Commissioner of the Bureau of Public Roads, Washington, D. C., was thereupon signed by the Commission jointly with Mr. W. H. Lynch, Division Engineer, Bureau of Public Roads; and by the Regional Forester, U. S. Forest Service.

Portland, Oregon
November 8, 1949

Chief, Forest Service
Commissioner, Bureau of Public Roads
Washington, D. C.

Gentlemen:

The Forest Highway System selected and submitted by the Oregon State Highway Commission, pursuant to the Rules and Regulations for administering Forest Roads and Trails under the provisions of the Federal Highway Act was approved by the Department in accordance with the recommendations of the Bureau of Public Roads and the Forest Service under date of March 19, 1924 and certain revisions were approved by subsequent letters.

It is now recommended that the approved Forest Highways be revised to conform with the current correct mileages and classification. Therefore, in accordance with the Rules and Regulations for administering Forest Roads & Trails, under the provisions of the Federal Highway Act, it is requested that the Forest Highway System for the State of Oregon be revised to read as follows:

Route No.	Name	Termini	Approved Length	Class
1	McMinnville-Tillamook	Hebo-East Forest Boundary	13.9	1
2	Salmon River	Oregon Coast Highway - West Polk County Line	13.7	1
3	Oregon Coast	Neskowin-Siletz River	22.8	1
4	Siletz	Oregon Coast Hwy.-Forest Bdry.	6.0	2
5	Oregon Coast	Yaquina Bay-Umpqua River	68.7	1
6	Alsea	Waldport-Benton Co. Line	28.4	2
7	Siuslaw	Blachly-Oregon Coast Highway	45.1	1
8	Umpqua	Scottsburg-Reedsport	15.6	1
9	Oregon Coast	Hauser-Douglas County Line	9.7	1
10	Oregon Coast	Port Orford-Gold Beach	31.3	1
11	Redwood	O'Brien Schoolhouse-State Line	5.4	1
12	Redwood	Summit Hayes Hill-Love Station	2.0	1
13	Oregon Caves	3 mi. West of For.Bdry.to Caves	11.5	2
14	Applegate	Ruch-Watkins	17.0	3
15	Pacific	Canyonville-2-3/4 miles South of Forest Boundary	11.0	1
16	Tiller-Trail	Tiller to Trail	26.3	2
17	Crater Lake	Trail-Park Boundary	44.0	2

Route No.	Name	Termini	Approved Length	Class
18	Crater Lake	Dalles-Calif.Hwy.to Park Bdry.	7.7	2
19	Dalles-California	Crescent-Old Fort Klamath	57.8	1
20	Sand Creek	Dalles-Calif.Hwy.to Park Bdry.	4.3	2
21	Willamette	Lowell to Dalles-Calif. Hwy.	73.3	1
22	McKenzie	Blue River to Sisters	51.2	1
23	Santiam	1 mi. East of Foster to Sisters	69.5	1
24	North Santiam	Niagara-Santiam Hwy.	44.6	2
25	Mt. Hood	Wapinitia Jct. to West Bdry.	15.4	1
26	Wapinitia	Mt. Hood Hwy. to 1 mi. North of Wapinitia	32.6	1
27	Ochoco	West For.Bdry.to North For.Bdry.	19.6	1
28	Columbia River	West For.Bdry.to East For. Bdry.	27.3	1
29	Fremont	East For.Bdry.to West For.Bdry.	16.2	1
30	Klamath Falls-Lakeview	West For.Bdry.to East For.Bdry.	29.4	2
31	Fremont	4 mi. South of Valley Falls to 6 mi. North of Lakeview	13.0	1
32	Heppner-Spray	Mouth of Chapin Creek to John Day Highway	26.3	2
33	Pendleton-John Day	2-½ mi. N.W. of Albee to Range	30.7	1
34	Pendleton-John Day	Long Creek-South For.Bdry.	20.4	1
35	John Day-Burns	John Day to Burns	70.2	2
36	John Day	Prairie City-Unity	42.6	1
37	Weston-Elgin	McDougall's Camp to Summerville-Elgin Road	23.2	2
38	Flora-Enterprise	Oregon-Wash. State Line to South Forest Bdry.	30.3	2
39	Little Sheep Creek	Imnaha to West For.Bdry.	8.8	2
40	Baker-Cornucopia	Carson to Cornucopia	5.0	2
41	Loop-Dalles	Mt. Hood Hwy.to East For.Bdry.	15.0	3
42	Warm Springs	Wapinitia Hwy. to For.Bdry.	6.9	1
43	Diamond Lake	Union Creek to Dalles-Calif.Hwy. via Diamond Lake	38.9	2
44	Williams Creek	Applegate Hwy.-Oregon Caves Hwy.	20.0	3
45	Oregon Coast	North For.Bdry. to South For. Bdry.between Hebo & Beaver	1.1	1
46	Cascade Lakes	North Bdry. of Crater Lake Park to Bend	101.0	3
47	North Umpqua	Rock Creek to Cascade Lakes Hwy.	60.0	3
48	Klamath Lake-West Side	Seven Mile Creek to Forest Bdry. southeast of Odessa Creek	20.0	2
49	Mt. Hood	Wapinitia Jct.-North For.Bdry.	21.5	2
50	Timberline	Junction Mt. Hood Highway to Timberline Lodge	5.6	3

MILEAGES

Class 1	Class 2	Class 3	TOTAL
716.8	446.4	218.6	1381.8

(Cont.)

No other changes in the system are contrmplated at this time.

Yours very truly,

/s/ W. H. Lynch

Member

/s/ H. B. Glaisyer
Secretary

By /s/ Chas. H. Reynolds
Member

Mr. A. H. Saxton, representing A. H. Saxton and Sons, contractors, appeared before the Commission regarding the performance of work under the contract awarded to contractor F. H. McEwen on the previous day, for furnishing crushed gravel in stockpiles for the Bandon-Brush Creek Rock Production Project on the Oregon Coast Highway in Curry County. Mr. Saxton advised that his crushing plant is now set up in the quarry that will be used by Mr. McEwen in connection with this job, and that he has arranged with Mr. McEwen to do the work, provided the Highway Commission will approve the assignment of the contract. He said that if the Commission will approve such assignment, he will start operating on the following day and will finish the job before the end of the year. The Chief Counsel advised that there is no legal obstacle to prevent the Commission from approving the assignment if it so desires. The Commission took the attitude that approving the assignment would establish a dangerous precedent that would act adversely in the future, but if Mr. McEwen will appear before the Commission and give some very good reason for the assignment, the Commission will give the matter consideration, but it will not approve the assignment on any other basis.

Commissioner Reynolds brought up for discussion the matter of routing traffic to the proposed dam in the Snake River at Hells Canyon. He said that the Hells Canyon Improvement Association is of the belief that the construction of this dam will be approved in the not distant future, and they want to be assured that if the dam is built, traffic to the dam will flow through Oregon rather than Idaho. It was his feeling that information concerning such feature should be ascertained from the Army Engineers and the Bureau of Reclamation. The Commission approved the suggestion and instructed the Engineer to secure such information if possible.

November 8, 1949

Commissioner Chandler brought up for discussion matters pertaining to the proposed improvement of the Salem-Silverton County Road as a Federal Aid Secondary Highway Project, particularly protests that have been filed against such improvement, which includes construction of a railroad grade separation structure. It appears that the property owners along the section to be improved object strenuously to the present plans, because it will mean giving up some of their valuable land as right of way for the new alignment, and they allege that the present alignment and grade crossing are entirely satisfactory, because there is only one train movement daily on the railroad. The Engineer advised that he is studying this matter and will report on it shortly. Mr. T. M. Davis, District Engineer, Bureau of Public Roads, who was present, advised that one train movement daily over a railroad does not, in his estimation, justify the expense of a grade separation structure. He gave as his understanding that when this project originated there were nine train movements daily, but it now seems that there is only one. As a result of this discussion, the Commission instructed the Engineer to request a written opinion from the Bureau of Public Roads with respect to the justification for the grade separation structure, so the information may be used as a guide in the future when matters of this kind arise.

The Commission considered and signed agreements, et cetera, as follows:

Deed conveying unto the Port of Portland right of way contained in Columbia Airport access road.

Sale contract with Mr. Tymich, covering purchase of house and lot on Oregon Coast Highway near Coos Bay.

Easement granting to C. F. Williamson and wife access to service road on Berger Ranch-Barnes Road Section of the Sunset Highway.

Release agreement covering settlement effected by U. S. Army Engineers with Earl E. Evans for damage to federal and state property at Tillamook Head.

Release, cancelling U. S. Army lease of state-owned property at Clatsop County.

Bargain and sale deed conveying to Yaquina Radio, Inc., excess property on Agate Beach-Newport Section of Oregon Coast Highway.

Agreement with Bureau of Public Roads covering maintenance of a short section of Oregon Coast Highway south of Port Orford during coming Winter at Federal expense.

Agreement with City of Portland covering the installation of signals on 82nd Avenue (Cascade Secondary Highway).

Easement agreement with U. S. Army Engineers covering deposit of dredge materials on state property under south end of Coos Bay Bridge.

Agreement with H. J. Griner covering elimination of stockpass on John Day Highway.

Agreement with City of Prineville covering installation of traffic signal at intersection of Third and Main Streets in Prineville. (Authorized by Highway Commission on August 1, 1949).

Agreement with Douglas Forest Protective Association covering construction of access road for fire protective purposes on right of way of the Pacific Highway in Douglas County. (Authorized by Highway Commission on September 19, 1949.)

Agreement with MacWilkins, Cole and Weber, extending previous agreement covering services rendered in connection with the Highway Commission's Travel Bureau.

Agreement with Wasco County covering maintenance of Wamic-Tygh Valley Section of Wamic County Road after construction as a Federal Aid Secondary Highway Project.

Agreement with Wasco County providing for payment for 2,000 cubic yards of crushed rock to be stockpiled in connection with state highway contract for the construction of Wamic-Tygh Valley Project.

Agreement with U. S. Forest Service re snow removal on Timberline Road.

Joint letter with Bureau of Public Roads verifying corrected mileages and classifications of roads in Forest Highway System.

"Consent to Vacate" unnamed road adjacent to a Highway Department stockpile site on the Old Oregon Trail, Section 28, T 17 S, R 47 E, W M, Malheur County.

The meeting adjourned at 4:00 p.m.

EXHIBIT "A"

Minutes of November 7 and 8, 1949

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

SULLIVAN GULCH SECTION, SULLIVAN GULCH HIGHWAY - UNIT #2

14660-A City of Portland
Right of Way
Option expires March 14, 1950 (Mayhew)

8,000 sq.ft. at 20¢ sq.ft.	$ 1,600.00	
Allowance- warehouse building	9,026.00	
Amount to be paid owner		$ 10,626.00
Amount chargeable to Right of Way		10,626.00

14692- Johnson, Alf T. and Agnes C. Johnson, and Emma H. Erickson
Right of Way
Option expires April 14, 1950 (Boone)

lot (50x120) at 20¢ sq.ft.	1,200.00	
Allowance- 5-room house	8,830.00	
Allowance- garage	720.00	
Amount to be paid owner		10,750.00
Amount chargeable to Right of Way		10,750.00

SULLIVAN GULCH SECTION, SULLIVAN GULCH HIGHWAY - UNIT #4

14846- Horton, E. B. and Luella St. Denis Horton (Mayhew)
Right of Way
Option expires March 27, 1950

7,875 sq.ft. at 17¢ sq.ft.	$ 1,338.75	
Allowance- for improvements	400.00	
6-room house	6,435.00	
garage	320.00	
approx. 6 mo. proration 1949-1950 taxes	36.25	
Amount to be paid owner		$ 8,530.00
Amount chargeable to Right of Way		8,530.00

14877- Robinson, Donald K. and Virginia B. Robinson, and A. G. Teepe (Mayhew)
Right of Way
Option expires April 13, 1950

5,000 sq.ft. (2 lots 25x100) at 12¢ sq.ft.	600.00	
Allowance- garage	200.00	
7-room house	4,411.60	
Amount to be paid owner		5,211.60
Amount chargeable to Right of Way		5,211.60

NORTHEAST UNION AVENUE SECTION, PACIFIC HIGHWAY

14773- Boden, Tom E. and Herbert C. Boden (Boone)
Right of Way
Option expires February 28, 1950

0.12 acre	250.00	
Amount to be paid Owner		250.00
Amount chargeable to Right of Way		250.00

POWELL BOULEVARD SECTION, MT. HOOD HIGHWAY

15450- Multnomah County (Mayhew)
Right of Way
Option expires April 1, 1950

0.47 acre at $638.00	300.00	
Amount to be paid owner		300.00
Amount chargeable to Right of Way		300.00

NORTH BOUNDARY-MT. HOOD NATIONAL FOREST SECTION, MT. HOOD HIGHWAY

15461- Noble, Frank J. and Carrie A. Noble (Benfield)
Right of Way
Option expires April 3, 1950

4.80 acres at $267.53 plus	$ 1,284.18	
Allowance - Timber	565.82	
Amount to be paid owner		$ 1,850.00
Amount chargeable to Right of Way		1,850.00

DODSON-BONNEVILLE SECTION, COLUMBIA RIVER HIGHWAY

15012-A Warren Packing Company (Boone)
Right of Way
x

0.08 acre *	25.00	
Amount to be paid owner		25.00
Amount chargeable to Right of Way		25.00

* Quitclaim deed

CASCADE LOCKS-VIENTO SECTION, COLUMBIA RIVER HIGHWAY

15604- Sisson, Darrell L. and Bernice V. Sisson, and Carl W. Nielsen and Darlene V. Nielsen * (Benfield)
Right of Way
Option expires April 6, 1950

2,438 sq.ft. at 40¢ sq.ft.	975.20	
Allowance for building	9,534.00	
- equity in 2 electric gas pumps	332.05	
- damages for loss business, etc.	1,000.00	
Restriction of access on remaining property		
Amount to be paid owner		11,841.25
Amount chargeable to Right of Way		11,841.25

* Grantors may rent property for $48.00 per month, for period of 1 year or less, after execution of deed.

VIENTO-HOOD RIVER SECTION, COLUMBIA RIVER HIGHWAY

15311- Jones, J. O. and Theresa D. Jones * (Benson)
Right of Way - Parks
Option expires April 3, 1950

* Grantors permitted to occupy the house just west of existing State Park and north of highway for a period of 5 years at a yearly rental of $10.00. Copy of agreement dated October 26, 1949, attached to final report.

(Cont.)

VIENTO-HOOD RIVER SECTION, COLUMBIA RIVER HIGHWAY (Cont.)

15311- Jones, J. O. and Theresa D. Jones (Cont.)

180.00 acres, less RR property and right of way, on which are 6 houses, service station, grocery, residence, water system, 2 new gasoline pumps, etc.	$ 35,000.00	
Amount to be paid owner		$ 35,000.00
Amount chargeable to Right of Way and Parks		35,000.00

*** (See Footnote at end of Resolution)

CANYON ROAD SECTION, SUNSET HIGHWAY

15456- Tavelli, Sophie (Witt)
Right of Way
Option expires April 7, 1950

20,500 sq.ft. at 20¢ sq.ft.	4,100.00	
Allowance- 4-room house	710.00	
loss shrubs, fruit trees, grape vines, etc.	190.00	
Amount to be paid owner		5,000.00
Amount chargeable to Right of Way		5,000.00

OREGON CITY-NEW ERA SECTION, PACIFIC HIGHWAY

14039- Mitchell, Ross R. and Averil J. Mitchell * (Benfield)
Right of Way
Option expires April 4, 1950

0.098 acre Waiver of Access	500.00	
Amount to be paid owner		500.00
Amount chargeable to Right of Way		500.00

* Yearly permit issued to grantors to use State property south of and immediately adjacent to their premises, to control growth of brush.

NEWBERG SECTION, PACIFIC HIGHWAY WEST

9936- Stevens, Carl M. and Claude Stevens and Arline Stevens (Benfield)
Lease extension
Lease expires October 31, 1950

Extension of existing lease, rental raised from $25.00 to $30.00 per month	30.00

(Cont.)

NEWBERG SECTION, PACIFIC HIGHWAY WEST (Cont.)

9936- Stevens, Carl M. and Claude Stevens and Arline Stevens (Cont.)

Amount to be paid owner		$ 30.00
Amount chargeable to Maintenance		30.00

McMINNVILLE-THREE MILE LANE SECTION, SECONDARY HIGHWAY #152

13122- Eberhard, William F. and Colon R. Eberhard (Benson)
Right of Way

FOOTNOTE: ***

Item 15311, acquisition of property on the Viento-Hood River Section of the Columbia River Highway, from J. O. Jones and Theresa D. Jones, for right of way and park purposes. The Commission unanimously approved purchase of this property for $35,000, but deferred distribution of the expense, a portion of which is to be charged to Right of Way, a portion to Parks.

EXHIBIT "B"

Minutes of November 7 and 8, 1949

R E S O L U T I O N

WHEREAS, on November 3, 1948, this Commission adopted a resolution and entered the same in its records, by which resolution the Commission determined upon and adopted a policy with respect to the construction, reconstruction, relocation and operation of highways in the State of Oregon pursuant to the authority and purpose of the provisions of Chapter 4, Laws of Oregon, 1947, known as the "Throughway Law"; and

WHEREAS, by the express terms and provisions of said law the powers and authority thereby and therein vested in this Commission are in addition to and do not restrict, limit, or repeal any power or authority then lodged in the Commission by any other law; and

WHEREAS, by Section 7 of said Act the Commission is authorized and empowered to acquire by agreement, by donation, or by the exercise of the power of Eminent Domain fee title to or any interest in any real property including easements of air, view, light, and access, which, in the opinion or judgment of the Highway Commission is necessary or deemed necessary for the construction of any highway as a Throughway, and by said section the Commission is authorized to acquire real property for such use and purpose pursuant to the procedure by which real properties are acquired by the State for ordinary highway purposes; and

WHEREAS, by Section 100-115, O. C. L. A., the Commission is vested with authority and power to acquire not only the fee title to real property taken for highway purposes but may acquire also all right of access from the land abutting thereon; and

WHEREAS, for the purpose of clarifying said resolution adopted and entered in the minutes and records of the Commission on the third day of November, 1948, and for the purpose of removing therefrom any question or purpose of limiting the procedure by which real property is to be acquired, including access to and from the same, the Commission does hereby amend said resolution in the manner herein set forth.

NOW, THEREFORE, be it and it hereby is resolved by this Commission, all members being present and voting affirmatively as follows:

1. That there be added to Section 5 of said resolution a paragraph which shall be and is designated as Paragraph 5a, and shall read as follows:

5a. When real properties are acquired pursuant to an order or orders of the Commission, which properties are to be used in connection with the construction, reconstruc-

(Cont.)

tion or relocation of a highway or section of highway as a Throughway. such real properties, whether acquired by grant or by the exercise of the power of Eminent Domain, may be acquired under the provisions of said Throughway Law or under the provisions of Chapter 2, O. C. L. A., known as the Oregon Highway Code. The resolution and order of the Commission authorizing the acquisition of real property may specify whether said real property shall be acquired under the provisions of the Throughway Law or under the provisions of the Oregon Highway Code.

2. This resolution shall be entered in the minutes and records of the Highway Commission as of the 7th day of November, 1949, and shall to the extent herein provided amend said resolution adopted November 3, 1948, but in all other respects, not inconsistent with the provisions of this amendment, said original resolution shall remain in full force and effect.

EXHIBIT "C-1"

Minutes of November 7 and 8, 1949

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, as amended, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1948 for street purposes as provided in said law, the several sums of amounts set opposite the names of the respective cities or towns:

Shaniko . . . . . $ 235.18

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 7th day of November, 1949.

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, as amended, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1949 for street purposes as provided in said law, the several sums of amounts set opposite the names of the respective cities or towns:

Dufur . . . . . $ 1,747.94

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof:

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 7th day of November, 1949.

EXHIBIT "C-3"

Minutes of November 7 and 8, 1949

RESOLUTION

WHEREAS, pursuant to the provisions of Chapter 425, Oregon Laws 1947, as amended by Chapter 149, Oregon Laws 1949, there have been by the Oregon State Highway Commission apportioned from revenues accruing during the first six month period of 1949 to the cities and/or towns hereinafter named for disbursement for street purposes as provided in said law, the amounts set opposite the names of the respective cities or towns:

Amity	$1,504.97	North Powder	$ 798.12
Barlow	110.38	Ocean Lake	1,182.33
Eagle Point	957.32	Pilot Rock	1,014.64
Echo	963.69	Powers	1,617.47
Elkton	454.25	Rockaway	2,020.78
Empire	1,500.73	Sublimity	594.35
Fairview	982.80	Wheeler	549.77
Glendale	1,182.33		

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 7th day of November, 1949.

EXHIBIT "D"

Minutes of November 7 and 8, 1949

RESOLUTION

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the following section of a state highway, to wit:

HAMILTON-ROUND BASIN CREEK SECTION of the KIMBERLY-LONG CREEK SECONDARY HIGHWAY No. 402, in Grant County,

and in connection therewith to prepare maps showing the route and location of said section of highway and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. That the survey of the above-mentioned section of state highway, particularly between Engineer's Station 1235+00 and Engineer's Station 1520+00, together with the map which for identification purposes bears the map file No. 6B-36-10, field notes and other engineering data submitted by the Engineer, hereby is approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. It is further ordered that the said route and the survey of the same hereby are adopted as the route and location of the HAMILTON-ROUND BASIN CREEK SECTION of the KIMBERLY-LONG CREEK SECONDARY HIGHWAY No. 402.

3. That when said section of said highway is permanently constructed, the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

4. That this resolution be entered in the minutes and records of the Commission as of the 8th day of November, 1949.

EXHIBIT "E"

Minutes of November 7 and 8, 1949

RESOLUTION

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 2995 with R. & M. Construction Co. for constructing the Pleasant Hill Overcrossing in Lane County, completed Sept. 30, 1949.

Contract No. 3017 with J. C. Papin for grading and oil mat surfacing on the North Unit, Joseph-Wallowa Lake Section of the Joseph-Wallowa Lake Secondary Highway in Wallowa County, completed May 27, 1949.

Contract No. 3020 with Harry I. Hamilton for repairs to the South Dillard Bridge in Douglas County, completed October 1, 1948.

Contract No. 3043 with Tom Lillebo for constructing the Beaver Creek Bridge in Coos County, completed October 21, 1949.

Contract No. 3074, with Groesbeck & Hickson for grading and surfacing on the Enegren Ferry Section of the Coos River Secondary Highway in Coos County, completed August 31, 1949.

Contract No. 3085 with Tom Lillebo for constructing the Delmar Overcrossing in Coos County, completed October 21, 1949.

Contract No. 3089 with Lindstrom Bros. for structure, grading and paving on the Devils Lake Outlet Section of the Oregon Coast Highway in Lincoln County, completed September 30, 1949.

Contract No. 3097 with T. W. Thomas for grading and surfacing on the Prineville-Eagle Rock Creek Section of the Paulina Secondary Highway in Crook County, completed September 21, 1949.

Contract No. 3100 with VaDare Const. Co. for constructing the Middle Fork, Coquille River River Bridge in Douglas County, completed Oct. 5, 1949.

Contract No. 3108 with A. H. Saxton & Sons for furnishing crushed material in stockpile on the Ranger Station-Toll Creek Section of the Santiam Highway in Linn County, completed August 9, 1949.

Contract No. 3113 with A. H. Saxton & Sons for grading, bituminous macadam surfacing and rock production on the Collins Creek & Parkdale Sections of the Hood River and Mt. Hood Highways in Hood River County, completed July 7, 1949.

(Cont.)

EXHIBIT "E" (Cont.)

Contract No. 3120 with J. N. & M. J. Conley for grading and oil mat surfacing on the Henley-Lost River and Malin Sections of the Klamath Falls-Malin Highway in Klamath County, completed October 15, 1949.

Contract No. 3126 with Western Golf Course Supply Co. for irrigating system and seeding on the Front Avenue (Alder-Bancroft Streets) Section of the Pacific Highway West in Multnomah County, completed Sept. 20, 1949.

Contract No. 3135 with Rath & Morris for constructing the Eugene Office Building in Lane County, completed October 31, 1949.

Contract No. 3153 with L. K. Snell for painting the Yaquina Bay Bridge in Lincoln County, completed October 13, 1949.

Contract No. 3157 with O. C. Yocom for reoiling on the Pine Grove-Maupin Section of the Wapinitia Highway in Wasco County, completed September 30, 1949.

Contract No. 3158 with O. C. Yocom for reoiling on the Maupin-Criterion Section of The Dalles-California Highway in Wasco County, completed October 8, 1949.

Contract No. 3165 with C. S. Whitcomb Co. for landscaping on the Freewater (Cleveland Street-North City Limits) Section of the Oregon-Washington Highway in Umatilla County, completed October 27, 1949.

Contract No. 3170 with Newport Construction Co. and Russell Olson for oil mat surfacing on the Milton-Freewater City Streets Section in Umatilla County, completed October 18, 1949.

Contract No. 3171 with Coos Bay Dredging Co. for grading and surfacing on the South Myrtle Point Section of the Coos Bay-Roseburg Highway in Coos County, completed September 27, 1949.

Contract No. 3176 with Snook Bros. for grade widening and paving on the Rogue River (Depot and Main Streets) City Streets Section in Jackson County, completed September 10, 1949.

Contract No. 3177 with Central Heating Company for pavement resurfacing on the Veneta-Fisher Road Section of the Richardson-Eugene Secondary Highway in Lane County, completed October 6, 1949.

Contract No. 3182 with Carl B. Armpriest for repairing the roof on the Vista House, Columbia River Highway in Multnomah County, completed September 24, 1949.

Contract No. 3185 with Perkins Bros. for grading and paving on the Oswego Section of the Oswego Highway in Clackamas County, completed October 31, 1949.

(Cont.)

EXHIBIT "E" (Cont.)

Contract No. 3187 with Acme Construction Company for grading and bituminous macadam surfacing on the Drain and Yoncalla City Streets Section in Douglas County, completed September 28, 1949.

Contract No. 3199 with Porter W. Yett for grading and paving on the Newberg (First Street-Willamette Street) Section of the Hillsboro-Silverton Highway in Yamhill County, completed September 26, 1949.

Contract No. 3201 with Warren Northwest, Inc. for grading and paving on the Lebanon (Milton and Williams Streets) City Streets Section in Linn County, completed October 22, 1949.

THEREFORE, BE IT RESOLVED THAT the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

EXHIBIT "F-1"

Minutes of November 7 and 8, 1949

RESOLUTION

WHEREAS, pursuant to the provisions of Section 100-122, O.C.L.A., "The commission is authorized and directed, whenever the route of any state highway passes through the corporate limits of any incorporated city or town of this state, to select and designate the street or streets of such incorporated city or town over which the said state highway shall be routed * * * "; and

WHEREAS, the highway known and identified as the Pacific Highway, which is also identified as State Highway No. 1 and U. S. Route No. 99, is a state highway and is, therefore, under the jurisdiction and control of the State Highway Commission; and

WHEREAS, said highway as now located and routed passes through the corporate limits of the City of Eugene, and pursuant to the provisions of Section 100-122, O.C.L.A., the Highway Commission has heretofore, by order made and entered in its official records, selected and designated as streets of said city over which to route South bound traffic entering, passing through and leaving said city, the following streets:

Seventh Avenue from the west city limits of Eugene to Mill Street,

Thence along Mill Street to East Broadway,

Thence along East Broadway to Franklin Boulevard,

and for the accomodation of traffic moving north, the Commission has selected:

Mill Street from East Broadway to Sixth Avenue, and

Sixth Avenue from its intersection with Mill Street to the west city limits; and

WHEREAS, it has been found and declared by the minicipal authorities of said city that the parking of vehicles within certain street areas along said routes restricts and impairs the free flow of traffic using said streets, and said city has found and declared that the parking of vehicles on said street areas tends to and does create traffic hazards; and

WHEREAS, based on studies and inspection of matters related to the parking of vehicles on said streets, the city has adopted, passed and made a part of its official records, City Ordinance No. 9404, by which it is made unlawful to park any vehicle within the street areas hereinafter described, to-wit:

1. The parking area on the West side of the streets, the entire length of the thirty degree curve connecting East Seventh Avenue and Mill Street.

(Cont.)

EXHIBIT "F-1" (Cont.)

2. The parking area on the West side of the entire curve connecting the South bound traffic lane of Mill Street to the West bound traffic lane of East Broadway.

3. The parking area on the North and East side of the entire curve connecting the West bound traffic lane of East Broadway to the North bound traffic lane of Mill Street.

4. The parking area on the South side of East Eleventh Avenue from a point directly opposite the steps leading to Villard Hall on the University of Oregon campus, East approximately 280 feet to a point on the South side of Franklin Boulevard, directly opposite the steps leading from Franklin Boulevard to the Fine Arts Building on the University of Oregon campus.

5. The parking area on the South side of Franklin Boulevard from a point 100 feet west of the intersection of the South line of Franklin Boulevard and the North line of East Eleventh Avenue, East to the said intersection.

WHEREAS, in response to instructions given by this Commission, the Chief Highway Engineer and the Traffic Engineer have investigated traffic conditions which obtain and exist with respect to the volume and character of traffic using said portion of East Broadway, and said Chief Engineer and Traffic Engineer have made and filed their report and recommendation concerning said matter; and

WHEREAS, the Commission, having given due and careful consideration to said report and recommendation, and based thereon and based also on knowledge of existing traffic conditions, is of the opinion that the action taken by said city officials is in the interest of the general public and, therefore, is entitled to the approval and support of this Commission.

NOW, THEREFORE, based upon the foregoing recitals of existing facts, it is hereby resolved by this Commission, all members being present and affirmatively voting, as follows:

1. That it hereby is found and declared that the promiscuous and unregulated parking of vehicles within the street areas described above in the City of Eugene impairs the free and safe flow of traffic using said streets and tends to and does create traffic hazards.

2. That the action taken by the minicipal authorities of said city in and by the passage and adoption of Ordinance No. 940 is hereby approved, and the Commission hereby pledges full cooperation in the enforcement of the foregoing city ordinance to the end that public welfare may be preserved and promoted.

3. That the Secretary be and he hereby is instructed to furnish said city officials with a duly certified copy of this resolution, and he likewise is instructed to furnish to the Superintendent of State Police a like certified copy.

4. That this resolution be entered in the minutes and records of the Commission as of the 8th day of November, 1949.

EXHIBIT "F-2"

Minutes of November 7 and 8, 1949

RESOLUTION

WHEREAS, pursuant to the provisions of Section 100-122, O.C.L.A., " * * * The commission is authorized and directed, whenever the route of any state highway passes through the corporate limits of any incorporated city or town of this state, to select and designate the street or streets of such incorporated city or town over which the said state highway shall be routed * * * "; and

WHEREAS, the highway known and identified as the Cascade Secondary Highway No. 211 is a part of the state highway secondary system and is, therefore, under the jurisdiction and control of the Highway Commission; and

WHEREAS, said highway as now routed and located passes through the City of Silverton and the Highway Commission has heretofore selected and designated as a street of said city over which to route said highway, the street known, named and identified as Oak Street in said city; and

WHEREAS, the municipal authorities of said city have found and declared, upon due and proper investigation, that the parking of vehicles on the section of said street which lies between its intersection with North Third Street and its intersection with Norway Avenue, impairs the free flow of traffic using said street and tends to and does create traffic hazards; and

WHEREAS, said city officials have, by adoption of Ordinance No. 390, prohibited and made unlawful the parking of vehicles on Oak Street between North Third Street and Norway Avenue; and

WHEREAS, in response to instructions given by this Commission, the Chief Highway Engineer and the Traffic Engineer have investigated traffic conditions which obtain and exist with respect to the volume and character of traffic using said Oak Street, and said Chief Engineer and Traffic Engineer have made and filed their report and recommendation concerning said matters; and

WHEREAS, the Commission, having given due and careful consideration to said report and recommendation, and based thereon and based also on the knowledge of existing traffic conditions, is of the opinion that the action taken by said city officials is in the interest of the general public and, therefore, is entitled to the approval and support of this Commission.

NOW, THEREFORE, based upon the foregoing recitals of existing facts, it is hereby resolved by this Commission, all members being present and affirmatively voting as follows:

(Cont.)

1. That it hereby is found and declared that the promiscuous and unregulated parking of vehicles on Oak Street between North Third Street and Norway Avenue in the City of Silverton impairs the free and safe flow of traffic using said street and tends to and does create traffic hazards.

2. That the action taken by the municipal authorities of said city in and by the passage and adoption of Ordinance 390 hereby is approved, and the Commission hereby pledges full cooperation in the enforcement of the foregoing city ordinance to the end that public welfare may be preserved and promoted.

3. That the Secretary be and he hereby is instructed to furnish said city officials with a duly certified copy of this resolution and he likewise is instructed to furnish to the Superintendent of State Police a like certified copy.

4. That this resolution be entered in the minutes and records of the Commission as of the 8th day of November, 1949.

16360

EXHIBIT "F-3"

Minutes of November 7 and 8, 1949

R E S O L U T I O N

WHEREAS, the Salem-Dallas Highway is one of the major state highways and is likewise a federal highway, which highway throughout its entire length carries a large volume of traffic; and

WHEREAS, it appears that approximately midway between West Salem and Rickreall a public auction market is being maintained on real property abutting on said highway, and that said auction market in particular on certain days of the week, is patronized by large numbers of people, many of whom park their cars within the right of way limits of said highway and leave said cars so parked for extended periods of time; and

WHEREAS, the parking of said cars on the shoulders of said highway tends to restrict and impair the use of the traveled portion of the highway to such an extent that in the opinion of the Highway Commission a hazard not only to through traffic but to the owners and occupants of the parked cars is created; and

WHEREAS, in the opinion of this Commission public welfare and public safety require that the use of the shoulders of said highway within said area for the parking of cars should be prohibited;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare, based upon investigation, reports and recommendations by members of its staff, that the parking of motor vehicles along the Salem-Dallas Highway between M.P. 9.6 (Highway Engineer Station 255+45) and M.P. 10.2 (Highway Engineer Station 223+77) a distance of 0.6 mile, in Polk County, Oregon, creates a hazard not only to through traffic but to persons owning and using said parked cars.

2. That in the opinion of this Commission the right of way of said highway at said location is not of sufficient width to permit parking facilities for large numbers of cars and at the same time to provide the degree of safety and convenience which in the opinion of this Commission should be provided the motoring public.

3. That this Commission does further find and declare that the parking of cars for long periods of time on the right of way of said highway within said termini should be prohibited and hereby is prohibited.

4. That the State Highway Engineer be, and he hereby is instructed to erect at said termini, and at such points between said termini as in the

(Cont.)

judgment of said Engineer are necessary to accomplish the purposes of this resolution and the action of the Highway Commission as here declared, "NO PARKING ON HIGHWAY SHOULDERS" signs.

5. That a certified copy of this resolution be sent to the owner and operator of said public auction market, and that a like copy be mailed to the Superintendent of State Police

6. That this resolution be entered in the minutes and records of the State Highway Commission as of the 8th day of November, 1949.

Minutes of November 7 and 8, 1949

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of Subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Klamath Falls-Lakeview Highway number: 20	Route Number: Ore. 66	
Location of Termini		Established Speed
M.P. 3.37 (0.8 mile east of U.S.R.S. Canal)	to M.P. 4.0 (near Jct. Patterson Road)	45 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

Minutes of November 7 and 8, 1949

R E S O L U T I O N

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of Subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Willamette Highway
Highway number: No. 18 Route Number: Ore. 58

Location of Termini			Established Speed
M.P. 2.37 (1000 ft. west of bridge, Coast Fork, Willamette River)	to M.P.	2.77 (1000 ft. east of same bridge)	20 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

EXHIBIT "H-1"

Minutes of November 7 and 8, 1949

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Willamette Highway known as the Lost Creek-Lowell Section in Lane County, the western terminus of which is at Highway Engineer's Station 570+00 of the relocated line and the eastern terminus of which is at Highway Engineer's Station 26+00 of the relocated line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway as formerly located have been eliminated from the boundaries of the new location, which eliminated sections or units will no longer be needed for highway purposes; and

WHEREAS, Lane County and the Highway Commission have entered into an agreement under date of December 19th, 1944, relating to the use and jurisdiction of the abandoned sections; and

WHEREAS, the contract for the construction of this relocated section of the Willamette Highway has not been completed, but a section from Station 570 to Station 727 has been completed and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the remaining sections or units of the right of way of said highway which are affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portions of the old right of way which by reasons of the relocation of the said highway are no longer within the boundaries of the new right of way and which portions lie between Highway Engineer's Station 567+55 and Highway Engineer's Station 674+95 of the reconstructed highway and between Highway Engineer's Station 684+65 and Highway Engineer's Station 706+35 of the reconstructed highway and between Highway Engineer's Station 708+05 and Highway Engineer's Station 726+95 of the reconstructed highway, and which areas are identified and shown colored in red, and otherwise designated as Units "A", "B" and "C" on map attached hereto and marked "Exhibit A", are hereby abandoned as any part of the right of way of the said state highway, but all of said abandoned sections of the right of way of said highway are to remain and be maintained as a public highway, but the Commission hereby surrenders all jurisdiction thereover and hereby consents that jurisdiction over said road may be assumed

(Cont.)

and exercised by the County Court of Lane County, and said road shall thereafter be maintained by the County for public use. **

2. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. **

3. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Lane County a duly certified copy thereof, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in red on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes. **

FOOTNOTE: **

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 121a under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "H-2"

Minutes of November 7 and 8, 1949

RESOLUTION

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Willamette Highway known as the Pleasant Hill-Lost Creek Section in Lane County, the western terminus of which is at Highway Engineer's Station 291+00 of the relocated line and the eastern terminus of which is at Highway Engineer's Station 570+00 of the relocated line; and

WHEREAS, by reason of the relocation of said section of said highway a portion or unit of the right of way of the highway as formerly located has been eliminated from the boundaries of the new location, which eliminated section or unit will no longer be needed for highway purposes; and

WHEREAS, Lane County and the Highway Commission have entered into an agreement under date of December 19th, 1944, relating to the use and jurisdiction of the abandoned section; and

WHEREAS, the contract for the construction of this relocated section of the Willamette Highway was completed on October 5th, 1949, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the remaining section or unit of the right of way of said highway which is affected by reason of said relocation;

NOW THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the portion of the old right of way which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way and which portion lies between Highway Engineer's Station 377+30 and a point opposite Highway Engineer's Station 564+11.99 of the reconstructed highway, including a new connection between the old highway and the reconstructed highway opposite Highway Engineer's Station 560+75 of the reconstructed highway, and which area is identified and shown colored in red, and otherwise designated as Unit "A" on map attached hereto and marked "Exhibit A", is hereby abandoned as any part of the right of way of the said state highway, but all of said abandoned section of the right of way of said highway is to remain and be maintained as a public highway, but the Commission hereby surrenders all jurisdiction thereover and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Lane County, and said road shall thereafter be maintained by the County for public use.

2. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway

(Cont.)

EXHIBIT "H-2" (Cont.)

and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. **

3. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Lane County a duly certified copy thereof, and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned section of the said old right of way shown colored in red on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes. **

FOOTNOTE: **

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 121b, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "H-3"

Minutes of November 7 and 8, 1949

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Bellevue-Hopewell Highway known as the Amity-Hopewell Section in Yamhill County, the western terminus of which is at Highway Engineer's Station 0+00 of the reconstructed line and the eastern terminus of which is at Highway Engineer's Station 247+89.48 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway purposes; and

WHEREAS, the contract for the construction of this relocated section of the Bellevue-Hopewell Secondary Highway was completed on July 8, 1949, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the portions of the old right of way, which by reason of this relocation of the said highway are no longer within the boundaries of the new right of way, and which portions lie between Highway Engineer's Station 129+20 and Highway Engineer's Station 134+00 and between Highway Engineer's Station 134+50 and Highway Engineer's Station 137+55 and between Highway Engineer's Station 201+20 and Highway Engineer's Station 212+70 of the reconstructed highway, and are otherwise shown and identified colored in brown on said "Exhibit A," are hereby abandoned as any part of the right of way of the said highway, and the Commission hereby surrenders all jurisdiction thereover and hereby consents that jurisdiction over said sections may be assumed and exercised by the County Court of Yamhill County to be used for county purposes or vacated as the County Court of Yamhill County may determine. In this connection, it is recognized and conceded that with respect to the above sections of highway there are no persons living thereon nor is there a community served thereby. **

2. The area shown colored in green on said "Exhibit A" includes right of way acquired for the location and construction of the said highway. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for

(Cont.)

highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. **

3. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Yamhill County a duly certified copy thereof, and said County Court is hereby respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in brown on the map attached hereto and market "Exhibit A", and shall assume jurisdiction thereover, or permit them to revert to the owners of the abutting property, as the County Court may determine. **

FOOTNOTE: **

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 211, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

HEADQUARTERS AND GENERAL OFFICE OF DEPARTMENT
LOCATED AT SALEM, OREGON

TABLE OF CONTENTS

Page	Date 1949	Subject
16371	Dec.5	Legislative Highway Interim Committee. Nine subjects discussed.
16372		County & City expenditure of hwy. funds. Insufficient control. Legislature may remedy.
		Construction programs, 1946-49 and 1950-51. Maps showing location of jobs to be furnished Interim Committee.
		Trucking industry taxes. Engineer suggests trucks contribute 33-1/3% instead of 28%.
		Load limits. Neff & Frohnmayer, Medford, advised on formula for tandem axle trailer.
		Statistics from P.U.C. Processing on Hwy. Dept. facilities. Action deferred.
		Recessed at noon to 1:30 p.m. and adjourned at 3:40 p.m. to meet in special session.
		Surveys. Status of 1950-51 construction program. Action deferred.
16373		Construction Program, first postwar. Engineer reports status of projects not yet contracted:
		Durkee Undercrossing,
		Multnomah County Line-Milwaukie channelizing and service road
		Coquille River Bridge at Myrtle Point
		Port Orford Section of Oregon Coast Hwy.
		Greenwood Underpass on Central Oregon Hwy. in Bend
		Klamath Falls One-way Streets on The Dalles-California Hwy.
16374		Bly Section of Klamath Falls-Lakeview Hwy.
		Springfield Section of McKenzie Hwy.
		Oak Hill Grade Separation, Richardson-Eugene Hwy.
		Fisher Road-Oak Hill Section, Richardson-Eugene Hwy.
		Broadway Bridge-Steel Bridge Section, Pacific Hwy. West.
		Sauvies Island Bridge Grading & Paving
16375		Denver Avenue-Union Avenue Landscaping
		Troutdale-Multnomah Falls Landscaping
		Little Nestucca River Bridges, Little Nestucca River Hwy.
		Umatilla River Bridge at Umatilla
		Austin & Cemetery Road Grade Separations, Sunset Hwy.
16376		Yamhill Section Pavement Widening, Tualatin Valley Hwy.
		Surveys. Engineer requests authority to make location surveys. Action deferred.
		Clatsop County. Fishhawk Falls Secdy. Hwy. Options for r/w from Cardiff and Shaw approved.
		Douglas County. Elkton-Sutherlin Hwy. Approved $500 payment to Rice for haul road easement.
16377		Salem. Request to lay temporary 12" water pipeline on Willamette River Bridge sidewalk approved.
		McNary Dam. Agreement with Army Engineers re relocation US730 and US395. Status of grade separation structures to be determined.

Page	Date 1949	Subject
	Dec.5	
16377		Coos County. Oregon Coast Hwy. Chrome Plant-Coquille. Deferred action on relocation survey.
		Sale of steel bridge from Alsea Hwy. to Lincoln or Lane Co. approved.
16378		Real Property appraisals. Procedure discussed with R/W Engineer. He is to make written report.
		Retirement. Action taken at previous meeting re retention of over-age employees not to be changed.
		George Neuner Jr. employed as special counsel for condemnation cases in Douglas County.
		Meeting adjourned 5:15 p.m.
	Dec.19	
16379		Bids received on the following projects:
		Dixie Summit-Baker County Line Rock Production
		West Unit, Hamilton-Long Creek Section
16380		Lawen-Crane Section
		Trail and Eagle Point Sections
		Chiloquin-Sprague River Section
16381		Chiloquin (Chocktoot Street) Bituminous Surfacing Project
		Junction City-Eugene Traffic Signals
16382		Mountain States Power Company Canal Bridge
		Jordan Creek-McNamara Camp Resurfacing
		Umatilla River Bridge Widening
16383		Cow Canyon Rock Production Project.
		Minutes of November 7 and 8, 1949, approved.
		Parks Superintendent reports on following matters:
		Dimmick State Park on Mount Hood Highway. Purchase of 18 acres approved. Hood River County to pay half.
		C. H. Armstrong written report on attendance at Northwest Park Association Meeting presented. Discussion deferred.
		Curry County Ocean Waysides. Deed for land from Pacific Borax Company referred to Counsel.
16384		Curry County Ocean Waysides. Status of acquisition R/W Engineer makes report.
		Colgrove Property. Option approved conditionally. Private access only to be given.
		Chetco Grange protests acquisition of waysides. No action.
		Deschutes River Waysides. Paxton refuses $3,500. Property not to be purchased.
16385		Coos and Curry County myrtle woods. Declined offer of three myrtle wood tracts. (See Dec.20)
		Dyer Park. Gilliam County. Earl Butler complains of lack of development. He is to be informed improvements now underway.
		Silver Falls State Park. Marion County. Schedule of fees for 1950 approved.
		South Beach Wayside. Lincoln County. Request denied for road to serve drive-in theater.
		Cove Palisades State Park. Jefferson County. Removal of cinders from "Round Top.". U.S. authorities to be contacted.
		Depoe Bay Wayside. Port of Newport wishes to construct roadway across park. Action deferred.

Page	Date 1949 Dec.19	Subject
16386		Lincoln County. Oregon Coast Hwy. Agate Beach-Newport. Damage claim settlement with C. E. Wiles approved.
		Real Property. Acquisition authorized. See EXHIBIT "A". Sullivan Gulch, Portland, revised r/w costs questioned. Engineer to prepare report on cost of r/w for all projects.
16387		Meeting recessed at 12:00 noon to reconvene at 2:00 p.m.
		Portland. Revised settlement with Mrs. Frances Symons for radio station site on Mt. Scott approved.
		Lincoln County. Corvallis-Newport Hwy., Eddyville-Blodgett Section. Approved sale of old quarry to J. R. Laisure.
		Sullivan Gulch, Portland. Accepted offer of G. B. Larrimer for small house on r/w.
		Multnomah County. Columbia River Hwy. Dodson-Bonneville. Accepted offer of Peter Kiewit Sons Co. for bldgs.
16388		Sale approved of miscellaneous items acquired with r/w.
16389		Coos County. Coos Bay. No bids received for bldgs. Authorized private sale.
		Lane County. Siuslaw Hwy. Mapleton. Approved exchange of land with Huntington Shingle Co.
		Clackamas County. Boring. Approved cancellation of Telford lease.
16390		Deschutes County. Lapine. Approved transfer of property to county.
		Klamath County. Klamath Falls. Westside by-pass. Granted authority to negotiate for purchase of Cobo property.
		Coos County. Oregon Coast Hwy. North Marshfield. Permission given Union Oil Co. to construct fire wall on state's easement.
16391		Lane County. Approved quarry lease from E. W. Fisher.
		Malheur County. Slide Irrigation Dist. Payment of assessment approved.
		Tillamook County. Stillwell Drainage Dist. Payment of assessment approved.
		Property sales. Deeds for excess property sold are to contain restriction as to advertising use.
		Tillamook County. Nehalem Sand Spit. Approved purchase of lots from Wm. Kennard.
16392		Umatilla County. Old Oregon Trail. Umatilla-Hermiston. Approved transfer of stockpile site to county.
		Gilliam County. Columbia River Hwy. Squally Hook-Quinton. Confirmed closing of option on Wild Cat Service Station. Controversial settlements hereafter to be based on consultation between Counsel and Engineer.
		Ocean Shore Control. Counsel presents report. No action.
		Permits. Barclay Bros. overweight trucks. P.U.C. to correct mistakes. Referred to Counsel.
16393		J. Neilson Barry protest on sign boards. No action.
		Lane County. Eugene. High Street-Walnut Street. Northwestern Cities Gas Co. claim. Referred to Engineer and Counsel.
		Multnomah County. Columbia River Hwy. Oneonta Slide. Compromise settlement with Union Pacific discussed, deferred.
		Linn County. Santiam Hwy. Approved agreement with Mountain States Power Co. for bridge over their canal.

Page	Date 1949 Dec.19	Subject
16394		Awards. Chairman announces awards of contracts.
16395		Parks buildings. Specifications to be revised.
16396		Accident prevention. Engineer recommends adoption of program. Referred to Engineer for further study.
		Wages and salaries. Step increases as of Jan., 1950 approved.
16397		A.A.S.H.O. Engineer reports on meeting of Nov.19-21, 1949.
		Travel expense. Approved report presented for 1949-50.
		Jackson County. Crater Lake Hwy. north of Prospect. Sale of timber to O'Connor and Bryson approved.
		Astoria Ferry. Finance report presented. Further report to be made.
16398 (20)		Lane County. McKenzie Hwy. through Springfield. Engineer recommends use of North "A" Street as alternate route. (See Dec.20)
		Klamath County. Klamath Falls. First Avenue-Esplanade Street. Approved increase in project authorization.
		Baker County. Request for improvement of Sumpter Valley Hwy. and Dooley Mt. Section. Action deferred.
		Portland. North Union Avenue. Denied proposal of Thos. A. Sweeney to place embankment materials.
16399		Washington County. Beaverton. Denied request to widen Beaverton-Hillsdale Hwy.
		Lane County. Oregon Coast Hwy. through Florence, request to pave it denied.
		Washington County. Tualatin Valley Hwy. through Hillsboro, request to widen it denied.
		Washington County. Hillsboro. Approved Special State Tax Street Fund project.
16400		Tillamook County. Oregon Coast Hwy. Denied request Ore.Coast Assoc. to construct causeway at Kilchis River, eliminate curves.
		Oregon Coast Hwy. Brush clearing requested. Work now underway. Signs at intersection US101 & US199 (in Calif.- no action.)
		Union County. Approved exchange of County Road #14 for F.A.S. Hwy. #538 if agreeable with B. P. R.
		Linn County. Harrisburg. Approved installation of signal at crossing of US99E over Oregon Electric tracks.
16401		Salem. Pacific Hwy.East. Approved installation two traffic signals.
		Portland. Mt. Hood Hwy. (Powell Blvd.) Approved paying half for installation of 13 signals. Agreement to be prepared.
		Coos County. Cape Arago Secdy.Hwy. Empire. City renews request for traffic signals. Engineer to check.
		Linn County. Santiam Hwy. Hoodoo Ski Bowl. State to remove snow from road into Bowl.
16402		State Tax Street Funds: See EXHIBIT "B".
		State Tax Street Funds: See EXHIBIT "C".
		Washington County. Tualatin Valley Hwy. Forest Grove. City requests one-way street system. Action deferred.
16403		Clackamas County. Oswego Hwy. Oswego. Approved payment to Oregon Iron and Steel Co. for repair to its sewer.
		Engineer's award of contracts confirmed by Commission.
16404		Extensions of time granted, as follows: Contracts Nos. 3203, 3064, 3012, 3189, 3011, 3096, 3111, 3052, 3077, 3016, 3009, 3192, 3010, 3179, 3121, 3123, 3119, 3115, 3190.

Page	Date 1949 Dec. 19	Subject
16410		Contracts completed and accepted. See EXHIBIT "D".
		Malheur County. Old Oregon Trail. County requests widening on Ontario Spur Section. Action deferred.
		Clatsop County. Oregon Coast Hwy. Arch Cape Tunnel. Approved agreement with Pacific Power & Light Co. for lighting.
		Silver Falls State Park. Approved Nohlgren's cancellation of concession lease.
		Insurance coverage on ferry and bridge operations. Present policies to be continued, renewal on "Enegren" & "Susan G."
16411		Fire insurance policies. State-wide application approved.
		Insurance. Blanket fidelity bond. Policy to be obtained from General Casualty Company for three year period.
		Warm Springs Hwy. Approved as Group I Hwy. with limitation on gross weight. See EXHIBIT "E".
16412		Crater Lake Hwy. Portion approved as Group I Hwy.
		Tiller-Trail Secondary Hwy. Approved as Group II Hwy.
		Junction City-Eugene Secondary Hwy. reclassified as Group I Hwy.
		Load Limits. Nehalem Secondary Hwy. 36-ton limit imposed on two bridges. See EXHIBIT "F".
		Load Limits. Wallowa Lake Hwy. 36-ton limit imposed on two bridges. See EXHIBIT "F".
16413		Load Limits. Alsea Hwy. 50 percent reduced limit where construction is under way. See EXHIBIT "G".
		Load Limit. Request to raise axle load limit to 22,000 pounds for hauling near Nyssa denied.
		Load Limit. 980 violations pending in courts. Engineer to report.
		Load Limit. Protests on possible reduced limits. No change in Commission policy.

		Delegation from Prineville thanked Commission for improvement to Ochoco Hwy. and extended invitation to picnic at Painted Hills State Park, August 27, 1950.
		Umatilla County. Oregon-Washington Hwy. Athena. Sale of gravel pit to city approved.
		Alsea Hwy. near Benton-Lincoln County line. Sale of abandoned r/w to Otto Dieckoff approved.
		Curry County. Oregon Coast Hwy. Gold Beach. Payment of A. G. Walker claim approved.
16622		Grant County. Kimberly-Long Creek Hwy. Dry Canyon-Monument Section. Payment of Harold Cork claim approved.
		Columbia County. Columbia River Hwy. Rainier-Goble Section. Chas. M. Kelley $1,000 claim for new spring approved; also $125 payment to Mr. Ostrom for pump.
		Yamhill County. Pacific Hwy. West. Dundee. Payment of $500 to Pearl Etzwiler for well approved.
		Sale. Salvage from r/w purchases confirmed.
16623		Clatsop County. Oregon Coast Hwy. south of Tolovana Park. Arvin Sabey, Seaside, granted permission to use spring on r/w.
		Washington County. Sunset Hwy. H.T. & Ethel Beach. Change in access location approved.
16624		Washington County. Sunset Hwy. Barnes Road. Miss Mina Foltz' request for change from private to commercial access approved.
		Multnomah County. Columbia River Hwy. Dodson-Bonneville Section. Payment of $200 to Luis & Irma Whispell to vacate property approved.

Page	Date 1950 Mar.20	Subject
16624		Eugene. Agreement with City for City's use of hwy. property above Judkins Point approved.
		Douglas County. Reedsport. Vacation of street approved.
		Umatilla County. Oregon-Washington Hwy. Freewater. Easement to use gravel pit granted U. S. Army Engineers.
16625		Klamath Falls. Acquisition of Cobo and other property on west side by-pass of U.S.Hwy.97 denied.
		Klamath Falls City Park Commission. Moore Park stockpile site lease renewed.
		Linn County. Santiam Hwy. Sweet Home. Improvement within city to be made entirely at state expense.
16626		Salem. Pacific Hwy. East By-pass. Authority granted to stake proposed route east of Salem.
		Malcolm H. Hawke appointed as auditor, effective March 1, 1950. See EXHIBIT "C".
		Bond for auditor. Referred to Commissioner Reynolds & Secretary.
		Signs on hwy. r/w. All infringements, by private owners or public, to be treated alike. Warning issued before action taken.
		Astoria-Megler Ferry. Columbia River. Award of contract deferred to see if low bidder agrees to new Astoria dock location.
16627		Award of contracts. Chairman Banfield announces publicly.
16628		Overloads. Counsel reports favorable response from district attorneys handling court cases. Instructed to thank them.
		Umatilla County. Pendleton. Disposal of land on US30 and on Airport Secdy.Hwy. Action deferred. (See March 21)
16629		Lincoln County. Corvallis-Newport Hwy. County P.U.D. is granted permission to place transformer temporarily on r/w east of Toledo.
		Tillamook County. Requests exchange of Pacific City-Sand Lake Loop County Road for Little Nestucca Secdy.Hwy. Engineer to study.
16630		Historical signs. Requests from Old Oregon Trail, Inc. referred to Oregon Historical Society. Their recommendations approved.
16631		Second Post War Construction Program. Engineer reports status of surveys for projects.
		Starkey Secdy.Hwy. in Union County-John Day Hwy.in Umatilla County. Proposed connection. U.S.Forest Service to be consulted.
		Hilgard-Starkey Secdy.Hwy. Proposed relocation above possible Grand Ronde damsite. No change in present improvement plans.
		Multnomah County. Sauvies Island Bridge approaches. Bids for construction to be called in April.
		Washington County. Hillsboro. Construction of new hwy. along Baseline to Sunset Hwy. requested. Engineer to determine cost of survey.
16632		Lane County. Springfield-Creswell Secdy.Hwy. Request for immediate improvement denied. Consider in future program.
		Malheur County. Old Oregon Trail. Ontario-Snake River Bridge. Widening requested. Survey authorized.
		Wheeler County. Fossil. Construction of maintenance hdqtrs. bldg. approved.

Page	Date 1950	Subject
	Mar.20	
16633		Clackamas County. Pacific Hwy.East at Naef Road. Construction of left-turn lane and traffic signal at drive-in theater approved if owner will pay entire cost.
		Jefferson County. The Dalles-California Hwy. Madras. Cooperation with Bureau of Reclamation on culverts approved.
		Union County. Imbler-Summerville County Road. Improvement of additional 2.4 miles approved.
16634		Coos County. Oregon Coast Hwy. Chrome Plant-Cedar Point. Survey adopted. See EXHIBIT "D".
		Coos County. Oregon Coast Hwy. Chrome Plant-Coquille. Coquille Grange urges four-lane hwy. Denied.
		Portland. University of Oregon Medical School. Proposed road & parking area. Loan of engineering personnel approved.
		Portland-Vancouver. Future Columbia River bridge. State of Washington's request for cooperative study denied. Engineer to conduct independent survey on Oregon side.
16635		Wasco County. Columbia River Hwy. Celilo Falls Indian fishing area. Additional parking space requested. Action deferred.
		T. H. Banfield. Resolution in his honor to be placed in minutes. See EXHIBIT "E".
		Meeting adjourned at 5:00 p.m. to reconvene on following morning.
	Mar.21	
16636		Bids received on the following projects:
		Ladd Canyon-North Powder Section, Old Oregon Trail
16637		Milwaukie Maintenance Storage Shed
		Jewell Maintenance Building, on Nehalem Hwy.
		Port Orford Section, Oregon Coast Hwy.
16638		Canyon Creek Summit-Soda Mountain Section, John Day-Burns Hwy.
		Goshen-Creswell Section, Pacific Hwy.
		Brogan Maintenance Building, on John Day Hwy.
		South Unit, Denver Ave.-Columbia Slough Section, Pacific Hwy.E.
16639		Astoria-Megler Ferry. Columbia River. Astoria Navigation Company, ferry service low bidder, agrees to use either 17th or 14th Street dock in Astoria. Contract awarded to them.
		Washington County. Hillsboro-Forest Grove delegation urges construction of new hwy. east of Hillsboro in lieu of widening Tualatin Valley Hwy. Engineer to determine cost of survey.
		Central Oregon. William Niskanen, Bend, requests 7 improvements in area. No action.
16640		Benton County. Lobster Valley. Delegation urges extension of Alsea-Deadwood Secdy. Hwy. into Lobster Valley. Benton County Court offers to take over Tampico-Lewisville Secdy. Hwy. in exchange. Cost of acquiring private road to be determined.
16641		Yamhill County. Pacific Hwy.West. C.H. Baynard's request for permission to maintain sign on r/w near Dayton Jct. denied.
16642		Recessed at 12:00 noon to reconvene at 2:00 p.m.
		Umatilla County. Pendleton. Rex Ellis requests that state sell him small tract for bldg. for Secretary of State. No action.

Page	Date 1950 Mar.21	Subject
16642		Malheur County. Old Oregon Trail. Delegation requests improvements on Ontario-Snake River Bridge Section and on Nyssa-Adrian Secdy.Hwy. Survey authorized on Ontario-Snake River Section.
16643		Klamath Falls. Delegation inquires status of plans for west side by-pass for US97 through city. No plans.
16644		Esplanade Underpass drainage to be investigated. South Sixth Street viaduct. R/w being acquired. Klamath Falls traffic grid system. Survey funds re-allocated. Klamath Avenue repair & maintenance denied — not state hwy.
		Award of contracts. Chairman Banfield makes public announcement.
16645		Lane County. Siuslaw Hwy. Junction City-Triangle Lake. Improvement requested. Reconnaissance survey authorized.
16646		Columbia River Hwy. Hood River. Request to haul logs approved.
		Portland. Southeast 82nd Avenue. Delegation requests traffic signals and safety lanes. Engineer to re-investigate.
16647		Coos County. Oregon Coast Hwy. Coos Bay Section. Increase in authorization approved and authority granted to call bids.
		Harney County. John Day-Burns Hwy. Crow Flat-Poison Creek. B.P.R.'s request that state maintain section approved.
		Josephine County. Grants Pass. City requests widening of Pacific Hwy. in city. Preliminary survey authorized.
		Washington County. Beaverton. Widening of Beaverton-Hillsdale Hwy. in city. Engineer to make personal inspection.
16648		Douglas County. Pacific Hwy. Roseburg. Construction of left-turn refuge at Garden Valley Road intersection approved.
		Crook County. Prineville. City-requested truck route by-pass denied.
		State Tax Street Funds. See EXHIBITS "F", "G", AND "H".
		Special State Tax Street Fund projects in Amity, Eagle Point, Oakland, Yoncalla approved. Cities to pay their share in advance.
16649		Yamhill County. City of Amity. Request for load denied.
		Special State Tax Street Fund projects. Seaside and Silverton. Action deferred. Projects to be further analyzed.
		Lincoln County. Corvallis-Newport Hwy. Toledo. Request for flashing beacon denied.
		Umatilla County. City of Umatilla's request for lights on bridge in city denied.
16650		Engineer's contract awards on bids received February 6 and 7, 1950, confirmed.
		Extensions of time granted as follows: 2768, 2792-A, 3016, 3093, 3095, 3235.
16652		Contracts completed and accepted as follows: Contract Nos. 2768, 2792-A, 2982, 2997, 3093, 3180, 3189, 3198, 3229, and 3242. See EXHIBIT "I".
		Douglas County. Oregon Coast Hwy. Gardiner. Lumber Company requests easement authorizing encroachment. To be prepared.
16653		Lane County. Oregon Coast Hwy. Agreement with Martin Peterson for use of Cape Creek quarry renewed for one year.

Page	Date	Subject
	1950 Mar.21	
16653		Coos County. Oregon Coast Hwy. North Bend-Coos Bay. Coos Bay Dredging Company allowed to cut center dividing strip.
		Grant County. John Day Hwy. Prairie City-Dixie Summit. R/w abandoned to county. See EXHIBIT "J".
		Coos County. Coos Bay-Roseburg Hwy. Bridge over Sandy Creek to remain as historical landmark. Agreement approved.
16654		Allen Press Clipping Bureau service to be cancelled.
		Northwest Traffic Engineering Conference at Oregon State College. Hwy. Dept. to act as one of sponsors.
		Columbia River Hwy. Bridal Veil-Parkrose and Dodson-Troutdale. Requests to haul logs approved.
		Load limits reduced and lifted. See EXHIBITS "M-1" and "M-2".
16655		Crook County. City of Prineville's offer to purchase two pieces of used equipment approved.
		Equipment and office furniture. Purchase approved.
		Malcolm H. Hawke. Authorized to go to San Francisco to inspect Union Pacific Railroad books re Bridal Veil Overcrossing Project.
		Manley Robison to attend Third Annual Northwest Resort Conference at Washington State College, April 2 to 4.
		Carl Jordan to attend Sportsmen and Vacation Show in Los Angeles, April 6 to 10.
		W. C. Williams. Confirmed previous telephone authorization to attend conference in Los Angeles on Feb.28 re Sullivan Gulch.
		Forrest Cooper. Confirmed previous telephone authorization to attend conference in Los Angeles on Feb.28 re Sullivan Gulch.
16656		Mark Astrup. Confirmed attendance at 3rd Annual Roadside Development Coordinators' Conference, Columbus, Ohio, March 22-25.
		George W. Hester. Confirmed attendance at Legislative Interim Committee meeting in Boise, Idaho, February 20 to 21.
		Curry County. Oregon Coast Hwy. Port Orford. Resolution re closure of streets adopted. See EXHIBIT "K".
		Klamath County. The Dalles-California Hwy. Barkley Springs-Algoma. Western Union Telegraph Company agreement approved.
		Portland. Interstate Bridge. Tri-party agreement re phone lines on bridge approved.
		Benton County. Pacific Hwy. West. Camp Adair. Acquisition of 2.88 acres from Federal Government approved. See EXHIBIT "L".
16657		Umatilla County. Pendleton. Disposal of two tracts again discussed. Chief Counsel outlines plan. Will prepare agreement.
		J. M. Devers to take vacation.
		Portland Steel Bridge. Chief Counsel reports on negotiations to purchase upper deck.
		Commission meeting, Special, set for April 3.
		Commission meeting, Regular, set for April 24 and 25.
16658		Agreements and other papers signed.
16659		Meeting adjourned at 5:00 p.m.

Portland, Oregon
December 5, 1949

The State Highway Commission conferred with members of the Legislative Highway Interim Committee at 10:00 a.m. in the Imperial Hotel regarding matters pertaining to the Committee's study of highway, road and street needs, revenue and taxation. Present representing the State Highway Department were:

T. H. Banfield, Chairman
Ben R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
W. C. Williams, 1st Asst. State Highway Engineer
W. W. Stiffler, 2nd Asst. State Highway Engineer
H. B. Glaisyer, Secretary

Representing the Interim Committee were:

Hon. Ralph T. Moore, State Representative, Coos Bay, Chairman
Hon. Paul L. Patterson, State Senator, Hillsboro, Secretary
Hon. Jack Bain, State Senator, Portland
Hon. Elmo E. Smith, State Senator, Ontario
Hon. Max M. Landon, State Representative, Sweet Home
Hon. Vernon Wilson, State Representative, Vale
Hon. Edward A. Geary, State Representative, Klamath Falls
O. R. Eckersley, Statistician, Salem

The following subjects were discussed:

1. The five divisions of the state which serve as a basis for highway fund expenditure allocations;
2. Relation between Highway Commission and Bureau of Public Roads;
3. Formulae, if any, for determination of priorities in road construction and modernization;
4. Purpose of use classification with respect to new highways, particularly that classification which temporarily prohibits truck operation;
5. Effectiveness and efficiency of city and county highway administration expenditures -- with a view to effecting improvement therein;
6. Specific highway programs, both current and future;
7. Problem of returning secondary roads to the counties;
8. Manner of determining priority with respect to the provision of costly facilities in cities, such as bridges, underpasses, overpasses, cloverleaf structures, etc.
9. Recommendations and suggestions.

The meeting was called to order by Mr. Moore, who explained that the Committee plans to tour the state to secure information for its report to the Legislature and wants to be in position to answer any questions that might be propounded in the course thereof, hence this conference. There followed a general discussion of the above-listed topics, during which numerous questions were asked by the members of the Interim Committee, and

detailed answers given by the members of the State Highway Commission, Chairman Banfield taking the lead. In the discussion of Topic No. 5, it appeared to be the consensus of opinion of all present that there is insufficient control of expenditures by the counties and the cities of the funds they receive from state highway revenues, and that the counties and cities should be required to set up an appropriate system so that an accurate accounting for funds may be made periodically through some state agency. It was suggested that the Legislature might require the counties and the cities to budget their highway funds and to render an accounting for the expenditure of the same at the end of each year.

Under Topic No. 6, specific highway programs, Chairman Banfield presented for the Interim Committee's information copies of the Highway Commission's currently active programs covering the periods 1946-1949 and 1950-1951. Maps were exhibited showing the locations of several projects. The Commission ordered that each member of the Interim Committee be furnished with copies of this material for his information.

In the discussion of Topic No. 9, upon request of Chairman Banfield, the State Highway Engineer suggested that, among other things, the trucking industry, which now contributes only about 28% of the highway fund, should be required to pay into this fund up to 33-1/3%. He brought into the discussion a letter from Neff & Frohnmayer, Attorneys, Medford, regarding the authority for limiting to 32,000 pounds the weight on the tandem axle of a tandem-axle pole trailer used in combination with a truck-trailer equipped with tandem rear axles. In the opinion of these attorneys, the operator of such equipment is entitled to a dual-axle weight on the trailer of 38,000 pounds, or at least 35,200 pounds, if the 650 formula, which entitles him to a tolerance of 10% governs. The Engineer advised that a representative of the Engineering Department and a representative of the Legal Department had conferred with and had apparently convinced the District Attorney of the fallacy of such reasoning.

The Engineer brought up for discussion the matter of processing, through the Highway Department's I.B.M. facilities, statistical information obtained by the Committee from the Public Utilities Commissioner. He estimated the total cost involved at approximately $40,000. It was the feeling of the Commission that the cost is justified if desired results are obtained. The Engineer was instructed to have someone acquainted with the procedure meet with the Interim Committee on the following day to explain details, at which time it can be decided whether or not to go ahead with the processing.

The meeting recessed for luncheon from 12:00 m. to 1:30 p.m. and adjourned at 3:40 p.m., following which the State Highway Commission met in special session for discussion of the following matters, the same persons and Forrest Cooper, Right of Way Engineer, being present and participating:

1. Status report on surveys for projects approved for the 1950-51 construction program. The Engineer submitted a written report on this subject for the Commission's information and study. The Commission deferred action on the matter.

2. Status report of projects in the First Postwar Construction Program which have not yet been contracted. The Engineer submitted a detailed

written report dated November 1, 1949, on this subject, which the Commission discussed item by item as follows:

a. Durkee Undercrossing, Old Oregon Trail, 1947 Federal Aid Project, present estimated cost $105,000: The Commission approved the Engineer's recommendation that this project be deferred until definite information has been received from the Union Pacific Railroad Company with respect to a proposed revision of its alignment in this vicinity, but did not approve the recommendation to allocate the money elsewhere at this time.

b. Multnomah County Line-Milwaukie Channelizing and Service Road, state project, estimated cost $65,000: The Engineer advised that the channelizing work is now under contract, but the service road construction, which is estimated to cost $45,000, is being held up pending a satisfactory arrangement with the City of Milwaukie concerning the adjacent federal housing project. The Commission approved the report.

c. Coquille River Bridge at Myrtle Point, 1948 Federal Aid Secondary Project, present estimated cost $240,000: The Engineer advised that the survey and designs for this structure have been completed, but the project cannot be advertised for bids until satisfactory agreement can be effected with the Southern Pacific Company, which is involved. A conference with officials of the Company, he said, would be held the following week and he hopes to be able to secure the deletion of some unreasonable conditions of the agreement as presently prepared by the railroad company. The Commission approved the report.

d. Port Orford Section of the Oregon Coast Highway, state project, present estimated cost $91,000: The Engineer advised that the plans for this project are complete and an agreement has been executed by the City of Port Orford. However, this agreement calls for the closure of certain streets, which has not been effected to date. As soon as the city of Port Orford has complied with this requirement, he said, the project will be advertised for bids. As a result of discussion, the Engineer was instructed to go to Gold Beach and discuss the matter with city officials and to analyze the project personally and report the results thereof.

e. Greenwood Underpass on the Central Oregon Highway in Bend, state project, estimated cost $60,000: The Engineer advised that because of inadequate drainage, the expense of remodeling the existing underpass as originally proposed is not justified, but he has investigated the possibility of a form of signalization using a traffic eye which he believes will eliminate the existing hazards. He estimated the cost of such signalization at $2,000 and recommended approval of the expenditure, and the cancellation of the underpass remodeling project. The Commission approved the recommendation.

f. Klamath Falls One-way Streets on The Dalles-California Highway, state project, estimated cost $26,000. The Engineer recommended deletion of this project from the program and the utilization of the funds elsewhere

because of the fact that the city of Klamath Falls is divided as to the desirability of the one-way street system and to date has not approved the plan. The Commission approved the recommendation.

g. Bly Section of the Klamath Falls-Lakeview Highway, state project: The Engineer advised that due to the extensive drainage facilities that are required, the estimated cost of the proposed improvement through Bly is $60,000. He pointed out that the original allocation for this improvement was only $15,000, and that he previously had requested authority to make further investigation to determine what could be done for such amount. This investigation, he said, revealed that a satisfactory drainage and pavement-widening project about three blocks long through the central part of town can be accomplished for about $25,000. He recommended such an improvement and advised that if it were approved he would advertise this project for bids within the next couple of months. The Commission approved the recommendation.

h. Springfield Section of the McKenzie Highway, state project: The Engineer advised that the call for bids for this project was deferred pending the formation of a drainage district which was necessary to justify the highway improvement. Such district, he said, has been formed, an agreement relative to drainage costs has been prepared, and he expects that the project will be ready to advertise for bids in the spring of 1950. He estimated the total cost involved at $410,000, using the North "A" Street route. He pointed out, however, that local people favor the South "A" Street route, which is approximately $100,000 more costly. He said that he would report further on the matter at the next meeting.

i. Oak Hill Grade Separation Project, Richardson-Eugene Highway, estimated cost $117,000: The Engineer advised that bids for this project were received on November 8, but the award of the contract was held pending satisfactory conclusion of difficulties with the railroad company, about which the Chief Counsel expects to confer with the railroad company officials on the following day.

j. Fisher Road-Oak Hill Section, Richardson-Eugene Highway, state project, estimated cost $78,000: The Engineer advised that bids for this project were also received on November 8, but the awarding of the contract was held up pending satisfactory conclusion of conferences with the railroad company which is involved.

k. Broadway Bridge-Steel Bridge Section, Pacific Highway West in Portland, 1948 Urban Project, estimated cost $680,000: The Engineer advised that this project requires a great amount of detailed work, most of which has to be ironed out with the railroad company. However, the survey is complete, the design is well along, and it is planned to advertise the project for bids to be received at the March meeting of the Commission. The Commission approved the report.

l. Sauvies Island Bridge Grading and Paving Project, Multnomah County Road, 1948 Federal Aid Secondary Project, estimated cost $100,000:

The Engineer advised that the contract for the construction of Sauvies Island Bridge was awarded in January, 1949, but the structure will not be advanced to the stage that approaches can be constructed until about August, 1950. He said that the plans for the approaches are now ready and that the project will be advertised for bids early in the spring, so the contractor will have sufficient time to make adequate preparations for construction as soon as the bridge work will permit.

m. Denver Avenue-Union Avenue Landscaping Project, Pacific Highway, state project, estimated cost $40,000: The Engineer questioned the justification of this improvement because of the expense involved in obtaining a water supply for maintenance purposes. He suggested that this project be cancelled and the $40,000 allotment used on other landscaping work in Division 1. He recommended such work on the Upper Columbia River Highway. The Commission approved the cancellation of the project and instructed the Engineer to report back the particular location on the Columbia River Highway where he would suggest that the money be applied.

n. Troutdale-Multnomah Falls Landscaping on the New Columbia River Highway, state project, estimated cost $10,000: The Engineer advised that the amount allocated for this work is insufficient to accomplish the desired results, but if the Commission will definitely authorize a transfer of funds from the Denver Avenue-Union Avenue Project, then he will arrange to call for bids for landscaping on the Columbia River Highway as soon as suitable weather permits. The Commission deferred a decision in the matter pending the Engineer's report on the transfer of funds from the Denver Avenue-Union Avenue Project.

o. Little Nestucca River Bridges on the Little Nestucca River Highway, Major Betterment Project, estimated cost $55,000: The Engineer advised that the construction of this project has been deferred pending possible use of existing steel spans which are being replaced at Cottage Grove on the Pacific Highway. He mentioned a proposal by the Tillamook County Court for an exchange of the Little Nestucca River Highway for a county road extending from Cloverdale through Pacific City to Hemlock. In the event this exchange of roads does not materialize, he said, it will be two or three months before the old spans from Cottage Grove would be available. He anticipated that the project would be advertised for bids in about April, 1950. The Commission took no action.

p. Umatilla River Bridge, Columbia River Highway at Umatilla, state project, estimated cost $163,000: The Engineer advised that the plans for this structure are now complete and that he contemplates advertising the project for bids to be received at the Commission meeting on December 19 and 20.

q. Austin Road and Cemetery Road grade separation structures on the Sunset Highway, 1947 Federal Aid Project, total estimated cost $51,000: The Engineer advised that at the time these projects were approved it was believed that a large building development was imminent adjacent to the Sunset Highway at this location. No building development has occurred, and there appears to be no justification for the

construction of the grade separation structures at this time. He recommended that both projects be removed from the program and funds allocated elsewhere. The Commission approved the recommendation.

r. Yamhill Section pavement widening project on the Tualatin Valley Highway in the town of Yamhill, state project, estimated cost $5,000: The Engineer advised that it was contemplated to do some minor pavement widening through the central part of this town, but several minor betterment improvements have been accomplished, so the project is no longer warranted. He recommended that it be deleted from the program. The Commission approved the recommendation.

3. The Engineer presented for the Commission's consideration a request for authority to conduct location surveys for an additional construction program estimated to cost $22,675,000. He submitted a list of the projects, identical to the list presented at the previous meeting, and estimated the cost of necessary surveys at $384,000. The Commission deferred action on the matter until its next meeting.

4. The Engineer brought up for discussion approval of two options that have been obtained covering an easement for a hauling road from a rock quarry, and two small parcels of right of way on the Fishhawk Falls Secondary Highway. One option was obtained from E. E. Cardiff and covers a portion of right of way, for $475, and for $200 a perpetual easement for a hauling road across Mr. Cardiff's land, or a total of $675. The other option, he said, was obtained from Mr. E. E. Shaw and involves a payment of $250 for a small parcel of right of way and a perpetual easement for a hauling road. He recalled that when this matter was discussed at the previous meeting he overlooked the fact that all of the right of way for this highway with the exception of these two parcels now under consideration, was acquired before the war. He also said that further contacts with the owners of both properties reveal that the right of way and the hauling road easement cannot be obtained at less expense. He recommended, in view of the fact that the hauling road leads to a state-owned quarry which is needed now for a rock production project and will also be needed in the future, that the options as submitted by the Right of Way Department be approved, inasmuch as it will assure the state of a perpetual hauling road to its quarry and will complete the acquisition of right of way for this highway. He pointed out that the bids for the rock production project have been received, but the contract is being held up pending settlement of this right of way matter. The Right of Way Engineer concurred in the recommendation. The Commission approved the recommendation unanimously, with the understanding that no commitment whatsoever is being made as to the construction of the Fishhawk Falls Secondary Highway.

5. The Right of Way Engineer brought up for discussion the matter of acquiring a permanent right of way easement for a hauling road from George A. and Helen Rice on the Yellow Creek-Calapooya Creek Section of the Elkton-Sutherlin Highway in Douglas County. He stated that this road is needed to provide permanent access to a gravel bar which is owned by the state, and that

the Rices are willing to grant the state such roadway on a permanent basis for the sum of $500, plus $100 for construction of fences and a gate. He recommended payment of such sum so that access to the gravel bar may be had for all time. The Commission approved the recommendation.

6. The Engineer presented a request from the City of Salem for permission to construct a 12" water pipeline temporarily along the sidewalk on the Willamette River Bridge between Salem and West Salem. He explained that the sidewalk is 5' wide and that the watermain will occupy about 1'5" of this area, leaving a 3'7" width of sidewalk for pedestrian use, such arrangement to be used until the new bridge is constructed on the Marion Street location. He gave as his belief that the pipeline will not seriously interfere with pedestrian traffic, and recommended the granting of the permit until such time as a permanent line can be established on the new bridge. The Commission approved the recommendation.

7. The Engineer brought up for discussion a proposed agreement with the U. S. Army Engineers covering the relocation of a portion of US730 and US395 to permit construction of McNary Dam. He recalled that the Commission at its previous meeting considered and approved entering into such an agreement. He presented the agreement forms which he said have been approved by authorities in Washington, D. C., and explained details of the provisions. In the discussion of this matter it was brought out that several railroad-highway grade separation structures are required. The question arose whether or not these structures will be constructed without cost to the state. Because of this question, the Commission decided not to execute the agreements until this feature has been clarified and assurance given the Commission in writing that the structures will be constructed with no expense whatsoever to the State of Oregon.

8. The Engineer requested approval of the relocation survey of the Oregon Coast Highway between Chrome Plant and Coquille, Coos County, so the Right of Way Department can proceed with securing options for right of way needed for this project. The Commission deferred a decision in the matter until its next meeting.

9. The Commission discussed a request from the County Court of Lincoln County that the structural steel from the old bridge over Scott Creek on the Alsea Highway, which bridge is being replaced by the U. S. Bureau of Public Roads with a modern structure, be given to Lincoln County without cost for use on its County Road system. The Engineer advised that the old bridge was also built by the Bureau of Public Roads, but they consider that title to the steel and responsibility for its disposal rests with the State Highway Commission. The steel is of no value for state highway purposes, he said, so the Commission is free to give it to the county if it so desires. However, he suggested that a charge of five cents a pound for the steel be made, which is in conformity with past practice in matters of this kind, rather than simply give it to the county free of cost. The Commission unanimously approved sale of the steel to the county at five cents a pound. If the county doesn't want it at that price, then the Engineer is authorized to sell it at the same price to Lane County, which has also made inquiry concerning it.

10. The Commission discussed with the Right of Way Engineer the procedure followed by him in connection with real property appraisals, particularly the following:

1. Does the Right of Way Engineer personally check appraisals that are submitted to his office for approval and which he recommends to the Commission for acceptance?

2. What procedure is followed when two or three separate appraisals are made by different individuals. Does each of these appraisers know the amount of the appraisals made by the others? Chairman Banfield explained that right of way costs are increasing and there is a question in the minds of the Commissioners whether or not they are being too liberal in their settlements. The Commission, he said, takes it for granted that when the Right of Way Engineer recommends a settlement he has personally inspected the property. The matter was discussed briefly and as a result the Right of Way Engineer was instructed to submit a detailed report in writing.

11. The Commission had under discussion the matter of retaining in the Highway Department employ, beyond their retirement dates, certain employees whose services according to action taken by the Commission at the previous meeting, are to be dispensed with in conformity with the State Retirement Law on January 1, 1950. The Commission decided unanimously not to make any changes in the action taken at the previous meeting.

12. The Chief Counsel reported that he still has several longstanding condemnation cases pending in Douglas County concerning acquisition of right of way on which the highway contractor was allowed to enter and perform work before settlement for the right of way was effected. These cases, he said, are very important and in his estimation it will be advisable to employ special counsel to handle them. He requested authority to enter into an arrangement with Mr. George Neuner, Jr., formerly Assistant Counsel for the Highway Department, to handle them. The Commission approved the request unanimously if necessary to secure the services of additional legal help.

The meeting adjourned at 5:15 p.m.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

December 5, 1959

Portland, Oregon
December 19, 1949

The State Highway Commission met in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben. R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Ass't. State Highway Engineer
W. W. Stiffler, 2nd Ass't. State Highway Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction, were opened and read aloud by the Secretary in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room.

GRANT COUNTY

Dixie Summit-Baker County Line Rock Production Project on the John Day Highway. State Project. Requires approximately 10,000 cu.yds. crushed rock in stockpile.

Barney B. Helser, Molalla	$ 25,400.00
E. C. Swaggart Co., Eugene	26,000.00
Vernie Jarl, Gresham	27,000.00
C. E. Leseberg, Nyssa *	27,345.00

* Bidder will not accept projects totaling over $176,746.00

GRANT COUNTY

West Unit, Hamilton-Long Creek Section of the Kimberly-Long Creek Secondary Highway. Federal Project No. S-260(3). 5.44 miles of grading, surfacing and oiling; also furnishing 1,700 cu. yds. crushed rock in stockpile. Requires approximately 65,800 cu. yds. excavation; 30,400 cu.yds. crushed rock; 100 tons RC-3 and 180 tons 151-200 asphalt.

Stevenson Constr. Co., Salem	136,433.00
Rogers Constr. Co., Portland	140,326.00
Spada Bros. & K. C. Dack Constr., Portland	140,384.10
C. E. Leseberg, Nyssa *	147,436.00
E. H. Itschner, Molalla **	150,661.00
Erland & Blickle, and F. H. McEwen, Vancouver, Wn.	153,429.00
E. C. Hall Co., Portland	156,035.00
G. D. Dennis & Son	171,496.00

(Cont.)

West Unit, Hamilton-Long Creek Section (Cont.)

McNutt Bros., Eugene	$ 190,517.60
C. J. Eldon, Portland	196,940.00

* Bidder will not accept projects totaling over $176,746.00
** Bidder will accept only one project.

HARNEY COUNTY

Lawen-Crane Section of the Burns-Crane Highway. Federal Project No. S-48(2). 10.9 miles of grading, surfacing and oiling; also furnishing 3,300 cu. yds. crushed materials in stockpile. Requires approximately 97,000 cu. yds. excavation; 55,000 cu. yds. cinder base material; 10,800 cu. yds. crushed cinders, rock or gravel; and 660 tons 151-200 asphalt.

C. E. Leseberg, Nyssa *	131,265.00
E. C. Hall Co., Portland	142,830.00
Inter City Sand & Gravel Co., Eugene	144,807.50
Erland & Blickle & F. H. McEwen, Vancouver, Wn.	145,294.50
D. F.McKenzie, Salem	148,894.50
Loyd Calkins, Ocean Lake	151,050.00
Stevenson Constr. Co., Salem	153,724.50
J. N. & M. J. Conley, Portland	159,547.50
K. F. Jacobsen Co., Portland	160,980.00
Durbin Bros., Eugene	163,003.50
Parker-Schram Co., Portland	166,536.00
M. L. & C. R. O'Neil, Creswell	174,694.50
Spada Bros. & K. C. Dack Constr., Portland	179,936.50
McNutt Bros., Eugene	186,184.00
G. D. Dennis & Son, Portland	1[illegible],925.00

* Bidder will not accept projects totaling over $176,746.00

JACKSON COUNTY

Trail and Eagle Point Sections of the Crater Lake, Tiller-Trail and Little Butte Highways. State Project. Rock Production. Requires approximately 18,500 cu. yds. crushed rock or crushed gravel in stockpile.

Fred Lemery, Lebanon *	45,880.00
Barney B. Helser, Molalla	46,990.00
M. C. Lininger & Sons, Medford	48,330.00

* Bidder will accept award of only one project

KLAMATH COUNTY

Chiloquin-Sprague River Section of the Sprague River Road. State Project. 17.91 miles of surfacing and oiling; also furnishing 1,800 cu. yds. crushed material in base. Requires approximately 24,000 cu. yds. crushed rock; and 1,300 tons 151-200 asphalt. This project may be bid in combination with the Chiloquin (Chocktoot Street) Project in Klamath County.

(Cont.)

Chiloquin-Sprague River Section (Cont.)

J. N. & M. J. Conley, Portland	$ 123,048.00
E. C. Hall Co., Portland	125,442.00
J. C. Compton Co., McMinnville	127,520.50
Babler Bros., Portland	129,938.00
E. H. Itschner Co., Molalla	131,784.25

J. N. & M. J. Conley, Portland	42,892.00

* Bidder will accept award of only one project

The Commission unanimously approved the minutes of its meeting held on November 7 and 8, 1949.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following matters:

1. Proposed purchase of an addition to Dimmick State Park on the Mount Hood Highway: The Parks Superintendent advised that Dimmick Park is located about twenty miles south of the city of Hood River, and consists of eighteen acres of land, and that the proposed addition consists of five acres, for which the owner is asking the sum of $1,000. He further stated that the County Court of Hood River County has agreed to contribute $500 toward the purchase price. He recommended acquisition of the property. The Commission approved the recommendation unanimously on the condition that Hood River County will pay fifty percent of the cost involved.

2. Report of Parks Engineer, Mr. C. H. Armstrong, relating to his attendance at the Northwest Park Association meeting which was held in Spokane, Washington, on December 3, 1949: The report was rendered in writing, and discussion of the same was deferred.

3. Tentative deed covering acquisition of Pacific Borax Company lands in Curry County: The State Parks Superintendent explained the provisions of the deed, advising that they are in conformity with the

ideas of the Commission as expressed at the previous meeting. The Commission referred the deed to the Chief Counsel to check. He was instructed to forward it to the Pacific Borax Company for execution if the provisions of the deed are satisfactory and in the state's best interests.

4. Status report on acquisition of Curry County ocean waysides: The Right of Way Engineer, Mr. Forrest Cooper, rendered a written report on this subject, which contained a statement of the acreage and cost factors involved in the acquisition of this recreational area. He pointed out orally that there are sixteen properties involved, for which options have been approved by the Highway Commission for 654.81 acres, totaling $70,316; that options have been secured but have not been approved by the Commission covering 400.32 acres at a cost of $72,864. He estimated the cost of acquiring the remaining acreage, totaling 921.7 acres, including the Pacific Borax Company property, at $58,500, making a grand total of 1,976.83 acres at $201,680. He exhibited a map showing the entire acreage.

In the discussion of this matter the Parks Engineer pointed out that the option obtained from Mr. Colgrove, covering 274.58 acres at $55,000, contains provisions that Mr. Colgrove shall have commercial access to the highway from his land, which is not in strict conformity with the Commission's established policy, but Mr. Colgrove is unwilling to deed his property to the state on any other basis. The members of the Commission expressed their feeling that, inasmuch as the area is being acquired strictly for recreational purposes, it should be preserved for such purposes and no commercial access to the highway should be allowed. Moreover, in fairness to others whose properties have been acquired, commercial access should be denied Mr. Colgrove. Following considerable discussion, the Commission referred the Colgrove item back to the Chief Counsel with instructions to renegotiate purchase on the basis of providing Mr. Colgrove private access. If the matter can be worked out on such basis, then the Commission will approve payment of the amount contained in the option, viz: $55,000.

In the discussion of the matters pertaining to the acquisition of the Curry County ocean waysides, there was presented to the Commission a protest from Chetco Grange No. 765, Harbor, Oregon. The letter was signed by Mr. D. C. Jaggers, Brookings, Oregon, who advises that the Grange is opposed to the state's purchase of private lands in Curry County for park purposes, because it will deprive Curry County of about $18,000 in taxes annually. The letter was discussed by the Commission, but the Commission made no change in its plans for the acquisition of this recreational area.

5. Acquisition of Paxton property on the Deschutes River and Warm Springs Highway near Warm Springs Agency: The Right of Way Engineer reported that pursuant to instructions from the Commission he offered Mr. Paxton $3,500 for this small tract, which contains 2.4 acres, but Mr. Paxton absolutely refuses to accept such consideration. The Chief Counsel recommended against condemnation unless the Commission is willing to pay as much as $10,000 for the property. The Commission decided unanimously not to purchase the area.

6. Offer of "Save the Myrtle Wood, Inc." to deed to the state three myrtle wood tracts in Coos and Curry Counties: The State Parks Superintendent recommended against acceptance of these tracts. The Commission approved the recommendation. (See additional entry ahead, covering delegation to appear before the Commission on the following day regarding this item.)

7. Request of Earl Butler, Mayville, Oregon, for development of Dyer Park: The Parks Superintendent advised that this is a very small park, but is a good stopping place for tourists because it contains a spring with good water. Mr. Butler's complaint, he said, is somewhat in order. However, the improvements that he requests are now under way. The Commission ordered that this information be passed on to Mr. Butler.

8. Schedule of fees for use of Silver Falls Recreational Area during 1950: The State Parks Superintendent advised that the fees received during 1949, for the use of this area were sufficient to pay the entire cost of operating the area, so there was no cash outlay by the state. He recommended, in view thereof, approval of the same schedule of fees during the 1950 season. The Commission approved the recommendation.

9. Request of William McKevitt, Newport, to construct a road across South Beach Park, Newport, to serve a "drive-in" theater: The State Parks Superintendent advised that Mr. McKevitt has plans to construct and operate a drive-in theater adjacent to the state park at South Beach and wants authority to construct a roadway across the state's property for the benefit and use of his patrons. He recommended that the request be denied. The Commission approved the recommendation.

10. Request for permission to remove cinders from "Round Top" in The Cove-Palisades State Park: The Parks Superintendent reported numerous requests of local people to take cinders from this area for use in constructing roads and driveways. He recommended that the requests be denied as a protection to the park and particularly because the conditions of the agreement with the U. S. Government, from whom the property is being leased, provide that no cinders shall be removed from the area, otherwise the property will revert to the Federal Government. In the discussion of this matter it developed that the U. S. Grazing Service is the federal agency that has opposed the removal of cinders, but another federal agency (U. S. Reclamation Service) which is concerned, has no objection thereto. It was also brought out that there is an inexhaustible supply of cinders available at this site, but a dearth of material suitable for road purposes at other convenient locations in Jefferson County. The Engineer gave as his feeling that the removal of cinders by local farmers for construction of driveways and the taking of a limited amount by the county for county road construction would not have an adverse effect upon the park, which contains several hundred acres of land. As a result of discussion, the Parks Superintendent was instructed to contact the federal agencies concerned and ascertain definitely whether or not they would object to the taking of a limited amount of cinders

from this pit for use by the county in construction of county roads. The Commission stated its opposition to removal of cinders for private purposes. (See additional entry ahead covering presentation of a delegation which appeared before the Commission on the following day regarding the same subject.)

11. Request of Port of Newport to construct a roadway across Depoe Bay State Park: The State Highway Engineer reported that the U. S. Army Engineers have plans for improvement of the harbor at Depoe Bay, consisting of diking off the bay, constructing a concrete wall, and filling in the area, which will require considerable trucking across the state park, and they have asked permission to make an opening in the sidewalk rail about 100 yards north of the highway bridge, and to construct a temporary roadway across the park property out to the point where the concrete wall is to be constructed to facilitate delivery of materials. The matter was discussed at some length, but a decision was deferred by the Commission pending discussion of the matter with a delegation on the following day. (See ahead for additional paragraph covering presentation by the delegation and approval by the Highway Commission.)

The Assistant Counsel, Mr. J. W. DeSouza, reported a settlement of the damage claim of Mr. C. E. Wiles, arising out of a change of grade on the Agate Beach-Newport Section of the Oregon Coast Highway. He advised that the right of way for the highway improvement was acquired in 1937, but Mr. Wiles at that time did not waive his rights to claim damages. Since then, he said, the highway has been constructed and the grade widened, resulting in drainage waters being diverted across Mr. Wiles' property. He further stated that Mr. Wiles has spent not less than $500 to correct the condition partially, but it is going to be necessary for him to spend an additional $500 for a new system of drainage. He has, however, agreed to relieve the state from further liability if paid the sum of $100. He recommended approval of the settlement. The Engineer concurred therein. The Commission approved the recommendation unanimously.

The Right of Way Engineer, Mr. Forrest Cooper, presented a list of options that have been obtained for real property acquisitions and recommended approval of the same by the Commission. As a result of careful consideration of each item, the Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto, marked EXHIBIT "A", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

In this connection, the question arose why present estimates of cost of right of way are so much higher than the original estimates, particularly right of way in Sullivan Gulch, Portland, which was originally estimated to cost $3,200,000, whereas the present-day estimate is $4,810,000. The Right of Way Engineer explained that the original extimates submitted for the Sullivan Gulch right of way were based on incomplete data, although it was the best that was available at the time. He further stated that experience does not bear out that right of way can be purchased for the amounts of the original estimates. However, it does reveal that it can be purchased for approximately the amount of current estimates determined by re-appraisals. Chairman Banfield

explained that when the Commission allocates a certain amount of money for a project, including both construction and right of way, it assumes that the estimates are accurate, and that the sum allocated will not be exceeded. If additional funds are required to finance that project, he said, the construction program is disrupted and undesirable revisions have to be made. As a result of this discussion, the Commission instructed the Right of Way Engineer to submit a report showing the estimated cost of right of way needed for all projects in the construction program, and current estimated costs resulting from re-appraisals so the Commission will be advised in its further study of the matter.

The meeting recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m. with the same persons present and participating, with the exception of Commissioner Chandler who arrived late because of a previous engagement.

The Right of Way Engineer brought up for discussion a revised settlement with Mrs. Frances Symons for property needed as a site for a Highway Department radio station on Mt. Scott, east of Portland. He recalled that this matter was before the Commission at the previous meeting and the settlement presented at that time was not approved because of certain reservations stipulated by the grantor. These conditions have since been modified, he said, and the terms are now satisfactory from all standpoints. The Chief Counsel explained the details and recommended purchase of the property on the basis of the revised agreement for the sum of $2,500. The State Highway Engineer concurred therein. The Commission approved the recommendation unanimously.

The Commission had under discussion the sale to Mr. and Mrs. J. R. Laisure of an old quarry adjacent to the Eddyville-Blodgett Section of the Corvallis-Newport Highway. The Right of Way Engineer advised that this is an exhausted quarry in the center of a farm belonging to the Laisures, and that Mr. and Mrs. Laisure have offered to pay $100 for the property. He recommended acceptance of the offer. The State Highway Engineer concurred therein. The Commission approved the recommendation. (The deed conveying the property to Mr. and Mrs. Laisure was signed by the Commission later in the session.)

The Right of Way Engineer reported an offer of Mr. G. B. Larrimer, Portland, to pay the sum of $50 for a small house located on property acquired by the Commission as right of way for the Sullivan Gulch Highway, Portland. He said that the house is not of much value and recommended acceptance of the offer. The Commission approved the recommendation.

The Right of Way Engineer also reported an offer from Peter Kiewit Sons Company, contractor for the construction of the Dodson-Bonneville Section of the new upper Columbia River Highway, to pay $500 for a house and store building located within the limits of the right of way where the company has contract work underway. He advised that these buildings were advertised for bids some time ago and no satisfactory offer was received, but Peter Kiewit Sons Company, which since then has been awarded the highway contract, wants the buildings for use in connection with their work. He recommended acceptance of the offer, which is in excess of the appraised value for the property. The Commission approved the recommendation.

The Right of Way Engineer reported the results of negotiated sales of the following items which have been acquired in connection with right of way transactions:

Item and Remarks	Former Owner	Location	High Bidder or Purchaser	High Bid or Sales Price
5' Refrigerator Meat Case Unit not in working order	Garriott Auto Court	Canyonville-Johns, Pacific	Lehman's Seafood, Salem	$ 75.00

(Cont.)

Item and Remarks	Former Owner	Location	High Bidder or Purchaser	High Bid or Sales Price
Small White Sheet-Steel Sink ($1) 7 Window Lights ($8)	Pioneer Auto Court	Canyonville-Johns, Pacific	James A. Stubblefield, Roseburg	$ 9.00
Daveno, chair, stool $50 Bed $3.50, Coil Bed Spring $8, Mattress $1.50, 5 Kitch. chairs $5, Chest Drawers & Coffee Table $12	" "	" "	Pat Gregory, Roseburg	80.00

The Right of Way Engineer recommended acceptance of the offers. The Chief Counsel concurred therein. The Commission approved the sales unanimously at the prices mentioned.

The Right of Way Engineer reported that pursuant to authority previously granted by the Commission he advertised the sale of six buildings in the city of Coos Bay, bids to be received in Salem on Monday, December 12, 1949. This sale, he said, was very well publicized, but no bids were received. The Commission approved the report and authorized the Right of Way Engineer to negotiate the private sale of the buildings.

The Engineer reported an offer from Huntington Shingle Company, Eugene, to deed to the State of Oregon a small parcel of land containing about one acre, adjacent to the Siuslaw Highway near Mapleton, if the Highway Commission will deed to the company a small stockpile site containing 0.88 acre, which the company needs in connection with the expansion of its facilities. The Engineer advised that this matter has been investigated and it has been ascertained that the tract which the company proposes to deed to the state will serve equally as well for a stockpile site as the present site. It is, in fact, a more desirable one, being rectangular in shape, whereas the present site is a three-sided tract. He exhibited a map showing the location of both tracts and recommended acceptance of the company's offer. The Commission unanimously approved the exchange of properties as recommended.

The Engineer brought up for discussion the matter of cancelling the lease of a one-acre tract of land in the town of Boring. He said that this property was leased from Mr. Wallace R. Telford on January 1, 1946, for a three-year period at a cost of $180, to facilitate the unloading of road oil and asphalt shipped to this point by railroad tank car. The School Board of Boring, he said, is dealing with Mr. Telford to acquire this site as a playground, and Mr. Telford has inquired whether or not the Highway Commission will agree to the cancellation of the lease if he will relieve the state from cleaning up the premises, which is the state's obligation according to the provisions of the lease. The Engineer said that during the past year road oils and asphalt used in this vicinity have been transported from Portland by tank-truck at a considerable saving, so the use of Mr. Telford's property is not especially needed for the purpose intended. He recommended, therefore, approval

of Mr. Telford's request, and that the lease be cancelled as of January 1, 1950. He presented a form of agreement covering such cancellation, which he pointed out had been executed by Mr. Telford. The Commission approved the recommendation. (The agreement was signed later in the session.)

The Engineer reported several requests from residents of the town of Lapine to purchase a building site acquired by the Commission from Deschutes County in 1943 for a consideration of one dollar. He advised that this site was originally acquired as a storage site but is no longer required for such purpose because a standard building has been constructed on a larger, more suitable tract of land acquired from the U. S. Government. He recommended that the site acquired from Deschutes County be deeded back to the county for disposal as it sees fit, in view of a provision in the deed received from the county that the property must be used for the benefit of the public, and as a building site only, and if and when the premises are not used for such purposes, then they shall revert to the county. It was the feeling of the Commission that inasmuch as the tract was acquired from Deschutes County at no cost, for a specific purpose, and that it is no longer required for such purpose, it should be deeded back to the county, and it was so ordered.

The Engineer requested authority for the Chief Counsel to negotiate the acquisition of right of way that is needed for the proposed westside by-pass in Klamath Falls, particularly through the property of Mr. Keith Cobo. He recalled that the Commission some tire ago authorized the making of a survey of this by-pass route and the securing of options for right of way upon completion of the survey, with the definite understanding that no commitment was to be made as to construction. The survey, he said, is still in progress, but the ultimate alignment through Mr. Cobo's property has been definitely determined. Mr. Cobo, he said, started construction of a motel about a year ago, but discontinued the work within the area required for right of way pending the state's acquisition of the right of way. However, he now wishes to proceed with his development and has stated a willingness to adjust his motel to the new right of way if the state will acquire at this time the land that is needed from him. The Engineer recommended that the Chief Counsel be authorized to negotiate immediately for the right of way needed through Mr. Cobo's property, in order to avoid extra expense if the purchase is delayed. The Commission unanimously approved the recommendation.

The Engineer reported a request from the Union Oil Company of California for a modification of its agreement with the Highway Commission dated October, 1941, in which the company granted to the state a ten-foot easement along the North Marshfield Section of US101. The modification requested is to permit the company to construct a firewall along the easterly line of the company's property at this location. He explained that the easement was acquired from the company to provide for embankment slopes along the section adjacent to the company's plant, but with the company constructing an adequate wall along this section, the easement no longer is required as the wall will retain the slopes. He recommended, in view thereof, approval of the company's request. The Commission approved the recommendation unanimously and ordered that the matter be covered by a written modification of the original agreement.

The Commission discussed and unanimously approved an agreement with Mr. and Mrs. Ernest V. Fisher providing for lease of a quarry site on properties belonging to the Fishers in Lane County. The lease covers 19.16 acres of land and is for a ten-year period, expiring on the 16th day of November, 1959. The consideration involved is the payment of three and one-half cents per cubic yard for material removed by the state from the premises during the term of the lease. (The agreement was signed later in the session.)

The Chief Counsel reported receipt of an assessment made by the Slide Irrigation District in Malheur County against state-owned property situate within the boundaries of the district. The principal amount of assessment, he said, is $88, but there is an accumulation of interest in the amount of $44. He further stated that he has been assured by the District that if the state pays the total amount, $132, it will not be assessed in the future. He recommended that the assessment be paid and that a court order be obtained relieving the state from future assessments. The Commission approved the payment of the current assessment and instructed the Chief Counsel to obtain such court order.

The Chief Counsel also reported receipt of a drainage assessment against the state in favor of the Stillwell Drainage District, Tillamook County, amounting to $108. He explained that this assessment is against the right of way of Netarts Secondary Highway; that Tillamook County paid the assessments regularly before this road was placed on the State Highway System, but when the State took the road over, it also assumed the county's obligation to pay the drainage district assessment for the construction and maintenance of a dike. He recommended payment of the assessment. The Engineer advised that the dike is of considerable benefit to the highway, and he stated his concurrence in the recommendation. The Commission approved the recommendation unanimously.

The Chief Counsel brought up for discussion the subject of the sale of excess state-owned property in the City of Portland, particularly the matter of whether or not the Commission should sell such properties as are in close proximity to a highway and permit advertising signs to be maintained thereon. He gave as his feeling that such use of the property is not in the best interests of the highway, and recommended that the Commission adopt a policy against the use of the property for advertising purposes. The Commission approved the recommendation and ordered that hereafter all deeds conveying such excess properties shall contain provisions prohibiting the use of the property for advertising purposes.

The Right of Way Engineer presented an offer from Mr. William Kennard, Portland, to sell to the state eight lots on the Nehalem Sand Spit, Tillamook County, for the sum of $150. He advised that a number of years ago the former Highway Commission authorized acquisition of properties on this sand spit for park purposes, and for right of way for a future routing of the Oregon Coast Highway. Under such authority, 2,180 lots were acquired, 90 percent of which were deeded to the state by Tillamook County, leaving about 120 lots still in private ownership. He recommended, in view of the circumstances, acceptance of Mr. Kennard's offer. The State Parks Superintendent also urged purchase of

the property from the parks standpoint. In view of the fact that practically all of this sand spit had previously been acquired, the Commission unanimously authorized the purchase of the eight lots under discussion, at the price quoted.

Consideration was given by the Commission to the conveyance to Umatilla County of a tract of land that was originally acquired for stockpile purposes on the Umatilla-Hermiston Section, former route of the Old Oregon Trail. The Assistant Counsel, Mr. DeSouza, explained that the alignment of the highway at this point has been revised and the old road turned back to the county, but, through oversight, the stockpile site under discussion, of no further value for state highway purposes, was not included in the description. He recommended that the area be deeded back to the county at this time. The Engineer concurred in the recommendation. The Commission approved the recommendation unanimously. (The deed was signed later in the session.)

Commissioner Chandler arrived at this point in the discussion.

The Commission by unanimous vote confirmed telephonic authority given the Chief Counsel to close, for a consideration of $13,325, the option submitted by the Right of Way Engineer at the previous meeting, covering property identified as the Wildcat Service Station, upon advice of the Chief Counsel that he was unable to affect a better settlement. This area is needed as right of way in connection with the improvement of the Squally Hook-Quinton Section of the upper Columbia River Highway (Old Oregon Trail) in Gilliam County.

In this connection the Commission ordered that hereafter recommendations to the Commission concerning settlements such as this one are to be based on consultations between the Chief Counsel and the Engineer.

The Chief Counsel presented for the Commission's information a written report of his review of federal and state laws relating to the shore of the ocean. He explained that he is rendering this report because oftentimes questions concerning the authority of the Highway Commission on regulatory measures concerning the shore of the ocean arise for discussion and consideration, and it was his thought that a resume of the federal and state laws might be helpful to the Commission in passing on these matters. The Commission took no action on the report.

The Chief Counsel rendered a status report on the cancellation of the P.U.C. permits of Barclay Bros., Camas Valley, for operating overwidth trucks in the transportation of logs over state highways from Camas Valley to Sutherlin. He advised that he ascertained from the office of the Public Utilities Commissioner that only two of these trucks are overwidth, one being one inch overwidth and the other not to exceed two inches overwidth. Barclay Bros., he said, had several other trucks that were overwidth to a greater extent than these two, but they have remodeled them to conform with the Oregon laws. He further stated that Barclay Bros. have requested the privilege of continuing in operation the two remaining trucks until they can be reconstructed, or until they are no longer serviceable. He inquired whether or not the Commission still wishes him to insist that the Public Utilities Commissioner cancel the permits and demand the surrender of plates from these two trucks. It was

the feeling of the Commission that the law should be respected and that it is the responsibility of the Public Utilities Commissioner to correct mistakes made in his office when permits are granted covering operation of vehicles that do not comply with the statutory requirements, and that such responsibility should not be passed on to the State Highway Commission. The matter was referred back to the Chief Counsel for further handling.

The Commission had under discussion two letters from Mr. J. Neilson Barry, Portland, in which he expresses his disapproval concerning certain sign boards and other informational data that are being maintained along state highways. No action was taken by the Commission.

The Commission discussed reports from the Chief Counsel and Engineer on the claim of the Northwest Cities Gas Company for reimbursement of the cost of labor and materials for the relocation of its gas mains and service lines necessitated by the construction of the High Street-Walnut Street Section of the Pacific Highway in Eugene. In his report the Chief Counsel advised that the amount of the Highway Commission's legal liability in this matter depends entirely upon the facts of the case. In view of this advice, the Commission deferred action on the matter and referred it back to the Engineer and Chief Counsel to determine those facts and report their findings.

The Chief Counsel brought up for discussion a proposed compromise settlement with the Union Pacific Railroad Company of its claim arising out of the construction of the Oneonta Slide Section of the Upper Columbia River Highway. He explained briefly that the Highway Commission is liable for damages to a certain extent, and the question now arises whether or not it would be advisable to fight the case in court or approve a compromise settlement which provides that the state shall pay fifty percent of the amount of the company's claim, which totals about $134,000. If the case goes to court, he said, whatever sum the state is required to pay would be considered as damages to date, but it would not relieve the state from future liability. The Commission deferred a decision in this matter pending a complete, detailed report on the subject, in writing, by the Chief Counsel.

The Commission discussed a form of agreement with the Mountain States Power Company covering construction of a bridge over a canal owned by the Power Company on the Santiam Highway, Linn County. The Engineer explained that in July, 1925, the former Highway Commission entered into an agreement with the Mountain States Power Company for the construction of this bridge, the terms of which agreement provided for the construction of a timber trestle with a roadway of not less than 20 feet, the cost of the structure and the maintenance thereafter to be paid equally by the state and the Power Company. The volume and type of traffic now using this highway, he said, require a wider bridge, and in the interests of maintenance a permanent type of structure should be provided rather than continuing the timber trestle. He pointed out that according to the old agreement, the Power Company would be required to pay fifty percent of a new timber structure, and to continue to pay half the maintenance expenses, but the Company is willing to pay toward the cost of the permanent type structure one-half the estimated cost of a timber structure, and an additional amount to amortize maintenance costs if the permanent type structure is constructed. On that basis the Company's share would amount to

a total of $3,220. The present agreement, he said, which has been executed by the Power Company, has been prepared on such basis. He recommended approval of the same. The Chief Counsel concurred. The Commission approved the recommendation unanimously. (The agreement was signed later in the session.)

The Commission discussed with the Engineer the bids received at the morning session for highway construction, and at 3:00 p.m. Chairman Banfield publicly announced the Commission's decision with respect to each project, as follows, the Commission's action in each instance being by unanimous vote:

"Dixie Summit-Baker County Line Rock Production Project on the John Day Highway in Grant County. Barney B. Helser, Molalla, submitted the low bid for this project, at $25,400. There were three higher bids for this project. The Commission has awarded the contract to the low bidder, Barney B. Helser, at his bid price.

"5.44 miles of grading, surfacing and oiling on the West Unit, Hamilton Long Creek Section of the Kimberly-Long Creek Secondary Highway in Grant County. Stevenson Construction Co., Salem, submitted the low bid for this work at $136,433. There were nine higher bids received. The Commission has awarded the contract to Stevenson Construction Co. at their low bid price.

"10.9 miles of grading, surfacing and oiling; also furnishing 3,300 cubic yards of crushed materials in stockpile on the Lawen-Crane Section of the Burns-Crane Highway in Harney County. The low bid for this project was submitted by C. E. Leseberg, Nyssa, at $131,265, who qualified his bid by stating that he would not accept projects totaling over $176,746. There were fourteen higher bids for this work. The contract has been awarded to the low bidder, C. E. Leseberg, at the bid price.

"Rock production project on the Trail and Eagle Point Sections of the Crater Lake, Tiller-Trail and Little Butte Highways in Jackson County. Fred Lemery, Lebanon, was the low bidder on this project, his bid being $45,880. He qualified his bid by stating that he would accept the award of only one project at this letting. Two higher bids were received. The Commission has awarded the contract to the low bidder, Fred Lemery, at his bid price.

"17.91 miles of surfacing, oiling and furnishing crushed material in base on the Chiloquin-Sprague River Section of the Sprague River Road in Klamath County. The low bid for this project was submitted by J. N. & M. J. Conley, Portland, at $123,048. E. C. Hall Co., Portland, submitted the next low bid at $125,442. There were six higher bids. The low bidder for the Chiloquin (Chocktoot Street) Bituminous Macadam Surfacing project in Klamath County, bids for which were also received at this meeting, was E. C. Hall Co., Portland, at $3,170. The next low bid was submitted by J. N. & M. J. Conley, Portland, at $3,559. Both bidders stated that they would not accept the award of this project unless also awarded the contract for the Chiloquin-Sprague River Section. There were five higher bids on this project. A study of the bids for both projects reveals that the com-

bination bid of J. N. and M. J. Conley, Portland, is low, at $126,607. E. C. Hall Company's was the next low combination bid, at $128,612. The Commission has awarded both contracts to the low combination bidder, J. N. & M. J. Conley.

"Installation of traffic signals at the intersection of Pacific Highway and Elmira Road near Eugene, Lane County. The low bid for this work was submitted by L. H. Morris Electric Co., Eugene, at $6,593. There were three higher bids. The Commission has awarded the contract to L. H. Morris Electric Co. at their low bid price.

"Construction of reinforced concrete slab bridge over Mountain States Power Company Canal, west of Lebanon on the Santiam Highway, Linn County. The low bid for this work was received from Snook Bros., Corvallis, at $16,808. Eleven higher bids were received. The contract has been awarded to Snook Bros., low bidder, at their bid price.

"7.11 miles of pavement resurfacing, together with furnishing crushed material in stockpile on the Jordan Creek-McNamars Camp Section of the Wilson River Highway, Tillamook County. Warren Northwest Inc., Portland, submitted the low bid for this project, at $123,605. Four higher bids were received. The Commission has awarded the contract to Warren Northwest Inc., low bidder, at their bid price.

"Widening the bridge over Umatilla River on the Columbia River Highway in Umatilla County. Archie R. Averill, Portland, was the low bidder for this project, at $94,340. He qualified his bid by stating that he would accept the award of only one project at this letting. There were four higher bids received. The contract has been awarded to Archie R. Averill, low bidder, at his bid price.

"Crushed rock in stockpile on the Cow Canyon Section of The Dalles-California and on the Sherman Highway in Wasco and Jefferson Counties. Fred Lemery, Lebanon, submitted the low bid for this project, at $31,500. He qualified his bid by stating that he would accept the award of only one project at this letting. E. C. Hall Co., Portland, was the next low bidder at $32,390. There were thirteen higher bids submitted. Having received the award of a prior contract at this letting, Fred Lemery's low bid was disregarded, due to the qualification placed thereon, and the contract has been awarded to the second low bidder, E. C. Hall Co., at its bid price."

The Engineer reported the results of investigations of the cost of constructing houses in state parks. He advised that a number of building contractors who are familiar with the plans for the building at Wallowa Lake and Armitage Parks were contacted and each stated that the plans and specifications as prepared by the State Highway Department are about the same as would be used in private construction, except that some of the contractors felt that the quality of framing lumber could be reduced without material injury to the building; and all pointed out that the performance bond that the state requires is not usually furnished in connection with private construction. He advised

that hereafter the plans will be revised to correspond with the recommendations concerning the framing lumber, but it would not be possible to eliminate the bond because of legal requirements. The Commission approved the report and ordered that the specifications with respect to the framing lumber be revised accordingly.

The Engineer brought up for discussion the matter of employing a full-time "Safety Engineer" or "Safety Director" to supervise a program of accident prevention insofar as it pertains to State Highway Department personnel and equipment. His report covered two subjects: (1) Motor Vehicle Traffic Accidents, and (2) Industrial Accidents. With respect to the first of these two subjects, the Engineer stated that the General Casualty Company of America was awarded a contract by the Board of Control in July, 1949, for property damage and public liability insurance covering all state equipment and that under that contract the Company agreed to make a state-wide survey, and recommendations for a "Standard Fleet Safety Program." This survey has been completed, he said, and the General Casualty Company has filed its recommendations, which, briefly, consist of the following: selection of equipment operators; safe driver's pledge, to be signed by all operators; driver's weekly report, made by equipment operators; maintenance superintendent's investigation of all accidents; safe driving awards; and supervision of the program by a full-time safety engineer. The Engineer pointed out that the insurance furnished by the General Insurance Company pays losses involving legal liability for bodily injury or property damage of others, but it does not cover losses which could exceed legal liability losses, such as damage to state equipment in collision, loss of use of equipment, damage to supplies or cargo carried, etc. It was his feeling that the only positive method of reducing such losses is through the adoption of an accident prevention program.

Concerning industrial accidents, the Engineer advised that such accidents were the subject of the Governor's first annual Industrial Safety Conference which was recently conducted by the State Industrial Accident Commission, and attended by several engineers of the Highway Department. This meeting, he said, was devoted to details and results of accident prevention programs now in force, and the outline of a program for accident prevention. He gave statistics for the State Highway Department as compiled by the Accident Commission, which revealed that the insurance rates for the Highway Department are now reduced 40 percent from base, whereas 64 percent of the contractors operating in the State of Oregon enjoy a 50 percent reduction from base. On the basis of securing a 50 percent reduction on base, he said, a saving of approximately $22,000 would result to the State Highway Department. He gave as his feeling that the establishment of a full-time position of Safety Engineer or Safety Director is justified and so recommended. In the discussion of this matter, the members of the Commission indicated a reluctance to establish a position of Safety Engineer until the matter has been given further study and trial using present Highway Department personnel. The matter was referred back to the Engineer for such study and report. (For details with respect to this matter see copy of Engineer's written report to the State Highway Commission dated December 12, 1949, in general files.)

The Engineer brought up for discussion the matter of approving "step-increases" in salary for eligible State Highway Department employees, as of

January 1, 1950, under Civil Service rules and regulations. He presented a tabulation listing 577 employees who are eligible for such increases, of whom about 83 percent have been recommended to receive them, being those whose merit ratings are at least average or better. He estimated the net cost of the increases for the calendar year 1950 at $68,000, and advised that this expense was anticipated in the preparation of the 1950 budget. The Commission unanimously approved the step-increases as recommended.

The Engineer presented a written report, dated November 28, 1949, on the meeting of the Executive Committee of the American Association of State Highway Officials held in Chicago on November 19, 20 and 21, 1949, and on the meeting of the Sub-committee of the Executive Committee at the same time. The Commission took no action on this matter. (For details see copy of Engineer's report in general files.)

Pursuant to instructions from the Commission at the previous meeting, the Engineer submitted an analysis of out-of-state travel expenses incurred by State Highway Department employees during the period January 1, 1949 to October 19, 1949, totaling $6,856.05. He said that he anticipates no additional out-of-state travel expense during 1949, and that expenditures for like purposes in 1950 will be about the same amount as expended in 1949. The Commission approved the report.

The Commission discussed the bids received in Salem on December 14, 1949, for the purchase of fir and pine timber located on the State Highway Department maintenance station site on the Crater Lake Highway north of Prospect. The Engineer reported three bids received, as follows:

1.	O'Connor and Bryson, Trail	$2,420.00
2.	I. W. Gervais, Medford	800.00
3.	A. L. Dorson, Prospect	200.00

He recommended acceptance of the high bid submitted by O'Connor and Bryson at $2,420, it being $1,100 in excess of the value of the timber as appraised by the State Forester. The Commission approved the recommendation unanimously.

The Engineer read aloud his written report to the Oregon State Highway Commission dated December 15, 1949, on the Astoria-Megler Ferry operation across the lower Columbia River. He pointed out that 12 months' operation in 1949 will show a deficit of approximately $37,500, compared with $26,562 in 1948, and a deficit of $22,439 in 1947. As to traffic, he said that the volume of passenger traffic has decreased steadily from a peak in 1946, the record of eleven months in 1949 being 227,892 passengers, and that a vehicular count showed that this also is decreasing slightly from a peak of 127,364 in 1947, to 123,326 during the first eleven months of 1949. He gave as his considered opinion that if the Commission desires to make this operation self-sustaining, toll charges will have to be increased. He recommended no increase in these charges, however, for at least a year. This matter was discussed at some length, but a decision with respect to the recommendation was deferred pending a report from the Engineer showing the estimated cost at the beginning of each year that the service has been provided, and the actual cost as disclosed in the records at the end of each of those years.

The Engineer reported the results of surveys and studies of various routes to provide for the handling of traffic on the McKenzie Highway through the City of Springfield. He said that after very careful analysis of all the facts concerned he has arrived at a possible solution and recommends the adoption of a one-way street plan whereby eastbound traffic will be routed along Main Street, which makes a direct connection with the Willamette River Bridge; and westbound traffic will be routed along North "A" Street, unless the City of Springfield is willing to contribute the extra expense to improve South "A" Street, which it is recommending and which is estimated to cost about $142,000 more than the improvement on North "A" Street. He recalled that the Commission two years ago allocated $110,000 for the improvement of the McKenzie Highway through this town, and later on because of conditions the amount was increased to $410,000 in order to pay for right of way and for the improvement of cross streets. However, the present-day estimate to provide the minimum plan for current needs is $439,000, which includes cost of right of way and of improving street intersections. The South "A" Street route, he said, is estimated to cost $581,000. He exhibited a map showing both routes and advised that he received a telephone call during this session of the Commission requesting that the Commission defer action to give the city an opportunity to ascertain whether or not it is able to secure local contributions to make up the difference in the cost of the South "A" Street route over North "A" Street. (For details, see copy of the Engineer's report to the Oregon State Highway Commission dated December 14, 1949, in general files.)

In the discussion of this matter, Chairman Banfield pointed out that the Commission has never had it in mind to spend so much money in the City of Springfield. The Commission deferred action on the report for the time being. (Contrary to the telephonic information received by the Engineer, a delegation from Springfield appeared before the Commission on the following day and urged the adoption of the South "A" Street route. The Commission took the matter under advisement.)

The Engineer requested authority to increase the project authorization for landscaping work on the First Avenue-Esplanade Street Section of The Dalles-California Highway in Klamath Falls, in the amount of $8,384.42. The Commission approved such increase unanimously.

A communication was presented from the Baker County Livestock Association recommending that the Sumpter Valley Highway and the Dooley Mountain Section of the Baker-Umatilla Highway be improved, and that they be given first consideration by the Commission as the next major highway projects to be undertaken in Baker County. The Commission deferred action on this matter pending discussion with the delegation on the following day. (See ahead for additional entry.)

The Engineer presented a proposal from Mr. Thomas A. Sweeney, contractor, Portland, for the placing of approximately 6,600 cubic yards of embankment material on the proposed North Union Avenue Federal Aid Project in Portland. He advised that this project requires 135,000 cubic yards of embankment, and that the small yardage that Mr. Sweeney has offered to furnish would, in his estimation, be of no material help, nor would it result in any

saving of cost to the state; it would only confuse the Federal Aid Project because federal aid would not be available on the portion for which Mr. Sweeney's material was furnished. He recommended that Mr. Sweeney's offer be refused. The Commission approved the recommendation.

A letter was presented from the Street Superintendent of the City of Beaverton, requesting state cooperation in widening a short section of the Beaverton-Hillsdale Highway (Ore.10) within the City of Beaverton, particularly between Short Street and Cedar Street, a distance of 970 feet. The Engineer recommended that the request be denied for immediate undertaking because the Tualatin Valley Highway through Beaverton has just recently been improved to a four-lane facility, which should relieve congestion on the Beaverton-Hillsdale Highway; and for the further reason that there is greater need for the funds elsewhere. The Commission approved the recommendation.

The Commission discussed a request from the City of Florence for the paving of the Oregon Coast Highway to full street width through this city. The Engineer advised that investigation reveals that the section the city wants improved is 0.54 mile in length, and that the work is estimated to cost $99,000. He recommended that the request be denied because there is no particular congestion or hazard by reason of the present surface width, and because there are no funds readily available immediately to finance the project. The Commission approved the recommendation.

The Engineer reported on a request from the City Manager of the City of Hillsboro, that the Highway Commission give consideration to the widening of the Tualatin Valley Highway in Hillsboro from the intersection of 10th and Baseline Streets to the east city limits. He said that investigation reveals that the project is about 3,600 feet in length and involves the widening of an existing 20 foot pavement to 44 foot width, with the construction of curbs, all of which is estimated to cost $70,000. This investigation, he said, also reveals that the section that the city wants improved is on the outskirts of the town where traffic congestion is not too serious now. He recommended that the city be advised that this particular project cannot be considered at this time, due to prior need on more important sections of state highways. The Commission approved the recommendation.

The Engineer also reported on the request from the City of Hillsboro for the improvement, as a Special State Tax Street Fund Project, of Northeast 10th Avenue (Cornell Road) from Main Street to the northeast city limits. He recalled that this project previously was approved by the Commission but was withdrawn at the request of the city because the city was unable to cooperate to the extent required, which was to construct the grade and place a rock surface thereon. The city, however, has now completed this work and has renewed its request for state cooperation in constructing an asphaltic concrete wearing surface, which is estimated to cost $15,000. He recommended approval of the project, which he said can be financed by an accumulation of underruns on other 1949 Special State Tax Street Fund Projects. The Commission approved the recommendation.

The Commission discussed a communication from the Oregon Coast Association recommending the following improvements on the Oregon Coast Highway (US101):

1. Construction of causeway to eliminate flooding of US101 at Kilchis River, and elimination of bad curves between Bay City and Garibaldi.

2. Additional clearing of brush along US101 to improve scenic view.

3. Installation of readable signs at intersection of US101 and US199.

The Engineer estimated the cost to construct the causeway to eliminate the flooding at Kilchis River at $100,000, and the cost to eliminate bad curves and straighten the alignment between Bay City and Garibaldi at approximately $944,000. He pointed out that the Commission has plans to reconstruct this highway at some future time on new alignment between Kilchis River and Bay City, at an estimated cost of $450,000, in view of which he recommended against the project requested by the Oregon Coast Association. The Commission approved the recommendation, there being no funds available to finance the work at the present time.

As to Item No. 2, additional clearing of brush along US101, the Engineer advised that the State Parks Superintendent now has such work underway. The Commission ordered that the Association be so informed. As to the third item, installation of readable signs at the intersection of US101 and US199, the Engineer pointed out that this intersection is in the state of California and accordingly the Oregon Highway Department has no control over the placing of signs. The Commission ordered that such information be passed on to the Association.

A letter was presented from the County Court of Union County requesting that County Road No. 14, which extends southerly from Island City to a connection with Ladd Canyon market road and by-passes the city of La Grande, be either placed on the State Secondary Highway System or designated a Federal Aid Secondary Highway as a substitute for Federal Aid Secondary Highway 538, which extends westerly from the town of Summerville. The Engineer exhibited a map showing the location of both roads. He recommended approval of the alternate suggestion, that County Road No. 14 be substituted for Federal Aid Secondary Highway 538 in the Federal Aid Secondary Highway System because it carries much more traffic and is a far more important road. Commissioner Reynolds also approved the exchange, advising that such by-pass route will at its south end connect with the proposed Ladd Canyon Highway and provide a saving of three miles distance for traffic originating south of La Grande destined for Wallowa County. The Commission approved the recommendation unanimously, subject to concurrence by the Bureau of Public Roads. The Engineer was instructed to take up the matter with this Federal Agency.

The Engineer reported the need for a railroad crossing signal on the Pacific Highway East, just north of the town of Harrisburg where this highway crosses the Oregon Electric Railroad tracks at grade, and where traffic

is extremely heavy. He estimated the cost of the installation at $4,000 and advised that the Railroad Company has offered to pay 50 percent of the cost. He recommended approval of the project. The Commission approved the recommendation on the condition that the Railroad Company will contribute one-half of the expense involved.

The Engineer also reported a request from the City of Salem for the installation of three additional traffic signals at street intersections on the route of US99E in Salem, viz: Fairgrounds Road (US99E) and Lana Avenue; Commercial Street (US99E) and Owens Street; Commercial Street (US99E) and McGilchrist Street. He advised that all three intersections have been investigated and analyzed by the Traffic Engineer, who advises that there is need for signals at two of these intersections, Lana Avenue and Owens Street, but there is no justification for the signal at the McGilchrist Street crossing. He estimated the cost of these two installations at $8,000 and recommended approval of the expenditure on the condition that the City of Salem will contribute 50 percent of the cost involved, and provided the city will furnish electrical energy to operate the signals and will maintain them at city expense when the installations are completed. The Commission approved the recommendation unanimously.

The Engineer brought up for discussion the matter of installing traffic signals on Powell Boulevard (Mt. Hood Highway) in Portland in cooperation with the City of Portland. He recalled that he first presented this matter to the Commission at its meeting on September 19 and 20, but action thereon was deferred at that time, pending additional information. He pointed out that the plan calls for thirteen signals, estimated to cost a total of $45,000, which is to be paid 50 percent by the state and 50 percent by the city of Portland. He recommended approval of the project and that it be covered by an appropriate written agreement between the city and the state, which will provide that the state shall pay its share of the cost at such time as the installations are completed by the City of Portland. The Commission approved the recommendation unanimously.

A letter was presented from the City of Empire requesting reconsideration of its previous request for the installation of traffic signals on Newmark Avenue (Cape Arago Secondary Highway) at its intersections with Commercial Street and Broadway Avenue in the city of Empire, which request was previously denied. Additional reasons were given in support of their request. As a result of discussion, the Commission instructed the Engineer to recheck the conditions at both intersections and report back to the Commission.

There was brought to the attention of the Commission requests from the Chambers of Commerce of Lebanon, Salem, Albany, Bend, Corvallis, Eugene and Sweet Home, urging the Commission to authorize snow removal operations on the road which extends from the Santiam Highway (US20) into Hoodoo Ski Bowl for the benefit of winter sports enthusiasts who patronize this recreational area. The Engineer advised that the road is .9 mile in length and that it will cost from $1,500 to $2,000 to keep it free from snow during an average winter period. Similar requests, he said, have been received in the past, but could not be approved because of the impossibility of operating snow plows over the road, which had not been surfaced. This condition no longer exists,

because the road was stabilized with rock and gravel during the past year. The promoters of this project, he said, allege that 5,000 visitors have been attracted to this recreational area during each of the past two years because of skiing facilities and lodging comforts that are offered, and they predict that the number will be greatly increased if the road is kept open for their use. Following discussion of this matter, the Commission authorized the Engineer to conduct snow removal operations on this road this coming winter as a trial proposition. He was instructed to keep a traffic count of the number of people that patronize this place so the information will be available when the matter comes up again in the future.

The Engineer reported that the cities of Jordan Valley, Mount Vernon and Wasco have satisfied the legal requirements with respect to the expenditure of 1948 State Tax Street Funds which they received in 1949, and that the plans for the projects that are to be financed with such funds have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission approved the recommendation unanimously by the adoption of the attached resolution relative thereto, marked EXHIBIT "B", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported that the following cities and towns have satisfied the legal requirements with respect to the expenditure of 1949 State Tax Street Funds accrued to them during the first six months of this year:

Adams	Dayville	Ione	Nehalem	Stanfield
Antelope	Dufur	Jordan Valley	Oakridge	Summerville
Butte Falls	Eastside	Lafayette	Paisley	Tualatin
Carlton	Estacada	Madras	Prescott	Turner
Columbia City	Falls City	Mitchell	St. Paul	Waldport
Cornelius	Gervais	Mosier	Sandy	Wasco
Culver	Halfway	Mount Vernon	Sodaville	Willamina

He further advised that the plans for the several improvements which are contemplated to be financed with the funds under discussion have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission unanimously approved the recommendation by the adoption of the attached resolution relative thereto, marked EXHIBIT "C", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer brought up for discussion his report previously rendered on September 19 and 20, 1949, with reference to street improvements and installation of a one-way street system to relieve traffic congestion on the Tualatin Valley Highway in the City of Forest Grove. (See copy of written report dated September 15, 1949, in general files.) He recalled briefly that the city had requested that "B" Street, which extends north and south, be widened to permit through traffic to pass through the city without entering the main business district, and that the city also requested that Pacific Avenue, present route of the Tualatin Valley Highway, be designated a one-way street for westbound traffic, and that First Avenue South be designated a one-way street for eastbound traffic on this highway. He recalled that the estimated

overall cost of the project is $80,000 and that the city offered to purchase the right of way, estimated at $6,500, which would leave the state's share approximately $73,500. He said that the traffic problem in this city is bad and could be corrected if the plan, as proposed, were put into effect. Moreover, the project should be considered when funds are available to finance it. It was the Commission's feeling, as expressed by Chairman Banfield, that the project is worthy of consideration in the formulation of future construction programs, but it cannot be considered in the current program because funds are not available to finance it. (The matter was discussed further with the delegation from Forest Grove on the following day, at which time the delegation was informed that the project is a meritorious one, that the Commission is not in position to obligate the expense involved but will consider it if underruns develop in the current construction program.)

The Engineer reported an offer received from the Oregon Iron and Steel Company with respect to the use of its sewer pipeline in connection with the draining of the Oswego Highway in the city of Oswego. He explained that when the Oswego Highway was widened and otherwise improved through the city of Oswego the Oregon Iron and Steel Company, which owns a sewer line extending from Oswego to the Willamette River, authorized the State Highway Department to connect its drainage pipe to this sewer, and as a result the state was saved the expense ($5,000 to $6,000) of constructing a new sewer entirely its own. Subsequently, a leak developed in a portion of the sewer pipeline directly under the spur railroad tracks of the Oregon-Portland Cement Company, necessitating replacement of the pipe, the expense of which the Oregon Iron and Steel Company feels should be paid by the state. He estimated the cost involved at $400, and recommended approval of the expenditure, provided a satisfactory agreement is executed with the Company, wherein the state will be relieved of future liability of any nature with respect to this sewer pipeline. The Commission approved the recommendation.

The Engineer reported that pursuant to authority previously granted him by the Commission, he has awarded contracts, as follows, bids for which were received by the Commission on November 7 and 8, 1949, the conditions of the awards having been satisfied:

Grading, surfacing and bituminous macadam, and extension of a box culvert on the Squally Hook-Quinton Section of the Columbia River Highway in Gilliam County; bids received November 8, contract awarded November 18, 1949 to low bidder, A. H. Saxton & Sons.

Grading, surfacing and oiling the Wamic-Tygh Valley Section of the Wamic County Road and Dufur-Maupin Section of The Dalles-California Highway in Wasco County; bids received November 7, contract awarded November 22, 1949, to Vernie Jarl, low bidder.

Rock Production Project on the Klaskanine Summit-Columbia County Line Section of the Nehalem Secondary Highway in Clatsop County; bids received November 8, 1949, contract awarded December 7, 1949, to Jed Wilson, low bidder.

Grading, surfacing and oiling the Fisher Road-Oak Hill Section of the Richardson-Eugene Secondary Highway, in Lane County; bids received November 8, contract awarded December 7, 1949, to Inter-City Sand & Gravel Company, low bidder.

Oak Hill Overcrossing Structure over the Southern Pacific tracks near Eugene on the Richardson-Eugene Highway in Lane County; bids received November 8, 1949, contract awarded December 9, 1949, to Glenn Snook, low bidder.

The Commission by unanimous vote confirmed the contract awards as reported by the Engineer.

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

1. R. & M. Construction Company, Contract No. 3203, for construction of a reinforced concrete box culvert across Tunnel Creek on the North Santiam Highway in Marion County, requested an extension of time of 15 days from October 15 to October 31, 1949, within which to complete this job. They attributed their failure to complete the project within the specified time limit to unfavorable weather conditions. The Engineer advised that this job was completed, with the exception of cleaning up the site, within the specified time limit and that the clean-up work was completed on October 26. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

2. Oscar E. Joelson, Contract No. 3064, for the Endicott Creek-Mystic Creek Rock Production Project on the Coos Bay-Roseburg Highway in Coos and Douglas Counties, requested an additional extension of time of 56 days, from August 15 to October 10, 1949, within which to complete this job. He attributed his failure to complete the job within the previously extended time limit to furnishing of extra materials as ordered by the Engineer. The Engineer advised that the reason given by the contractor for overrunning the specified time limit is correct. He recommended in view thereof that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

3. R. O. Dail, Contract No. 3012, for the Hunter Creek-California State Line Rock Production Project on the Oregon Coast Highway in Curry County, requested an extension of time of 293 days on Unit "A", and of 354 days on Unit "B", or until July 20, 1949, within which to complete this job. Mr. Dail advised that the original contract for this work was awarded to Shoreline Construction Company, which defaulted, and that his arrangement to complete the work was made with the Glens Falls Indemnity Company, surety on the bond furnished by the Shoreline Construction Company. This arrangement, he said, was not effected soon enough to complete the job within the specified time limit. Moreover, he had to handle about three times as much material as was contemplated, due to the large amount of rejects. The Engineer advised that this contract was awarded to the Shoreline Construction Company, which was unable to complete the

job, and that Mr. Dail was employed by the bonding company to do the work. Delays occasioned by negotiations between Mr. Dail and the bonding company, he said, did not permit completion of the project within the specified time limit. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

4. Western Golf Course Supply Company, Contract No. 3189, for landscaping on the North Medford Section of the Pacific and Crater Lake Highways in Jackson County, requested an extension of time of 30 days, from October 31 to November 30, 1949, within which to complete this job. They stated that due to mild weather conditions the nursery from whom they had arranged to purchase trees advised against delivery of the trees until the leaves had fallen and sap receded. For this reason they were unable to complete the job within the specified time limit. The Engineer advised that the contractor completed within the specified time limit all of the planting with the exception of the trees, and for reasons stated by the contractor the trees were not delivered by the nursery. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

5. R. O. Dail, Contract No. 3011, for the Brush Creek-Hunter Creek Rock Production Project, requested an extension of time of 333 days from November 30, 1948, to October 30, 1949, within which to complete this job. Mr. Dail pointed out that this job was originally awarded to the Shoreline Construction Company, which did not complete it, and that he was engaged by the Glens Falls Indemnity Company, surety on the bond furnished by the original contractor, to do the work. Due to delays in effecting an arrangement with the bonding company it was not possible to complete the job within the specified time limit. Moreover, there was an excessive amount of reject material that had to be handled. The Engineer advised that the Shoreline Construction Company, the original contractor, was unable to complete the project and the bonding company took it over and arranged with Mr. Dail to do the work. Difficulties encountered in effecting the arrangement, he said, delayed progress on the job so it was not possible to complete it within the specified time limit. The state, he said, has not been unduly inconvenienced by the delay. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

6. Vernie Jarl, Contract No. 3096, for Minam-Wallowa Lake Rock Production Project on the Wallowa Lake and Joseph-Wallowa Lake Highways in Wallowa County, requested extension of time of 150 days, from October 31, 1949, to March 31, 1950, within which to complete this job. He attributed his failure to complete the job within the specified time limit to obligations in connection with other state highway contracts in Eastern Oregon. The Engineer advised that the contractor was asked to withhold operations on this job in order that he might complete the crushing of surfacing materials for use on the North Unit of the Enterprise-Forest Boundary Section. The materials that he is producing under the present contract, he said, will not be used until spring of 1950, so the state will not be inconvenienced by not having them available within the specified time limit. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

7. Colonial Construction Company, Contract No. 3111, for the Mt. Hood Rock Production Project on the Mount Hood and Wapinitia Highways in Wasco, Clackamas and Hood River Counties, requested an additional extension of time of 35 days from November 15 to December 20, 1949, within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to the fact that they were required to give special consideration to surfacing a section of the Warm Springs Highway under contract with the Bureau of Public Roads. The Engineer advised that this contractor, while operating for the state was awarded another contract for surfacing on the Warm Springs Highway, and at the request of the Bureau of Public Roads he was permitted to give preference to that project, with the understanding that he would return and complete the state's job as soon as possible. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

8. Warren Northwest Inc., Contract No. 3052, for grading and paving the West Slope-Beaverton Section of the Tualatin Valley Highway in Washington County, requested an additional extention of time of 31 days from September 30 to October 31, 1949, within which to complete this job. They attributed their failure to complete the job within the previously extended time limit to delays caused by public utilities in revising their facilities, and to changes in the original plans for the work. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are substantially correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

9. Erick Enquist, Contract No. 3077, for construction of bridges over Long Tom River on the Siuslaw Highway in Lane County, requested an extension of time of 61 days from August 31 to October 31, 1949, within which to complete this project. He attributed his failure to complete the job within the specified time limit to adverse weather conditions in the months of January and February, 1949, and to unforeseen difficulties encountered in excavation. The Engineer advised that in his opinion the reason for the contractor's failure to complete the project within the specified time limit was that he did not provide a sufficient crew. Weather conditions during the past winter, he said, were unquestionably severe but did not interfere unduly with the work that was in progress at that time. He recommended in view of the circumstances that the extension of time as requested be granted but that the contractor be charged with engineering costs incurred by the state subsequent to the specified date of completion, August 31, 1949. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

10. Perkins Brothers, Contract No. 3016, for construction of three bridges on the Sprague River County Road, Klamath County, requested an extension of time of 61 days from October 31 to December 31, 1949, within which to complete this job. They gave the following reasons for failure to complete the job within the specified time limit: delays encountered in placing footings at the Sprague River Bridge; unusually severe weather

and high water; difficulties in securing experienced help; and delays incident to a fire which burned the falsework on one of the bridges. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are correct. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

11. Macco Corporation, Contract No. 3009, for construction of a bridge over the Willamette River on a County Road at Independence, Marion and Polk Counties, requested an extension of time of 365 days from December 31, 1949, to December 31, 1950, within which to complete this job. They attributed their failure to complete the job within the specified time limit to the impossibility of obtaining necessary steel materials in time for fabrication and erection, due, they stated, to no neglect or failure on their part. The Engineer advised that investigation reveals that the delay in completion of this job within the contract time limit is entirely attributable to the inability of the contractor to secure necessary structural steel. The matter of completing the project has been discussed thoroughly with the Vice President of the Macco Corporation, he said, and it was agreed that the time extension as requested should be recommended to the Commission with the understanding that if the bridge were placed in use on or before August 31, 1950, no penalty would be imposed, but if the structure could not be placed in use on that date, then the contractor would be charged with all engineering costs incurred by the state subsequent to August 31, 1950. He recommended approval of the contractor's request on such basis. The Commission approved the recommendation.

12. Geo. H. Claussen, Contract No. 3192, for construction of guardrail on the North Unit, Washington State Line-Flora Junction Section of the Enterprise-Lewiston Highway in Wallowa County, requested an extension of time of 212 days from November 30, 1949 to June 30, 1950, within which to complete this job. He attributed his failure to complete the project within the specified time limit to adverse weather conditions which would not permit application of the second coat of paint. The Engineer advised that because of extremely cold weather near the end of the job, it was considered advisable to defer the painting work until next spring, and that the contractor was requested to hold up that part of the work until that time. He recommended, therefore, that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

13. Warren Northwest Inc., Contract No. 3010, for grading, paving and bridge construction on the Oregon City-New Era Section of the Pacific Highway East in Clackamas County, requested an additional extension of time of 18 days from May 31 to June 18, 1949, within which to complete this job. They gave the following reasons for their failure to complete the project within the previously extended time limit: delay in awarding of the contract, and wet weather. The Engineer advised that all the work on the travelled roadway was completed within the specified time limit, with the exception of some final clean-up work, and the finishing of the bridge at the southerly end of the project. The state, he said, has suffered no inconvenience because of the delay, in view of which he recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

14. Stoens Rock & Landscape Company, Contract No. 3179, for landscaping on the Eugene (High Street-Judkins Point) Section of the Pacific Highway, Lane County, requested an extension of time of seven months from November 1, 1949, to June 1, 1950, within which to complete this job. They stated that all work in connection with their project is completed with the exception of final adjustment of sprinkler heads, which cannot be done until grass is established in the lawn areas. The Engineer advised that the contract involved the establishment of a sprinkling system in areas which were to be planted in lawn by another contractor, and because of delays of the other contractor the adjustment of the sprinkler heads cannot be accomplished until the lawn has sprouted and settled. He recommended in view of the circumstances that the extension of time be granted without penalty. The Commission approved the recommendation.

15. Homer G. Johnson, Contract No. 3121, for the Rainrock-Alderwood Park Rock Production Project on the Siuslaw Highway and Alsea-Deadwood Secondary Highway in Lane County, requested an extension of time of 120 days from September 30, 1949, to January 30, 1950, within which to complete this job. He attributed his failure to complete the project within the specified time limit to the fact that his plant was busily engaged in other contract work for the State Highway Department. The Engineer advised that the materials which are being furnished by Mr. Johnson will not be used until the start of the 1950 oiling season, so the overrun of the time limit will cause no inconvenience. He recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

16. O. & S. Painters, Contract No. 3123 for painting the Springfield, Coast Fork of the Willamette, Harrisburg, and East Side Bridges in Lane and Benton Counties, requested an extension of time of 242 days from October 31, 1949, to June 30, 1950, within which to complete this job. They alleged that due to adverse weather conditions, including mist and fog, their work was delayed to such an extent that they were unable to complete the project within the specified time limit. The Engineer advised that the contractor completed all work that was required within the specified time limit except the finishing of re-paint work on the Willamette River Bridge at Creswell. Because of the lateness of the season, he said, it was considered inadvisable to do this work, in view of which he ordered it discontinued until next spring. He recommended in view of the circumstances that the extension of time as requested be granted without penalty, subject, however, to the condition that the contractor shall resume work on the project at the earliest feasible time in the spring of 1950, and that he make good to the state any damage that might be sustained on the Willamette River Bridge job during the coming winter because of its partially completed status. The Commission approved the recommendation.

17. Arthur Gentemann, Contract No. 3119, for the Mosier Rock Production Project on the Columbia River, The Dalles-California, and Hood River Highways in Hood River and Wasco Counties, requested an additional exten-

sion of time of 90 days from December 31, 1949, to March 31, 1950, within which to complete this job. He gave no particular reason for overrunning the time limit, except that he stated that the capacity of his crushing plant was less than he anticipated. The Engineer advised that the Commission at its meeting on November 8, 1949, extended this contract from September 30 to December 31, with the understanding that the contractor would reimburse the state for all engineering expense accruing on this job from October 1, 1949, to the actual date of completion. He recommended that the additional extension of time now requested be granted, subject to the same condition. The Commission approved the recommendation.

18. Walter Berndt Construction Company, Contract No. 3115, for grading and oil mat surfacing on the Snider Creek-Crater Lake Junction Section of the Sams Valley Secondary Highway in Jackson County, requested an extension of time of 273 days from October 31, 1949, to July 31, 1950, within which to complete this job. They attributed their failure to complete the project within the specified time limit to financial difficulties over which the contractor had no control, and unsuitable weather conditions for oiling operations. The Engineer advised that due to financial difficulties the contractor was forced to close down his work for several months, and for that reason he was unable to complete the oiling this year. He gave as his feeling that all work in connection with this job should be completed by June 30, 1950, and he accordingly recommended that an extension of time up to that date be granted without penalty, with the understanding, however, that if the job is not finished by June 30, then the contractor shall be required to reimburse the state for all engineering expense incurred subsequent to that date. A letter was presented from the Bureau of Public Roads concurring therein. The Commission unanimously approved the recommendation.

19. Knight Pearcy and Parkrose Nursery, Contract No. 3190, for planting on the Alder Street-Bancroft Street Section of Front Avenue, Portland, (Pacific Highway West), requested an extension of time of 30 days from November 30 to December 30, 1949, within which to complete this job. They attributed their failure to complete the job within the specified time limit to non-delivery of certain shrubs which had to be ordered from the east and did not arrive in time. The Engineer advised that this contract specified approximately 4,800 small evergreen groundcover plants which it was found could not be obtained locally in sufficient quantity so had to be purchased from an eastern dealer. Because of weather conditions, he said, these plants could not be dug until recently, which delayed the contractor's operations to such an extent that the extra time is required to complete the job. He recommended that the extension of time requested be granted, without penalty. A letter was presented from the Bureau of Public Roads concurring therein. The Commission approved the recommendation unanimously.

The Commission in discussing the requests for extensions of time as listed above, considered but did not necessarily adopt the recommendations of the Engineer and/or the reasons given by the contractors for failure to complete their projects within the specified time limits.

The Engineer reported that contracts Nos. 3011, 3012, 3046, 3049, 3052, 3058, 3060, 3083, 3099, 3106, 3109, 3114, 3122, 3147, 3150, 3151, 3159, 3181, 3183, 3186, 3193, 3203, 3204, 3210, and 3211, for construction of state highway projects, have been completed according to the requirements of the contracts, or modifications thereof, and that said projects are now ready for acceptance. After due consideration, the Commission by unanimous vote accepted said contracts by the adoption of the attached resolution relative thereto, marked EXHIBIT "D", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer brought up for discussion a request from the County Court of Malheur County for the widening of US30, Ontario Spur Section of the Old Oregon Trail, between the City of Ontario and Snake River Bridge. He advised that this section is 1.37 miles in length; that when the Ontario underpass was constructed the pavement on a .23 mile section adjacent thereto was widened to 22 feet, but the pavement on the remaining portion, 1.14 miles in length, is only 18 feet wide. He estimated the cost to widen this section to 22-foot width with ten-foot shoulders, at $57,000. He pointed out that the Snake River Bridge is only 20 feet wide and at some future time it will be necessary either to widen it or to build another bridge alongside the existing one, so there are possibilities that a portion of the expense to widen the pavement as now requested may be lost when the bridge improvement is made. He suggested, in view thereof, an expenditure of about $10,000 for strengthening, widening and oiling the shoulders on the existing pavement, which, he said, would provide a facility capable of handling all of the traffic that the present bridge could take care of. This matter was discussed briefly, but action thereon was deferred by the Commission until the following day, when a delegation from Malheur County was scheduled to be present. (The delegation did not appear as scheduled, and this matter was not discussed further.)

The Commission discussed and approved an agreement with the Pacific Power and Light Company providing for the furnishing of electrical energy for lighting Arch Cape Tunnel on the Oregon Coast Highway south of Cannon Beach, Oregon. (The agreement was signed by the Commission later in the session.)

A letter was presented from Mr. Ralph S. Nohlgren, concessionaire at Silver Falls State Park, notifying the Commission of his desire to cancel immediately his concession in conformity with the provisions of his original written agreement with the Highway Commission, dated March 21, 1947 as amended March 20, 1948. The Chief Counsel recommended approval of the request, notwithstanding that Mr. Nohlgren overlooked that provision in the agreement which requires him to give the Commission 30 days' written notice of his intention to terminate his lease on December 1, 1949. The Commission approved the recommendation.

Commissioner Reynolds reported the results of his study of insurance coverage now being provided for state ferry and bridge operations. He advised that he has examined the existing policies carefully and all appear to be in order. Moreover, the coverage furnished is adequate. He recommended continuation of the present policies, and the method in which they are now being handled through the State Insurance Agents' Association. The Commission approved the recommendation.

Commissioner Reynolds also brought up for discussion and recommended renewal, through the State Insurance Agents' Association, of the hull and machinery insurance on the "Enegren" and the "Susan G" ferries, which operate across Coos River at Enegren crossing, in the amounts of $10,000 for the "Enegren" and $1,500 for the "Susan G". The Commission approved the recommendation and so ordered.

Commissioner Reynolds also reported on his study of the Commission's fire insurance policies providing protection for properties purchased in connection with right of way acquisitions. He advised that according to the form attached to the policies, coverage is provided for property acquired in connection with right of way purchases anywhere in the State of Oregon, there being no limit as to the location, and all that is required to secure protection desired is to notify the insurance company within sixty days from the date that the property is acquired. He recommended statewide application of this insurance coverage rather than limiting the coverage to properties located in Sullivans Gulch, Portland, as in the past. The Commission approved the recommendation unanimously and so ordered.

Commissioner Reynolds also reported on his examination of the Highway Commission's blanket position bond covering Highway Department employees, such bond now being furnished by the Ohio Casualty Insurance Company. He stated that he has given this matter very careful consideration, and it is possible to obtain an identical bond with another insurance company at a premium saving of approximately $100 annually. He recommended that, if there is no obligation on the part of the Commission to continue business with the Ohio Casualty Insurance Company, a new policy be purchased from the General Casualty Insurance Company, which has offered to furnish it at reduced premium expense, and that the new policy be written for a three-year period, so as to realize an additional saving, the premium on a three-year policy being two and one-half times that for a one-year policy. The Commission unanimously approved the recommendation and ordered that a new policy be purchased from the General Casualty Insurance Company in conformity therewith.

The Engineer reported numerous requests for the reclassification of the Warm Springs Highway, recently opened to traffic, as a Group I Highway, so as to permit vehicle combinations 60 feet overall in length with gross loads of 75,600 pounds to operate thereover. The northerly seven-mile section of this highway, he said, will not be completed until next July, and at the request of the Bureau of Public Roads, loads weighing more than the statutory weight limit of 54,000 pounds are not allowed over it. The Oregon Motor Transport Association has requested permission for vehicle combinations 60 feet overall in length to use the road without load, the idea being that loaded equipment would use the Wapinitia Highway enroute from Portland to Central Oregon, and would return to Portland empty over the Warm Springs Highway. He recommended approval of the reclassification subject to the posting of the road for a 54,000 pound gross weight limit, until the road is entirely completed.

Mr. Tom Davis, District Engineer, Bureau of Public Roads, who was present, stated that his Department would offer no objection to the classification of the road as a Group I Highway, provided loads in excess of 54,000

pounds gross are not moved over it. Following discussion the Commission approved the recommendation and by unanimous vote adopted the attached resolution relative thereto, market EXHIBIT "E", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Engineer also reported several requests for the reclassification of the following highways, or sections thereof, in order to allow vehicles to proceed, under permit, with a maximum gross weight in excess of the basic statute weight limit of 54,000 pounds:

1. Crater Lake Highway No. 22, from Eagle Point to the junction with Butte Falls Road at M.P. 14.45. The Engineer explained that this highway is now classified as a Group I Highway from Medford to Eagle Point, but from that point north it is classified as a Group II Highway. Because of improvements, he said, the section between Eagle Point and the Junction with the Butte Falls Road now qualifies as a Group I Highway, and he recommended that it be so classified.

2. Tiller-Trail Secondary Highway No. 230. The Engineer explained that log hauling has been permitted over this highway with maximum gross weights of 68,700 pounds and 50 feet overall in length, in view of which it was his recommendation that this highway throughout be classified as a Group II Highway, which will allow 66,000 pound gross weight loads, but limits the overall length to 50 feet. The Commission approved both recommendations by unanimous vote.

The Engineer brought up for discussion a request from Pierce Auto Freight Lines Inc. for the reclassification from a Group II Highway to a Group I Highway of the Junction City-Eugene Secondary Highway No. 223, in order to allow trucks to carry the same weight loads as are allowed on primary highways. He said that a field investigation and test run reveal that the alignment will safely accommodate vehicles having an overall length of 60 feet, and he recommended approval of the request for the reclassification of the road from a Group II Highway to a Group I Highway. The Commission approved the recommendation.

The Engineer requested authority to post for maximum gross weights of 36 tons the following bridges located on state highways that are classified as Group I Highways:

Nehalem Secondary Highway, No. 102

1. Bridge No. 3145 (Nehalem River) located at M.P. 56.50
2. Bridge No. 3146 (Nehalem River) located at M.P. 58.41

Wallowa Lake Highway, No. 10

1. Bridge No. 4821 (Grand Ronde River) located at M.P. 2.64
2. Bridge No. 4872 (Lostine River) located at M.P. 55.00

He explained that Chapter 450, Oregon Laws of 1949, allows a maximum gross weight of 75,600 pounds on a vehicle transporting liquid petroleum products in bulk on a Group I Highway, but these bridges, which are old county bridges,

would be overstressed with such great weight, and this accounts for his request that the maximum gross weight be limited to 72,000 pounds. The Commission approved the request and by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "F", which resolution by this reference is made a part hereof with like effect as though extended in full herein. The Commission ordered that all petroleum haulers be informed of this action.

The Engineer reported a request from the Bureau of Public Roads for the establishment of a 50 percent reduced load limit on the Alsea Highway where Forest Highway construction is underway. He advised that the matter has been investigated, and the findings reveal that such reduced load limit is required. He recommended approval of the request. The Commission approved the recommendation and by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "G", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A resolution was presented from Oregon Trail Grange No. 687, adopted November 12, 1949, and endorsed on November 26 by Malheur County Pomona Grange, in which resolution both granges go on record as favoring the raising of the axle load limit on vehicles operating over state highways in the vicinity of Nyssa so as to permit axle weights of 22,000 pounds during the harvesting of sugar beets. The request was denied by the Commission by unanimous vote.

In the discussion of this matter the Engineer advised that there are 980 cases now pending in Justice Courts concerning violations of weight requirements. He was instructed by the Commission to render a complete report on this subject for consideration by the Commission at its next meeting.

The Commission had under discussion numerous petitions, all forwarded by the Albany Chamber of Commerce, from Chambers of Commerce, and lumber and logging industries, protesting the possible reduction in weight limits during the coming winter season because of the adverse effect that closing down of operations would have on the state's economy. There was also presented for the Commission's information a copy of a letter from Mr. T. B. Watters, Chairman, Roads and Highways Committee, Klamath County Chamber of Commerce, and a letter from R. E. Steele, Manager, Hood River Chamber of Commerce, both directed to the Albany Chamber of Commerce, advising that their respective Chambers of Commerce have full confidence in the State Highway Commission and its judgment should it be necessary to order a reduction in the weight of loads in order to preserve highway surfaces. The Commission refused to make any change in its previous decision in this matter, and ordered that the Albany Chamber of Commerce be so informed. The Secretary was requested to convey to Mr. Watters and Mr. Steele sincere appreciation for their communications.

The Engineer reported that pursuant to verbal authority previously given him by two members of the Commission, the log-hauling permit of Thomas H. Ireland, Myrtle Creek, Oregon, which was cancelled by the Commission at its meeting on November 7 and 8, has been reinstated after a ten-day suspension, Mr. Ireland having agreed in writing not to allow, hereafter, any of his trucks to operate over a state highway with an overload. The Commission by unanimous vote approved the reinstatement of Mr. Ireland's permit on a probationary basis.

The Commission discussed a written report from the Engineer, dated December 15, 1949, on the subject of violations committed by log haulers in the vicinity of Enterprise, Wallowa County. According to this report, the practice of Justices of the Peace of imposing small fines for such violations was initiated at the request of the County Judge of Wallowa County. On November 30, 1949, an investigation of the violations was conducted by the Highway Department's Chief Weighmaster and the Director of Permits, during which the Justices of the Peace at Joseph and Enterprise were contacted, as well as County Judge J. L. Staggs. As a result of this conference, Judge Staggs instructed both Justices to impose more severe penalties, similar to those that are being imposed by Justices in the upper Willamette Valley area. The Commission approved the report. (For further details, see copy of report in general files.)

The Commission had under discussion the disposition to be made of the right of way of the former route of the Collins Creek Section of the Hood River Secondary Highway in Hood River County, which section has been reconstructed on new alignment. The Engineer recommended that a portion of the old route be abandoned for state highway purposes and allowed to revert to Hood River County for such use as the court may deem in the public interest, and that certain portions be retained by the state for right of way and for other highway purposes. He exhibited a map showing the portion to be turned over to the County and the portion to be retained by the State. The Commission approved the recommendation and by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "H", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

The Commission discussed a proposed agreement with Malheur County with respect to the disposition to be made of a portion of the right of way of the Nyssa-Adrian Secondary Highway No. 45, when this highway has been reconstructed on new alignment. According to the agreement, a portion of the old route is to be maintained by the county as a county road under the jurisdiction and control of Malheur County. The Engineer exhibited a map showing the portion to be disposed of, and recommended approval of the agreement. The Commission approved the recommendation by unanimous vote. (The agreement was signed by the Commission later in the session.)

The Commission discussed a request from the officials of the Warm Springs Indian Reservation for the establishment of a 40 mile per hour speed zone on the Warm Springs Highway through the Agency, particularly between M. P. 31.7 and 32.5. The Engineer advised that investigation reveals that the establishment of such a zone is warranted, because of the culture along this section, which consists of a school, the Agency buildings, and several residences; and there is a considerable number of pedestrians who are obliged to cross or to walk along the highway within these limits. He recommended establishment of a speed zone of 45 miles per hour between the limits mentioned, rather than a 40 mile zone as requested. The Commission approved the recommendation and thereupon by unanimous vote adopted the attached resolution relative thereto, marked EXHIBIT "I", which resolution by this reference is made a part hereof with like effect as though extended in full herein.

A petition was presented, signed by 33 property owners residing along the Farmington Road between Huber and Livermore Avenues, in Washington County, requesting the establishment of a 35 mile per hour speed zone along this section of highway, and the installation of an arc light. The Engineer advised that investigation reveals no particular need for reducing the speed of vehicles along this highway, nor the illumination of the highway. He recommended that the request be denied. The Commission approved the recommendation.

A letter was presented from Mr. Otto J. Kraemer, Attorney, Portland, requesting an early decision by the Commission with respect to disposition of a drainage controversy on a secondary state highway near Milwaukie, involving some of his clients. The Chief Counsel recalled previous discussions of this matter, including a presentation to the Commission by Mr. Kraemer in person. Mr. Kraemer's clients, he said, are developing home sites and it appears that they object to drainage water following its natural course across their property, and want the state to construct a modified type of storm sewer system in another location, which is estimated to cost about $2,800, whereas it would cost only about $800 to construct an open ditch along the natural drainage channel. He gave as his opinion that the state is legally obligated to the extent of $800, and recommended payment of such sum. The Commission approved the recommendation on the condition that Mr. Kraemer's clients will pay the balance of the expense, estimated at $2,000, to construct the facility in the location where they want it.

The Engineer submitted for the Commission's approval a typed copy of a combined application and permit form for the construction of approach roads to state highways in conformity with the provisions of Chapter 308, Oregon Laws 1949, which law obligates the Highway Commission to approve the location of such approach roads and to specify the provisions and specifications for the work involved, but which also requires the owner or the lessee of the abutting property to bear the total cost of the approach road construction. He advised that this form was prepared after very careful consideration, and study of the matter from all standpoints, including consultations with the District Maintenance Superintendent under whose general supervision the roads would be constructed. He recommended approval of the form. The Chief Counsel advised that the form as prepared conforms with the provisions of the statutes. As a result of discussion, the Commission by unanimous vote approved the form as submitted and instructed the Chief Counsel to prepare appropriate form of resolution covering the matter for adoption by the Commission at its next regular meeting.

The Commission had under discussion the setting of the date for its next regular meeting following that scheduled for Monday and Tuesday, February 6 and 7, 1950, and decided to hold such meeting in Portland on Monday and Tuesday, March 20 and 21, 1950. The Secretary was instructed to make the usual arrangements to hold this meeting in the Green Room of the Imperial Hotel.

Pursuant to instructions from the Commission at the previous meeting, the Right of Way Engineer reported the results of another conference with Mr. Frank Hamlin, regarding the construction of a small dam on state-owned property

adjacent to the Pacific Highway, about three quarters of a mile south of Canyonville. He advised that Mr. Hamlin now maintains a small dam about four feet high, on right of way of a proposed revision of the highway at this point. The dam is used to divert water into a ditch about 4,500 feet in length, and he uses the water to provide power to operate compressors in an ice plant and for irrigation. The construction of the new highway. he said, will destroy this dam and Mr. Hamlin has requested permission to replace it with a low diversion-head works a short distance upstream from the present dam. He questioned the advisability of attempting to buy out Mr. Hamlin's entire interest, in view of the purpose for which he uses the water and the fact that he will pay the entire cost of revising his facilities, which includes the construction of a new dam about two feet high, and at least seven hundred or eight hundred feet of 18-inch culvert. He said that neither the dam nor Mr. Hamlin's activities will adversely affect the highway in any way. He recommended that a permit be granted to him to construct the new dam at the proposed location. The Engineer concurred in the recommendation. The matter was discussed at some length, and as a result thereof the Commission approved the recommendation by unanimous vote.

The Engineer reported an offer from Mr. A. J. Churchill to sell to the state for park purposes, about 680 acres of land that he owns adjoining Cape Sebastian State Park in Curry County at the rate of $25 per acre. The Engineer advised that only about 12 acres of Mr. Churchill's land is needed as right of way for the future relocation of the Oregon Coast Highway in this district, and that the Parks Superintendent questions the advisability of purchasing all of Mr. Churchill's property for park purposes, although it might be advisable to purchase the portion which immediately adjoins Cape Sebastian Park. From the information at hand, however, it appears that Mr. Churchill wants to sell all or none of it. The Commission decided unanimously not to purchase any of Mr. Churchill's property.

The Engineer brought up for discussion the improvement of the Pudding River-Silverton Section of the Salem-Silverton County Road, for which an amount of $425,000 has been budgeted in the Second Postwar Federal Aid Secondary Highway Program. He advised that at the tire the survey for this project was made, there were nine or ten train movements daily over the Southern Pacific Company's branch railroad line, which was considered justification for an expenditure of about $75,000 to eliminate the railroad grade crossing. There is now only one train daily, which does not warrant such an expenditure for a grade separation structure. The Public Roads Administration, moreover, will not approve a grade separation under those conditions. He explained that if a grade crossing is not to be constructed, the existing alignment will serve equally as well for the highway improvement as the relocated line. He recommended in view of the circumstances, the improvement of the highway on the present location, which he estimated would cost about $181,000, and the reallocation elsewhere of the balance of funds set up for this improvement. Mr. T. M. Davis, District Engineer of the Bureau of Public Roads, who was present, concurred in the recommendation. The Commission approved the recommendation unanimously on the condition that there are no objections on the part of either the Bureau of Public Roads or the County Court of Marion County.

The Chief Counsel brought up for discussion the matter of vacating a portion of Railroad Avenue and a portion of Porter Street, lying on the east

side of the Oregon Coast Highway in the City of North Bend, pursuant to agreement with the Weyerhaeuser Timber Company dated January 31, 1948. He presented a form of "Consent to Vacate" portions of said streets, and advised that it conforms with legal requirements and the provisions of the agreement with the Weyerhaeuser Timber Company. He also presented a letter from the Weyerhaeuser Timber Company stating its willingness to waive access to the Oregon Coast Highway at any point along the vacated section. He recommended approval and execution of the form consenting to the vacation proceedings. The Commission approved the recommendation unanimously. (The "Consent to Vacate" form was signed by the Commission later in the session.)

A letter was presented from the Astoria Central Labor Council requesting the speedy improvement of US30 between Rainier and Astoria. This communication was discussed briefly, but action thereon was deferred until the following day when a delegation was scheduled to appear before the Commission concerning the subject. (See ahead for additional paragraph.)

A petition was presented from 69 residents of the Rasmussen Village Apartments situate at 4950 Southwest Barbur Boulevard, Portland, requesting the Commission to install a traffic light on Barbur Boulevard (Pacific Highway West) at the entrance to their apartments. The Engineer advised that studies have been made by both city and state traffic engineers, as to the need of signals at this point, which investigations indicate that a signal is not practical and that the interference and danger to traffic using Barbur Boulevard would more than outweigh the benefits that would accrue to the residents of Rasmussen Apartments were the signal installed. He admitted that the people residing in these apartments do have a problem, nevertheless, he recommended that the request be denied for reasons stated. The Commission expressed the desire for additional information, and referred the matter back to the Engineer to make further investigations to determine what, if anything, can be done to alleviate the existing hazard of lefthand vehicular movements and pedestrians crossing this busy highway.

The Commission considered, approved and signed the following letter, directed to Mr. T. M. Davis, District Engineer, Bureau of Public Roads, requesting the designation of a short section of the Oregon Coast Highway immediately north of Coquille as a "spur" to Federal Aid Road No. 2:

December 16, 1949

Mr. T. M. Davis, District Engineer,
Department of Commerce, Bureau of Public Roads
Post Office Box 3900
Portland 8, Oregon

Dear Sir:

In order that there may be a more direct primary federal aid connection between Primary Federal Aid Road No. 14 and the portion of Primary Federal Aid Road No. 2 which is north of Coquille, the Highway Commission requests the addition to the Federal Aid Primary System of

a section of road beginning at a point on Federal Aid Road No. 2 about 13.85 miles south of Coos Bay and extending southeasterly to a point on Federal Aid Road No. 14 in the City of Coquille.

The gross length of this section of road is 3.67 miles. Of this total, 0.24 mile is within the corporate limits of Coquille, a city having a population of 3,327 (1940 census). The average daily traffic on the road is 2,800.

With the understanding that it is the wish of the Bureau of Public Roads to consider this additional section of road a "spur" of Federal Aid Road No. 2, the following revised description is suggested for Federal Aid Road No. 2:

> From the Oregon-California State line southeast of Brookings via Port Orford, North Bend, Reedsport, Newport and Tillamook to a connection with Federal Aid Road No. 1 in Astoria; including a spur beginning at a point about 13.85 miles south of Coos Bay and extending to a connection with Federal Aid Road No. 14 in Coquille.

A map showing the location of the proposed additional road is submitted herewith.

Very truly yours,

OREGON STATE HIGHWAY COMMISSION

The Right of Way Engineer reported on the cost to acquire right of way needed in connection with the construction of the Klamath Falls overpass section of the Klamath Falls-Lakeview Highway on South Sixth Street, Klamath Falls. He estimated the total cost involved at $157,214.61. He advised that options have been obtained from two of the principal owners, viz: Weyerhaeuser Timber Company, at $81,406.86; and Big Lakes Box Company, at $35,000. These two options, he said, expire in thirty days, so if the Commission wants the property it will have to exercise the options within that period. The State Highway Engineer recommended purchase of these two properties because they are vital to the proposed highway improvement. He pointed out that if they are not purchased now the probabilities are that they will be developed and then will cost the state considerably more. He suggested purchase of the right of way now with no obligation whatsoever as to construction of the project. The Commission deferred a decision pending discussion of the matter with a delegation scheduled to be present on the following day. (Mr. Alfred E. Collier, Klamath Falls, appeared on the following day concerning this matter. Following his departure the Commission voted unanimously to close the options with the Weyerhaeuser Timber Company and the Big Lakes Box Company at the amounts stated therein, and authorized negotiations to acquire the balance of the right of way needed for this project. See ahead for additional paragraph.)

The Engineer reported the results of recent investigations with respect to the request of Mr. and Mrs. J. H. Balzhiser, Eugene, for permission to open up the concrete curb at three locations near the intersection of Walnut Street with Franklin Boulevard (US99) in Eugene. He recalled that this matter was first discussed by the Commission at its meeting on November 7 and 8, when Mr. Balzhiser was present, and that the Commission at that time deferred action pending further investigation. Such investigation has been made, he said, and a plan developed which he believed would solve the problem and would involve not more than one curb cut, if any. He exhibited a map showing the plan, and explained the details. He also said that the City of Eugene is still negotiating with Mr. and Mrs. Balzhiser to acquire their property as an addition to the city's recreational area, in view of which he suggested that the Commission again defer action on the matter pending the results of those negotiations. The Commission approved this suggestion.

The Chief Counsel reported a request from Mr. Clifford Knodell, Albany, to purchase a small parcel of state-owned property on the west side of US99E just north of the overcrossing in Albany. This, the state's one-half portion of Lafayette Street, was vacated a number of years ago when the highway improvement in Albany was concluded. Mr. Knodell, he said, is constructing a building on his property for use by the Secretary of State, but he needs the state's property, 33 feet wide by 227 feet long, in connection therewith, and has offered to pay $300 for it. The Commission deferred a decision in the matter pending inspection of the property by the Chief Counsel and the Engineer, to determine whether or not it is of value for state highway purposes, and if not, how much the state should receive for the property.

The meeting adjourned at 5:00 p.m. to reconvene at 9:00 a.m. the following morning in the same room.

Portland, Oregon
December 20, 1949

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben. R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Ass't State Highway Engineer
W. W. Stiffler, 2nd Ass't State Highway Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction were opened and read aloud by the Secretary, following which Chairman Banfield announced that the awards of contracts would be made at 3:30 p.m. in the same room.

BENTON COUNTY

Kings Valley-Read Creek Section of the Kings Valley Secondary Highway. Federal Project No. S-38(3). 5.70 miles of surfacing and bituminous macadam. Requires approximately 27,400 cu. yds. crushed rock; 124 tons RT-4 tar; and either 440 tons 121-150 asphalt or 536 tons RT-9 tar.

A delegation representing the Baker County Chamber of Commerce, and consisting of Donald J. Donahue, Manager; P. T. Fortner, Chairman, Highway Committee; and Ed Mason, Chairman, Merchants' Committee, apneared before the Commission regarding the following:

1. Oiling the 16-mile section of the Baker-Unity Highway recently constructed over Dooley Mountain, and improvement of this highway between Dooley Mountain and Baker.

2. Construction of an access road to a proposed Hells Canyon Dam on the Snake River.

3. Improvement of the Haines-Anthony Secondary Highway leading to Anthony Lakes recreational area.

4. Improvement of the Old Oregon Trail at the Union Pacific Railroad undercrossing near the City of Durkee, and provision for more adequate approaches to the Union Pacific overcrossing near Oxman.

5. Improvement of the Ochoco Highway west from the Town of Mitchell.

Mr. Fortner presented the pricipal argument in behalf of their projects, supporting a brief previously filed with the Commission. He also presented a letter from the Baker County Court endorsing the projects. He urged the oiling of the Dooley Mountain Section as Baker County's first choice of projects, although he said that the section between Dooley Mountain and Baker also needs improvement. Concerning the access road to the proposed Hells Canyon Dam, Mr. Fortner declared that it is their considered opinion that unless an access road on the Oregon side of the Snake River is provided, the major portion of economic advantage during construction of the dam, and the major portion of revenue from tourist travel after the dam is completed would accrue to the State of Idaho rather than to the State of Oregon. He urged that everything possible be done to assure that the access road to the dam be provided on the Oregon side of the river.

Mr. Fortner urged the improvement of the Haines-Anthony Secondary Highway from the standpoint that it serves one of Baker County's richest areas. He said that it is the main access road from the south to the Anthony Lakes recreational area, and is of sufficient importance to warrant early improvement. The present road in the Anthony Lakes District, he added, is very poor, being extremely rough and dusty during the summer months, and virtually impassable during the winter and spring months. Mr. Fortner also stressed the importance of modernizing the Old Oregon Trail through Baker County, particularly at the undercrossing near the town of Durkee and the overcrossing at Oxman siding.

Concerning the Ochoco Highway west of Mitchell, Mr. Fortner stated that while this project is not located within the borders of Baker County, it is of extreme importance to the people of that county because it will afford them quicker access to Portland via the Warm Springs Highway. Mr. Mason also spoke briefly in behalf of these projects, particularly for the oiling of the Dooley Mountain Section. The delegation was informed that the Highway Commission does not have funds available to finance at one time all the projects they have mentioned; but the Commission realizes the need for the oiling of the Dooley Mountain project and will do the best that it can. It is the feeling of the Commission that no commitments or promises should be made in advance.

A delegation representing the Corvallis City Council, and including James O. Convill, City Manager; Victor L. Goodnight, City Engineer; and Messrs. Glenn W. Holcomb and S. W. McHugh, Councilmen, was present. Mr. Convill headed the group. He said that they would like to have information on two subjects: first, the proposed underpass and new highway connection on US99W just north of Corvallis; and second, traffic signal installations in Corvallis. Regarding the first subject, Mr. Convill stated that the city wishes to know when it can reasonably expect this work to be undertaken. Regarding the second subject, he said that the city will have funds available in July, 1950 to pay its share of the cost of signal installations. He was informed by Chairman Banfield that the right of way for the first-mentioned project was acquired by the Commission as protection for future construction of the project; that no provision has been made in the 1950-51 program for this work and the Commission is not in position at the present time to make any definite statements as to what it will do in the future. The Commission recognizes the need for the improvement, however, and will give the case consideration as funds become available. Concerning the signal installations, Chairman Banfield advised that the Commission has, as yet, had no report or recommendation from the Engineer regarding

such project, but should the Commission approve the project it undoubtedly would be on the basis of the city sharing expenses equally with the state. The Engineer was instructed to investigate the signal request. Mr. Convill then mentioned that the city is constructing a new sewer system which will affect the drainage of the proposed highway connection north of the city. He asked that the State Highway Engineer be authorized to consult with the city regarding this feature. The Commission approved the request and instructed the Engineer to investigate the matter and report his findings at the next meeting.

A delegation representing the Chambers of Commerce of the cities of John Day and Prineville appeared before the Commission regarding the improvement of the eleven-mile section of the Ochoco Highway immediately west of the town of Mitchell. The delegation consisted of Messrs. I. B. Hazeltine, Secretary, John Dav Chamber of Commerce; Fred Lemke, President, Grant County Stockmen's Association, John Day; and A. R. Bowman, Prineville, formerly County Judge of Crook County. This group urged the Commission to provide for the immediate construction of the eleven-mile section of the Ochoco Highway west of Mitchell so as to provide a connection with the forest highway project now underway over the Ochoco Summit. All three members of the delegation spoke in behalf of the improvement. Mr. Hazeltine filed with the Commission a brief in support of their request, and gave as their feeling that this improvement is in the nature of an emergency because the present road is in very bad condition and at times practically impassable. Chairman Banfield advised that the improvement is estimated to cost $804,000, which the Commission does not have available at the present time. The discussion then reverted to the question of what can be done to improve the existing road. Mr. Hazeltine suggested a dust palliative. The Engineer advised that the present highway is being maintained in about as good condition as any highway of that type can be maintained. He pointed out that it is an old county road and that the base is not sufficiently stable to warrant construction thereon of a standard oil surface. It would be possible, he said, to provide a light oil treatment as a dust palliative, but not to provide permanent construction, and the Bureau of Public Roads will not cooperate on that type of work. As a result of this discussion, the Commission instructed the Engineer to make investigations to determine the maximum benefit that can be derived from a minimum expenditure along this section. Mr. Bowman then inquired whether or not it would be feasible to finance this project in a manner similar to the procedure that was used in financing the construction of the Warm Springs Highway through Warm Springs Agency, which involved a temporary transfer of funds. He also requested early replacement of an existing covered bridge over Bridge Creek on this highway, between Jones Ranch and Mitchell. He declared this bridge is a bottleneck for heavy truck-hauling and should be eliminated. The Commission referred the matter to the Engineer for investigation and report.

Mr. Bruce Ambler, Engineer for the Port of Newport, headed a delegation which included Mr. R. E. Hickson, Chief Engineer, U. S. Engineer's office; and Mr. O. L. Hoffman, District Real Estate Officer of the U. S. Engineer's office, which requested permission for the Army Engineers to open up the concrete sidewalk rail on the Oregon Coast Highway at Depoe Bay and to construct a roadway from this opening to the point at the mouth of the bay. Mr. Ambler advised that the federal government plans shortly to call for bids for a

$400,000 improvement at this place, but its agreement with the Port of Newport provides that the Port must furnish right of way to provide access to the improvement, which means that the sidewalk railing will have to be opened up about 400 feet north of the bridge, and a roadway constructed across state park property at this point. It will also be necessary to deposit on state property on the south side of the bay certain spoils from this improvement, up to a level with the highway. Following discussion, during which the State Highway Engineer stated that he has no objections to permitting the government to use the state's property as intended, and the Chief Counsel advised that the state's interests will not be jeopardized, the Commission by unanimous vote authorized the granting of a permit to the Port of Newport as requested, said permit to be in writing.

The following persons constituted a delegation which appeared before the Commission regarding the truck-hauling of logs on the upper Columbia River Highway from M. P. 35.63 near Dodson, to the Cascade Locks Lumber Company mill at M. P. 48.47, approximately two miles east of the town of Cascade Locks: Hon. R. H. Nichols, Mayor, Cascade Locks; Ray L. Mallicott, Vice President, Cascade Locks Port; Walter James, timber owner; W. I. Embree, representing Cascade Building Supply; August Uehlinger, representing Cascade Locks Lumber Company; Fred Dallos, former Manager, Cascade Lumber Company, Portland; Frank L. Clark and Thomas F. Riggle, representing Riggle and Clark Logging Company; and C. N. Amoth, C. J. Mathews and E. L. Howard, all of Cascade Locks; Dale Nickell, Forest Grove, and C. H. Godley, Troutdale, representing Nickell Logging Company; J. A. Bucher, timber owner and Otto Spicuzza, timber and motel owner, both of Bonneville; and F. H. Torp, Attorney, Portland, representing the law firm of Hart, Spencer, McCulloch, Rockwood and Davies, attorneys for the City of Cascade Locks and the Cascade Locks Lumber Company.

Mr. Torp headed the group. He stated that they wish to present to the Commission a statement of the economic impact and effect that the prohibition of log hauling on this section of highway will have on the people of the Cascade Locks district. He called upon Mayor Nichols to present their arguments that the Commission rescind its recent action and allow the truck-hauling of logs to the mill of the Cascade Locks Lumber Company. He spoke from the economic standpoint in the interests of the men working in the mill, and the benefits that the Town of Cascade Locks will receive if log hauling is permitted. In the discussion of this matter, the Engineer recalled that the Commission at its previous meeting authorized the truck-hauling of logs on this section of highway up to December 15, 1949, because of its general rule not to allow log hauling on the upper Columbia River Highway, portions of which are quite crooked. He gave as his opinion that the hauling of logs over the section presently under discussion would not be objectionable if properly restricted, and provided the operators will comply strictly with the requirements. As a result of this discussion the Commission unanimously approved the granting of permits for the truck-hauling of logs over this section of highway until the date of its next regular meeting, which is scheduled for February 6 and 7, 1950, and ordered that new permits be issued in conformity therewith. The Engineer was instructed to study the matter and report to the Commission at such meeting the restrictions which he considers should be included in the permits if the Commission approves granting permits on a continuous basis after that time. Mr. Torp filed with the Commission letters from the Cascade Locks Lumber Company, port of Cascade Locks and the City of Cascade Locks in support of their case.

Mr. Alfred E. Collier, Klamath Falls, was present and urged the Commission to acquire right of way that is necessary for the widening of the Klamath Falls-Lakeview Highway on south Sixth Street, Klamath Falls, where this highway passes over the railroad tracks of the Southern Pacific Company and property owned by the Big Lakes Box Company and the Weyerhaeuser Timber Company, so the right of way will be available to the Commission when it is ready to proceed with the widening of the present highway at this location. He said that options have been secured from the Weyerhaeuser Timber Company to purchase its property at $81,406.86, and the Big Lakes Box Company property is under option at $35,000, both amounts being considerably less than the amounts these companies originally demanded for their property, and considerably less than the amount for which they can be purchased at any time in the future. He gave as his considered opinion that the prices are reasonable and that the Highway Commission should take advantage of the options, which he said expire in thirty days. Chairman Banfield advised that because of lack of funds it is impossible for the Commission to construct in the near future the project for which this right of way is required, and should the Commission close the options it would be with the strict understanding on the part of the people of Klamath Falls that construction would be absolutely dormant for several years, and if the Commission buys the property it would only be on the basis of protecting the state for the future. Commissioners Chandler and Reynolds endorsed Chairman Banfield's statements. Mr. Collier advised that he is certain that the people of Klamath Falls appreciate the Commission's position and will approve the purchase of the right of way on such basis. The Commission took the matter under advisement until later in the session. (Discussion of this matter was resumed by the Commission on the following day at which time the Commission voted unanimously to close the options secured on both of these properties and authorized the Right of Way Department to negotiate options for the remaining right of way required for this project.)

The meeting recessed at 12:00 noon and reconvened at 2:00 p.m. with the same persons present and participating.

Messrs. James R. Shick, City Attorney, and M. O. Gardner, City Manager, Forest Grove, were present and inquired as to the action, if any, the Commission may have taken on the city's previous request for state assistance in the relief of traffic congestion on the Tualatin Valley Highway in their business district. They were informed by Chairman Banfield that the Commission has had a report from the Engineer on this subject and that it is the feeling of the Commission that the project is merited, but the Commission is not in position at the present time to obligate the state's share of the expense. Mr. Shick inquired whether or not the state would proceed with the work if the city would agree to cooperate to a greater extent than merely furnishing necessary right of way. He was informed that the Commission cannot answer that question now, but will bear it in mind in future deliberations on the subject, and will consider this improvement, should underruns develop in connection with other contract work. No definite promise or commitment regarding it, however, can be made at the present time.

A delegation composed of representatives of The Oregon Farm Bureau Federation, the Jefferson County Farm Bureau, and the Jefferson County Court, was present and urged the Commission to authorize removal of cinders from the

cinder pit on Round Butte in The Cove Palisades State Park for use by local people in this vicinity in construction of driveways and roads. The group was headed by Mr. Marshall Swearingen, Executive Vice President of the Oregon Farm Bureau Federation, Salem, and included the following: Hon. T. A. Powers, County Judge of Jefferson County; Melvin Tingle, Past President, Jefferson County Farm Bureau; W. T. "Bill" Summers, Floyd Glass and Albert Zemke, also representing the Jefferson County Farm Bureau. Mr. Swearingen stated that his federation is interested in helping out county farm bureaus that have problems, and in this particular instance the farmers of Jefferson County, who have extremely high taxes and poor local roads, would be greatly benefited if they were allowed to obtain cinders from the state's quarry on Round Butte for their private purposes. He said that he is opposed to the commercialization of the deposit and that a guarantee would be given that the material would not be used for commercial purposes. He said that he is simply asking for this privilege so that farmers can build their driveways and the county court can improve its county roads. He suggested that permits be issued for the removal of cinders for these purposes and gave as his feeling that not a great amount of material would be taken. Judge Powers declared that the taking of cinders would not interfere in any way with the adjacent scenery or the park in general, and if they had thought the park would be impaired they would not have made the request. He alleged that the supply of cinders in this particular pit is inexhaustible and stated that he is mainly interested in securing them for road improvements in the nearby vicinity. Chairman Banfield advised that the Commission had this matter under discussion on the previous day, at which time it was pointed out that the federal government imposed certain restrictions when it turned this property over to state control, and one of those restrictions is that the Highway Commission shall not permit removal of cinders from the area. He further advised that from information at hand one federal agency is strongly opposed to the removal of the cinders while another has no objection thereto, in view of which the Commission referred the matter to the State Parks Superintendent to ascertain definitely whether or not they still object to the removal of the cinders from this site, for county road construction. The Highway Commission, he added, is opposed to the indiscriminate removal of materials from its material sites, as a general proposition, for private gain, and is not inclined to deviate from that policy in the present instance, although the Commission is not opposed to the county's taking a limited amount of materials for the improvement of county roads. Were the Highway Commission to authorize private individuals to remove cinders from this pit, he said, it would establish an undesirable precedent that would react adversely, and probably embarrass the Commission in passing on requests for similar privileges throughout the state. He concluded the conference by again stating that the first thing to ascertain is the attitude of the two federal agencies with respect to the matter. Mr. Swearingen filed with the Commission a short brief in support of the oral request.

The following people composed a delegation from the City of Warrenton, which urged the Commission to obtain options for right of way needed for a proposed relocation of the Oregon Coast Highway across Youngs Bay, following somewhat the route of the S. P. & S. Railroad between Smith Point (Astoria) and Glenwood, bypassing the City of Warrenton: E. R. Baldwin, City Manager; Dr. Kenneth Grant, President, Chamber of Commerce; Thomas T. Chave, City Attorney; Dr. Noel B. Rawls, City Commissioner, and R. T. Carruthers, President, Bioproducts, Oregon Ltd. Mr. Baldwin headed the group. He recalled the city's former appearance

before the Highway Commission on the same matter when the Commission ordered investigation of the route, but later dismissed the project from consideration. He urged that the matter be reconsidered at an early date, and that the Commission authorize the securing of options for necessary right of way, which, he said, can be obtained much cheaper now than later on when industrial development takes place. He offered assistance from the city in securing the options and advised that they feel that the right of way should be acquired now, notwithstanding that construction may not be undertaken for ten years. He particularly pointed out that Clatsop County owns considerable property on this location and the county has received many requests to purchase the same, which should be an incentive to the state to proceed with the acquisition of the right of way. Chairman Banfield advised that this project is one for the future, not the present, but the Engineer will be requested to bring his previous report up to date and the Commission will take action when the report has been rendered and analyzed. The Engineer was thereupon instructed to recheck his original report on the subject and report his findings.

The Commission discussed with the Engineer the bids received at the morning session, for highway construction, and at 3:30 p.m. Chairman Banfield publicly announced the Commission's decision with respect to each project, as follows, the Commission's action in each instance being by unanimous vote:

"Surfacing and construction of bituminous macadam on the Kings Valley-Read Creek Section of the Kings Valley Secondary Highway, Benton County. The Commission received eight bids for this work, the low one being that of J. R. Taggart & Co., Salem, at $94,914 based on the use of asphalt. The Commission has awarded the contract to this company at its bid price.

"Lincoln County Line-Alsea Mountain Rock Production Project on the Alsea Highway. F. O. Laws, Myrtle Point, Oregon, submitted the low bid for this work at $34,320. There was one higher bid. The Commission has awarded the contract to Mr. Laws at his bid price.

"Whiskey Creek-East Forest Boundary Rock Production Project on the Klamath Falls-Lakeview Highway in Klamath and Lake Counties. Walter Berndt Construction Co. and Austin B. McCoy, Vancouver, submitted the low bid for this work at $50,050. There were four higher bids. The contract has been awarded to Walter Berndt Construction Company and Austin B. McCoy, low bidders, at their bid price.

"Forest Boundary-Silver Lake Rock Production Project on the Fremont Highway in Lake and Klamath Counties. Eleven bids were submitted for this work, the low one being that of Inter-City Sand and Gravel Co., Eugene, at $17,780. The contract has been awarded to this company at its bid price.

"Surfacing and oiling the Noti-Elmira Section of the Richardson-Eugene Secondary Highway, Lane County. Acme Construction Co., Eugene, submitted the low bid for this work at $73,955 based on the use of asphalt, and $76,471 based on the use of tar. There were five higher bids. The Commission has awarded the contract to the low bidder, Acme Construction Co., at its bid price, using asphalt.

"Construction of a bridge over the Coast Fork, Willamette River, on the Willamette Highway, Lane County. Hamilton & Thoms, Eugene, submitted the low bid for this work at $150,000. There were ten higher bids. The contract has been awarded to Hamilton & Thoms at their bid price.

"Grading and paving the Pumping Plant Hill-Ontario Section of the Old Oregon Trail, Malheur County. The Commission received twenty bids for this work, the low one being that of C. E. Leseberg, Nyssa, Oregon, at $198,187.50. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, C. E. Leseberg, at his bid price when certain conditions have been satisfied.

"Redecking the Sandy River Bridge on the Columbia River Highway, (old route) near Troutdale, Multnomah County. R. & M. Construction Co., Central Point, submitted the low bid for this work at $16,825. There were twelve higher bids. The Commission has awarded the contract to the low bidder, R. & M. Construction Company, at its bid price.

Grading, surfacing and oiling the Scott Canyon Section of the Scott Canyon County Road in Sherman County. The Commission received twenty-one bids for this work, that of George E. Corliss, Ontario, being low at $75,467. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Mr. George E. Corliss, when certain conditions have been satisfied."

A delegation representing "Save the Myrtle Wood, Inc.", Portland, was present and offered to deed to the State of Oregon three myrtle wood tracts which the Association owns in Coos County. This delegation was headed by Mr. Thornton I. Munger, President, and included Alfred Greenwalt, Vice President; Mrs. Walter Wilheim, member of the Board; O. C. Roehr; and Marshall Dana of the Oregon Journal, Portland. Due to press of business, Mr. Dana was unable to remain throughout the conference, but he submitted his views in writing later, and requested that they be incorporated in this record.

Mr. Munger advised that the Association has acquired four myrtle tree tracts, three of which they feel should be in public ownership as an assurance that they will be preserved for the benefit and enjoyment of future generations. Two of these tracts, he said, are directly on the state highway system, one being on the Coos River Secondary Highway just north of the Town of Allegany, and the other on the Powers Secondary Highway. The third, he said, is on the Old Coos Bay Wagon Road near a place known as Sitkum. He explained that their organization is of a temporary nature; that it is not equipped to manage properties of this kind, and that the conditions under which the tracts were acquired are in the nature of a trust which contemplates conversion of the properties to public ownership. The Association feels, he said, that the State Parks Department, which is under the jurisdiction of the State Highway Commission, is the proper public agency to administer these tracts and it is for that reason that they are now being offered to the state. He added that they are not asking for the development of the area, but simply that ownership of the tracts be in the State of Oregon. Also speaking in be-

half of this project were Messrs. Greenwalt and Roehr. Chairman Banfield outlined the position of the Highway Commission by stating that the Commission feels that it has done about all it should do toward preservation of myrtle trees by establishing the myrtle tree lane on the Coos Bay-Roseburg Highway, and that it should not spend the funds that have been provided by motorists, to acquire and develop additional myrtle tree tracts or other park areas in general as is desired and requested by certain factions. He complimented the group for acquiring the tracts under discussion, but gave as his feeling that the purpose for which they were acquired is now satisfied, namely the preservation of the myrtle trees. He also mentioned that acceptance of the three tracts has not been recommended by the State Parks Superintendent under whose supervision they would be maintained if they came into state ownership. He pointed out that the upkeep of the areas would involve considerable expenditure of state funds which are not readily available for such purposes, as the Commission interprets the law which authorizes the Highway Commission to acquire and develop parks. He expressed the feeling that the Commission probably would ask the Legislature for advice as to how far the Commission should go in the acquisition and development of parks and recreational areas, because it is the feeling of the Commission that the attention it is giving to such matters may be in excess of what the Legislature had in mind when it authorized the expenditure of state highway funds for such purposes. Commissioners Chandler and Reynolds endorsed the statements of Chairman Banfield. Mr. Munger then asked the Commission not to definitely turn down their offer at this time, but to take the matter under advisement. This the Commission agreed to do.

(The following is a brief outline of Mr. Dana's attitude with respect to this matter as subsequently expressed in writing.)

The donor of one of the three myrtle wood tracts obtained by the Association is Mrs. C. S. Jackson, who explained that her gift was made out of the desire that the unique myrtle wood species be preserved and enjoyed by the public, and whose gift was made with the understanding that responsible administration would be given to prevent cutting, not only of the myrtle wood, but of other species contained on the tract presented by her. Mr. Dana also advised that the deed from Mrs. Jackson directs that the tract be maintained in perpetuity as a park, open to the public under reasonable rules and regulations for the purposes of education, scientific study and recreation, and that it be conveyed within fifteen years to an agency of the State of Oregon, or of the United States, for park purposes and uses, and that if an attempt is made to sell the property, or the myrtle trees growing thereon, the probabilities are that injunction proceedings would be filed to stop such sales.

A delegation representing the lower Columbia River Highway Association, appeared before the Commission in the interests of the improvement of the lower Columbia River Highway between Rainier and Astoria. The group was headed by Mr. Fred L. Andrus of the Astorian Budget, Astoria, Secretary of the Association, and included the following: Myron E. Jones, County Commissioner, Clatsop County; J. W. Hunt, County Judge, Columbia County; and Fred W. Hermans, Attorney, Rainier. Mr. Andrus stressed orally their request for an economic analysis of the Rainier-Astoria Section, as previously requested in a letter dated December 15, 1949, to determine the

benefits that would accrue and the ratio of benefits to the cost of construction. He also read aloud and presented a letter from the Astoria Chamber of Commerce to the Oregon State Highway Commission, dated December 15, 1949, in which the Chamber of Commerce supports the request of the Lower Columbia River Highway Association for such economic analysis. Others speaking in behalf of such analysis and for the improvement of this section of highway were Judge Hunt and Mr. Myron E. Jones. Chairman Banfield advised that the Highway Commission in its deliberations is not overlooking the lower Columbia River Highway, but it is simply a question of funds that might be available to improve it, and the location where those funds could be expended to the best advantage, and for the greatest benefit to the general public. He further stated that the Commission undoubtedly would authorize a survey of that entire area this coming year, and would then make up its mind as to what can be done in the future with regard to improvement of this road. As a result of the discussion, the Commission unanimously authorized the Engineer to make a reconnaisance and economic survey of the lower fifty mile section of this highway at an estimated cost of $10,000.

A delegation was present from the City of Springfield with regard to the routing of McKenzie Highway traffic through this town. Included in the delegation were Fred R. Cheatham, City Manager; W. S. Fort, member of the City Planning Commission; B. P. Larsen, Mayor; John W. Boeshars; Arthur C. McChesney; Ralph Nicholas and Fred Bouk, Councilmen; Guy Wright and A. M. Knapp, representing the Chamber of Commerce, and D. R. Offley, financier. Mr. Cheatham headed the group and introduced Mr. Fort who made an urgent plea for the adoption of a one-way street plan for McKenzie Highway traffic through their town, using Main Street, present route of the highway, as a one-way street for westbound traffic, and South "A" Street as a one-way street for eastbound traffic. He exhibited maps and presented statistical data in support of the South "A" Street route, and urged adoption of such route as being in the best interests and to the greatest benefit and advantage of the people of the City of Springfield, and of the general public as a whole, notwithstanding, as he explained it, that the State Highway Engineer has recommended that westbound traffic be routed over North "A" Street, and that the present highway on Main Street be limited to eastbound traffic.

Mr. Jerome F. Bischoff, Attorney, Portland, was present, stating that he represented Mr. W. H. Gonyea, owner of the Clear Fir Products Company, Springfield, which is opposed to the adoption of the South "A" Street route as recommended by the city. He said that Mr. Gonyea had expected to be present personally, but was erroneously informed that the proponents of the South "A" Street route would not make a presentation to the Commission at this meeting, but in view of the fact that the plans were changed and the delegation present, Mr. Gonyea would like to have the opportunity of expressing his views to the Commission before it takes final action in the case.

The delegation was informed that the Commission will give very careful consideration to all the factors involved, including that of financing the project, before it makes its final decision, and whatever action is taken will be what the Commission feels is in the best interests of all concerned.

The Engineer reported a request from the Western Veneers Company to transport a steam boiler weighing 47,000 pounds and measuring 15 feet, 9 inches in diameter, over state highways from Portland to Lebanon. He stated that this

movement could safely be made on US99E between Portland and Albany, but not from Albany to Lebanon without hazard and without maintaining one-way traffic; however, he believed that he could devise a set of rules and requirements which, if strictly and conscientiously complied with, would guarantee the movement with a minimum amount of inconvenience and hazard to other traffic. As a result of discussion, the Commission instructed the Engineer to analyze the difficulties that would have to be met and to prescribe rules and regulations to off-set them. He was authorized to grant the permit on the basis of his findings.

The Engineer brought up for discussion his previous request for authority to conduct surveys for new projects which are estimated to cost between $20,000,000 and $25,000,000. He submitted a list of the projects under consideration for such program and estimated the cost of the surveys at $407,000. He said that he has five survey crews operating and that during the first eleven months of 1949 the expenditure for surveys was $625,000. He pointed out that unless additional survey projects are authorized the field crews will be out of work by June, 1950. He suggested that if the Commission cannot see its way clear to approve surveys for all of the projects listed, it authorize five of the surveys, so as to expedite preparation of plans for the projects when the Commission is ready to proceed with construction, and to insure that the survey crews are kept busy. As a result of a lengthy discussion of this matter, the Commission unanimously authorized the Engineer to conduct five surveys, as follows, it being understood that he will use his present crews for this purpose and will not engage additional crews. The Engineer was also instructed to render an up-to-date report to the Commission on the status of surveys for the 1950-51 program.

Highway and Section	Length in Miles	Est. Construction Cost	Estimated Survey Cost
Pacific Highway:			
Chenoweth Park-Roseburg			
M.P. 179.4 - M.P. 198.4	19.0	$ 2,000,000	$ 35,000
Oregon Coast:			
M.P. 225 - M.P. 234	9.0	1,100,000	18,000
M.P. 244 - M.P. 250.5	6.5	800,000	13,000
Newport-Corvallis Highway:			
Newport-Toledo	8.0	1,000,000	20,000
Baker-Unity Highway			
Baker-Salisbury	8.0	265,000	15,000
West Side Pacific Highway:			
So. Yamhill River-Amity	3.4	200,000	7,000
Tigard-Rex Hill Gaps			
M.P. 10.33 - 13.72) M.P. 15.44 - 17.42)	5.37	1,000,000	10,000
		$ 6,365,000	$ 118,000

The meeting adjourned at 4:40 p.m. to reconvene at 1:30 p.m. on the following day for consideration of the Highway Department budget for the calendar year 1950.

Portland, Oregon
December 21, 1949

The meeting of the State Highway Commission reconvened at 1:30 p.m. in the Streamline Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben. R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Ass't State Highway Engineer
W. W. Stiffler, 2nd Ass't State Highway Engineer
J. M. Devers, Chief Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Chief Accountant
C. H. Armstrong, Parks Engineer
H. B. Glaisyer, Secretary

Consideration was given by the Commission to the adoption of a State Highway Department budget for the calendar year 1950, particular attention being given to a proposed budget prepared by the State Highway Engineer covering the following items:

EXHIBIT "A"	Capital Outlays
EXHIBIT "B"	Maintenance Budget
EXHIBIT "C"	Operations Budget
EXHIBIT "D"	Miscellaneous Operational Items
EXHIBIT "E"	Contract Rock Production

The general items making up the several exhibits are as follows: (See footnotes for changes.) (For details making up the general items see copy of complete budget in Commission's files.)

EXHIBIT "A"

CAPITAL OUTLAYS

(Under supervision of Maintenance Department)

	Budget Amount
Minor Betterment	$ 750,000
Improvement of Roadways in Parks	60,000
Improvements at Picnic Areas	20,000

EXHIBIT "A", CAPITAL OUTLAYS (Cont.)

		Budget Amount
Improvements at Maintenance Stations		$ 250,000
Improvements at Miscellaneous Properties		
Quarries, Stockpile Sites and Sand Bunkers		19,000
Equipment shops		22,000
Radio System		25,000
Truck Scales		9,000
Equipment Purchases		1,182,000
Sales and Depreciation Credits:		
a. Astoria Ferry	Cr.	30,000
b. Other equipment	Cr.	600,000

EXHIBIT "B"

MAINTENANCE BUDGET

		Budget Amount
1.	Special Maintenance	$ 550,000
2.	General Maintenance - Primary	7,580,000
3.	General Maintenance - Secondary	2,300,000
4.	County Road Signs	25,000
5.	District Superintendents	257,000
6.	Radio System	33,000
7.	Maintenance Station and Scales Upkeep	110,000
8.	Truck Load Inspection	183,000
9.	Reserve for Contingencies	100,000
	Total	$ 11,138,000

December 21, 1949

EXHIBIT "C"

OPERATIONS BUDGET
(Maintenance Department)

	Budget Amount
Leases and upkeep expense at stockpile sites, quarries, etc.	$ 8,000
Operation - Park roadways and parking areas	20,000
Operation - Roadside picnic areas	8,000
Astoria-Megler Ferry:	
Operation charges	250,000
Operation revenues	215,000
Drawbridges and other ferries	150,000

EXHIBIT "D"

MISCELLANEOUS OPERATIONAL ITEMS

	Budget Amount	
Administration and General Supervision:		
a. Engineering Division	$ 827,000	
b. Legal Division	138,000	
c. Accounting Division	192,000	
d. Parks Division	80,000	
e. Secretary to Commission	52,000	
Total		$ 1,289,000
Traffic and Planning Survey:		
a. Traffic Engineering	86,500	
b. Planning Survey	187,500	
Total		274,000
Travel Information Department		250,000
Research and Special Investigation		15,000
Contributions to Retirement Fund		445,000
Interim Committee Expense		15,000
Miscellaneous General Expense		92,000
Total		$ 2,380,000

December 21, 1949

EXHIBIT "B"

CONTRACT ROCK PRODUCTION

	Budget Amount	
Division 1.	$ 27,500	
Division 2.	117,500	
Division 3.	245,000	
Division 4.	399,500	
Division 5.	430,500	
Total		$ 1,220,000

In connection with the proposed budget the Engineer submitted details with respect to the individual items in each Exhibit. These were analyzed by the Commission very carefully and as a result thereof the Commission unanimously approved the budget as proposed by the Engineer, subject to the following changes and alterations:

EXHIBIT "A"

CAPITAL OUTLAYS

In the discussion of the items making up the details of this Exhibit, it was pointed out that no provision has been made in the item "Improvements at Maintenance Stations" for additions to the office and shop buildings at the La Grande Division Headquarters. The Engineer advised that additional space is needed and he estimated the cost to provide it at $35,000 for the office building and $40,000 for the shop building, totaling $75,000. The Commission approved the expenditure and authorized increasing the budget in such amount, this increase to be financed from the Minor Betterment Reserve, decreasing such reserve to $25,255.

Concerning equipment purchases, the Engineer pointed out that the budget contains a total of $1,182,000 for this purpose, of which it is estimated that the amount needed for the first quarter of 1950 will be $693,245, including an amount of $25,655 for office furniture and equipment. The Commission deferred action on the amount budgeted for office furniture and equipment until its next meeting when the Engineer is to report further details with respect thereto. The Commission unanimously approved an expenditure of $667,590 for purchase of equipment needed in the first quarter of 1950.

In the discussion of equipment purchases, the question arose whether or not it would be better to rent crawler type shovels rather than purchase them outright. The Engineer stated that he would endeavor to rent such equipment and, if possible todo so, will try it out and ascertain whether or not satisfactory results could be obtained by renting.

With respect to "Improvements at Maintenance Stations", the Commission's approval was in principle only. The Engineer was instructed to submit for the Commission's approval the plans and cost estimate for each individual project before such project is advertised for bids.

EXHIBIT "B"

MAINTENANCE BUDGET

The total expenditure proposed by the Engineer for maintenance was $11,138,000. The Commission ordered this amount reduced to $10,138,000, a reduction of $1,000,000 which the Engineer was instructed to carry in a reserve account so that it will be available later on if necessary. He was instructed to render to the Commission at its meeting in June, 1950, a status report on maintenance expenditures up to that time. He was also instructed to revise this Exhibit by deleting the two columns in the Exhibit as presently prepared showing the expenditures made for this purpose during 1948 and 1949, and by substituting therefor a new column showing where reductions have been effected to make up the $1,000,000 reduction ordered by the Commission. Concerning the Special Maintenance item, for which an amount of $550,000 has been provided in the budget, the Engineer requested authority to contract the work rather than to do it with state forces. The Commission approved the request.

EXHIBIT "C"

OPERATIONS BUDGET

The Commission unanimously approved this budget without alteration, as proposed by the Engineer.

EXHIBIT "D"

MISCELLANEOUS OPERATIONAL ITEMS

The Commission unanimously approved the budget as proposed by the Engineer, without alterations.

In the discussion of this item, the question arose as to the purchase of insurance coverage for state highway property over and above the amount of the insurance ($500,000) that is made available to all state departments under the State Restoration Fund Account. Commissioner Reynolds volunteered to discuss with the State Board of Control the matter of purchasing such excess coverage.

EXHIBIT "E"

CONTRACT ROCK PRODUCTION

The Commission unanimously approved the detailed items making up this budget as proposed by the Engineer.

Mr. C. H. Armstrong, State Parks Engineer, submitted a budget for the State Parks Department for 1950, totaling $677,000, itemized as follows:

Capital Outlays		
Surveys for parks	$ 16,000	
Purchase of real property	100,000	
Construction and betterment of buildings	165,000	
Sub-total		$ 281,000
Operation of Parks		
Administration and general supervision	80,000	
Park Operation	316,000	
		396,000
Total		$ 677,000

In the discussion of this matter it was explained that the amount of the budget as originally prepared was $764,400, but because of the fact that some of the items had already been approved in the budget prepared by the State Highway Engineer, it was necessary to delete these particular items, which reduced the total budget amount to $677,000. It was also explained that the amounts originally set up for administration and general supervision, and for park operation, were $79,500 and $316,500, but these were changed to $80,000 and $316,000 respectively in the final budget. The Commission unanimously approved the budget as revised.

The Commission also approved employment of a District Supervisor for District No. 4 with headquarters in Bend, provision for which is included in the park budget as submitted and approved.

The Commission had under discussion the matter of extending the employment of the following persons whose services, according to the State Retirement Act, must be dispensed with on January 1, 1950: S. H. Boardman, State Parks Superintendent; Clifford L. Gardiner, Right of Way Agent; and

William J. Minkiewitz, Right of Way Clerk. The Chief Counsel expressed his approval of these men being retained on the Highway Department payroll through the year 1950 if that can be arranged, in order that they may complete important work on which they are engaged. It was the feeling of the Commission that the legislature in enacting the retirement law acted in accordance with the wishes of state employees, and that, accordingly, the services of employees in general should be dispensed with when they have reached retirement age, although if an employee is doing a particular kind of work that requires his retention beyond his retirement date, then, if requested in writing by the State Highway Engineer or the Chief Counsel, as the case may be, the Commission will intercede with the State Retirement Board in such employe's behalf. As a result of due consideration of the three employees mentioned above, the Commission voted unanimously to retain their services for a period of six months, or until July 1, 1950, subject to approval by the State Retirement Board. Chairman Banfield stated his willingness to intercede in their behalf before the State Board of Retirement if the Chief Counsel and the Engineer will direct letters to him requesting such consideration, giving reasons therefor.

The Commission again discussed the matter of acquiring right of way for the proposed improvement of the Klamath Falls-Lakeview Highway on South Sixth Street, Klamath Falls, particularly where this highway crosses over the railroad tracks of the Southern Pacific Company, and the properties of the Weyerhaeuser Timber Company and the Big Lakes Box Company. It was the feeling of the Commission that the right of way for this proposed improvement should be acquired now before developments occur and while it can be obtained at minimum expense, so that it will be available when the Commission is ready to construct the project, provided there is no alternate highway location, and provided further that the people of Klamath Falls understand strictly that the Commission is making no commitment or promise whatsoever as to when it will construct the project. The Engineer advised that he knows of no other location that would satisfy the requirements, and no way to avoid this expense. He pointed out that the existing bridge on this route is in bad condition; that traffic over the bridge is now about 10,000 vehicles daily, which will increase, as the City of Klamath Falls is growing rapidly. Motion was made by Commissioner Chandler that the Commission exercise on such basis the options heretofore taken on the properties of the Weyerhaeuser Timber Company and the Big Lakes Box Company at $81,406.86 and $35,000 respectively, and that the Right of Way Department be authorized to negotiate options for the balance of the right of way required for this proposed improvement on the same basis. The motion was seconded by Commissioner Reynolds and carried by the unanimous vote of the Commission.

The Chief Counsel brought up for discussion matters pertaining to the controversy with the Southern Pacific Company regarding the construction of a spur railroad track across the Oregon Coast Highway at grade, near the Town of Gardner. He recalled that the original plan of the railroad company was to construct its spur track across the highway at grade, but an alternate plan was presented which involved construction of the railroad under a highway trestle and a location on Bolon Island, eliminating the grade crossing on this important highway. It appears now, he said, that the railroad company has made further studies and has stated a preference for the original location with

a grade separation structure where the tracks cross over the highway, involving extra expense of about $90,000, a portion of which the company wishes the state to assume. He recommended that the Highway Commission approve the expenditure of state highway funds to pay a portion of this cost. The State Highway Engineer concurred in the recommendation and suggested a contribution of $30,000 of state highway funds for this purpose. After careful consideration of this matter, the Commission unanimously approved the recommendation and authorized the Chief Counsel to file a supplemental petition for rehearing and reconsideration of this matter by the Public Utilities Commissioner, and to offer not to exceed $30,000 participation by the state.

The Engineer presented a request from the Bureau of Public Roads that the State Highway Department perform winter maintenance on the following forest highway sections, at government expense:

1. Forest Highway Route No. 42, Warm Springs Forest Highway, during the period November 21, 1949, to May 31, 1950, maximum reimbursable amount, $5,000.

2. Forest Highway Route No. 21, Willamette Forest Highway, during the period November 21, 1949 to June 15, 1950, maximum reimbursable expenditure, $10,000.

The Engineer recommended approval of the request. The Commission approved the recommendation unanimously. (Agreements covering both projects were executed by the Commission later in the session.)

The Engineer also brought up for discussion the allocation of $3,000,000 of Forest Highway Funds for the fiscal year 1950-51. As a result of discussion, the Commission unanimously selected the following projects for the funds available and authorized Chairman Banfield to recommend such projects to the Bureau of Public Roads and the U. S. Forest Service when a conference with representatives of those two agencies is held in the near future. The Engineer was instructed to arrange such conference:

Ochoco Highway	Marks Creek-East Forest Boundary, 18 miles surfacing and oiling	$ 400,000
Alsea Highway	9 miles surfacing	300,000
Pendleton-John Day	Beech Creek Section, 6 miles grading and surfacing	350,000
John Day-Burns	Poison Creek Section 4 miles grading, 12 miles surfacing and oiling	400,000
N. Umpqua Highway		325,000
N. Santiam Highway	Breitenbush River-East	425,000

Pacific Highway	Canyonville-South		
	Federal funds	$800,000)	
	State funds (Saving	)	
	from $816,000)	* 136,000)	1,011,000
	State funds	)	
	(Additional)	* 75,000)	
		Total	$ 3,211,000

* The allocation of $136,000 and $75,000 of state funds for the Canyonville South Project is contingent on an amount of $800,000 of Forest Highway Funds being made available on the Canyonville Section of the Pacific Highway.

The Chief Counsel brought to the Commission's attention a proposed agreement with the City of Springfield covering construction of a drainage pipeline extending northerly from Main Street (McKenzie Highway) in the City of Springfield, a distance of about 1500 feet. He explained that presently the highway is drained by an open ditch which is located within the residential section of the city where it presents an unsightly appearance and adversely affects private property to such an extent that the property owners want a pipeline installed to carry the water, and the ditch filled in. The City of Springfield, he said, has agreed to furnish all right of way necessary, to provide all necessary surveys and engineering data, and to be responsible for the maintenance and upkeep of the drain so that free flow of water will not be impaired or retarded at any time. Furthermore, the city will furnish all necessary pipe and other material needed to accomplish the work. The state's obligation, he said, is simply to install the pipe in the open ditch and to backfill the same. The Engineer estimated the cost of the state's share of the work at about $4000 and recommended approval of the project, which he said is needed to properly maintain the highway, regardless of the proposed highway improvement in this town. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously. (The agreement was executed by the Commission later.)

The Chief Counsel also reported the status of a proposed agreement with the U. S. Army Engineers concerning reconstruction of the Columbia River Highway to facilitate construction of McNary Dam. He recalled that this project involves the construction of several railroad grade separation structures, and at the previous meeting, when the Commission had under consideration the signing of an agreement covering the project, the question arose whether or not the state would be given a guaranty that it would not be charged with any of the expense of such grade elimination structures. The Chief Counsel advised that up to the present time he has received no such guaranty, either from the federal authorities or the railroad company, although he has received word from the railroad company that it cannot make such a statement. The Commission took no action.

The Commission considered, approved and signed agreements, etc. as follows:

Agreement cancelling lease on Telford property, Boring.

Quarry lease with Mr. and Mrs. Fisher, covering Lane County property.

Deed Conveying stockpile site on Umatilla-Hermiston Section of Old Oregon Trail to Umatilla County.

Agreement with Mountain State Power Company covering construction of a bridge on the Santiam Highway.

Agreement with Malheur County covering abandonment of a portion of the Nyssa-Adrian Secondary Highway No. 45.

Agreement with Pacific Power and Light Company covering furnishing of electrical power for the illumination of the Arch Cape Tunnel.

Agreement with Portland General Electric Company covering lease of state-owned property at Aloha for use as electric transformer station. (Authorized September 19, 1949.)

Agreement with Sherman County covering maintenance of the Scott Canyon Section of Federal Aid Secondary Highway 313 (Scott Canyon County Road) after constructed by the state. (Authorized May 18, 1949, in Second Post War Program.)

Consent to vacation of portions of Railroad Avenue and Porter Street, lying east of Oregon Coast Highway in North Bend.

Letter directed to T. M. Davis, District Engineer, Bureau of Public Roads re adding "spur" to Federal Aid Highway No. 2, north of Coquille.

Memorandum of Cooperative Agreement covering the winter maintenance of Oregon Forest Highway Project 42-A1, for the period November 21, 1949, to May 31, 1950, inclusive.

Memorandum of Cooperative Agreement covering the winter maintenance of Oregon Forest Highway Project 21-E5, G3, H4, I4, J5, K5, L2, for the period November 21, 1949, to June 15, 1950, inclusive.

Bargain and Sale Deed conveying unto Jerry R. and Carla I. Laisure, husband and wife, an old quarry on the Eddyville-Blodgett Section of the Corvallis-Newport Highway.

Agreement with City of Springfield providing for installation of drainage pipe in an open drainage ditch in Springfield.

The meeting adjourned at 5:00 p.m.

EXHIBIT "A"

Minutes of December 19 and 20, 1949

R E S O L U T I O N

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement, hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

SULLIVAN GULCH SECTION, SULLIVAN GULCH HIGHWAY- UNIT #2

15797- Robertson, Alice
Right of Way (Witt)
Option expires May 28, 1950

1,075 sq.ft. at 36¢ sq.ft.	$ 387.50	
Allowance - apple tree	35.00	
Amount to be paid owner		$ 422.50
Amount chargeable to Right of Way		422.50

Access not controlled.

SULLIVAN GULCH SECTION, SULLIVAN GULCH HIGHWAY- UNIT #3

14740- Goetze, William C. and Margareta Goetze
Right of Way (Mayhew)
Option expires June 6, 1950

4,025 sq.ft. at 15¢ sq.ft. (takes all)	603.75	
Amount to be paid owner		603.75
Amount chargeable to Right of Way		603.75

Access controlled.

(Cont.)

SULLIVAN GULCH SECTION, SULLIVAN GULCH HIGHWAY- UNIT #3 (Cont.)

14741- Gootze, Margaret Bahnsen (Mayhew)
Right of Way
Option expires June 6, 1950

2,520 sq.ft. at 15¢ sq.ft. (takes all)	$ 378.00	
Allowance- 7-room house	5,012.54	
Amount to be paid owner		$ 5,390.54
Amount chargeable to Right of Way		5,390.54

Access controlled.

SULLIVAN GULCH SECTION, SULLIVAN GULCH HIGHWAY- UNIT #5

15019- Yungberg, Fred G. and Doris A. Yungberg (Mayhew)
Right of Way
Option expires June 11, 1950

1.87 acres at $2,000.00	3,740.00	
Allowance- to avoid taking small house and good new horse barn	1,260.00	
Amount to be paid owner		5,000.00
Amount chargeable to Right of Way		5,000.00

Access controlled

NORTHEAST UNION AVENUE SECTION, PACIFIC HIGHWAY

14795-A Richmond, Lena G. (Boone)
Right of Way
Have Permit

Approximately 4,000 sq.ft. for slope	350.00	
Amount to be paid owner		350.00
Amount chargeable to Right of Way		350.00

DENVER AVENUE SECTION, PACIFIC HIGHWAY WEST

15073- U. S. Public Housing Administration (Mayhew)
Right of Way
Have executed deeds

23.217 acres	00.00	
Amount to be paid owner		00.00
Amount chargeable to Right of Way		00.00

(Cont.)

DENVER AVENUE SECTION, PACIFIC HIGHWAY WEST (Cont.)

15073- U. S. Public Housing Administration (Cont.)

STATE to: Construct and maintain underpass under Denver Avenue (completed)
Construct and maintain roads and approaches to Vanport site

Access not controlled.

INTERSECTION 82nd AVENUE AND POWELL BOULEVARD SECTION- MT. HOOD HIGHWAY

15657- Oregon Realty and Dora R. Jordan
Right of Way (Mayhew)
Option expires May 7, 1950

399 sq.ft. at $1.25 sq.ft. (plus)	$ 500.00	
Allowance- to lessee for removing and replacing 3 fuel storage tanks, electric flood light, concrete pavement, & general damages to service station or auto court, including shortening width service lane	1,500.00	
Amount to be paid owner and lessee		2,000.00
Amount chargeable to Right of Way		2,000.00

Access not controlled.

VISTA AVENUE-MULTNOMAH COUNTY LINE SECTION, SUNSET HIGHWAY

14191- Smith, Henry G. and Clara E. Smith
Right of Way (Witt)
Option expires May 2, 1950

1,745 sq.ft. at 4¢ plus per sq. ft.	75.00	
Amount to be paid owner		75.00
Amount chargeable to Right of Way		75.00

Access controlled

DODSON-BONNEVILLE SECTION, COLUMBIA RIVER HIGHWAY

15011- Ellesson, Gunnard C. and Mary E. Ellesson
Right of Way (Boone)
Option expires May 17, 1950
(CORRECTION)

9,583 sq.ft. at 4¢ sq.ft.	383.32

(Cont.)

DODSON-BONNEVILLE SECTION, COLUMBIA RIVER HIGHWAY (Cont.)

15011- Ellesson, Bunnard C. and Mary E. Ellesson (Cont.)

Allowance- moving small building (completed)	$ 25.00	
damages- reducing area, taking trees, scenic point of access, etc. (access point changed)	604.17	
Amount to be paid owner		$ 1,012.49
Amount chargeable to Right of Way		1,012.49

Access controlled.

Previous report: On September 19, 1949, Commission approved above acquisition, allowing damages in the amount of $104.17. $500.00 additional is being given inasmuch as access points will be approx. one-half mile from present ones which were directly in front of property.

VIENTO-HOOD RIVER SECTION, COLUMBIA RIVER HIGHWAY

15846- Brown, Gordon G. and Ray T. Yasui
Right of Way (Benson)
Option expires May 24, 1950

0.08 acre at $1,000.00 (takes all)	80.00	
Amount to be paid owner		80.00
Amount chargeable to Right of Way		80.00

Access controlled

15316- Kvavle, Anna
Right of Way (Benson)
Option expires May 16, 1950

92.5 acres at $40.00 (takes all)	3,700.00	
Amount to be paid owner		3,700.00
Amount chargeable to Right of Way		3,700.00

Access controlled

NEHALEM SECTION, OREGON COAST HIGHWAY

800-A - Hunt, Verna Tubbesing and Donald E. Hunt
Stock pile lease (McChesney)
Lease expires November 15, 1951

2-year ground lease on 0.202 acre at $10 yr.	20.00	
Amount to be paid owner		20.00
Amount chargeable to stock pile		20.00

McMINNVILLE-THREE MILE LANE SECTION, SECONDARY HIGHWAY #152

13121- Caldwell, R. M. (Benson)
Right of Way
Option expires April 11, 1950

0.155 acre at $1,000.00	$ 155.00	
Allowance- 6 walnut trees at $75 each	450.00	
- rose bushes, shrubbery, lawn, sidewalk, fruit trees **	126.00	
- 15 rods fence	45.00	
- moving garage	350.00	
- damages- taking the lawn and front yard, etc.	874.00	
Access not controlled		
Amount to be paid owner		$ 2,000.00
Amount chargeable to Right of Way		2,000.00
STATE to: Replace tile in highway ditch between Engr.Sta.45+20 & 47+60, and fill as it now is (Estimated)	480.00	
Amount chargeable to Construction		480.00
GRAND TOTAL (Estimated)		2,480.00

** Experimental prune trees on above land shall not be disturbed during lifetime of owner.

ALBANY-LEBANON SECTION, SANTIAM HIGHWAY

15762- Alley, Hester C. (Boone)
Right of Way easement
No option taken

0.069 acre- easement for detour road (temp.)	25.00	
Amount to be paid owner		25.00
Amount chargeable to Right of Way		25.00

15763- Mountain States Power Company (Boone)

FOOTNOTE: **

Re Item No. 15754, covering acquisition of permanent drainage ditch easement from W. L. Crissey and Millie B. Crissey: The Commission unanimously approved this item subject to the condition that the provisions and the easement are approved by the Chief Counsel.

EXHIBIT "B"

Minutes of December 19 and 20, 1949

R E S O L U T I O N

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, as amended, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1949 for street purposes as provided in said law, the several sums of amounts set opposite the names of the respective cities or towns:

Jordan Valley	$ 1,221.78
Mount Vernon	1,993.19
Wasco	1,351.09

AND WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and/or towns hereby are approved.

2. That the action taken respectively by said cities and/or towns as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

3. That upon entry of this resolution in the minutes and records of the Commission, the Secretary shall thereafter mail to the proper officer in each of said cities and/or towns a duly certified copy of the resolution or resolutions adopted by the city, together with a copy of the resolution approving the plans submitted by the city.

4. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 19th day of December, 1949.

EXHIBIT "C"

Minutes of December 19 and 20, 1949

R E S O L U T I O N

WHEREAS, pursuant to the provisions of Chapter 425, Oregon Laws 1947, as amended by Chapter 149, Oregon Laws 1949, there have been by the Oregon State Highway Commission apportioned from revenues accruing during the first six month period of 1949 to the cities and/or towns hereinafter named for disbursement for street purposes as provided in said law, the amounts set opposite the names of the respective cities or towns:

Minutes of December 19 and 20, 1949

RESOLUTION

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of said contracts, and that said jobs are now ready for acceptance:

Contract No. 3011 with Shoreline Construction Co. for furnishing crushed materials in stockpiles on the Brush Creek-Hunter Creek Section of the Oregon Coast Highway in Curry County, completed October 20, 1949.

Contract No. 3012 with Shoreline Construction Co. for furnishing crushed materials in stockpiles on the Hunter Creek-California State Line Section of the Oregon Coast Highway in Curry County, completed July 20, 1949.

Contract No. 3046 with E. C. Hall for bituminous macadam surfacing on the Salt Creek-Odell Butte Section of the Willamette Highway in Lane and Klamath Counties, completed September 9, 1949.

Contract No. 3049 with Don L. Cooney, Inc., for constructing Mill Creek Bridge on the Warm Springs Highway in Wasco County, completed November 18, 1949.

Contract No. 3052 with Warren Northwest, Inc., for grading and paving on the West Slope-Beaverton Section of the Tualatin Valley Highway in Washington County, completed October 29, 1949.

Contract No. 3058 with Del R. Beebe Construction Co. for grading and paving on the Coaledo-Chrome Plant Section of the Oregon Coast Highway in Coos County, completed October 29, 1949.

Contract No. 3060 with J. C. Compton Co. for surfacing and oiling on the Smallwood Creek-Benton Co. Line Section of the Alsea Highway in Lincoln County, completed July 18, 1949.

Contract No. 3083 with Coast Construction Co. for roadside improvement on the Barnes Road-Multnomah County Line Section of the Sunset Highway in Washington County, completed November 15, 1949.

Contract No. 3099 with Vernie Jarl for grading, surfacing and oiling on the Cow Canyon Section of The Dalles-California Highway in Wasco County, completed August 20, 1949.

Contract No. 3106 with Homer G. Johnson for grading, surfacing and oiling on the Sheeley Bridge-Sunset Camp Section of the Upper Nehalem County Road in Columbia and Washington Counties, completed November 15, 1949.

(Cont.)

EXHIBIT "D" (Cont.)

Contract No. 3109 with Spada Bros. for roadside improvement on the Steiwer Hill-Albany Section of the Pacific Highway in Linn and Marion Counties, completed November 30, 1949.

Contract No. 3114 with C. T. Malcolm for grading and paving on the Troutdale Section of the Columbia River Highway in Multnomah County, completed August 27, 1949.

Contract No. 3122 with Gilbert Roberts for constructing Deadwood Maintenance Station buildings in Lane County, completed October 22, 1949.

Contract No. 3147 with Barney B. Helser for furnishing crushed material in stockpiles on the Oregon City-Molalla-Estacada Section of the Cascade and Woodburn-Estacada Secondary Highways in Clackamas County, completed September 29, 1949.

Contract No. 3150 with E. A. Shannon for constructing Roseburg Division Office Building in Douglas County, completed November 8, 1949.

Contract No. 3151 with Mill Electric Co. for installing the Elkton Tunnel lighting system on the Umpqua Highway in Douglas County, completed November 18, 1949.

Contract No. 3159 with Burkhard and Shortgen for constructing the Chiloquin Maintenance Building in Klamath County, completed November 16, 1949.

Contract No. 3181 with Geo. Berry for constructing two culverts and one bridge on the Central Oregon Highway in Malheur County, completed November 3, 1949.

Contract No. 3183 with Werner & Jeske, Inc., for constructing the South Fork Ash Creek Bridge on the Monmouth-Independence Highway in Polk County, completed December 8, 1949.

Contract No. 3186 with Loyd Calkins & Co. for grading and sectional culvert on the Mail Creek Section of the Sunset Highway in Clatsop County, completed November 10, 1949.

Contract No. 3193 with Leonard & Slate, Oregon Ltd., for grading on the Forest Boundary-Jones Section of the Ochoco Highway in Wheeler County, completed November 4, 1949.

Contract No. 3203 with R. & M. Construction Co. for constructing the Tunnel Creek Culvert on the North Santiam Highway in Marion County, completed October 26, 1949.

Contract No. 3204 with Western Golf Course Supply Co. for landscaping on the Front Avenue (Ash St.-Alder St.) Section of the Pacific Highway West in Multnomah County, completed November 28, 1949.

(Cont.)

EXHIBIT "D" (Cont.)

Contract No. 3210 with Erwin E. Batterman for constructing the Dallas Maintenance building in Polk County, completed November 7, 1949.

Contract No. 3211 with M. C. Lininger & Sons for surfacing, oiling and rock production on the Provolt-Jacksonville Section of the Medford-Provolt Secondary Highway in Jackson County, completed November 30, 1949.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

EXHIBIT "E"

Minutes of December 19 and 20, 1949

RESOLUTION

WHEREAS, the Highway Commission on the 28th day of June, 1949, adopted a resolution, the purpose of which was to conform with the provisions of Chapter 450, Oregon Laws 1949; and

WHEREAS, by said resolution the Commission classified state highways under the jurisdiction of the Commission into two groups; namely Group I and Group II, and as a part of said resolution the Commission attached as Exhibit "A" all of the highways designated as Group I Highways, and attached to said resolution Exhibit "B" in which were enumerated all of the highways designated as Group II Highways; and

WHEREAS, since the adoption of said resolution the Warm Springs Highway No. 53, which begins at the junction with the Wapinitia Highway No. 44 and ends at the junction of said highway with The Dalles-California Highway No. 4 at a point near Madras, has been by the State of Oregon and the Public Roads Administration reconstructed and is, therefore, subject to the conditions hereinafter expressed, qualified for classification as a Group I Highway; and

WHEREAS, it is the opinion and judgment of the Commission that said highway, subject to the conditions and restrictions hereinafter set forth, should be classified as a Group I Highway within the meaning and purpose of Chapter 450, Oregon Laws 1949.

NOW, THEREFORE, based on the foregoing statements and recitals, it hereby is resolved by the Commission, all members being present and affirmatively voting, as follows:

1. That the Warm Springs Highway, otherwise known as State Highway No. 53, which highway begins at its junction with the Wapinitia Highway No. 44 and ends with its junction with The Dalles-California Highway No. 4 near Madras, hereby is selected and designated as a Group I Highway and is, therefore, added to the Group I Highways designated and provided for in said resolution dated June 28, 1949. Provided, however, that with respect to the section of said highway which begins with its junction with Highway No. 44 at M.P. 0.00 and ends with M. P. 13.3 near the Warm Springs River, no permits shall be issued prior to July 15, 1950, authorizing the movement over said section of said highway of vehicle and load or vehicles and loads having a gross weight in excess of 54,000 pounds; and provided further that said restriction as to time may be shortened or extended by the Commission upon representation

(Cont.)

by the Division Engineer of the Bureau of Public Roads with respect to the condition and qualification of said section of said highway.

2. This resolution shall be entered in the minutes and records of the Commission as of the 19th day of December, 1949

EXHIBIT "F"

Minutes of December 19 and 20, 1949

R E S O L U T I O N

WHEREAS, the roads or highways hereinafter named have been designated and declared to be, and are state highways, and have been improved and are being maintained by the State Highway Commission pursuant to the laws of the State of Oregon, as state highways; and

WHEREAS, on each of the said state highways there are located certain bridge structures, which bridges, in the judgment of the State Highway Commission, are incapable of safely carrying the traffic to which they are being subjected, and in order to protect said bridge structures against damage and injury, and in order to safeguard traffic over said bridge structures, it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said bridge structures and of the traffic which uses the said bridge structures that the maximum weight now permitted and authorized by law be reduced; and

WHEREAS, the State Highway Engineer has caused investigations to be made and has determined and found from such investigations and has recommended to the State Highway Commission, that the maximum gross load that can be safely permitted upon any single span of said structures at any time is thirty-six (36) tons; and

WHEREAS, based upon the investigations and determinations and recommendations of the State Highway Engineer, it is the judgment of this Commission that the maximum gross load which shall be permitted upon any single span of any of said structures at any time shall be reduced and fixed as in this order provided;

NOW THEREFORE, the premises being in part as above stated, and the State Highway Commission having as a result of due investigation found that the bridge structures above referred to are incapable of safely sustaining or supporting a total gross load in excess of thirty-six (36) tons;

IT IS HEREBY ORDERED that the total gross weight of combined load and vehicle which at any one time shall be permitted upon any single or individual span of any of the said bridge structures shall not exceed thirty-six (36) tons. In computing the total weight of any single vehicle, the total gross weight of any trailer or trailers attached to said vehicle shall be considered as a component part of the total gross load and shall not be considered as a separate vehicle.

The bridge structures to which this order applies, and the highways on which they are located are described as follows, to wit:

Nehalem State Secondary Highway, No. 102:

1. Bridge No. 3145 (Nehalem River), located at M.P. 56.60
2 Bridge No. 3146 (Nehalem River), located at M.P. 58.41

(Cont.)

EXHIBIT "F" (Cont.)

Wallowa Lake Primary State Highway, No. 10:

3. Bridge No. 4821 (Grand Ronde River), located at M.P. 2.64
4. Bridge No. 4872 (Lostine River), located at M.P. 55.00

IT IS FURTHER ORDERED that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 115-394 O.C.L.A. shall be in full force and effect from the 19th day of December, 1949, until rescinded, modified or revoked by order of the State Highway Commission.

AND IT IS FURTHER ORDERED that a notice be posted in a conspicuous manner and place at each end of each of the above-named bridge structures so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions of the traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED that a certified copy of this order be furnished to the County Clerk of each County in which said bridge structures are located, and that a certified copy of said order be furnished the Superintendent of the Department of State Police for his information.

Dated this 19th day of December, 1949.

EXHIBIT "G"

Minutes of December 19 and 20, 1949

R E S O L U T I O N

WHEREAS, the Alsea Highway, otherwise known as State Highway No. 27 and Oregon Route No. 34, has been designated and declared to be, and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway; and

WHEREAS, a portion of said state highway now is under construction as a Forest Highway Project under the supervision of the Federal Bureau of Public Roads and is being subjected to a kind and character of traffic which is damaging and injuring said highway, and it is the judgment of the Division Engineer of the Federal Bureau of Public Roads that it will be for the best interests of said highway that the maximum weights permitted and authorized by law be reduced pending completion of said construction work; and

WHEREAS, the State Highway Engineer has caused an investigation to be made and has determined and found from such investigation, and has recommended to the State Highway Commission, that the maximum gross load that can be safely permitted upon said road during said construction period should not exceed fifty (50) percent of the maximum weights permitted and authorized by law; and

WHEREAS, based upon the investigation, determination and recommendation of the said State Highway Engineer, it is the judgment of this Commission that for the best interests of said highway the maximum gross load which shall be permitted upon said road during said period of construction shall be reduced so as to conform to the requirements fixed in this order.

NOW THEREFORE, the premises being in part as above stated and the Commission being of the opinion that the said section of highway is not capable of withstanding the maximum weights permitted and authorized by law;

IT IS HEREBY ORDERED that the maximum weight of combined load and vehicle which shall be permitted upon the Alsea Highway between M.P. 14.63 and M.P. 18.53 shall be as follows: The maximum combined weight bearing on the surface of the highway at contact with the tread on all of the wheels of a vehicle or combination of vehicles shall not exceed thirty-six thousand (36,000) pounds; and, the maximum combined weight bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles shall not exceed eight thousand (8,000) pounds.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Sec. 115-394. O.C.L.A., shall be in full force and effect from December 10, 1949, until modified, annulled or voided by the order of the State Highway Commission.

(Cont.)

EXHIBIT "G" (Cont.)

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-described highway section and at important crossroads on said highway, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of each county affected by this order, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this 19th day of December, 1949.

EXHIBIT "H"

Minutes of December 19 and 20, 1949

R E S O L U T I O N

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Hood River Secondary Highway No. 281 known as the Collins Creek Section in Hood River County, the northerly terminus of which is at highway engineer's station 72+89.8 of the reconstructed line and the southerly terminus of which is at highway engineer's station 55+55.4 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway a portion or unit of the right of way of the highway, as formerly located, has been eliminated from the boundaries of the new location, which eliminated section or area is no longer needed for state highway purposes; and

WHEREAS, the contract for the construction of this relocated section of the Hood River Secondary Highway was completed on July 7, 1949, and highway traffic is now routed over said section; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the area and section of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the section or area of the old right of way which lies between highway engineer's station 62+00 and highway engineer's station 68+35 of the reconstructed highway, which section is otherwise shown and identified colored in brown on said Exhibit "A" hereby is abandoned as any part of the right of way of the said state secondary highway. The Commission hereby surrenders all jurisdiction over said abandoned section and hereby consents that jurisdiction over said abandoned section and title thereto may revert to the abutting land owner or pursuant to appropriate order made and entered by the county court in its records, such abandoned section of right of way may be held by the county for such public use as the court may deem to be in public interest.

2. The area shown colored in green on said Exhibit "A" includes right of way acquired for the location and construction of the said highway. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said Exhibit "A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners.

(Cont.)

EXHIBIT "H" (Cont.)

3. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the county court of Hood River County a duly certified copy thereof, and said county court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned section of the said old right of way shown colored in brown on the map attached hereto and marked Exhibit "A", and shall assume jurisdiction thereover, or permit it to revert to the owners of the abutting property, as the county court may determine.

FOOTNOTE:

The map mentioned (Exhibit "A") in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 212, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

EXHIBIT "I"

Minutes of December 19 and 20, 1949

RESOLUTION

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Warm Springs

Highway number: 53 Route number:

	Location of Termini	Established Speed
M.P. 31.7	to M.P. 32.5 (through Warm Springs Agency)	45 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

Portland, Oregon
February 6, 1950

The State Highway Commission convened in regular session at 9:00 a.m. in the Green Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Ben. R. Chandler, Commissioner
Chas. H. Reynolds, Commissioner
R. H. Baldock, State Highway Engineer
W. C. Williams, 1st Ass't. State Highway Engineer
W. W. Stiffler, 2nd Ass't. State Highway Engineer
J. M. Devers, Chief Counsel
C. W. Enfield, Assistant Counsel
Forrest Cooper, Right of Way Engineer
Malcolm H. Hawke, Chief Accountant
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction were opened and read aloud by the Secretary in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

COOS COUNTY

Spruce Street (Myrtle Point) Bridge Section, Federal Project No.S-46(1). Construct reinforced concrete and steel bridge, 561 feet in length, over South Fork Coquille River, and 0.19 mile roadway approaches thereto on Coquille-Myrtle Point County Road. Involves following approximate quantities: 17,000 cu. yds. general excavation; 2,750 cu. yds. rock slope protection; 1,600 cu. yds. selected roadbed topping; 300 cu. yds. 1½" - 0" material in leveling course; 360 cu. yds. structural excavation; furnish 2,000 lin. ft. untreated piling; 2,800 lin. ft. treated piling; 460 lin. ft. steel H piling, drive only 120 piles; 910 cu. yds. concrete; 173,000 lbs. metal reinforcing; 184,000 lbs. structural steel; 35 M-FBM untreated lumber and 8 M-FBM treated lumber.

Barney B. Helser, Molalla *	34,524.00

*Bidder will accept only two projects

February 6, 1950

The Commission by unanimous vote approved the minutes of the meetings of the Commission held on December 5, 1949, and on December 19, 20 and 21, 1949.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported, as follows, on state parks matters:

1. Proposal to establish a new federal agency to be known as the U. S. Government Conservation Corps: The Parks Superintendent reported receipt of a communication to the effect that a Bill is to be introduced in Congress by Senator James E. Murray, Montana, which provides for the establishment of a conservation corps, patterned after the recent Civilian Conservation Corps, and that support is requested from the Oregon State Highway Commission. He gave as his feeling that the establishment of camps under authority of such a Bill, if it passes, would be very beneficial to the activities of the Parks Department. The Commission took no action in the matter.

2. Parks Betterment Budget for 1950: The Parks Superintendent requested definite approval of specific projects making up his Betterment Budget for the calendar year 1950, so the proposed developments can be started without delay. He submitted an itemized list of the betterment work to be performed. The Commission approved the list unanimously. (For details see list attached to Parks Budget file, giving type, form and cost of the developments.)

3. Acquisition of three myrtle groves in Coos County: The Parks Superintendent recalled that the Commission at the previous meeting indicated a reluctance to accept the offer of "Save the Myrtle Wood, Inc." to present to the state as a gift these three myrtle wood tracts. He suggested reconsideration of the matter because of the conditions under which the tracts were acquired by that Association, and because the State Parks Department is the only agency that is eligible to maintain the tracts. He recommended acceptance of the tracts with no commitment whatsoever as to their development, and advised that it would not be necessary to increase the personnel of his Department to maintain them. Following discussion, the Commission agreed to accept the tracts from the Association on the condition that the Association will agree not to solicit additional tracts under the assumption that the state will maintain and develop them. The matter is to be covered by a written agreement between the Association and the Commission and was referred to the State Parks Superintendent for further handling.

4. Question of extending the employment of Mr. W. A. Langille, Parks Department: The Parks Superintendent advised that Mr. Langille has reached retirement age and his services will be dispensed with unless the Commission sees fit to extend the period of his employment. He said that Mr. Langille is engaged in certain work of a historical nature, and that it is quite necessary that his services be retained until this work is completed. He recommended that Mr. Langille be retained on the payroll for 600 hours during 1950. The Engineer concurred in the recommendation. The Commission approved the recommendation unanimously.

5. Removal of cinders from Round Butte in the Cove Palisades State Park, Jefferson County: The Parks Superintendent advised that he has taken up with the federal agencies concerned, the matter of permitting cinders to be removed from this area, and they are reluctant to permit such operation, alleging that there are three additional cinder cones available in that vicinity which they believe will serve the purpose. In the discussion of this matter, the Chief Counsel advised that a portion of this park consisting of 40 acres was acquired from Jefferson County by deed, which contains no restrictions as to the use of the property, and if this tract contains cinders suitable for the purposes intended by local people, the Commission could grant these people privileges as it desires, without interference from the federal authorities. It appears that the boundaries of this tract have never been outlined, and that would have to be done before the area could be definitely determined. It was the feeling of the Commission that inasmuch as the county deeded the tract to the state, some arrangement should be made so that it could secure cinders from the tract for road building purposes. As a result of discussion, the Commission deferred a definite decision in the matter pending investigation by the Engineer as to the possibilities of the three cones mentioned by the federal agency.

6. Requests for concession privileges during the smelt run in the Sandy River: The Parks Superintendent reported requests for the privilege of conducting concessions on state property at this location, and recommended that they be denied, except that the State Fish Commission be permitted to sell fishing licenses on the property as was done during the 1949 season. The Commission approved the recommendation.
